(b) *Equity contributors.* Equity contributors without this demonstrated fishing industry ability and experience may be allowed to own a portion, not to exceed 49 percent, of the vessel or facility for which guaranteed financing is sought only if:

(1) At least 51 percent of the vessel or facility is owned by persons who do possess the requisite fishing industry ability and experience, and such persons have made a full pro-rata equity contribution, are severally 100 percent liable for the debt obligation, and are responsible for the management and operation of the Project; and

(2) The vessel or facility being financed is so large and so expensive as to be beyond the normal equity funding capability of an owner with the requisite fishing industry ability and experience.

(c) *Limitation of liability.* In no event will equity contributors be permitted to limit their liability to the amount of their original equity contribution. Each equity contributor shall, additionally, be jointly and severally liable for *at least* the amount of the guaranteed debt obligation which corresponds to the percentage of such equity contributor's ownership interest in the vessel or facility. This limitation of liability provision shall apply to all equity contributors in closely-held corporations, partnerships, and joint ventures.

§ 255.8 Economic soundness.

(a) *Income and expense projections.* Conservative income and expense projections must reasonably assure adequate net earnings from operation of the vessel or facility. This projection must allow the prospective accumulation of net retained earnings sufficient to provide for operational contingencies, to establish a reasonable reserve for depreciation, and to protect the Project against cyclical economic conditions in the fishing industry.

(b) *Underutilized fisheries.* An economic soundness test for vessels or facilities to be operated in underutilized fisheries that is less stringent than the requirements for vessels or facilities to be operated in more developed fisheries may, at the Program's discretion, be applied. This less stringent economic soundness test will, however, not extend to factors beyond the uncertainty of cash-flow projections in an underutilized fishery. Moreover, the Program will otherwise only guarantee financing for vessels or facilities which are to operate in the *initial* development stages of an underutilized fishery if the owners of those vessels or facilities adequately share with the Program a higher degree than ordinary of the greater financial risk. Demonstrated fisheries ability and experience requirements, financial condition requirements, and collateral requirements all may be stringent when the vessel or facility financed is to operate in the *initial* development stages of an underutilized fishery rather than in a more developed fishery. Owners of vessels or facilities which are to operate in the *initial* development stages of an underutilized fishery must possess *exceptional* fisheries ability and experience.

(c) *Consultant services.* The Program may require, as a pre-condition to a decision about approving a guarantee, that expert consulting services be provided. This requirement will generally be restricted to situations where a guarantee is sought for financing for larger and more expensive vessels to be operated in underutilized fisheries, or for larger and more expensive fisheries shoreside facilities, but may also be imposed where a guarantee is sought for financing for larger and more expensive vessels to be operated in more developed fisheries. The expert consulting services may be required to assist in assessing economic, technical, and financial feasibility, property design and engineering or other factors. When such a requirement is imposed, the Program (under conditions acceptable to the Obligor) will choose the consultant and specify the consultant's duties, and the Obligor will reimburse the Program for the Program's payment of the consultant,s services. No approved application will be closed until satisfactory arrangements have been made for such reimbursement. If an application is declined, the 25 percent commitment fee may be used by the Program for such reimbursement. *When such a requirement is imposed by the Program,* the cost of such consulting services may be included in the actual cost of the Project (if approved) for purposes of determining the amount of the guarantee.

§ 255.9 Financial requirements.

(a) *Working capital.* The vessel or facility owner must be in sufficiently sound financial condition to meet obligations, to continue to operate successfully the vessel or facility and all other business operations, and to protect the Program against undue risk. Audited financial statements will ordinarily be required in applications for guaranteed financing for large fisheries shoreside facilities Projects, and may be required in applications for other purposes. Working capital (current assets minus current liabilities) requirements will be established on a case-by-case basis, but must in all cases be sufficient to fund vessel or facility operations until the vessel or facility can generate sufficient income to do so. Working capital must be sufficient not only for the Project for which guaranteed financing is sought, but for all other affiliated projects, businesses, or interests. The *minimum* working capital from *equity* sources must in the case of fishing vessel construction equal at least 8 percent of the total capitalizable cost of the vessel. In the case of fisheries shoreside facility construction, the minimum working capital required from equity sources will be determined on a case-by-case basis, but will ordinarily be considerably greater than that required for fishing vessels. Minimum working capital requirements for reconstruction, reconditioning, and (where eligible) purchasing Projects will be decided on a case-by-case basis. *Additional* working capital may be required on a case-by-case basis and may, at the Program's discretion, consist of readily convertible investments, other assets readily capable of being used to generate working capital, lines or letters of credit, or the presence of a co-maker or guarantor with sufficient financial resources.

(b) *Equity.* No financing shall be approved for a guarantee unless the Obligor can demonstrate that, at the time of the financing's closing, *minimum* capital provided from *equity* sources is equal to at least the total of the following:

(1) 12½ percent of the total capitalizable cost of the construction, reconstruction, reconditioning, or (where eligible) purchase of the vessel or facility (the downpayment);

(2) The Program's first-year guarantee fee;

(3) The first year's premium for all required insurance;

(4) The minimum working capital requirement; and

(5) Such other *additional* amounts as the Program may deem necessary on a case-by-case basis.

(c) *Guarantees of financing for fisheries shoreside facilities or processing vessels.* Applicants for guarantees for financing of fisheries shoreside facilities and processing vessels will be required to obtain acceptable lines or letters of credit (some may be required to be in the form of irrevocable letters of credit) for all foreseeable inventory financing needs (beyond those to be met by the working capital available from equity sources) during at least the first year of operation of the facility or vessel.

§ 255.10 Collateral.

(a) *Mortgage.* The vessel of facility for which the financing is to be guaranteed should always be collateral for the Program guarantee. This property ordinarily will be secured by a first mortgage or, and in the case of vessels,

by a first preferred ship mortgage in favor of the Secretary of Commerce. In the case of equipment, the security interest may be perfected by a filing in accordance with the Uniform Commercial Code and/or by the recording of any form of security agreement or mortgage (e.g. chattel mortgage) necessary in a jurisdiction where the Uniform Commercial Code has not been adopted.

(b) *Guarantees.* If, in considering the risk involved in guaranteeing a financing, net worth is a significant factor relied on to offset other risks, such net worth must ordinarily be pledged as additional collateral for the program guarantee (an irrevocable letter of credit may be substituted under terms and conditions acceptable to the Program). If a closely-held corporation will be the Obligor, all major stockholders will ordinarily be required to provide their personal guarantees as additional collateral for the Program guarantee. If a subsidiary corporation, without substantial assets in addition to the vessel or facility is Obligor, the parent corporation will ordinarily be required to provide its guarantee as additional collateral for the Program guarantee. Personal or entity guarantees will always be required as additional collateral for Program guarantees where necessary to assure that the principal parties in interest, who ultimately stand most to benefit from the Project, are held accountable for the performance and operation of the Project.

(c) *Limitation of liability.* In no instance will equity contributors be permitted to limit their liability on a guarantee only to the amount of their initial equity contribution. Equity contributors will, additionally, be required to be *at least* jointly and severally liable for the amount of the guaranteed obligation which corresponds to the percentage of their ownership interest in the Project. Such equity contributors may, however, be required to be liable for more than such percentage. Under appropriate circumstances, and at the Program's sole discretion, the lessor of a financing lease may be treated differently.

(d) *Dual-use Capital Construction Fund agreement.* In the case of fishing vessels, the Program may require, as additional collateral, execution of a dual-use Capital Construction Fund Program agreement, and annual deposit into such fund (on a tax-deferred basis) of a reasonable portion of the net income of the vessel. Dual-use agreements provide for all the normal benefits of the Capital Construction Fund Program, but also give the Program control of withdrawals from a Capital Construction Fund and allow the Program to use these reserved funds, in the event of a default, to repay the debt obligation involved in the guaranteed financing. This control insures that the Obligor will have an emergency reserve of funds, as well as a reserve for reconditioning of the vessel. At the Program's discretion, reserved funds not required in connection with the vessel for which financing is guaranteed may be withdrawn for other qualified purposes.

(e) *Reconstruction or reconditioning.* The Chief, Financial Services Division, may, in his discretion, require such additional security or collateral as may be necessary to secure the Program's interest.

§ 255.11 Miscellaneous requirements.

(a) *Insurance.* All vessels and facilities for which financing is guaranteed shall be continuously insured during the term of the Program guarantee with such casualty, liability, breach of warranty, keyman, title, and/or other insurance in such form and amounts as the Program deems necessary. The Program shall ordinarily be the sole loss payee on all such insurances. No such insurances may be cancelled without 20 days prior written notice to the Chief, Financial Services Division. The Program's standard endorsements regarding the insured's breach of warranties, negligence, omission, etc., as well as an admission of seaworthiness or property soundness, shall be a part of all such insurances.

(b) *Bids and project costs.* If application for Program guarantee is first made before a contract for the vessel or facility to be financed is executed, not less than three responsive bids for the vessel or facility will ordinarily be required. Ordinarily, the lowest bid will be accepted, unless the Obligor and the Program agree that it is advisable to accept a higher bid. If application for a Program guarantee is first made after a contract for the vessel or facility has been executed, the Program may not guarantee a financing in an amount higher than would fairly and reasonably have resulted if competitive bidding had occurred. All applicants are encouraged to obtain at least three competitive bids, and applicants without such bids who first apply after a contract has been executed may be required by the Program to establish, at their expense, independent confirmation acceptable to the Program that the contract cost is both fair and reasonable. Approvals and commitments for Program guarantees will be based on the initial contract cost, and contract cost overruns may or may not, at the sole discretion of the Program, be added to the amount of the guaranteed financing.

(c) *Property inspection.* The Program will require inspection and approval of all vessels and facilities before providing a financing guarantee. For all guarantees involving financings of more than $500,000, the Program, where appropriate, will require inspection and approval by certified architects or engineers (either marine or real property architects or engineers). For program guarantees for financing of less than $500,000, the required property inspection and approval may, at the Program's discretion, be made by any competent authority acceptable to the Program. The required property inspection and approval should involve assessment of at least the following:

(1) Adequacy of workmanship;

(2) Fitness and sufficiency for the intended purpose;

(3) Reasonableness of cost;

(4) Compliance with basic contract specifications regarding the property; and

(5) The identification and recommended resolution of any significant deficiencies.

Where financing for used vessels or facilities is to be guaranteed, the inspection and approval assessment will be adjusted to provide the normal assurances associated with financing the acquisition of used property. Issuance of guarantees of financings involving more than $5,000,000 may be conditioned upon additional requirements regarding the inspection and approval of a vessel or facility. Program guarantees of financings involving more than $5,000,000 should always be conditioned on comprehensive *on site* inspection, by certified architects and engineers, and inspection of the vessel or facility to be financed at appropriate times during construction, reconstruction, or reconditioning. The Program may require American Bureau of Shipping *classification* requirements for all Program guarantees involving fishing vessels costing more than $5,000,000, and applicants are urged presently to consider voluntary use of the American Bureau of Shipping *classification* program for the construction of all fishing vessels costing over $5,000,000. All required property inspections and approvals must be conducted by competent and impartial authorities acceptable to the Program. Architects, engineers, surveyors, or appraisers employed by contractors constructing, reconstructing, or reconditioning a vessel or facility, or by parties selling

used vessels or facilities, are not acceptable for meeting this requirement. The cost of inspection and approval services in connection with a vessel or facility may be included in the actual cost of the vessel or facility and, thus, guaranteed by the Program.

(d) *Maintenance reviews.* All vessels and facilities for which financing is guaranteed under the Program shall be inspected at least once every three years by a competent and impartial authority acceptable to the Program. A full inspection report, identifying deficiencies and recommending the action necessary for their correction, will be provided to the Obligor and to the Program. Failure to provide this tri-annual inspection, or correct deficiencies identified by it, will constitute a default of the terms and conditions of mortgages securing the Program's guarantee and a cause, at the Program's discretion, for acceleration and liquidation of the debt obligation. Special property inspections may be required whenever the Program deems it necessary to preserve its collateral. All such inspections shall be at the expense of the Obligor. This requirement extends to all supplementary collateral for Program guarantees.

(e) *Terms and conditions of Program guarantees.* The Program will, on a case-by-case basis, specify in detail the precise terms and conditions prerequisite to the Program's willingness to provide a guarantee. These terms and conditions are at the Program's sole discretion, and an applicant's failure to comply with them will result in nonqualification for a Program guarantee.

(f) *Program Obligees.* The applicant may choose the Obligee to fund the debt to be guaranteed by the Program. Obligees may be any financial institution, public agency, or other party. The Program may, however, refuse to guarantee financing unless it has approved the terms and conditions of the financing (including particularly the interest rate and other amortization provisions) *before* the Obligor makes a firm commitment to an Obligee. Failure to first obtain the Program's approval may result in the Program's refusal to issue the guarantee despite the fact that the Obligor may have created a binding contract with an Obligee, abrogation of which may result in loss to the Obligor. The Program will assist those whose applications for Program guarantees are approved to gain access to the private market for appropriate financing, but only as a gratuitous service. Arrangements between the Obligor and the Obligee are a matter of private contract between those two parties, and the Program will not in any way be responsible to either for nonperformance by the other.

(g) *Closing*—(1) *Contracts.* All debt obligations and associated contractual arrangments which comprise the financing will be documented by *standard Program forms,* which may not be altered or amended in any way by insertion, deletion, or variation without prior Program approval (which will be sparingly granted).

(2) *Closing schedules.* The Program will attempt to meet the closing schedules (where reasonable) of Obligors and Obligees. The Program, however, accepts no responsibility for adverse interest-rate fluctuations, loss of commitments, or other consequences of non-compliance with Obligors' or Obligees' closing schedules. Obligors and Obligees should work closely with the Program to assure reasonable closing schedules, since internal workload and personnel considerations sometimes affect the Program's ability to meet otherwise desirable schedules.

(3) *Closing vessel financings.* The Program will attempt to close guarantees on financings involving fishing vessels with minimal services from private attorneys and/or other private contractors.

(4) *Closing shoreside facilities financings.* Closings for guarantees of financing for fisheries shoreside facilities will require substantial services from private attorneys and/or other contractors at the expense of the Obligor. The choice of such private contractors for any portion of the closing process is subject to Program approval. Services required to be provided by private contractors may include: title searches; preparation of legal documents; actual closing, escrow, and disbursement services; and the provision of a *legal opinion* from acceptable counsel regarding the validity and binding effect of transactions, compliance with procedures specified by the Program, and other assurances.

(5) *Paying agents.* The Chief, Financial Services Division, in his discretion, may require the use of a paying agent or trustee. Where paying agents are used, Obligors or Obligees will be responsible for their cost.

§ 255.12 Fees.

(a) *Filing and commitment fees.* The Program's filing and commitment fee shall be ½ of 1 percent of the first $2,000,000 principal amount (or portion thereof) of the Program guarantee for which application is made and ¼ of 1 percent of all principal amount over $2,000,000. The fee shall be due at the time an application is submitted, and no application for guarantee shall be accepted unless the full filing and commitment fee accompanies it. The filing fee shall be 75 percent of the filing and commitment fee, and once an application for a guarantee is accepted, no portion of the filing fee shall be returned for any reason. The commitment fee shall be the remaining 25 percent of the filing and commitment fee, and shall be returnable only if a refund is requested *before* the Program issues an Approval in Principle letter or if the application is declined.

(b) *Guarantee fee.* The Agency guarantee fee shall be:

(1) For guarantees on financings not involving underutilized fisheries risks, ¾ of 1 percent of the average unpaid principal balance of the debt obligation for which the guarantee is outstanding during each year of the life of the guarantee; and

(2) For guarantees on financings involving underutilized fisheries risks, 1 percent of the average unpaid principal balance of the debt obligation for which the guarantee is outstanding during each year of the life of the guarantee.

The guarantee fee shall be due in advance based upon the financing's amortization schedule. The first annual guarantee fee shall be due at closing of the guarantee. Each subsequent annual guarantee fee shall be due on the anniversary date of the closing of the guarantee. No refund of guarantee fees shall be made regardless of the status of the financing or the guarantee during the year to which the guarantee fee relates.

(c) *Refinancing/assumption fee.* The Program's refinancing/assumption fee shall be ¼ of 1 percent of the principal amount of the debt obligation to be refinanced or assumed, and is due upon application for a guarantee for the refinancing/assumption. The refinancing/assumption fee is non-returnable regardless of the subsequent disposition of an application. The Chief, Financial Services Division, may, however, (1) waive the refinancing/assumption fee where the refinancing/assumption is primarily to protect the Program's interest or (2) charge an actual cost fee, not to exceed $1,000, where the refinancing/assumption does not substitute a wholly different obligor for the initial obligor.

(d) *Where payable.* Fees shall be paid by check mailed to: U.S. Department of Commerce, National Oceanic and Atmospheric Administration, NBOC 1, Room 122, 11420 Rockville Pike, Rockville, Maryland 20852. Checks shall be made payable to: "NMFS/FSFF".

§ 255.13 Demands and payment.

All demands by Obligees, whose debt has been guaranteed under the provisions of this Program, for payment of all or any portion of a guaranteed obligation in default shall be made in writing to the Chief, Financial Services Division, F/UD5, 3300 Whitehaven St., NW., Washington, D.C. 20235, by certified mail, return receipt requested. In the event the Program does not acknowledge timely receipt of a demand alleged to have been timely made, the demander must possess evidence of the demand's timely delivery to the Program. Payment of demands shall be made within 30 days after receipt of a timely demand by the Chief, Financial Services Division. Demands may be made by Obligees' duly authorized agents or trustees.

§ 255.14 Default/liquidation of collateral.

(a) *Default.* In the event of default by an Obligor which results in the payment by the Program to an Obligee of the guaranteed debt, the Program shall ordinarily foreclose on its collateral and institute personal collection proceedings against the Obligor and the guarantors of the financing. At the Program's sole discretion, other remedies which are deemed most appropriate to protect the Program's interest may be pursued.

(b) *Liquidation of collateral.* If the Program is the highest bidder at a foreclosure sale of collateral, the Program (as the new owner of the collateral) may, in its sole discretion, subsequently complete, recondition, reconstruct, renovate, repair, maintain, operate, charter, lease, or sell such collateral. In the event there is a willing buyer for such collateral at an amount at least equal, or almost equal, to the amount owed the Program, the Program may convey title to such collateral, upon proper payment, without competitive bidding or other contracting procedures. If there is not a willing buyer for such collateral at an amount equal, or almost equal, to the amount owed the Program, the collateral will ordinarily be disposed of by competitive bidding—unless the Program decides that it can best recover without competitive bidding. Any deficiency resulting from the Program's purchase of collateral at a foreclosure sale shall not be offset by receipts from a subsequent sale of such collateral in the event the Program purchases the collateral and sells it for an amount greater than that owed the Program; the original Obligors and guarantors of the guaranteed financing remain liable for such deficiency.

§ 255.15 Program guidelines.

The Chief, Financial Services Division, will issue Program guidelines from time to time, as the need arises, to govern national Program policy and administrative issues which are not addressed by these rules.

§ 255.16 Applicability of rules.

These rules will be applicable to all Program applications first accepted after the rules' effective date.

List of Public Laws

Last Listing December 22, 1982

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (phone 202–275–3030).

H.R. 6403 / Pub. L. 97–371. To provide for the use and distribution of funds to the Wyandot Tribe of Indians in docket 139 before the Indian Claims Commission and docket 141 before the United States Court of Claims, and for other purposes. (December 20, 1982; 96 Stat. 1813) Price: $1.75.

H.R. 5795 / Pub. L. 97–372. To provide for the use and distribution of the funds awarded to the Shawnee Tribe of Indians in dockets 64, 335, and 338 by the Indian Claims Commission and docket 64–A by the United States Court of Claims, and for other purposes. (December 20, 1982; 96 Stat. 1815) Price: $1.75.

S. 2177 / Pub. L. 97–373. To amend title III of the Colorado River Basin Project Act, Public Law 90–537 (82 Stat. 885), as amended by Public Law 95–578 (92 Stat. 2471), and Public Law 96–375 (94 Stat. 1505). (December 20, 1982; 96 Stat. 1817) Price: $1.75.

S. 764 / Pub. L. 97–374. To provide for protection of the John Sack cabin, Targhee National Forest in the State of Idaho. (December 20, 1982; 96 Stat. 1818) Price: $1.75.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 47, No. 248
Monday, December 27, 1982

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 910

[Lemon Reg. 391]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period Dec. 26, 1982–Jan. 1, 1983. Such action is needed to provide for orderly marketing of fresh lemons for the period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: December 26, 1982.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291, and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona lemon crop for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under Marketing Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1981–82. The marketing policy was recommended by the committee following discussion at a public meeting on July 6, 1982. The committee met again publicly on December 21, 1982, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons is easier.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

PART 910—[AMENDED]

Section 910.691 is added as follows:

§ 910.691 Lemon Regulation 391.

The quantity of lemons grown in California and Arizona which may be handled during the period December 26, 1982, through January 1, 1983, is established at 240,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 22, 1982.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 82-35132 Filed 12-23-82; 8:45 am]
BILLING CODE 3410-02-M

7 CFR Part 1106

[Milk Order No. 106]

Milk in the Oklahoma Metropolitan Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rules.

SUMMARY: This action suspends certain provisions concerning the shipping standards for supply plants and the limits on the amount of milk from individual producers that may be diverted directly to nonpool plants and still be priced under the order. For the month of December 1982, the suspension reduces the amount of milk that a supply plant must ship to pool distributing plants in order to qualify as a pool plant. Also, the amount of milk that may be moved directly from farms to nonpool plants for manufacturing is increased. The action was requested by two cooperative associations because of increased milk production and an anticipated decline in fluid milk sales due to school closings during the Christmas holidays. The suspension is necessary to assure the efficient disposition of reserve milk supplies that are now available and to assure that dairy farmers who have regularly supplied the fluid milk needs of the market will continue to have their milk pooled and priced under the order.

EFFECTIVE DATE: December 27, 1982.

FOR FURTHER INFORMATION CONTACT: Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–4824.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of Proposed Suspension; Issued December 2, 1982; published December 7, 1982 (47 FR 54977).

This action has been reviewed under USDA procedures established to implement Executive Order 12291 and

has been classified as a "non-major" action.

It has been determined that any need for suspending certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register**. However, this would not permit the completion of the required suspension procedures on the timely basis necessary to make the suspension effective for the month of December 1982. In this instance, the initial request for the action was received on November 29, 1982. A notice of proposed suspension was issued on December 2, 1982, inviting interested parties to submit comments on the proposed action on or before December 14, 1982.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and tends to insure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Oklahoma Metropolitan marketing area.

Notice of proposed rulemaking was published in the **Federal Register** (47 FR 54977) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded opportunity to file written data, views, and arguments thereon.

After consideration of all relevant material, including the proposal set forth in the aforesaid notice, data, views, and arguments filed thereon, and other available information, it is hereby found and determined that for the month of December 1982 the following provisions of the order do not tend to effectuate the declared policy of the Act:

1. In § 1106.7(b), that part of the provisions that reads "in an amount not less than 50 percent of milk received at the supply plant from dairy farmers who would be eligible as producers under § 1106.12 if such plant qualifies pursuant to this paragraph and milk of such dairy farmers diverted from such plant by the plant operator".

2. In § 1106.13(e)(1), that part of the provisions that reads ", subject to the conditions of paragraph (e)(3) of this section, a total quantity of milk not in excess of total" and "received at all pool plants during the month. Diversions in excess of such quantity shall not be eligible under this section and the diverting cooperative shall specify the dairy farmers whose diverted milk is not so eligible. If the cooperative association fails to designate such persons, status under this section shall be forfeited with respect to all milk diverted by such cooperative association".

3. In § 1106.13(e)(2), that part of the provisions that reads ", subject to the conditions of paragraph (e)(3) of this section," and ", in a total quantity not in excess of the milk of producers not members of such cooperative association received at such pool plant(s) during the month. Milk diverted in excess of such quantity shall not be eligible under this section and the diverting handler shall specify the dairy farmers whose diverted milk is not so eligible. If a handler fails to designate such persons, status under this section shall be forfeited with respect to all milk diverted by such handler".

4. In § 1106.13, paragraph (e)(3).

Statement of Consideration

This action reduces the amount of milk that supply plants must ship to pool distributing plants to attain pool plant status under the order. Under the suspension, a supply plant needs to make but one shipment to a pool distributing plant to qualify as a pool plant.

The action also increases the amount of milk that may be moved directly from farms to nonpool manufacturing plants and still be priced under the order. Without the suspension, diversions would be limited to producers who deliver not less than 15 percent of their producer milk to pool plants. In addition, diversions to nonpool plants by proprietary handlers and cooperatives could not exceed the quantity of milk received at pool plants.

This action was requested by two cooperative associations that represent producers supplying the market. The cooperatives indicated that the suspension is needed because increases in fluid milk sales have not kept pace with increases in production. The cooperatives further stated that the imbalance between fluid milk sales and producer receipts will become worse because of a decline in Class I sales to schools as a result of school closings for the Christmas holidays.

As a result of the imbalance between fluid milk sales and production, greater than normal supplies of milk will have to be moved to manufacturing outlets for surplus disposal during December. In the absence of any suspension action, costly and inefficient movements of milk would have to be made by handlers solely for the purpose of assuring that the milk of dairy farmers who have regularly supplied the fluid milk needs of the market would continue to be pooled under the order.

Interested parties were given an opportunity to submit written data, views, or arguments concerning the suspension and no views in opposition to the suspension were received. The operator of a proprietary pool supply plant supported the suspension in order to avoid uneconomic movements of milk or loss of pool status for producers and handlers associated with the market.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that without this action uneconomic movements of milk would be made solely for the purpose of pooling the milk of dairy farmers who have regularly been associated with the market.

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register**.

List of Subjects in 7 CFR Part 1106

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, That the aforesaid provisions in §§ 1106.7(b) and 1106.13(e) of the order are hereby suspended for the month of December 1982.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: December 27, 1982.

Signed at Washington, D.C., on: December 20, 1982.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

[FR Doc. 82-34949 Filed 12-23-82; 8:45 am]

BILLING CODE 3410-02-M

7 CFR Part 1135

[Docket No. AO-380-A3]

Milk in the Southwestern Idaho-Eastern Oregon Marketing Area; Order Amending Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action amends the Southwestern Idaho-Eastern Oregon Federal milk order by providing for the indefinite continuation of the present Class I pricing provisions. The order became fully effective on July 1, 1981, and the Class I price provisions were established on a temporary basis through December 31, 1982, so that the appropriateness of the price level could be reviewed in light of market experience. The action is based on an industry proposal considered at a public hearing held on October 21, 1982. The change, which has been approved by more than two-thirds of the producers in the market, is necessary to reflect current marketing conditions and to assure continued orderly marketing in the area.

EFFECTIVE DATE: January 1, 1983.

FOR FURTHER INFORMATION CONTACT: Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, (202/447-7183).

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

Prior documents in this proceeding:

Notice of Hearing: Issued October 8, 1982; published October 14, 1982 (47 FR 45884).

Final Decision: Issued December 1, 1982; published December 7, 1982 (47 FR 54978).

Findings and Determinations

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of the said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Southwestern Idaho-Eastern Oregon marketing area.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order effective not later than January 1, 1983. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of this order are known to handlers. The decision of the Assistant Secretary containing all amendment provisions of this order was issued December 1, 1982 (47 FR 54978). The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order effective January 1, 1983, and that it would be contrary to the public interest to delay the effective date of this order for 30 days after its publication in the Federal Register. (Sec. 553(d), Administrative Procedure Act, 5 U.S.C. 551-559).

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in Sec. 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the respective orders; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

List of Subjects in 7 CFR Part 1135

Milk marketing orders, Milk, Dairy products.

Order Relative To Handling

PART 1135—MILK IN THE SOUTHWESTERN IDAHO-EASTERN OREGON MARKETING AREA

It is therefore ordered, That on and after the effective date hereof, the handling of milk in the Southwestern Idaho-Eastern Oregon marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended as follows:

1. In § 1135.50, paragraph (a) is revised to read as follows:

§ 1135.50 Class prices.

* * * * *

(a) The Class I price shall be the basic formula price for the preceding month plus $1.50.

* * * * *

(Secs. 1-19, 48 Stat. 31, as amended; (7 U.S.C. 601-674))

Effective date: January 1, 1983.

Signed at Washington, D.C., on December 20, 1982.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

BILLING CODE 3410-02-M

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 2, 19, 20, 21, 30, 40, 51, 61, 70, 73 and 170

Licensing Requirements for Land Disposal of Radioactive Waste

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is issuing regulations that set out licensing procedures, performance objectives and technical requirements for the licensing of facilities for the land disposal of low-level radioactive waste. The regulation is necessary to provide comprehensive national criteria applicable to the land disposal of radioactive waste. This action is taken in response to the needs and requests of the public, Congress, industry, the states, the Commission, and other Federal agencies for codified regulations to govern the disposal of low-level radioactive waste.

DATES: 10 CFR 20.311 of Part 20 effective date is December 27, 1983; 10 CFR Part 61 and all other changes effective January 26, 1983.

ADDRESSES: Documents referred to in this regulation may be examined at the Commission's Public Document Room, 1717 H Street NW., Washington, DC. Copies of NUREG's may be obtained by writing the Superintendent of Documents, U.S. Government Printing Office, CIB, SSOS, UCP, Washington, DC 20401 or the NRC/GPO Sales Program, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of Branch Technical Positions may be obtained from the Low Level Waste Licensing Branch, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

FOR FURTHER INFORMATION CONTACT: Paul H. Lohaus, Low-Level Waste Licensing Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301)427–4500.

SUPPLEMENTARY INFORMATION:

Introduction

The NRC is amending its regulations to provide specific requirements for licensing the land disposal of low level radioactive wastes containing source, special nuclear, or byproduct material. The amendments provide licensing procedures, performance objectives, and technical criteria for licensing facilities for the land disposal of radioactive waste. Specifically, the regulations establish performance objectives for land disposal of waste; technical requirements for the siting, design, operations, and closure activities for a near-surface disposal facility; technical requirements concerning the waste form that waste generators must meet for the land disposal of waste; classification of waste; institutional requirements; and administrative and procedural requirements for licensing a disposal facility. Amendments to other parts are established to govern the certification and use of shipping manifests to track waste shipments and clarify, but not substantially modify, the requirements of existing regulations. Provisions for consultation and participation in license reviews by State governments and Indian tribes are also included. Specific requirements for licensing facilities for the disposal of radioactive wastes other than high level waste by alternative land disposal methods will be proposed in subsequent rulemakings. Disposal of radioactive wastes by an individual licensee will continue to be governed by 10 CFR Part 20.

Background

On October 25, 1978, the Commission published an Advance Notice of Proposed Rulemaking (43 FR 49811) regarding the development of specific regulations for the disposal of low-level radioactive wastes (LLW). The development of these regulations was in response to needs and requests expressed by the public, the Congress, industry, the States, the Commission, and other Federal agencies for codification of regulations for the disposal of LLW. The respondents to the advance notice strongly supported the Commission's development of specific criteria and standards for the disposal of low-level waste. The comments received by the Commission on the advance notice were used by the Commission in scoping the form and content of the draft Environmental Impact Statement (EIS) (NUREG–0782) and the regulation.

On February 28, 1980, the Commission also published a Notice of Availability of a preliminary draft regulation, dated November 5, 1979, announcing availability of the draft for public review and comment (45 FR 13104). This was done to help ensure wide distribution and early public review and comment on the development of the rule. Copies of this draft regulation were distributed to all of the States.

During the summer and fall of 1980, the Commission also sponsored four regional workshops to provide an opportunity for open dialogue among representatives of the States, public interest groups, industry, and others on the issues to be addressed in the Part 61 rulemaking. These workshops were particularly useful in formulating our positions on the more judgmental aspects of the rule and underlying assumptions (such as the length of time we should assume that active governmental controls could reasonably be relied on).

Proposed 10 CFR Part 61 and conforming amendments were published on July 24, 1981 (46 FR 38081). The original comment period was due to expire October 22, 1981, but was extended to January 14, 1982 to coincide with the 90-day comment period for the supporting draft EIS (NUREG–0782). The availability of the draft EIS was announced on October 22, 1981 (46 FR 51776). The proposed rule was sent to all Commission licensees and copies were provided to Agreement State officials to distribute to their licensees.

Public comments were received on both the rule and draft EIS and may be examined at the Commission's Public Document Room (PDR) located at 1717 H Street NW., Washington, D.C. Comments on the rule are available at the PDR Docket No. PR–2 *et al.* (46 FR 38081). Comments on the draft EIS are available at the PDR referencing Docket No. PR–61 (46 FR 51776).

A total of 42 persons commented on the draft EIS. These commenters represented a variety of interests. Comments were received from 21 States, 8 industry/utilities, 8 Federal agencies/laboratories, 3 individuals and 2 broker/disposal firms. The comments generally raised or echoed the same issues raised concerning the rule except that some questions on the methodologies and presentation of results were raised. A detailed analysis of the comments on the draft EIS will be included as an appendix to the final EIS (NUREG–0945) which is being prepared[1]

Overview of Comments on 10 CFR Part 61

A total of 107 different persons submitted comments on the proposed 10 CFR Part 61. The commenters represented a variety in interests. Comments were received from: 19 industrial groups, 17 state groups, 15 individuals, 13 utilities, 9 federal agencies or laboratories, 6 universities, 4 medical groups, 4 engineering firms, 4 public interest groups, 4 professional organizations, 3 broker/disposal firms, 2

[1] Copies of this report may be obtained by written request to the Division of Technical Information and Document Control, Washington, D.C. 20555. Copies will also be made available for inspection or copying for a fee at the NRC Public Document Room, 1717 H Street NW., Washington, D.C.

legal groups, 2 surety groups, and 5 others. Commenters offered from one to over 20 comments each. The topics addressed a wide range of issues and all parts of the rule.

The general response was quite favorable. Almost half (47) expressed explicit support of the rule or overall approach. Many of these commenters expressed some concern about one or a few specific provisions and most offered suggestions for improvements. Many expressed the view that the rule provides a needed and adequate framework for establishing additional low-level waste disposal capacity. The importance, reasonableness, and clarity of the rule were noted. Support was expressed by almost every sector.

Only 15 commenters expressed any outright opposition to the rule or some significant portion of the rule. Most were individuals. No state group or current disposal site operator expressed opposition. The opposition expressed appeared to stem from objections to nuclear power and use of radioactive materials, opposition to shallow land burial as a disposal method in general and for TRU wastes in particular, opposition to perceived increase in costs to waste generators, the regulatory burden of the licensing process, and the technical requirements in Subpart D of the proposed rule. Several of the commenters that expressed opposition offered suggestions for improving the rule, however.

Most of the remaining commenters (45) offered constructive comments without taking a general position on the rule, or offered support with reservations about one or more aspects of the rule.

All concerns expressed by all commenters are discussed in detail in a staff analysis of comments which is available in the PDR. Because the volume of comments and analysis in detail occupy several hundred pages, the following discussion summarizes and responds to all comments of major and generic significance. For example, comments on Part 61 standard provisions that are common to all Commission regulations are not discussed in this summary, but are covered in the document available in the PDR.

Summary of Comments for Proposed Part 61

Subpart A: General Provisions. A variety of comments were received that related to the scope of the rule. Two clarifying changes were made to make it clearer that uranium and thorium tailings as defined in Section 11e(2) of the Atomic Energy Act of 1954, as amended, are not subject to the requirements of Part 61, but are disposed of according to requirements in 10 CFR Part 40. In addition, clarifying changes were made to state that the requirements of Part 61 do not apply to persons who are licensed by an Agreement State pursuant to authority relinquished to that State by the Commission in accordance with Section 274 of the Atomic Energy Act of 1954, as amended.

Some commenters felt that provisions should be made for an individual to dispose of his or her own waste. Private waste disposal may be licensed under current provisions of 10 CFR Part 20. The Commission feels that these provisions are adequate and that no change to Part 61 to accommodate private disposal is warranted.

At least two State commenters asked about Agreement State requirements being compatible with Part 61. The Commission is preparing guidance for States that will consider Section 61.2, Definitions; Subpart C, Performance Objectives; Subpart D, Technical Requirements for Land Disposal Facilities; those portions of Subpart B that are necessary to implement the provisions of Subparts C and D; Section 20.311, Transfer for disposal and manifests; and that portion of Subpart E requiring closure funding arrangements as a matter of compatibility for the Agreement States. Guidance will identify those aspects where uniformity in desirable and those aspects where States would have flexibility in establishing their own requirements.

It was suggested that construction of a disposal facility should be permitted to begin before a license is issued. The Commission believes that to do so would have a detrimental effect on the decisionmaking process and therefore no change is being made to this provision.

In the proposed rule, near surface disposal was defined in § 61.2 and discussed in § 61.7 as disposal in the upper 15–20 meters of the earth's surface. Based on comments received, the wording could be misinterpreted to mean that disposal was allowed only between 15 and 20 meters or that deeper disposal was prohibited. The wording was clarified to make it consistent with the waste classification requirements. (Class A and B wastes have no minimum depth requirement and Class C wastes have a 5 meter depth requirement when relying on depth alone.) Disposal at a depth greater than 5 meters would also be acceptable.

Subpart B: Licenses. Comments received on Subpart B covered a wide range of issues. Many were concerned with clarification and intent. There were, however, several issues that were more substantive and addressed by a large group of commenters.

Several commenters were concerned that the language in several places required the applicant to demonstrate in the application that certain objectives were met. Their concerns were over what would constitute a demonstration, and the impossibility of meeting an objective with complete certainty as implied by the language in the rule. The Commission agrees with these commenters and changes have been made in appropriate places to indicate that what the Commission wants is information or analyses that will provide reasonable assurance that the objective or requirement will be met. Other minor changes were made for purposes of clarification.

An advisory statement in § 61.13 that the ground water pathway was generally the most significant for near surface disposal, in terms of releases of radioactivity, was deleted. This section requires an analysis of all potential pathways and two commentators objected to singling out ground water.

Several commenters expressed concern over the length of time that the licensing process might take and suggested limits be established in the regulations. The Commission does not believe that this is practicable, considering the uncertainties in predicting the quality of future applications, the availability of staff resources at critical times, and the potential for hearings. The licensing process must be in accordance with the Commission's mission to protect public health and safety but the Commission does agree that the licensing process must be carried out in the minimum amount of time consistent with this mission. Some changes in the procedural aspects of the rule are being made with this in mind (see comments, Subpart F). The Commission staff is developing technical positions to assist applicants in preparing their applications and is developing performance assessment capabilities that will enable the staff to perform timely reviews.

Nine commenters addressed the language in § 61.25 that prevents the licensee from making any changes in the facility or procedures described in the application except as provided for in specific license conditions. The commenters felt that this was unnecessarily restrictive, in that there may be aspects of the facility or procedures that were described in the application, but which are not important to public health and safety and the

licensee should be free to change them. The Commission agrees, since it was not intended that all changes be subject to Commission review or approval, only those important to public health and safety. Section 61.25 is changed accordingly.

Over a dozen commenters raised objections to the requirement that the license be renewed on the usual five-year interval with a concomitant public notice on the opportunity to request a public hearing. The dominant reason for these objections is the burden that is perceived if public hearings were held every five years at the time of license renewal. The Commission believes that a periodic reassessment by the licensee and the Commission staff is necessary. This reassessment should factor in the past operating experiences of the disposal facility, the results of monitoring data, changing economic conditions that might affect financial assurances, advances in technology, etc. While there are alternatives to license renewal in order to ensure these periodic reappraisals, the Commission has found through its experience that periodic license renewal is the most effective method. As for the public notice of the renewal and the notice of opportunity to request a public hearing, the Commission agrees that this is not necessary and it has been deleted. Deleting this requirement will not have an adverse effect on the public's interest and rights. According to revised § 61.25, any changes to the license conditions from a license renewal process would be subject to notice and opportunity to request hearings if the conditions were in the highest category specified in that section (paragraph 61.25(a)(1)).

Two commenters suggested not subjecting the licensee to an opportunity for hearings at the time of site closure. The Commission believes that this is an important and worthwhile time to provide for public participation. No changes were made.

While none of the commenters took exception with the need for a period of post-closure observation and maintenance by the licensee, a number did object to the open-endedness of the requirements that this period be for "a minimum of five years." This provision has been changed to state that the period will normally be five years, but that shorter or longer periods may be approved by the Commission in connection with the approval of the site closure plan for a specific site.

Several commenters, including Chem-Nuclear Systems, Inc., and U.S. Ecology, the operators of the existing disposal facilities, were concerned about possible delays in transfer of the license to the site owner at the end of the post-closure observation period. They foresee the possibility of more stringent requirements being imposed at this time, thereby delaying the transfer with an adverse effect on the ability of the licensee to effect proper closure due to changes beyond the financial requirements initially established. The Commission recognizes this possibility, but it is beyond the Commission's authority to control or regulate the site owner and force the transfer to take place. Any requirements for transfer that are outside the public health and safety considerations prescribed by Part 61 became a matter of contract or agreement between the site owner and the site operator. With the Low Level Radioactive Waste Policy Act laying the responsibility for disposal of low level waste on the States, it is obvious that the States will play an increasingly important role. State authorities, who in all likelihood will be the site owners, should become active participants in the disposal activities from the earliest stages of development through site closure and stabilization so that at the time of site transfer to them for institutional control, there are no unforeseen obstacles to the orderly and timely transfer. Part 61 provides for this participation in the licensing process, and as landlord, there are other avenues of participation.

Subpart C: Performance Objectives. A dozen commenters addressed the approach taken in Part 61 to establish performance objectives supplemented by some minimum technical requirements. All commenters except three supported the approach of addressing disposal from an overall systems standpoint, i.e., establishing overall performance objectives and minimum technical requirements and leaving considerable flexibility on how an applicant or licensee would design and operate a site. Of the three who disagreed, one felt that the concern for public health and safety is so great that the rule should be based on prescriptive requirements; one felt that there should be no technical requirements in the rule, only performance objectives; and the third felt that the rule is restrictive by establishing both performance objectives and technical requirements. On balance, the comments were judged to be supportive of the mix of objectives and requirements and no changes have been made in this regard.

One commenter challenged the performance objectives in Part 61 as being premature in advance of relevant EPA standards and beyond the agency's authority to the extent that they are not already embodied in 10 CFR Part 20 and that they are unduly stringent and unsupported. With respect to this comment, EPA, under its ambient environmental standards setting authority assigned by Reorganization Plan No. 3 of 1970 has the authority to prepare a standard that will set limits for releases of radioactivity to the general environment from disposal facilities. Presently there is no such EPA standard. In the absence of such a standard, the Commission examined a range of limits which bound that expected for the EPA standard and selected a proposed performance objective that establishes a release limit for the site boundary, a regulatory action within the limits of NRC authority. In a rulemaking action, the Commission is not solely limited to existing standards in Part 20 and the Commission does not intend to withdraw any portion of the rule that may be related to the performance objectives.

With regard to the specific performance objective for releases to the environment, the Environmental Protection Agency commented that the establishment of an individual exposure limit at the site boundary for releases as proposed in § 61.41 is appropriate. They stated that the range of 1 to 25 mrem/yr analyzed by the Commission was a reasonable range that should encompass any standard which EPA might derive for low level waste disposal facilities. Based on the Commission's analysis, NRC does not anticipate any need to change the technical requirements of Part 61 to meet a future EPA standard. In their comments, EPA stated their opinion that it was inappropriate to apply the EPA drinking water standard as proposed in § 61.41. Accordingly, this part of the performance objective has been deleted. However, this does not diminish the Commission's concern over protecting sources of drinking water. The Commission will assess the potential impact on drinking water supplies as part of its licensing review.

Reaction to the proposed performance objective to protect potential inadvertent intruders was mixed. There were some who felt the proposed 500 mrem whole body dose to the intruder was too high, some felt that it was the right value for a standard, and others felt that higher values were in order. Those that felt that the standard should be higher suggested values of 5 rem or 25 rem (the Department of Energy) to correspond to limits for occupational exposure or one-time exposures to workers from potential accidents. A number of commenters, in their comments about considering the

probability that intrusion will occur, expressed concern about weighting too heavily the protection against inadvertent intrusion in determining disposal requirements for waste. Based on these comments, the Commission believes that the primary concern of those who feel that the intruder protection objective is too restrictive is the effect that this has on the concentrations of certain nuclides that are acceptable for disposal in a near surface facility and the need to meet additional requirements such as stability for some wastes. With this in mind, and in response to other comments, the Commission has reevaluated the calculations that establish the waste classification concentration limits to eliminate unnecessarily conservative assumptions with the result that the analysis is more realistic and the limits for several important isotopes have been raised. With this action, the Commission believes that most of the concerns of those who encouraged higher exposure limits or less emphasis on protection of intruders will have been met.

With respect to those who suggested that lower limits would be appropriate, there were no compelling arguments or technical demonstrations presented that persuaded the Commission to lower the dose limit for intruders.

The EPA recommended that the 500 mrem dose limit be deleted from the performance objective, since the licensee would not be able to monitor or demostrate compliance with a specific dose limit that applies to an event that might occur hundreds of years from now. They did recommend use of the 500 mrem whole body dose limit coupled with ALARA as the basis for determining the concentration limits in Table 1 of Part 61. The 500 mrem dose limit has been deleted from the performance objective but retained as the basis of the waste classification limits.

Comments were offered that more emphasis should be placed on requirements, such as the use of durable monuments to warn potential intruders. This concept is incorporated in the regulation.

Acts of terrorism and sabotage were identified as possible intrusion problems and suggestions were made for protecting against such acts. The Commission does not feel that the likelihood of such events or the magnitude of the effects of such acts are sufficient to warrant requirements in this regard.

EPA asked for a clarification of the intent of the performance objective in § 61.43 as it pertains to effluents from the site. This performance objective states that operations at the land disposal facility must be conducted in compliance with the standards for radiation protection set out in Part 20. Part 20 contains standards for concentrations of radioisotopes in air and water released from a licensed facility. Section 61.41 sets forth limits on concentrations of radioisotopes released from a land disposal facility which are lower than those in Part 20. It is the Commission's intent that the provisions of Part 20 will apply to all aspects of radiation protection during operation except for releases of radioactivity from the site which will be governed by the more stringent requirements of § 61.41. The rule has been modified to clarify this point.

Commenters pointed out a need to be clearer in the rule on how the principle of maintaining radiation exposures to a level that is as low as reasonably achievable (ALARA) will be handled. The Commission intends that the ALARA principle apply to the performance objectives for long-term environmental release and protection of individuals during site operations. It cannot apply to the intruder performance objective, since Part 61 sets out the requirements for protection and intrusion which is beyond the disposal facility licensee's control. Appropriate changes have been made in §§ 61.41 and 61.43 to reflect the ALARA principle.

Subpart D: § 61.50, Disposal Site Suitability for Near-Surface Disposal. Approximately two dozen commenters offered comments on various aspects of § 61.50, addressing disposal site suitability requirements. These comments address eight subject areas which are discussed below.

Eight comments were received on the requirement that the disposal site shall be capable of being characterized, modeled, analyzed, and monitored. The comments were directed to the perceived vagueness of the requirement, i.e., what does it mean to be capable of being characterized, modeled, analyzed, and monitored? Some commenters offered suggested rewording or examples. The Commission has issued a staff technical position (NUREG–0902) that provides interpretation and explanation of the meaning and intent of this requirement. In the technical position, it is explained that the site characteristics must be such that limited site characterization can adequately define the site characteristics spatially across the disposal site and that site characteristics should vary with a sufficiently narrow range so that the input to modeling is representative of the hydrogeologic units and the assumptions underlying the modeling are valid. Further, natural processes affecting the disposal site should be occurring at a consistent and definable rate such that the modeling of the site will represent both present and anticipatable site conditions after closure. Finally, site characteristics must be such that a reasonable number of monitoring points can adequately describe the extent to which radionuclides have migrated from the waste disposal units. In addition, the Commission's staff is developing an in-house modeling capability and will share that capability through pre-qualification of prospective computer codes. The Commission believes that a concise statement in the rule along with guidance on these subjects provided by technical position papers and Regulatory Guides is appropriate.

Several aspects related to ground water were addressed in the comments. Three commenters (Ontario Hydro, the Department of Interior, and the Department of Energy) endorsed the provision in § 61.50(a)(7) that permits disposal below the water table where diffusion dominated the ground water flow system.

The Department of Interior recommended using the term, "molecular diffusion" and both they and Ontario Hydro suggested specifying a limit for soil hydraulic conductivity of less than 10^{-6} cm/sec, as appropriate. There were several commenters who disagreed with this provision and recommended total containment or some minimum depth to the water table.

The Commission envisions a site that would satisfy the exception in section 61.50(a)(7) as one with an inactive flow system so that the water which would contact the wastes would move on the order of less than one foot per year. Given the low hydraulic conductivity and effective porosity of the soils, very little water would actually contact the waste or flow from the disposal units. The travel time will result in sufficient reduction of concentration of the small amounts released and fine-grained soils will typically provide significant attenuation for most radionuclides. No change has been made to this provision of the rule.

Several commenters suggested requirements on retardation properties for soils, both impervious and porous. One suggested a leachate collection and treatment system for the impervious soils. The Commission does not consider it appropriate to set forth specific values for characteristics which promote attenuation of radionuclides. Whereas attenuation is advantageous for some radionuclides, others such as H–3, C–14,

and I-129 may not be significantly attenuated. The Commission believes that reliance should be placed on siting requirements which will keep water away from wastes, result in low volumes of contaminated water being released, and provide a long travel time for decay. The Commission takes exception to any design which relies on a leachate collection and treatment system to reduce migration. Such a design is expected to result in a requirement for continued active site maintenance, therefore violating the performance objective in § 61.44.

Several comments recommended that the natural resources considered under § 61.50(a)(4) specifically include ground water and aquifers underlying the site and that the resources of significance were not limited to "economic" significance. Another suggested that the resources be "known" resources so that the applicant would not have to engage in an extensive exploration program to assure that there were no significant natural resources. The Commission considers ground water and aquifers to be natural resources in the context of this requirement. The Commission also agrees that it should not be necessary to conduct extensive exploration studies to prove that no resources exist. Several changes have been made in the sections relating to ground water to reflect these comments.

Commenters raised four questions on the siting requirements related to surface water drainage. These can be summarized as (1) definition of certain terms such as upstream drainage areas, coastal high-hazard area and wetland; (2) the adequacy of the exclusion of waste disposal based on the 100-year floodplain; (3) whether engineering drainage modifications can be made in order to meet the requirements; and (4) the vagueness of some terms.

With respect to the terms "coastal high-hazard area" and "wetland," these are defined in Executive Order 11988 (42 FR 26951, May 25, 1977), *Floodplain Management Guidelines* which is noted in the rule. The term "upstream drainage area" can be defined in conventional hydrologic terms as all the land surface which drains, either by channel flow or sheetwash, across the disposal facility.

The 100-year floodplain is that land which would be inundated by a flood having a 1 in 100 chance of occurring in any particular year. The Commission feels the major hazard due to flooding is associated with the period of site operations when disposal units are open. Because of other provisions of the rule, the disposal units will be open a comparatively short time. Once closed, the covers and site drainage system will provide protection against the effects of flooding. The Commission considers 300 or 500-year floodplains to be unnecessarily restrictive; and questions whether an adequate data base or standard methods of determining such floodplains exist.

The question on engineering modifications will be addressed more fully in staff technical positions related to site suitability, selection and characterization and to site design and operations. Engineering features may be used to improve site drainage and protect against flooding during operations.

With respect to the vagueness, or non-prescriptive, nature of the requirements, the Commission considers the siting requirements as site screening tools which will be met in most cases and which, if not met fully, would require a site-specific evaluation to determine whether an exemption is warranted. The Commission finds this preferable to treating more prescriptive siting requirements as exclusionary.

Minor changes of a clarifying nature have been made to the requirements related to flooding.

Several commenters suggested that radioactive waste disposal facilities could be colocated with hazardous waste disposal facilities. The Commission does not object to this as long as the facilities are separated from one another and the wastes are not commingled. The provisions of § 61.50 pertaining to nearby facilities not adversely impacting the ability of the site to meet the performance objectives or significantly masking the environmental monitoring program would have to be met.

Several commenters raised the question of relevance of seismic or volcanic hazards to low level waste disposal, given the orders of magnitude difference between the time frames for those geologic phenomena and the hazard of the low-level wastes. Concern was also expressed that certain areas, such as California, would have all potential sites eliminated by the requirement to avoid seismic areas.

The requirement, as written, provides the Commission a mechanism for site specific evaluation of such factors as recurrence intervals, probabilities, liquefaction potential, and ground accelerations to compare against a long-term (500-year) radiological hazard and the disposal requirements of Part 61. This minimum technical requirement would not arbitrarily eliminate potential sites so much as it would provide a site screening test which will be met in most cases and will mandate a thorough evaluation of site performance in areas of known tectonic hazards.

Several persons commented on the reliability of long term projections of population growth. The Commission recognizes such projections have a degree of uncertainty. Part of the staff review of any projection focuses on this uncertainty and how it has been handled by the applicant. Previous experience with commercial low-level disposal sites illustrate that suitable sites can reasonably be found in areas of low population density and minimal population growth potential.

Two commenters suggested a siting requirement based on accessibility to major transportation routes. This issue becomes a consideration in site selection and the evaluation of alternatives required under NEPA and is not necessary in the rule.

Individual comments were received suggesting siting requirements related to mechanical and physical properties of soils to make them suitable for compaction and supporting construction equipment, and requirements to avoid areas of high natural radioactivity. Changes to the rule were not deemed necessary. The mechanical and physical characteristics of soils are factors to be addressed in the site design and operations in order to meet stabilization requirements and objectives. With respect to areas of high natural radioactivity, these areas would be excluded if they could be shown to violate the ability to carry out a monitoring program. Otherwise, the Commission sees no valid reason for excluding these areas.

Several commenters raised the general question of the length of time the various siting or design requirements have to be satisfied. Others requested that the design basis natural events or phenomena be identified and that the length of time for consideration associated with these be stated.

The siting, design, and waste-form requirements relate to both stability of the disposal site and control of releases within acceptable limits. Reliance must be placed for a longer time on the site since the waste form and design features will decrease in effectiveness over time. Therefore, each of the siting requirements should be considered applicable over the indefinite future and should be evaluated for at least a 500-year time frame. A 500-year time frame for design basis natural events or phenomena should also be applied.

Subpart D: § 61.51, Disposal Site Design for Land Disposal. Five commenters objected to the absoluteness of the requirements in

§ 61.51 relative to preventing infiltration and eliminating the contact of water with waste. Comments were also expressed requesting preferential consideration be given to progressive slope design for burial and concern was expressed that the rule does not provide specific guidance for engineered features. Commenters also expressed concern that site areas used for disposal of Class A waste will require more maintenance.

The requirements referred to are expressed as design objectives. Given that these are design objectives, the actual achievement will be to minimize, rather than absolutely prevent or eliminate. The achievement level should be as near the design objectives as is practicable. The wording of these paragraphs has been changed to reflect this. With respect to progressive slope design for burial, the regulation does not specify the type of disposal unit. The site designer should give particular attention to the design of that portion of the facility used for the disposal of Class A wastes so that the inherently unstable Class A wastes will not interfere with the long-term stability of the site.

Four commenters recommended that warning signs or permanent identification monuments be employed as a deterrent to inadvertent intrusion. Several suggested a design lifetime of 500 years for such markers.

Although there are few "signs" in the traditional sense that have design lives approaching 500 years, the Commission would consider such things as granite monuments near the survey marker control points as an appropriate adjunct to the physical intruder barriers employed in the disposal of the waste. A change to the rule has been made to require such monuments at the time the license is terminated.

Subpart D: § 61.52, Land Disposal Facility Operation and Disposal Site Closure. There were several issues related to facility operation and site closure identified by about thirty commenters. A half dozen commenters raised questions with respect to the requirement that Class A waste be segregated from other classes of waste. Questions also addressed the need for segregation during transportation, the meaning and intent of the term "interaction," and the need for segregation in arid sites.

The intent of the rule is not to prohibit waste from more than one class from being shipped on the same transport vehicle. Consistent with appropriate transportation regulations, the Commission has no objection to commingling different classes of waste in transport.

In identifying the need to clarify the term "interaction," the commenters noted that it was vague and unenforceable, could include migration, and could be physical or chemical interaction.

The intent of the rule is to protect Class B and C wastes. Class A wastes could interact with other wastes directly through the release of absorbed liquids, solvents, or other mobile components that might be present in Class A waste. Indirect interaction could result from degradation of Class A waste and its lack of stability. Consolidation of Class A wastes would provide a less stable support which could contribute to failure of the disposal unit cover leading to increased precipitation infiltration and surface water intrusion. The degree to which these interactions could occur depends to a large extent on site specific characteristics and the Commission does not believe that it is appropriate to set a prescriptive requirement in this area in the rule. The wording of this requirement has been changed to define the purpose for the segregation and minimization of interaction between the segregated wastes. The rule also permits Class A waste that meets the stability requirements to be placed with Class B and C wastes.

The State of Washington regulates the disposal site located in an arid region near Richland, Washington. The State noted that without the likelihood of ground water or surface water being factors at arid sites, segregation of Class A wastes seems to be unnecessary. They also noted that commingling Class A and B wastes would dilute the Class B wastes and have potential benefit.

The State's observations may have merit for arid sites but are difficult to adopt in a rule that must address sites located in all parts of the country. The Commission anticipated the need to consider alternative disposal requirements and included § 61.54, "Alternative requirements for design and operations" to provide for consideration of such alternatives.

A number of commenters noted that factors other than waste form play a role in assuring the stability of the site. In the area of site operations, these factors are identified as the way in which waste is emplaced and the filling of voids in between waste packages after emplacement. Several pointed out the stability problems (slumping, etc.) that could still be associated with disposal units containing the segregated and unstable Class A waste. A number of commenters objected to the requirement that wastes must be emplaced in an orderly manner because of perceived increased exposures. The requirement that was proposed in paragraph (4) of § 61.52(a) was intended to assure that the placement of packages into a disposal unit did not destroy the integrity of the package in order to minimize the possibility of releases of contamination, and also to minimize the void spaces between packages so that this would not be a contributor to site instability. It has been a common practice at waste disposal facilities to dump some wastes over the edge of a disposal trench with the packages falling and tumbling to the trench bottom where they ended up a random arrangement. This practice jeopardizes package integrity and does not permit access to voids between packages so that they could be backfilled. The assumption by the commenters that orderly emplacement necessitates increased handling by site operators with resultant higher radiation exposures is not necessarily the case. Lifting and stacking devices are currently in use for low level waste disposal that permit remote lifting and emplacement in the disposal trench without increased occupational exposure. The resulting emplacement meets the intent of protection of packaging integrity and access to void spaces. Since the term "orderly" was subject to misinterpretation, the requirement has been rewritten to remove the term and to specify the objectives of emplacement.

Six commenters addressed the requirement for maintaining a buffer zone of at least 100 feet. These comments generally supported the concept and purposes of a buffer zone, but questioned whether the specified 100 feet was sufficient. The Department of the Interior suggested that the buffer zone should be three dimensional to include some distance below the disposal site.

In response to these comments, the Commission has restated the requirement in terms of the objective to carry out monitoring activities and take mitigative measures if needed, and has made the buffer zone three dimensional.

Several persons commented on the need to conduct ancillary activities at the disposal facility such as storage, waste treatment, truck terminals, etc. Concern was expressed over the language in § 61.51(a)(7) that would seem to preclude such activities. Others felt that provisions should be made in Part 61 for the description and licensing of such activities.

The provision of § 61.51 that caused the concern was that the disposal site shall be used exclusively for the disposal of radioactive wastes. The

intent of this provision was to prevent the disposal of wastes such as toxic or hazardous chemicals which do not contain radioactive material at the facility. It was not intended, as could easily be inferred from the way the requirement was worded, that disposal is the only activity that could take place. Corrective word changes have been made to clarify this. The purpose of Part 61 is to specify the regulatory requirements for the disposal of radioactive waste. Existing requirements in Parts 30, 40, 70, *et al.*, would govern the licensing of other activities involving licensed radioactive materials, such as waste treatment or storage.

Several comments questioned the meaning of the term "a few percent above background" as applied to the requirement that limits radiation levels at the surface of the disposal unit cover. Some suggested values from as low as 1 percent of background to as high as 1 mrem/hour (about 5,000 percent of background). One commenter suggested that the radiation limit should not be confined to gamma radiation, but should be expressed as a dose rate to include other types of radiation.

The rules in Part 20 contain provisions for premissible levels of radiation in unrestricted areas in § 20.105. The Commission considers these to be appropriate for application at the time that the disposal facility license is transferred to the site owner for the period of institutional control. Although access to the site will be controlled to prevent inadvertent intrusion and the site could be viewed as a restricted area, the Commission believes it is not proper to consider those who do have access, such as caretakers and site maintenance personnel, as radiation workers who could receive much higher occupational exposures. Therefore, § 61.52(a)(6) has been changed to reflect the Part 20 unrestricted limits.

A number of other individual comments and suggestions were considered and were addressed in the detailed analysis of comments. Some clarifying changes were made to the rule as a result.

Subpart D: § 61.53, Environmental Monitoring. Only nine commenters addressed the provisions for environmental monitoring. One commenter observed that analyses of release pathways should be conducted so that they may be validated by data acquired from subsequent monitoring, a point with which the Commission agrees. Two comments addressed the 12-month preoperational monitoring requirement: one thought it too long, the other too short. While a one-year period of site specific data may not provide the range of fluctuations in data expected over a longer period, the site specific data can be augmented by reconnaissance level data or regional data that can be correlated with the site-specific data. These activities should be started early enough in the site development process that they do not interfere with a timely submittal of an application. Additional data may be obtained as the licensing process continues which can be used to update the application.

It was noted that the environmental monitoring requirements are not detailed or specific and at least one commenter suggested that highly detailed prescriptive requirements be set forth. Because of the wide variety of site-specific conditions, and a desire to avoid overly prescriptive requirements in Part 61, the Commission does not feel that this suggestion is practicable. A Branch Technical Position on Monitoring is being prepared and will provide additional guidance.

It was pointed out that one important purpose of a monitoring system is to provide early warning of migration of radionuclides from the disposal site before they leave the site boundary. The Commission agrees, and has made a clarifying change to that effect.

The Department of Interior recommended that "geochemistry" be added to the site characteristics to be studied. This has been done.

Subpart D: § 61.55, Waste Classification. Over half of the commenters on Part 61 offered comments on one aspect or another of the waste classification provisions. Nearly 20 different issues were identified and addressed in the staff's detailed analysis of comments. In general, there was support for the concept of identifying wastes that were generally acceptable for near-surface disposal and further dividing this general category into more specific classes. Most of the comments were related to understanding how these categories were established and the basis for them; support for further identifying a class of waste that would not be of any regulatory concern because of its low radioactivity, i.e., a "de minimis" level; what should the upper limits be particularly for certain radioisotopes such as the transuranic elements; what provisions will be made for disposal of waste that exceed the limits for near-surface disposal; and how does a waste generator show compliance with the waste classification requirements. There were a large number of comments requesting clarification and restructuring of the requirements to make them more understandable, as well as a number of miscellaneous comments.

With respect to those comments that the numbers used to define waste classification were not adequately explained or supported in Part 61, it should be noted that most such comments were submitted before the supporting Draft Environmental Impact Statement (DEIS) for Part 61 became generally available. Since a considerable part of the DEIS is devoted to the derivation of the waste classification numbers, the Commission does not feel that the basis needs to be repeated in detail in the rule. The Commission is preparing an analysis of the comments received on the DEIS and these comments will be factored into the final EIS to make the basis for waste classification values more understandable. Other commenters on the numerical values suggested the use of values reported in an earlier NRC contractor document, NUREG/CR-1005. The present waste classification scheme proposed in Part 61 drew on this and other earlier work; however, the earlier approaches to waste classification did not consider the effects of stability or waste form.

Table 1 Proposed values for several radionuclides that were the same value regardless of the class of waste. This has lead to some confusion and misunderstanding. In the disposal of wastes, precautions are taken to provide protection against intrusion for the first several hundred years. These precautions include institutional controls, waste form requirements, and intruder barriers. There are certain radionuclides common to waste that are of such a long half-life that they will be present several hundred years from now in essentially the same concentration as when they were originally disposed. Therefore, the rule limits the initial concentrations of these radionuclides to values that will be acceptable after several hundred years when the intrusion protection measures are not considered to be effective.

Over one fourth of all commenters endorsed the concept of setting levels for wastes below which there is no regulatory concern, the so-called "de minimis" level. Some of the commenters supporting the de minimis concept made direct reference to the Commission's position that exempting particular waste streams from compliance with the Part 61 regulations was preferable to setting generic levels for all isotopes. Several disagreed with this position, although at least one of these commenters remarked that as there is not yet a consensus on a

generic de minimis level, any level chosen would be premature. A number of other commenters suggested that a de minimis classification be added to the Part 61 regulations, perhaps as an additional column in Table 1.

Several commenters suggested that NRC permit case-by-case review of requests for specific application of the de minimis concept during the period criteria are being developed. Others suggested specific values for specific waste streams or radioisotopes.

The fundamental concern of practicially all commenters was not as much whether a generic or a case-by-case approach be taken, but rather that action to develop de minimis standard should be taken as soon as possible.

The Commission agrees with the importance of setting timely standards for disposal of certain wastes by less restrictive means. The Commission agrees with the commenters that establishment of such de minimis levels would reduce costs of disposal for many licensees and would also conserve space in disposal facilities which are otherwise designed for wastes having much higher activities. The Commission also believes that establishment of de minimis levels is important in enhancing overall stability of a disposal facility, and therefore in reducing potential long-term site maintenance and corresponding costs, since de minimis levels would reduce the volume of Class A waste. This would also tend to reduce ground water migration impacts, since subsidence and water infiltration would be reduced.

Regarding the issue of setting de minimis levels on a generic or on a case-by-case basis, the Commission still believes that the current policy of examining waste streams on a case-by-case basis will result in the quickest and best results. It is recognized that setting generic limits may be a desirable goal, and the Commission Plans to work this goal over the next few years. Meanwhile, the Commission believes that the process of examining a few specific waste streams will facilitate the development of generic requirements and is accelerating its efforts on setting standards for disposal of wastes by less restrictive means. In this regard, the Commission staff is willing to accept petitions for rulemaking from licensees, licensee organizations, or others for declaring certain waste streams to be of no regulatory concern. Such petitions should provide at least the following information:

- A description of the process by which the waste is generated;
- A description of the waste generated, including chemical characteristics;
- The radionuclide content of the waste, including principal *as well as* trace contaminants;
- A description of the potential change in the radionuclide content as a function of process variations;
- A description of the process control and quality control programs by which the licensee would ensure compliance.

Waste streams common to a number of licensees and in which the radionuclide content is well known and relatively nonvarient are generally preferred. Individual licensees may also continue to request amendments for alternative disposal methods for the licensee's own waste pursuant to § 20.302.

Of all the values proposed in Table 1, the limits for contamination by alpha emitting transuranic elements received the most attention and comments. There were a number of issues raised related to the allowable concentration, ranging from its validity to the impacts of meeting the limit. By far the most comments were related to the magnitude of the limit. Of the 23 commenters on the transuranic issue, four thought the 10 nCi/gm limit should be retained or lowered, while the remaining 19 suggested that the limit be raised. Those who suggested that the limit be raised presented a number of supporting arguments. Many, if not most, of the commenters suggested that the limit could be safely raised to 100 nCi/gm. One argument given is the advantage of enforceability of the higher limit. With current measurement techniques, it is argued that it is very difficult if not impossible to certify that waste contains less than 10 nCi/gm, but much less difficult to certify that it is less than 100 nCi/gm. Others pointed out that a 100 nCi/gm limit would encourage volume reduction through incineration and other means while conversely, the 10 nCi/gm limit would discourage volume reduction, contrary to the Commission's policy on volume reduction. The commenters cited a number of reports, documents, and ongoing activities as providing justification for their contentions, including a proposed revision to the Department of Energy Manual Chapter 0511. Some commenters felt that the Commission's calculations were excessively conservative. The most common comment in this regard was that the analysis did not consider dilution by other wastes, and if that dilution were considered, the allowable concentration could be increased by an order of magnitude or more.

The commenters that supported the 10 nCi/gm limit or did not want it raised generally made statements of endorsement for the value because of prior use or because of the view that wastes exceeding this limit should not be buried at commercial low-level waste disposal sites. Concern in this regard was also expressed over the provision in § 61.58 that the Commission could, on a case-by-case basis, grant exemptions to the waste classification requirement, thereby permitting disposal of higher concentrations of transuranic radionuclides.

In response to these comments, the Commission has reevaluated the analyses for disposal of waste containing transuranic nuclides, in an attempt to temper unnecessarily conservative assumptions, such as not considering the dilution by other wastes that decay to essentially inert levels with time, so that more realistic estimates of consequences will result. As a result, disposal limits for Class C, waste have been raised to 100 nCi/gm for long lived alpha emitting transuranic nuclides. For Class A wastes, the limit remains at 10 nCi/gm. The details and results of these analyses are presented in the Final Environmental Statement supporting Part 61.

Several commenters wanted to know what to do with waste containing Radium-226, a radioisotope which is not currently listed. It appears that there are two types of radium wastes to be considered: (1) small concentrated sources of radium such as radiation sources or luminescent dials, and (2) wastes which contain small amounts of radium incidental to other radioisotopes, such as radium contained in wastes from uranium separation processes. The former is not subject to regulation by the Commission, since radium is a naturally-occurring isotope and is not included in the provisions of the Atomic Energy Act of 1954, as amended. The Environmental Protection Agency has a program for collection of radium sources. This program may be phased out in the next few years. Such sources are expected to be transferred to the Department of Energy for storage and disposal. As for radium incidental to other types of waste, the Commission has made provisions for disposal of small quantities of uranium tailings as Class A waste. For purposes of this provision, a small quantity is defined as 10,000 kilograms containing not more than 5 millicuries of radium-226. This concentration is typical of uranium mill tailings (0.5 nanocuries per gram). The quantity of radium-226 is that contained in 150 pounds of natural uranium at

equilibrium with its daughter products. 10 CFR Part 40 permits any person to possess and use under general license 150 pounds of source material per year. Permitting the disposal of such a quantity in a near-future disposal facility is judged to be acceptable. For larger amounts, specific approval would be required.

Several commenters expressed concern with a footnote in Table 1 and § 61.55(d) which indicate that greater concentrations than Class C limits may be determined to be acceptable for near-surface disposal under certain conditions. Commenters were either opposed to permitting any higher concentrations or asked for clarification of what the requirements would be for higher concentrations.

The Commission established the Class C limits using the performance objectives as criteria to ensure safe disposal of waste considering the degree of protection provided by "normal" near-surface disposal. To ensure that the performance objectives are met, disposal of higher concentrations of isotopes than those listed in Table 1 would have to be by disposal technologies having greater confinement capacity or protection than "normal" near-surface disposal. Such improved disposal technologies could, depending on the particular radioisotopes, involve better waste forms or packaging, or disposal by methods having additional barriers against intrusion (e.g., burial at depths greater than 5 meters). The Commission believes that some flexibility should be permitted, provided the performance objectives are met, and therefore will evaluate exceptions on a case-by-case basis. In the meantime, the Commission is beginning studies to establish criteria for the disposal of wastes that are not normally suited for near-surface disposal. These would be the subject of future rulemaking.

Over one dozen commenters, nearly all of which were nuclear utilities or industry groups, expressed concern with how one determines compliance with the waste classification requirements. Most were concerned that the regulations would require them to routinely measure for every isotope in Table 1 within each package of waste. Many examples were given of the difficulty that this would present, citing heterogeneous waste mixtures, difficult to measure radioisotopes, increased costs, radiation exposures to personnel, etc. A number of suggestions were offered related to means of classifying the waste by its source, measuring key isotopes to infer quantities of more difficult-to-measure isotopes, and establishing different limits for every disposal site.

The Commission expects licensees to carry out individual programs to assure proper classification of waste. However, the Commission does not feel that detailed measurements routinely made on all waste packages are necessary or desirable. The Commission staff is developing guidance to licensees on a number of alternative methods by which compliance can be shown. At present, the Commission staff has identified four basic programs which may be used either individually or in combination by licensees. They are: materials accountability; classification by source; gross radioactivity measurements; and direct measurement of individual radionuclides including scaling some radionuclides based upon measurement of others. These methods are discussed in the Branch Technical Position on Waste Classification being prepared.

Several commenters also raised the issue of averaging concentrations to comply with the concentration limits. One expressed concern about the potential for concentrated or "hot spots" of transuranic nuclides permitted under the proposed provision to allow concentrations to be averaged over the volume of the package. Since the trace transuranic nuclides in most shipments will be homogeneously distributed and incidental to the total activity, averaging over the packages is physically representative of the majority of wastes. Reprocessing or other future changes in waste streams which might change the transuranic character of the waste can be addressed in subsequent rule changes. Other commenters were concerned about potential ground water restricted inventory limits on radionuclides which are present in wastes in very low concentrations. Assay of individual packages for these nuclides is difficult as discussed in the preceding paragraph. Averaging the concentration of radionuclides such as Tc-99 or I-129 over the waste shipment or control on a total site inventory basis was suggested to minimize conservative over-reporting. Such over-reporting could exhaust site inventory limits and lead to inefficient use of the site. The Commission agrees. This issue will also be addressed in the Branch Technical Position on Waste Classification which will be available in early 1983. The concentration averaging language in the final rule was changed to provide additional flexibility for the specific guidance being developed in the Branch Technical Position.

In a related issue, a few commenters remarked on the difficulty of inspection and enforcement to ensure compliance with the Part 61 requirements, citing past history of waste shippers not complying with the present DOT and NRC shipping requirements.

The Commission has recognized the importance of increasing inspection and enforcement activities in the processing, packaging, and transportation of waste. A number of programs have been initiated to improve compliance. At the present time, enforcement comes largely on the basis of provisions in the existing regulations (e.g., 10 CFR Parts 30, 40, and 70) that no licensee may transfer licensed material to another person unless that person is properly licensed to receive it. Requirements on waste form, concentrations, etc., are a part of the disposal site licensee's license. The Commission believes that issuing regulations to which all waste generators and disposal site operators would be subject will give the Commission a stronger basis for inspection and enforcement. Adoption of uniform requirements by Agreement States will greatly bolster the effectiveness of a national system of inspection and enforcement.

There were several commenters who argued that the waste classification scheme tends to discourage volume reduction, since this increases concentrations of radioisotopes and may result in a change in classification, or at the extreme, make the waste unacceptable for near-surface disposal. As long as the resulting concentrations of radioisotopes are within the limits set by Part 61, the Commission does not feel that waste classification necessarily discourages volume reduction. While a higher classification of waste might result in more stringent requirements on waste form and disposal methods, there are economic considerations that need to be considered by the waste generator. The cost of processing, shipping, and disposal of a small volume of higher classification waste needs to be compared with the transportation and disposal of a larger volume of a lower classification waste. There is no reason to believe that the balance will always be against volume reduction. For wastes with concentrations that would place them not generally acceptable for near-surface disposal if they were volume reduced, the provisions for specific Commission approval of the disposal of such wastes provides a potential alternative for licensees considering volume reduction.

Several commenters were concerned with materials which may be present in low-level radioactive waste which may be chemically toxic or hazardous. Some

suggested that the Commission's waste classification system incorporate a "total hazard" approach that would consider both the radiological and chemical hazard of wastes. At least one comment did not favor the total hazard approach because of the very complex classification system that the commenter perceived would result.

The Commission has stated publicly on several occasions that if it were technically feasible to classify waste by total hazard, then it would make eminently good sense to do so. We do not now know of any scheme for such classification; however, the Department of Energy intends to support research into the development of a classification system for hazardous waste that might be compatible with Part 61. In the meantime, the Commission will study the chemical toxicity of low-level waste, with special emphasis on identifying any licensees who generate hazardous wastes subject to requirements of the Environmental Protection Agency. We will look then at what could be done, perhaps through processing, to minimize the hazard.

Furthermore, the Commission believes that the technical provisions of Part 61 generally meet or exceed those expected in the Environmental Protection Agency's rules for the disposal of hazardous wastes. Although it is not the Commission's intent to allow disposal of hazardous wastes in a radioactive waste disposal facility, as is noted in the regulation, the Commission recognizes that such wastes may be present in low-level radioactive wastes. It is the Commission's view that disposal of these combined wastes in accordance with the requirements of Part 61 will adequately protect the public health and safety. Such hazardous wastes are expected to be such a small percentage of the total volume that dilution by other wastes would greatly minimize any risks. The Commission intends to work closely with the Environmental Protection Agency to assure continued compatibility. Further, EPA in its response to a resolution of the Conference of Radiation Control Program Directors indicated their willingness to work with other Federal agencies to address this problem.

Several commenters raised questions on the basis or criteria for setting site inventory limits for certain radionuclides, as was indicated in Table 1 of the proposed rule. Some correctly noted that such inventory limits would be site specific. The Commission established concentration limits for radionuclides based on a number of considerations, including protection of a potential intruder, operational safety, and long-term site stability. In addition to concentration limits, the Commission desires the ability to limit maximum site inventories for some isotopes that are of concern from a ground water point of view. Isotopes which are both mobile and long-lived are iodine-129, technetium-99, and carbon-14. Tritium is of concern due to its extreme mobility and its presence in waste in large quantities. Establishment of inventory limits through site-specific license conditions for such radionuclides will help ensure that the performance objectives for ground water migration are not exceeded. The Commission does not plan, as was suggested by a few commenters, to establish site inventory limits for every isotope to protect against potential intrusion. Inadvertent intruder exposures are mainly controlled by the concentration of a particular isotope, and to a lesser degree by the site inventory.

Several commenters raised specific points about the cost and regulatory burden of the waste classification requirements. Much of the concern was related to the issue of costs for determining compliance with the concentration limits, as discussed earlier. The basis of the concentrations, in particular the 10 nanocurie per gram limit for transuranic nuclides was of concern and is discussed elsewhere. One commenter expressed the view that the classification requirements would raise the cost of disposal because of perceived increased cost for disposal of Class A waste and the cost of quality control activities.

While some costs will be associated with these concerns, when they are weighed against the longer term costs and institutional burdens that may result if the requirements are not adopted, the Commission judges the short-term costs to be warranted.

The State of Nevada, who regulates the Beatty site, expressed the view that the rule will increase the burden and expenses of the regulatory agencies. Two reasons cited related to monitoring the adequacy of site maintenance funds and inspection of waste generator packaging and classification activities.

Monitoring the adequacy of funding is already a part of the program for regulating disposal sites and is only peripherally related to waste classification in that stability is not assumed for Class A wastes. This is not different from the existing situation at disposal facilities where a large percentage of waste is not in a stable form. Thus, this does not appear to be a significant increase in regulatory burden. Inspection of waste generators for compliance with waste classification is more the responsibility of the Commission or the Agreement State regulating the generator. Existing regulatory responsibilities include inspection of the packaging and shipment of radioactive waste. The incremental burden of reviewing a licensee's program for classifying these wastes should be small.

In addition to the above issues, a large number of commenters offered individual comments on a variety of points of clarification, format, definition, and completeness of the provisions for waste classification. While not summarized here, they are addressed in the detailed analysis of comments by the Commission staff, and to the extent practicable, these comments were reflected in the revision of § 61.55.

As a result of these comments, § 61.55 has been revised to present the classification values in two tables rather than one. Those radio-nuclides with long half-lives, along with some shorter-lived precursors of long-lived nuclides, are now listed separately in a new Table 1. The presence of these long-lived radionuclides will dominate the classification of the waste. If waste contains less than one tenth the concentration of such a nuclide listed in Table 1, it is Class A waste; greater than that, it is judged to be Class C waste provided the concentration does not exceed the value shown in Table 1. Shorter-lived radionuclides are listed with a range of concentrations in Table 2. Depending on the concentration, wastes containing only these shorter-lived nuclides will be judged to be Class A, B, or C. If waste contains nuclides listed in both tables, the mixture must be considered in determining the waste class. If Table 1 nuclides are present in concentrations less than one tenth the Table 1 limits, the class is determined by the Table 2 nuclide concentration. If Table 1 nuclides exceed one tenth of the Table 1 limits the waste is Class C regardless of the Table 2 concentrations.

The phrase "theoretical maximum specific activity" has been eliminated and replaced with a notation of "no limit." A footnote to Table 2 explains that while there is no theoretical limit for concentrations of certain nuclides in Class B and C wastes, practical considerations such as radiation and heat generation will determine the limits.

Several radionuclides have been removed from the originally proposed table. Cesium-135 was removed because it is present in wastes in very small concentrations and classification will be

determined by the presence of Cs-137 and because Cs-135 is a pure beta emitter which is very difficult to measure. Similarly, the radionuclides Ni-59 and Nb-94 have been removed except as they may be contained in activated metals. As examined in the draft environmental impact statement of Part 61, these nuclides are present in reactor wastes (other than activated metals) in such small concentrations as to be insignificant. Uranium has been removed as a radionuclide that must be considered for waste classification. The Commission's analysis shows that the types of uranium-bearing wastes being disposed of do not present a sufficient hazard to warrant limitation on the concentration of this naturally occurring material. Both depleted and enriched uranium do not contain daughter products in any quantity because of the relatively short time since the uranium was refined from ore, compared to the half-lives of the uranium isotopes. The daughter products are disposed of primarily as uranium mill tailings. Primarily for these reasons, the uranium limits were dropped.

For a number of radionuclides, the maximum allowable concentrations in Class C waste have been increased by a factor of ten. This came in response to a number of comments received on the proposed rule and the draft environmental impact statement that pointed out where unnecessarily conservative assumptions had been incorporated into the calculations for intruder protection. These comments pointed out that waste disposed beneath five meters of cover would be difficult to contact even at 500 years and that such waste would be diluted by the other wastes whose radioactivity had decayed to extremely low levels. Additionally, the average concentrations tend to be only a fraction of the maximum permissible. At the present time, these are recognized by the Commission as conservative assumptions and the Commission has found that an order of magnitude increase in Class C limits is warranted. This order of magnitude increase has not changed the established framework of factors such as relying on up to 100 years of institutional control and a 500 mrem whole body limit for intruders.

The radionuclide, curium-242, was added to the nuclides in Table 1. While Cm-242 is a relatively short-lived nuclide (163 days) it decays to plutonium-238, a transuranic nuclide with a half life of nearly 90 years. The concentration of 20,000 nanocuries per gram for Cm-242 will result in a concentration of 100 nanocuries per gram of Pu-238.

To the extent practicable, the numerous footnotes originally found in the proposed Table 1 were eliminated and have been incorporated, where appropriate, into the textual part of the section on waste classification.

In response to a number of comments, a statement is made that permits the concentrations of nuclides in waste to be determined by means other than direct measurement. These methods may include such things as material accountability, where records of receipts, shipments, and inventories can confirm that waste concentrations could not exceed permissible concentrations. Other indirect methods might include "inferential" measurements where a ratio is established between nuclides in a mixture and the concentrations of the difficult-to-measure nuclide is inferred based on measurement of some easier-to-measure nuclide. Whatever the indirect method used, there should be reasonable assurance that the values determined could be correlated with actual measurements. For example, in the case of inferential measurements, the ratio on which the value is determined should be based on previous actual measurements. In the other example above, the receipts, shipments, and inventories should be based on measured value.

Subpart D: § 61.56, Waste Characteristics. A large number of comments were received addressing both the minimum and the stability requirements for waste form characteristics in § 61.56. The following summarizes the comments on the minimum requirements.

One commenter objected to the use of absorbent material to immobilize liquids contained in Class A waste, stating that using absorbent materials was an obsolete technique. The State of South Carolina recommended that this requirement apply only to institutionally generated aqueous or biological waste forms. Since various absorbents have been shown to be effective with liquids, such as organic solvents, oils, etc., the Commission sees no reason to restrict the use of absorbent material to aqueous or biological waste. The Commission does not see any reason to restrict the use of absorbents to institutional generators.

Eighteen commenters stated that the requirement (proposed in Table 1, § 61.55) to obtain specific approval to dispose of wastes containing greater than 0.1 percent chelating agents was too restrictive, and stated that utilities might decide against performing decontamination operations which could reduce occupational exposures. Several commenters requested the basis for the 0.1 percent limit. One commenter recommended that no chelating agents be permitted.

Since chelating agents have been shown to increase the migration of certain radionuclides at certain sites, the Commission desired to evaluate the disposal of large quantities of wastes containing high concentrations of chelating agents on a case-by-case basis. This approach was used when the Commission staff reviewed the disposal of wastes that would be generated in the decontamination operations at the Dresden Unit 1 Station. Because the disposal of wastes containing chelating agents is dependent on the characteristics of the disposal facility and on the properties of the waste form, the Commission has modified the chelating agent disposal requirements to reflect this. The Commission has placed on the disposal site license applicant the responsibility for describing the conditions for disposal of waste containing chelating agents. If approved by the Commission, site specific requirements will be placed on the disposal facility licensee. At this time the waste generator will be required only to identify such wastes in the information contained on the shipping manifest.

At the request of comments, definitions have been added for the terms, "hazardous," "pyrophoric," and "explosive."

Of five comments received on the prohibition against packaging waste in cardboard or fiberboard boxes, four felt the prohibition is unnecessary. One commenter supported the provision. After reviewing the comments, including the reasons presented, the Commission still believes that such a prohibition is needed. The experience cited by the Department of Energy, of successfully using cardboard containers for waste packages at their sites, does not include extensive handling and transportation that commercially generated wastes might encounter. The existing prohibition against cardboard and fiberboard containers at existing disposal facilities came about as a result of unfavorable experience in receiving, handling, and disposing of wastes in such containers. No change has been made in this requirement.

Ten commenters addressed the requirements relating to waste in a gaseous form. Several noted an inconsistency between the provisions in §§ 61.56(a)(5) that prohibits wastes capable of generating toxic gases, and

61.56(a)(7) that permits up to 100 curies of activity in waste in a gaseous form. Several requested the basis for the 100 curie limit. A recommendation was made that gases should be processed into liquid or solid forms, and another felt that gases should be limited to several microcuries. The Department of Energy recommended that krypton 85 immobilized by zeolite encapsulation or ion implantation into metal be permitted with concentrations up to five million curies per cubic meter.

The intent of § 61.56(a)(5) is to prohibit the disposal of wastes that are chemically reactive under ambient conditions and produce toxic gaseous reaction products. This section is not intended to prohibit the disposal of properly packaged gases such as H-3 or Kr-85 which occasionally require disposal. This section has been reworded to clarify the intent. The 100 curie limit derives from the existing limits at commercial disposal facilities. The Commission has studies underway to determine whether higher limits would be appropriate. Such limits, if justified, would be proposed in a future rulemaking. In lieu of a requirement that gases be converted to a liquid or a solid, the Commission is evaluating the significant generators of tritium wastes and investigating improved package designs for tritium wastes which would be capable of retaining the contents until they had decayed to innocuous levels. The requirements of Part 61 do not contemplate the disposal of millions of curies of Kr-85 as suggested by the Department of Energy. The Commission is not prepared to set disposal requirements for this waste at this time, and since this waste is not liable to be generated by Commission licensees in the near future, the Commission believes there is ample time to assess the still emerging technology for krypton fixation and establish suitable disposal requirements through future technical guidance or rulemaking action.

Some commenters felt that the requirement in § 61.56(a)(1) that waste packages presented for disposal must comply with NRC and DOT transportation regulations implied that outer packaging such as shipping casks must also be disposed. This was not the Commission's intent. Since proper packaging for transportation purposes is specified in regulations elsewhere, the Commission feels that it is not necessary to restate them in Part 61, particularly in view of the confusion created. This requirement has been deleted.

As discussed earlier, the Commission is concerned with the possible hazards presented by non-radiological components of the radioactive waste. This was recognized in the requirement proposed that wastes containing biological, pathogenic, or infectious material must be treated to reduce the potential hazard to the maximum extent practicable. The Commission believes it is prudent to add hazardous properties to this requirement and has done so.

A variety of comments were received on the proposed requirements in § 61.56(b) that pertain to the stability of Class B and C wastes. These are discussed below for the various aspects of the requirement.

Nine commenters commented on the statement that the requirements were intended to provide stability for at least 150 years. Three thought that the 150 years was overly restrictive and two recommended 100 years to correspond to the institutional control period. Others observed that some nuclides would not decay to low levels during the 150 years, that Class A waste should also be stable because of the presence of Cs-137 and Sr-90, that steel drums could not be expected to last this long, and that high integrity containers have not been tested for 150 years.

The Commission has reviewed the 150 year stability requirement with respect to the scenarios used to calculate the waste classification values. The property of stability contributes to meeting successfully several of the performance objectives set forth in Part 61. A waste that is stable for a long period helps assure the long term stability of the site, eliminating the need for active maintenance after the site is closed. This stability helps to assure against water infiltration due to failure of the disposal unit covers and, with the improved leaching properties implicit in a stable waste form, minimizes the potential for radionuclide migration in groundwater. Stability also plays an important role in protecting an inadvertent intruder, since the stable waste form is recognizable for a long period of time and minimizes any effects from dispersion of the waste upon intrusion.

The 150 year period was initially chosen to approximate the active life of a near-surface disposal facility, along with the periods of post-closure observation and institutional controls. At the end of this period, the intrusion scenario is based on the intruder readily recognizing any uncovered waste as something out of the ordinary with the result that no further attempts at construction or agriculture would be attempted. When other aspects of the performance objectives are considered, however, a longer design life is called for. The waste should continue to maintain its gross physical properties and maintain a measure of its identity for several hundred years more to provide site stability and to keep the Class B and C waste recognizable and unsuited to the construction and agriculture scenarios postulated. Consistent with its desire to avoid prescriptive requirements where possible, the 150 year specification has been removed. It is the Commission's belief, however, that to the extent that it is practicable, waste forms or containers should be designed to maintain gross physical properties and identity over 300 years, approximately the time required for Class B waste to decay to innocuous levels. This is reflected in Commission staff technical positions.

Fourteen commenters indicated that the proposed requirement that a stable waste form maintain its physical dimensions within five percent was overly restrictive and impossible to achieve due to the impracticality of filling containers to 95 percent capacity. Commenters also noted that asphalt and polymeric solidification agents would be incapable of meeting this requirement because of their viscoelastic creep properties. Commenters also observed that the limit could entail added expenses.

Upon review of the proposed requirement, the Commission has concluded that there is not sufficient basis at this time to support a numerical limit for deformation of stable waste. The five percent value has been removed from this requirement. Reliance will be placed on the requirements that void spaces within packages must be minimized, that wastes must be emplaced in a manner that permits void spaces between containers to be filled, and that these spaces must be filled.

With respect to void spaces in waste containers being reduced to the extent practicable, six comments were received. Several requested specific criteria on how this would be met and if filler materials were needed. Two felt that economics would drive waste generators to package the maximum volume of waste into a container and that this requirement in the rule is unnecessary.

Due to the highly variable nature of wastes, the Commission believes that it is not possible or desirable to include specific criteria for minimizing voids. To the extent that void spaces can contribute to eventual instability of the waste, they should be eliminated or reduced as much as possible. This might be done in some cases by filling void

spaces with other wastes or inert materials.

Eleven commenters objected to the specific requirement that the stability of waste be maintained under a compressive load of 50 pounds per square inch (psi). Most felt that the specific requirement should be deleted and replaced by a more general requirement to reflect actual disposal site conditions and operations.

In response to these comments, the 50 psi specification has been removed from the rule. The specification was based on conservatively assuming maximum burial depths up to 45 feet and waste or overburden densitity of 150 lb/ft.^{3}. Testing performed on acceptable solidified waste specimens indicate that 50 psi compressive strength should be easily obtained. The Commission believes that while this is achievable, some latitute should be allowed for the design of waste forms and containers to reflect site conditions where burial depths may be less.

Since § 61.56(b) permits the stability of waste to be achieved by placing the waste in a suitable container for disposal, a number of comments addressed the properties such a container should exhibit and the uses to which it should be put. It was suggested that the Commission reexamine design criteria for a high integrity container for highly dispersible forms, and one suggested that such container should be used for both high and low concentration wastes. A major supplier of waste solidification technology questioned whether the use of a container reflected the best available technology and the concepts of ALARA.

Three commenters, two of whom are suppliers of waste solidification technology and services, felt that ion exchange resins should all be solidified and that disposal of ion exchange media by dewatering is not within the concepts of ALARA and use of the best available technology.

The Commission staff is preparing a technical position on waste form criteria, including design criteria for a high integrity container. Draft copies have been made available to interested parties for their review and comment. In short, the technical position states that the container must provide as much assurance of stability for as long as required for a stable waste form or product. It should be designed, to the extent that it is practicable, to contain the waste and maintain gross physical properties and identity over 300 years, under the conditions of disposal. The Commission believes that the use of containers to achieve stability is consistent with the concept of ALARA and the use of the best available technology. Occupational exposures in using high integrity containers are expected to be similar to or less than waste solidification, either with mobile or installed systems.

Several commenters addressed the proposed limitation of free standing liquid which would require that such liquids be reduced to as low a level as is reasonably achievable, but in no case to exceed 1 percent. Further, the proposed rule stated that the liquid should be noncorrosive. There were no requests to increase the value. However, one waste solidification service supplier recommended a limit of zero, while the State of South Carolina recommended implementing the limits in the license for the Barnwell disposal facility, i.e., 0.5 percent for solidified wastes, 1 percent for waste in high integrity containers. Several commenters asked for a definition of the term "noncorrosive."

The Commission has reexamined the proposed limit on free standing liquid and judged that solidified wastes and wastes in high integrity containers should be addressed separately. The Commission has concluded that existing waste solidification technology can produce a waste form that is essentially free of free standing liquid. In order to compensate for potential condensation of water vapor sealed in containers, the Commission believes that a limit of 0.5 percent by volume is appropriate for solidified wastes. For dewatered products, such as ion exchange resins, that are in a container designed to ensure stability, it is very difficult to ensure that such products would meet a 0.5 percent requirement following transport to a burial site. Therefore, for dewatered products, 1 percent should be allowed to account for settling during the transport period. The non-corrosive properties of the liquids will be defined and discussed in a staff technical position, rather than in the regulation. To provide a degree of consistency between Class A wastes and the Class B and C wastes, the limitations on liquids in Class A wastes have been modified. Liquid waste must be packaged with sufficient absorbent material to absorb twice the volume of the liquid. Solid wastes with incidental liquids must meet the 1 percent free standing liquid requirement.

Two commenters pointed out what they perceived as inconsistencies between Part 61 and other Commission rules or guides. One of the guides referenced is the Effluent Treatment Systems Branch Technical Position 11–3. This document was revised in July 1981 and is consistent with Part 61 requirements. The Commission fails to see inconsistency between Part 61 and its supporting EIS, with Appendix I of Part 50, or guidelines for storage of waste, as claimed by the commenters.

Subpart D: § 61.57, Labeling. Several commenters offered suggestions or raised questions on the requirement that waste packages be labeled to show the classification of the contents. The commenters suggested color coding, different wording, consistency with DOT labeling, minimum standards, and asked for clarification of responsibilities.

The requirement for labeling is to provide the disposal facility operator with information as to whether the contents are Class A, B, or C wastes so that he will be able to dispose of them in the proper manner. The Commission does not feel that a Federal standard for such labeling is warranted, only that it be clear and legible. Individual facility operators may have operating procedures that could be enhanced by label location, size, color, etc. Since the label is to benefit the operator, it is more appropriate for him to set specifications through contractual arrangement. A suggestion to simplify the nomenclature on the labels was adopted and a minor change was made in § 61.57.

Waste classification labeling is in addition to labels required by DOT for transportation purposes. There is a similarity in nomenclature between the Class A and B wastes and the Type A and B packages used by DOT. DOT requires that packages be labeled as to whether they are Type A or B, therefore, there could be some confusion if the packages are labeled to indicate the waste classification. However, DOT has a variety of numerical and alphabetical designations and it is difficult to avoid some similarity in designation.

Subpart D: § 61.59, Institutional Requirements. There were few comments on the requirement for State or Federal ownership of the disposal site. Those commenting expressed general support. One commenter suggested that the State should have an option to turn ownership and responsibility for long-term custody over to the Federal government. Such an option is not available under current law. In related comments, two commenters expressed concern over the State's responsibility and liability after accepting the disposal site for custodial care. Since the State does become responsible for the site, the State must be involved and aware of the operations and conditions at the site during its operation. This could be done through some independent oversight as landlord, or through participation with NRC in the

review of the initial application as provided in Subpart F of Part 61.

About twenty commenters addressed the appropriateness of the 100 year limit on institutional controls and its effect on wastes acceptable for disposal under the conditions prescribed by Part 61. All commenters expressed support in one way or another for defining a time frame for institutional control related either to the hazard duration of the waste or assurance of continued government stability or concern. It was generally agreed that waste that was potentially hazardous after the end of the assured institutional controls should be disposed of by methods providing greater controls and assurances against potential exposure. These comments are judged to support the provisions of Part 61 that combine institutional controls with waste form, site characteristics, and site design and operations to provide assurances that potential exposures will be with acceptable limits. Class A waste that is potentially accessible and unrecognizable is no longer hazardous after 100 years. Special provisions for waste being in a stable form and in some cases buried deep assure against potentially unacceptable exposures or releases for up to 500 years.

There were a number of suggestions that the period of institutional control should be raised from 100 to 300 years. There appear to be two basic reasons for these suggestions. One reason is that institutions such as a state or the Federal government can reasonably be expected to survive for much longer than 100 years. A second reason is that the 100 year restriction on institutional care affects the waste concentrations acceptable for disposal as Class A waste with resultant higher costs to the waste generator. With respect to the first reason, the Commission feels that it is not a question of how long the government can survive, but how long should they be expected to provide custodial care. Based on work done by EPA, public comments on a preliminary draft of Part 61 and an advanced notice of proposed rulemaking, and four regional workshops, a clear consensus was developed which supported the 100 year limit. The Commission has not seen any compelling reasons to change its view on the 100 year limit.

Some commenters expressed the view that the government landowner should have flexibility in controlling site access during the institutional control period and that productive uses of the land which would not affect site integrity should be permitted. The Commission agrees and words to that effect have been added to the Concepts section, 61.7.

Subpart E: Financial Assurances. Approximately two dozen commenters responded to the proposed financial assurance requirements for closure and post-closure care. In general, the commenters expressed support for the rule's establishment of financial assurances for closure and for long term care of a LLW disposal site. Commenters mentioned that the existing history of LLW disposal sites revealed a strong need to require licensees to demonstrate evidence of financial responsibility so that the public health and safety were protected and also so that potential liabilities do not rest with state taxpayers.

Several commenters felt that the financial requirements should provide more detail. The Commission agrees and has prepared a draft Branch Technical Position on Funding Arrangements for Closure and for Long-Term Care of a LLW Disposal Site that provides definitive guidance for evaluating all financial assurances, including surety bonds.

One of the major points raised by a variety of commenters was that the proposed regulation failed to address financial responsibility for unanticipated contingencies at a LLW disposal site. One group expressed concern that the regulations set the stage for a "tax-payer funded bail-out" of poorly-run disposal sites. They felt the industry should bear these costs, and that the regulations should be written to make this explicit. Another commenter noted that the experience of the State of Kentucky with Maxey Flats emphasized the importance of making contingency funds available in the event that serious problems occur. They felt this issue should be addressed in the rulemaking. One State further noted that the rule failed to mention who would be financially responsible if problems occur at the site that cost more than were budgeted on an assumption of normal operation. These questions cover such a variety of different scenarios (i.e., Acts of God, licensee negligence, etc.) that it is not possible to specifically respond to all of the potential contingencies. However, a general response to the overall issue of responsibility for contingencies at a low-level waste disposal site is possible. These comments cover two different time periods—the post-closure period, when the original licensee is still responsible at the site, and the institutional control period, when the license has been transferred to the landowner of the site for a period of up to one hundred years. In the case of the post-closure care period, the licensee would be responsible for all activities at the site found necessary by the Commission to protect the public health and safety. Financial responsibility for activities during the institutional control period are a matter to be worked out between the site owner (i.e., the State or Federal Government) and the licensee in their lease or other legally binding arrangement. It is possible that if the site owner were a state, they would work out an arrangement whereby the site operator would collect a surcharge from waste generators for the institutional control period. The rights and responsibilities of the State and the licensee would be determined at such a time.

With regard to contingencies, one commenter also asked who would assume responsibility for a site and its accompanying waste when it was closed prematurely by the NRC, due to rule violation. Responsibility for a site closed prematurely by the NRC would depend on the situation. Additionally, closure would be a last resort of the Commission, since the agency has other authorities, such as civil penalties, to require licensee compliance. In the event it would become necessary to close the site for health and safety reasons, the rule provides that the licensee continues to be responsible until the license is terminated. In the event that the licensee's financial condition deteriorated so that he was unable to maintain the site to protect the public health and safety, then the Commission would probably require the site owner (either the State or Federal government) to assume responsibility at the site.

Regardless of who assumed responsibility for a prematurely closed site, the rules require that a licensee have available at all times during the site life, sufficient financial guarantees to ensure that sufficient funds are available for site closure and decommissioning. These funds would be available for properly maintaining the site if the original licensee were unable to do so.

Several commenters considered that the rule should resolve the issue of financial responsibility for contingencies by requiring liability insurance or specific language that licensees would be required to indemnify property owners in case of off-site migration. Although not proposed in the original rule, the staff evaluation of these public comments indicates there is a need for licensees to provide financial responsibility for liability coverage for

off-site bodily injury and property damage. The Commission thinks the public health and safety and the environment would be protected from unanticipated contingencies by such coverage, as well as assisting the States in establishing disposal sites. Four existing LLW disposal facilities currently carry this type of liability coverage, and several other State and Federal agencies, including EPA have imposed similar requirements for hazardous and radio-active waste facilities in order to protect the public health and safety and the environment. However, at the present time, the Commission's only statutory framework for establishing such a requirement is Section 170 of the Atomic Energy Act, also known as the "Price-Anderson" Act. This type of coverage is designed to cover "catastrophic events" primarily for nuclear reactor licensees, and the Commission feels this coverage would be in excess of the risk at a low-level waste facility. Therefore, the Commission has not established a third party liability requirement in this regulation. The Commission will strongly encourage licensees to continue to carry third party liability insurance coverage through the conventional insurance market.

A variety of comments were received concerning the short term financial assurances required for closure and decomissioning. Several commenters supported the rule's use of a variety of different options for closure, noting that flexibility was crucial if the proposed rule was to function in a reasonable manner.

Other commenters expressed support for the rule's provision requiring that the amount of surety liability change with changes in cost estimates. One commenter also was concerned that the financial surety arrangements increase in value over time to compensate for the effects of inflation. The rule allows the Commission to periodically assess the amount of funds collected for both closure and post-closure care of the site and if necessary, the Commission could require the financial assurances to be increased to account for inflation, unforeseen problems, and unanticipated costs.

Commenters expressed support for the variety of alternatives allowed to demonstrate short term financial responsibility. However, several commenters mentioned that no commercial market exists to provide surety bonds of the type mentioned in the rule. In developing the rule, the Commission is aware that surety bonds of the type proposed in the rule may be unavailable at this time. However, the Commission included this alternative in the rule in the event that this type of coverage becomes available in the insurance market at a later time.

Commenters were also divided about whether the Commission should allow self-insurance as a financial assurance for closure. Several commenters felt that self-insurance would not satisfy the surety requirements, and they recommended that licensees should be required to place specific funds in escrow to cover costs of decontamination, closure and stabilization. Another commenter suggested that self-insurance be based on an annual submittal of financial reports, i.e., a financial test.

The Commission rejected the use of stand alone "self-insurance" based on the Commission's lack of confidence in this method to provide adequate assurances. Further, state officials have informally expressed the need to have tangible funds available from the licensee for site closure, so the State as landowner would not be left financially responsible. While not specifically allowing its use on a generic basis in the rule, the Commission will evaluate the use of financial tests proposed by licensees on a case-by-case basis.

Commenters also expressed support for the need to have a long-term care fund established at the time a license is issued. Some commenters wanted the rule to explicitly require the licensee to set aside funds for long-term care. However, the Commission currently lacks the authority to require a licensee to establish a fund to provide for long-term care of the site after the license is terminated. Instead, the Commission can only require a licensee to provide evidence of entering into a lease or other binding arrangement with the site owner indicating that the two parties have established financial responsibility for long-term care between themselves. With regard to the lack of authority, one person suggested that the Commission ask Congress for authority to require financial assurances for licensees for the active institutional control period. The NRC has raised this issue with Congress both in testimony and in a letter commenting on waste legislation.

Subpart F: Participation by State Governments and Indian Tribes. Many of the comments on Subpart F were concerned with interpretations and clarifications. These have been answered in the detailed analysis of comments. Two noteworthy changes were made. In § 61.71, a change was made to ensure that the Director shall make Commission staff available for discussion with the State or tribal governing body. At the request of the Department of the Interior, a statement was added to § 2.101 to indicate that the Commission will inform the U.S. Bureau of Indian Affairs when tribes have been notified of the filing of an application.

The Commission has been examining ways by which the licensing process can be shortened in time. One way is to conduct activities in parallel where possible, rather than sequentially. One such area is in the submittal and evaluation of proposals by States and Indian tribes for participation in the NRC license review, as provided by Subpart F. As proposed, § 61.72 would provide up to 120 days after an application was docketed for a State or tribe to submit a proposal for participation. The time from initial submittal of the application until it has been docketed is estimated to be 60 days or more. Thus, there is a potential delay of 180 days between the time NRC would receive a proposal and could begin the serious consideration of the proposal. Until resolution were reached on the role a State or tribes would play in the review, the NRC's review of the application could be significantly hampered.

The Low Level Radioactive Waste Policy Act of 1980 clearly states that it is a State's responsibility to provide for the disposal of low level waste. The Act also provides for the formation of interstate compacts for this purpose, subject to Congressional approval. Thus, any application for a disposal facility license will have had State or compact participation and backing for a significant period of time before submittal. During this time, the Commission believes that the State will have had ample opportunity to determine what role it wants to play in the review of the application. This also holds true for other States that are parties to an interstate compact. Therefore, § 61.72 is being changed to require that a proposal from the State in which the facility is proposed, or from any State involved in a compact with the State, must be submitted within 45 days after the application has been tendered. However, the Commission notes that a more prompt submittal by the State would help reduce delays.

Although it is to be hoped that the States will inform Indian tribes of plans for disposal facilities and provide them with sufficient information to permit them to make a proposal at an early time, there is no way of ensuring this. Therefore, Indian tribes and States not covered above will be given 120 days from the tendering of an application to

submit their proposal. It is anticipated that the participation of Indian tribes and non-compact States will not impact the schedule of the licensing process as much and this additional time can be accommodated.

The Commission believes that there should be sufficient information in the tendered application on which to base a proposal and that it is not necessary to wait until the acceptance review is completed and the docketing procedure carried out.

By making these changes, review of proposals can be carried out earlier and in parallel with the other reviews. It is expected that this could reduce the licensing time by up to six months.

It shoud be noted that participation by States and Indian tribes pursuant to Subpart F of Part 61 is not through an adjudicatory hearing. If an adjudicatory hearing is requested, then 10 CFR Part 2 applies.

A provision was added to § 61.25 to ensure that State, local, and Indian officials were notified of the opportunity for a hearing for certain types of amendments to the disposal facility license.

Subpart G: Records, Reports, Tests, and Inspections. Several commenters made suggestions on records and reports and the need for resident inspectors. Comments were also offered encouraging state involvement in records review and inspections. Two suggestions, relative to reporting any release of radioactivity and a requirement for maintaining duplicate sets of records were rejected as being impracticable. The Commission, however, would encourage protection of records so that they would not be vulnerable to loss because of fire, flood, or other occurrence. The other suggestions did not require modification of the regulations in order to accomplish what was suggested.

10 CFR Part 2: Rules of Practice. No major issues were raised by the several comments on the proposed amendments to Part 2.

10 CFR Part 20: § 20.311 Transfer for Disposal and Manifests. Because any licensee might make a waste shipment and thus be subject to the proposed manifest system requirements, the Commission mailed copies of the proposed rules to each of the Commission's approximately 9,000 licensees. In addition, some 12,000 copies were furnished to the Agreement States for distribution to their licensees. Out of this large group came a total of 29 letters commenting on the manifest system. These comments were wide ranging, with the majority of questions or suggestions being raised by only one commenter. Only a handful of issues drew more than one comment, with four being the largest number of comments on any issue. As a result of these comments, several changes were made to the proposed requirements to clarify some aspects.

To deal with the situation where a waste collector picks up waste directly from the generator, provisions are made for delivering the manifest to the collector at that time. The waste collector will not be required to attach copies of all waste generator manifests to his, as long as the collector's manifest has the information for each package that is required by § 20.311(b). The person transferring wastes will be required to maintain a signed copy of the manifest or equivalent documentation such as a computer generated printout from the transferee containing the same information and binding acknowledgement as the record required by Parts 30, 40 and 70 governing transfer of licensed material. This was done to provide inspectable records at the waste generator's facility which demonstrate compliance with the manifest requirements.

Changes were made in the requirements dealing with quality assurance. The term quality "assurance" has been changed to quality "control" and management's role has been modified to require evaluation of audits rather than the conduct of such audits.

Of note is that only one commenter, a midwest utility, addressed the question of the burden that the manifest would represent to small entities. When the manifest requirements were proposed, the Commission judged that they would not have significant economic impact on small entities. Pursuant to the Regulatory Flexibility Act, the Commission solicited comments on this matter.

General Comments

Seventeen commenters expressed concern with the use of absolute terms in the rule such as "eliminate" and "prevent." One was concerned about the lack of absoluteness of "reasonable assurance."

As discussed elsewhere, most of the places where such terms were used were in the context of design objectives. Since total achievement of such absolute objectives is unlikely, modifications have been made to the requirements to require minimization or prevention to the extent practicable.

Twelve commenters made suggestions on the kinds of additional regulatory guidance they felt was needed. The Commission agrees with the need for regulatory guidance and has a program underway to provide such guidance, first in the form of staff technical positions, then as Regulatory Guides. Most of the topics addressed by the commenters are already under development. Consideration is being given to the development of guidance on other topics suggested by the commenters.

One commenter suggested exempting wastes in storage prior to the effective date of the regulation from the packaging and labeling requirements. This comment touches on a subject with broader implications, the phasing in of the Part 61 requirements, consistent with the ability of licensees, Agreement States, and applicants to make necessary changes to assure compliance.

The following sections and subparts will be considered a matter of compatibility for the Agreement States when the rule is adopted: Section 61.2, Definitions; Subpart C, Performance Objectives; Subpart D, Technical Requirements for Land Disposal Facilities; those portions of Subpart B that are necessary to implement the provisions of Subparts C and D; that portion of Subpart E requiring closure funding arrangements; and Section 20.311, Transfer for disposal and manifests. Meetings were held with Agreement State representatives and agreement was reached on a method for uniform implementation of the manifest requirements, waste classification, waste form, and the effective date of Section 20.311 which was set at 365 days after publication in the Federal Register.

Since all other provisions of the proposed rules would pertain only to applicants for new Commission-licensed disposal facilities, there are no reasons to delay the effective date of these requirements. The Commission is working with the Agreement States to develop model regulations to be adopted by the Agreement States in accordance with their agreements to maintain compatible state regulations.

Applicability of the requirements in Part 61 to Commission disposal facility licenses in effect on the effective date of the rule will be determined on a case-by-case basis and implemented through terms and conditions of the license or by orders issued by the Commission.

There were a variety of comments related to commenters questions about the development of new sites, concerns over nuclear facilities becoming *de facto* disposal sites, the need for an environmental impact statement, and an extension of the comment period for Part 61 to correspond with that of the environmental impact statement. These comments are addressed in the detailed

analysis of comments and had no effect on the rule. The comment period was, in fact, extended from October 22, 1981 to January 14, 1982 to correspond with that for the EIS.

About one third of all commenters offered editorial suggestions that were aimed at improving clarity, correcting grammatical errors, and noting typographical errors. These were very helpful in preparing the final version of the rule.

Employee Protection

A new 10 CFR 61.9 has been added concerning job protection for employees who provide information to the Commission. The new section is included in this final rulemaking to carry out the Commission's intent that all specific licensees will have similar responsibilities under its employee protection regulations. See the **Federal Register** notice (47 FR 30452) dated July 14, 1982 for the basis for this action.

New 10 CFR 61.9 emphasizes to employers—that is, licensees, applicants, and their contractors and subcontractors—that termination or other acts of job discrimination against employees who engage in activities furthering the purposes of the Atomic Energy Act and the Energy Reorganization Act is prohibited. In addition, new 10 CFR 61.9 makes the employee aware that if discrimination of this nature is believed to have occurred, a remedy is available through the Wage and Hour Division of the Department of Labor. To ensure that employees of licensees and applicants are aware of these amendments, these organizations are required to post their premises with explanatory material related to the prohibition of discrimination and availability of a remedy in the event of discrimination.

Paperwork Reduction Act

As required by the Paperwork Reduction Act, Pub. L. 96–511, the recordkeeping and reporting requirements in the proposed amendments to 10 CFR 20 incorporated in the 10 CFR 61 rulemaking were submitted to the Office of Management and Budget and were approved. The proposed amendments to 10 CFR Part 20 were not significantly altered as a result of public comments so that approval remains valid. The application, reporting, and recordkeeping requirements contained in 10 CFR 61 apply only to land disposal facility operators and affect fewer than 10 persons and, therefore, are not subject to OMB clearance.

Regulatory Flexibility Act

Based upon the information available and on the public comments received on the proposed rule, and in accordance with the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission hereby certifies that this rulemaking will not, if promulgated, have a significant economic impact upon a substantial number of small entities.

The Regulatory Flexibility Act (Pub. L. 96–345) was signed into law in September 1980. The Act's principal objective is to make certain that Federal agencies try, where possible, to fit regulatory requirements to the scale of the affected activity. Significant economic impacts on a substantial number of small entities is a major concern. Part 61 and accompanying rule changes will potentially impact a significant number of persons licensed by the Commission and the Agreement States. The following discussion addresses the factors in the analyses required by the Act and the public comments received. The draft and final EIS's for Part 61 provide additional background information and analysis of the impacts of this rulemaking action.

Section 604 of the Regulatory Flexibility Act requires that the need for the regulatory action be clearly established. The need for standards to govern the disposal of low-level radioactive wastes and new regulations to implement these standards was discussed in detail in the draft EIS. The majority of the public comments supported the rule and thus affirmed the need for the rule and the regulator framework it establishes.

Section 609 of the Regulatory Flexibility Act requires that small entities have an opportunity to participate in the rulemaking when the rule will have a significant economic impact on a substantial number. Since the Commission's initial certification of no significant impact was a qualified one, special efforts to reach small entities were made. For example, the proposed rule was distributed to all Commission licensees (9,000) and made available to Agreement States (12,000 licensees) with a cover letter highlighting the points that might impact them. Comments were solicited from groups such as the Health Physics Society, a national organization of professionals concerned with radiation safety, many of whose members will have to prepare manifests and coordinate compliance with the rule. The Health Physics Society publicized the rule in its newsletters to members. Of some 107 different commenters responding, none specifically addressed the Regulatory Flexibility Act or the summary analysis. One utility (which is not a small entity) did make a general qualitative reference to burdens on small entities. Twelve commenters representing a variety of sectors (not just small entities) addressed the potential burden of the manifest system.

Section 604 of the Regulatory Flexibility Act further requires a summary of the issues and a statement of any changes made in the proposed rule as a result of the comments. Two commenters were concerned about the burden of specifying chemical form. Four commenters objected to shipper responsibility for tracking shipments. Three commenters including one broker considered the system to be a paperwork burden and two, a general burden. Three supported the system and one indicated no problems in complying. Two objected to forwarding a copy of the manifest and one was concerned about the implications of generator certifications.

The proposed rule included relief language "as completely as practicable" for specifying chemical form. Small entities generate a significant percent of wastes and data on these wastes is needed, so no further relief was provided. Objections to shipper tracking and forwarding manifests stemmed primarily from the need to clarify intent of the rule on waste broker or collector role and responsibility. The transfer of papers and tracking responsibility is more clearly addressed in the final rule. The recommendation for simplifying the paperwork for brokers was adopted. These issues and concerns are addressed in more detail in the staff analysis of comments in the final EIS.

The comments on waste classification were discussed in the preceding summary and resulted in extensive revision of this portion of the rule to simplify and clarify the requirements. The detailed staff analysis in the final EIS provides further discussion of the issues raised.

Federal rules that overlap the proposed rule are primarily those of the Department of Transportation (DOT). The Commission and DOT have an established working relationship implemented through a formal Memorandum of Understanding. The rule itself acknowledges the need to comply with DOT rules, and the Commission currently inspects licensees for compliance with DOT requirements. The manifest required by this rulemaking is consistent with DOT shipping paper requirements, and the same document may be used by licensees to meet requirements of both

agencies. Neither NRC nor DOT require a specific form and both allow such dual use. The waste form and packaging requirements are in addition to and compatible with DOT rules. In addition, the manifest terminology and requirements were compared to those in the proposed Uniform Hazardous Waste Manifest, the joint EPA/DOT proposed form published March 4, 1982 (47 FR 9336). A few minor procedural and terminology changes were made to conform to this proposed form. Licensees may use the Uniform Hazardous Waste Manifest, once it is implemented, as both a DOT shipping paper and a NRC manifest for radioactive wastes by using additional spaces to describe wastes and adding information to the back. These changes were made based on consultation with EPA and DOT staff and will help to reduce the burden on all licensees.

The following comment was received from EPA on possible duplicative requirements:

> NRC solicited comments on possible duplicative requirements for effluent releases and broker activities under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA). This "Superfund" law exempts from notification "any release of source, special nuclear, or byproduct material . . . in compliance with a legally enforceable license, permit, regulations, or order issued pursuant to the Atomic Energy Act of 1954" (CERCLA Section 101(10)(K)). Radioactive releases from nuclear waste disposal facilities which are not in compliance with an NRC license, permit, regulation, or order fall within the reporting requirements of CERCLA. Furthermore, as part of the notification regulations under CERCLA, EPA is planning to develop a notification scheme for releases of radioactive materials not licensed under the Atomic Energy Act of 1954 or the Uranium Mill Tailings Radiation Control Act of 1978. EPA wishes to minimize duplicative reporting requirements for releases reported to other agencies. EPA intends to work with NRC to minimize duplicative reporting requirements to the extent possible.

The EPA also addressed the potential for duplicative costs to the two agencies for wastes that are a mixture of hazardous chemicals and radioactive materials. Close coordination and a memorandum of understanding were suggested. EPA has regulatory responsibility for the disposal of hazardous wastes under the Resource Conservation and Recovery Act (RCRA). NRC agrees that the two regulatory programs need to be coordinated, and will take action in that regard.

The Regulatory Flexibility Act also requires discussion of alternatives to the proposed action. The recordkeeping and reporting requirements impose such a minor incremental burden that no exemption was considered. Initial estimates were that about 2,000 of the Commission's 9,000 licensees are waste generators who might make waste shipments. Waste generators must provide more complete information on the manifest than is currently required to meet DOT shipping paper requirements and must report on investigations of missing shipments. The additional information required in the manifest includes the identities of solidification agents; presence of any chelating agents; whether the waste is Class A, B, or C; and the total quantity of H-3, C-14, Tc-99, and I-129. The annual public burden for all licensees should be no more than about 4,500 staff hours for the preparation of the manifest instead of just preparation of DOT shipping papers and 1,000 hours for investigating and reporting on late or missing shipments. Reactor licensees, who are not small entitites, ship at least half the waste now shipped to disposal sites. The remainder is shipped by hospitals, universities, industrial firms, etc., who may or may not be small entities. Thus, less than half this burden should fall on small entities based on relative volumes of wastes shipped. The waste classification and characteristics portion of the rule does provide relief for most wastes produced by the small entities, i.e., Class A wastes. Where radiological hazard permits, segregated disposal has been provided as an option to complying with more restrictive waste acceptance requirements for Class B and C wastes.

The incremental burdens were initially judged small. Based on further staff evaluations and public comments on the rule, this initial judgment was correct and the rule will not have a significant economic impact. The rulemaking will not affect economic factors such as employment, business viability, or ability of affected entities to compete. The improvements in waste disposal practices and the contribution of those improvements to establishing new disposal capacity are judged to significantly outweigh the small economic impact on small entities.

List of Subjects in 10 CFR Part 61

Low-level waste, Nuclear materials, Penalty, Waste treatment and disposal.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and section 553 of title 5 of the United States Code, the following new 10 CFR Part 61 and the following amendments to 10 CFR Parts 2, 19, 20, 21, 30, 40, 51, 70, 73, and 170 to Chapter 1 of Title 10, of the Code of Federal Regulations are published as a document subject to codification.

A new Part 61 is added to 10 CFR to read as follows:

PART 61—LICENSING REQUIREMENTS FOR LAND DISPOSAL OF RADIOACTIVE WASTE

Subpart A—General Provisions

Sec.
61.1 Purpose and scope.
61.2 Definitions.
61.3 License required.
61.4 Communications.
61.5 Interpretations.
61.6 Exemptions.
61.7 Concepts.
61.8 Reporting, recordkeeping, and application requirements: OMB approval not required.
61.9 Employee protection.

Subpart B—Licenses

61.10 Content of application.
61.11 General information.
61.12 Specific technical information.
61.13 Technical analyses.
61.14 Institutional information.
61.15 Financial information.
61.16 Other information.
61.20 Filing and distribution of application.
61.21 Elimination of repetition.
61.22 Updating of application and environmental report.
61.23 Standards for issuance of a license.
61.24 Conditions of licenses.
61.25 Changes.
61.26 Amendment of license.
61.27 Application for renewal or closure.
61.28 Contents of application for closure.
61.29 Post-closure observation and maintenance.
61.30 Transfer of license.
61.31 Termination of license.

Subpart C—Performance Objectives

61.40 General requirement.
61.41 Protection of the general population from releases of radioactivity.
61.42 Protection of individuals from inadvertent intrusion.
61.43 Protection of individuals during operations.
61.44 Stability of the disposal site after closure.

Subpart D—Technical Requirements for Land Disposal Facilities

61.50 Disposal site suitability requirements for land disposal.
61.51 Disposal site design for land disposal.
61.52 Land disposal facility operation and disposal site closure.
61.53 Environmental monitoring.
61.54 Alternative requirements for design and operations.
61.55 Waste classification.
61.56 Waste characteristics.
61.57 Labeling.
61.58 Alternative requirements for waste classification and characteristics.
61.59 Institutional requirements.

Subpart E—Financial Assurances

Sec.
61.61 Applicant qualifications and assurances.
61.62 Funding for disposal site closure and stabilization.
61.63 Financial assurances for institutional controls.

Subpart F—Participation by State Governments and Indian Tribes

61.70 Scope.
61.71 State and Tribal government consultation.
61.72 Filing of proposals for State and Tribal participation.
61.73 Commission approval of proposals.

Subpart G—Records, Reports, Tests, and Inspections

61.80 Maintenance of records, reports, and transfers.
61.81 Tests at land disposal facilities.
61.82 Commission inspections of land disposal facilities.
61.83 Violations.

Authority: Secs. 53, 57, 62, 63, 65, 81, 161, 182, 183, 68 Stat. 930, 932, 933, 935, 948, 953, 954, as amended (42 U.S.C. 2073, 2077, 2092, 2093, 2095, 2111, 2201, 2232, 2233); Secs. 202, 206, 88 Stat. 1244, 1246, (42 U.S.C. 5842, 5846); Secs. 10 and 14, Pub. L. 95-601, 92 Stat. 2951 (42 U.S.C. 2021a and 5851).

For the purposes of Sec. 223, 68 Stat. 958, as amended, (42 U.S.C. 2273): Tables 1 and 2, §§61.3, 61.24, 61.25, 61.27(a), 61.41 through 61.43, 61.52, 61.53, 61.55, 61.56, and 61.61 through 61.63 issued under Sec. 161b, 68 Stat. 948 as amended (42 U.S.C. 2201(b)); §§ 61.10 through 61.16, 61.24, and 61.80 issued under Sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

Subpart A—General Provisions

§ 61.1 Purpose and scope.

(a) The regulations in this part establish, for land disposal of radioactive waste, the procedures, criteria, and terms and conditions upon which the Commission issues licenses for the disposal of radioactive wastes containing byproduct, source and special nuclear material received from other persons. Disposal of waste by an individual licensee is set forth in Part 20 of this chapter. Applicability of the requirements in this Part to Commission licenses for waste disposal facilities in effect on the effective date of this rule will be determined on a case-by-case basis and implemented through terms and conditions of the license or by orders issued by the Commission.

(b) Except as provided in Part 150 of this chapter, which addresses assumption of certain regulatory authority by Agreement States, and § 61.6 "Exemptions," the regulations in this part apply to all persons in the United States. The regulations in this part do not apply to (1) disposal of high-level waste as provided for in Part 60 of this chapter; (2) disposal of uranium or thorium tailings or wastes (byproduct material as defined in § 40.4(a–1)) as provided for in Part 40 of this chapter in quantities greater than 10,000 kilograms and containing more than five (5) millicuries of radium-226; or (3) disposal of licensed material as provided for in Part 20 of this chapter.

§ 61.2 Definitions.

As used in this part:

"Active maintenance" means any significant remedial activity needed during the period of institutional control to maintain a reasonable assurance that the performance objectives in §§ 61.41 and 61.42 are met. Such active maintenance includes ongoing activities such as the pumping and treatment of water from a disposal unit or one-time measures such as replacement of a disposal unit cover. Active maintenance does not include custodial activities such as repair of fencing, repair or replacement of monitoring equipment, revegetation, minor additions to soil cover, minor repair of disposal unit covers, and general disposal site upkeep such as mowing grass.

"Buffer zone" is a portion of the disposal site that is controlled by the licensee and that lies under the disposal units and between the disposal units and the boundary of the site.

"Chelating agent" means amine polycarboxylic acids (e.g., EDTA, DTPA), hydroxy-carboxylic acids, and ploycarboxylic acids (e.g., citric acid, carbolic acid, and glucinic acid).

"Commencement of construction" means any clearing of land, excavation, or other substantial action that would adversely affect the environment of a land disposal facility. The term does not mean disposal site exploration, necessary roads for disposal site exploration, borings to determine foundation conditions, or other preconstruction monitoring or testing to establish background information related to the suitability of the disposal site or the protection of environmental values.

"Commission" means the Nuclear Regulatory Commission or its duly authorized representatives.

"Custodial Agency" means an agency of the government designated to act on behalf of the government owner of the disposal site.

"Director" means the Director, Office of Nuclear Material Safety and Safeguards, U. S. Nuclear Regulatory Commission.

"Disposal" means the isolation of radioactive wastes from the biosphere inhabited by man and containing his food chains by emplacement in a land disposal facility.

"Disposal site" means that portion of a land disposal facility which is used for disposal of waste. It consists of disposal units and a buffer zone.

"Disposal unit" means a discrete portion of the disposal site into which waste is placed for disposal. For near surface disposal the unit is usually a trench.

"Engineered barrier" means a man-made structure or device that is intended to improve the land disposal facility's ability to meet the performance objectives in Subpart C.

"Explosive material" means any chemical compound, mixture, or device, which produces a substantial instantaneous release of gas and heat spontaneously or by contact with sparks or flame.

"Government agency" means any executive department, commission, independent establishment, or corporation, wholly or partly owned by the United States of America which is an instrumentality of the United States; or any board, bureau, division, service, office, officer, authority, administration, or other establishment in the executive branch of the government.

"Hazardous waste" means those wastes designated as hazardous by Environmental Protection Agency regulations in 40 CFR Part 261.

"Hydrogeologic unit" means any soil or rock unit or zone which by virtue of its porosity or permeability, or lack thereof, has a distinct influence on the storage or movement of groundwater.

"Inadvertent intruder" means a person who might occupy the disposal site after closure and engage in normal activities, such as agriculture, dwelling construction, or other pursuits in which the person might be unknowingly exposed to radiation from the waste.

"Indian Tribe" means an Indian tribe as defined in the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450).

"Intruder barrier" means a sufficient depth of cover over the waste that inhibits contact with waste and helps to ensure that radiation exposures to an inadvertent intruder will meet the performance objectives set forth in this part, or engineered structures that provides equivalent protection to the inadvertent intruder.

"Land disposal facility" means the land, buildings, and equipment which is intended to be used for the disposal of radioactive wastes into the subsurface of the land. For purposes of this chapter, a geologic repository as defined in Part 60 is not considered a land disposal facility.

"License" means a license issued under the regulations in Part 61 of this chapter. "Licensee" means the holder of such a license.

"Monitoring" means observing and making measurements to provide data to evaluate the performance and characteristics of the disposal site.

"Near-surface disposal facility" means a land disposal facility in which radioactive waste is disposed of in or within the upper 30 meters of the earth's surface.

"Person" means (1) any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, government agency other than the Commission or the Department of Energy, (except that the Department of Energy is considered a person within the meaning of the regulations in this part to the extent that its facilities and activities are subject to the licensing and related regulatory authority of the Commission pursuant to section 202 of the Energy Reorganization Act of 1974 (88 Stat. 1244)), any State or any political subdivision of or any political entity within a State, any foreign government or nation or any political subdivision of any such government or nation, or other entity; and (2) any legal successor, representative, agent, or agency of the foregoing.

"Pyrophoric liquid" means any liquid that ignites spontaneously in dry or moist air at or below 130°F (54.5°C). A pyrophoric solid is any solid material, other than one classed as an explosive, which under normal conditions is liable to cause fires through friction, retained heat from manufacturing or processing, or which can be ignited readily and when ignited burns so vigorously and persistently as to create a serious transportation, handling, or disposal hazard. Included are spontaneously combustible and water-reactive materials.

"Site closure and stablization" means those actions that are taken upon completion of operations that prepare the disposal site for custodial care and that assure that the disposal site will remain stable and will not need ongoing active maintenance.

"State" means any State, Territory, or possession of the United States, Puerto Rico, and the District of Columbia.

"Stability" means structural stability.

"Surveillance" means observation of the disposal site for purposes of visual detection of need for maintenance, custodial care, evidence of intrusion, and compliance with other license and regulatory requirements.

"Tribal Governing Body" means a Tribal organization as defined in the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450).

"Waste" means those low-level radioactive wastes containing source, special nuclear, or byproduct material that are acceptable for disposal in a land disposal facility. For the purposes of this definition, low-level waste has the same meaning as in the Low-Level Waste Policy Act, that is radioactive waste not classified as high-level radioactive waste, transuranic waste, spent nuclear fuel, or byproduct material as defined in section 11e.(2) of the Atomic Energy Act (uranium or thorium tailings and waste).

§ 61.3 License required.

(a) No person may receive, possess, and dispose of radioactive waste containing source, special nuclear, or byproduct material at a land disposal facility unless authorized by a license issued by the Commission pursuant to this part, or unless exemption has been granted by the Commission under § 61.6 of this part.

(b) Each person shall file an application with the Commission and obtain a license as provided in this part before commencing construction of a land disposal facility. Failure to comply with this requirement may be grounds for denial of a license.

§ 61.4 Communications.

Except where otherwise specified, all communications and reports concerning the regulations in this part and applications filed under them should be addressed to the Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Communications, reports, and applications may be delivered in person at the Commission's offices at 1717 H Street NW., Washington, D.C. or 7915 Eastern Avenue, Silver Spring, Maryland.

§ 61.5 Interpretations.

Except as specifically authorized by the Commission in writing, no interpretation of the meaning of the regulations in this part by any officer or employee of the Commission other than a written interpretation by the General Counsel will be considered binding upon the Commission.

§ 61.6 Exemptions.

The Commission may, upon application by any interested person, or upon its own initiative, grant any exemption from the requirements of the regulations in this part as it determines is authorized by law, will not endanger life or property or the common defense and security, and is otherwise in the public interest.

§ 61.7 Concepts.

(a) *The Disposal Facility.* (1) Part 61 is intended to apply to land disposal of radioactive waste and not to other methods such as sea or extraterrestrial disposal. Part 61 contains procedural requirements and performance objectives applicable to any method of land disposal. It contains specific technical requirements for near-surface disposal of radioactive waste which involves disposal in the uppermost portion of the earth, approximately 30 meters. Burial deeper than 30 meters may also be satisfactory. Technical requirements for alternative methods will be added in the future.

(2) Near-surface disposal of radioactive waste takes place at a near-surface disposal facility, which includes all of the land and buildings necessary to carry out the disposal. The disposal site is that portion of the facility which waste is used for disposal of waste and consists of disposal units and a buffer zone. A disposal unit is a discrete portion of the disposal site into which waste is placed for disposal. For near-surface disposal, the disposal unit is usually a trench. A buffer zone is a portion of the disposal site that is controlled by the licensee and that lies under the site and between the boundary of the disposal site and any disposal unit. It provides controlled space to establish monitoring locations which are intended to provide an early warning of radionuclide movement, and to take mitigative measures if needed. In choosing a disposal site, site characteristics should be considered in terms of the indefinite future and evaluated for at least a 500 year time frame.

(b) *Waste Classification and Near-Surface Disposal.* (1) Disposal of radioactive waste in near-surface disposal facilities has the following safety objectives: protection of the general population from releases of radioactivity, protection of individuals from inadvertent intrusion, and protection of individuals during operations. A fourth objective is to ensure stability of the site after closure.

(2) A cornerstone of the system is stability—stability of the waste and the disposal site so that once emplaced and covered, the access of water to the waste can be minimized. Migration of radionuclides is thus minimized, long-term active maintenance can be avoided, and potential exposures to intruders reduced. While stability is a

desirable characteristic for all waste much radioactive waste does not contain sufficient amounts of radionuclides to be of great concern from these standpoints; this waste, however, tends to be unstable, such as ordinary trash type wastes. If mixed with the higher activity waste, their deterioration could lead to failure of the system and permit water to penetrate the disposal unit and cause problems with the higher activity waste. Therefore, in order to avoid placing requirements for a stable waste form on relatively innocuous waste, these wastes have been classed as Class A waste. The Class A waste will be disposed of in separate disposal units at the disposal site. However, Class A waste that is stable may be mixed with other classes of waste. Those higher activity wastes that should be stable for proper disposal are classed as Class B and C waste. To the extent that it is practicable, Class B and C waste forms or containers should be designed to be stable, i.e., maintain gross physical properties and identity, over 300 years. For certain radionuclides prone to migration, a maximum disposal site inventory based on the characteristics of the disposal site may be established to limit potential exposure.

(3) It is possible but unlikely that persons might occupy the site in the future and engage in normal pursuits without knowing that they were receiving radiation exposure. These persons are referred to as inadvertent intruders. Protection of such intruders can involve two principal controls: institutional control over the site after operations by the site owner to ensure that no such occupation or improper use of the site occurs; or, designating which waste could present an unacceptable risk to an intruder, and disposing of this waste in a manner that provides some form of intruder barrier that is intended to prevent contact with the waste. This regulation incorporates both types of protective controls.

(4) Institutional control of access to the site is required for up to 100 years. This permits the disposal of Class A and Class B waste without special provisions for intrusion protection, since these classes of waste contain types and quantities of radioisotopes that will decay during the 100-year period and will present an acceptable hazard to an intruder. The government landowner administering the active institutional control program has flexibility in controlling site access which may include allowing productive uses of the land provided the integrity and long-term performance of the site are not affected.

(5) Waste that will not decay to levels which present an acceptable hazard to an intruder within 100 years is designated as Class C waste. This waste is disposed of at a greater depth than the other classes of waste so that subsequent surface activities by an intruder will not disturb the waste. Where site conditions prevent deeper disposal, intruder barriers such as concrete covers may be used. The effective life of these intruder barriers should be 500 years. A maximum concentration of radionuclides is specified for all wastes so that at the end of the 500 year period, remaining radioactivity will be at a level that does not pose an unacceptable hazard to an intruder or public health and safety. Waste with concentrations above these limits is generally unacceptable for near-surface disposal. There may be some instances where waste with concentrations greater than permitted for Class C would be acceptable for near-surface disposal with special processing or design. These will be evaluated on a case-by-case basis. Class C waste must also be stable.

(c) *The Licensing Process.* (1) During the preoperational phase, the potential applicant goes through a process of disposal site selection by selecting a region of interest, examining a number of possible disposal sites within the area of interest and narrowing the choice to the proposed site. Through a detailed investigation of the disposal site characteristics the potential applicant obtains data on which to base an analysis of the disposal site's suitability. Along with these data and analyses, the applicant submits other more general information to the Commission in the form of an application for a license for land disposal. The Commission's review of the application is in accordance with administrative procedures established by rule and may involve participation by affected State governments or Indian tribes. While the proposed disposal site must be owned by a State or the Federal government before the Commission will issue a license, it may be privately owned during the preoperational phase if suitable arrangements have been made with a State or the Federal government to take ownership in fee of the land before the license is issued.

(2) During the operational phase, the licensee carries out disposal activities in accordance with the requirements of this regulation and any conditions on the license. Periodically, the authority to conduct the above ground operations and dispose of waste will be subject to a license renewal, at which time the operating history will be reviewed and a decision made to permit or deny continued operation. When disposal operations are to cease, the licensee applies for an amendment to his license to permit site closure. After final review of the licensee's site closure and stabilization plan, the Commission may approve the final activities necessary to prepare the disposal site so that ongoing active maintenance of the site is not required during the period of institutional control.

(3) During the period when the final site closure and stabilization activities are being carried out, the licensee is in a disposal site closure phase. Following that, for a period of 5 years, the licensee must remain at the disposal site for a period of post-closure observation and maintenance to assure that the disposal site is stable and ready for institutional control. The Commission may approve shorter or require longer periods if conditions warrant. At the end of this period, the licensee applies for a license transfer to the disposal site owner.

(4) After a finding of satisfactory disposal site closure, the Commission will transfer the license to the State or Federal government that owns the disposal site. If the Department of Energy is the Federal agency administering the land on bahalf of the Federal government the license will be terminated because the Commission lacks regulatory authority over the Department for this activity. Under the conditions of the transferred license, the owner will carry out a program of monitoring to assure continued satisfactory disposal site performance, physical surveillance to restrict access to the site and carry out minor custodial activities. During this period, productive uses of the land might be permitted if those uses do not affect the stability of the site and its ability to meet the performance objectives. At the end of the prescribed period of institutional control, the license will be terminated by the Commission.

§ 61.8 Reporting, recordkeeping, and application requirements: OMB approval not required.

The information collection requirements contained in this part affect fewer than ten persons. Therefore, under section 3506(c)(5) of the Paperwork Reduction Act of 1980 (Pub. L. 96–511), OMB clearance is not required for these information collection requirements.

§ 61.9 Employee protection.

(a) Discrimination by a Commission licensee, an applicant for a Commission licensee, or a contractor or subcontractor of a Commission licensee or applicant against an employee for engaging in certain protected activities is prohibited. Discrimination includes discharge and other actions that relate to compensation, terms, conditions, and privileges of employment. The protected activities are established in Section 210 of the Energy Reorganization Act of 1974, as amended, and in general are related to the administration or enforcement of a requirement imposed under the Atomic Energy Act or the Energy Reorganization Act.

(1) The protected activities include but are not limited to—(i) Providing the Commission information about possible violations of requirements imposed under either of the above statutes;

(ii) Requesting the Commission to institute action against his or her employer for the administration or enforcement of these requirements; or

(iii) Testifying in any Commission proceeding.

(2) These activities are protected even if no formal proceeding is actually initiated as a result of the employee assistance or participation.

(3) This section has no application to any employee alleging discrimination prohibited by this section who, acting without direction from his or her employer (or the employer's agent), deliberately causes a violation of any requirement of the Energy Reorganization Act of 1974, as amended, or the Atomic Energy Act of 1954, as amended.

(b) Any employee who believes that he or she has been discharged or otherwise discriminated against by any person for engaging in the protected activities specified in paragraph (a)(1) of this section may seek a remedy for the discharge or discrimination through an administrative proceeding in the Department of Labor. The administrative proceeding must be initiated within 30 days after an alleged violation occurs by filing a complaint alleging the violation with the Department of Labor, Employment Standards Administration, Wage and Hour Division. The Department of Labor may order reinstatement, back pay, and compensatory damages.

(c) A violation of paragraph (a) of this section by a Commission licensee, an applicant for a Commission licensee, or a contractor or subcontractor of a Commission licensee or applicant may be grounds for—

(1) Denial, revocation, or suspension of the license.

(2) Imposition of a civil penalty on the licensee or applicant.

(3) Other enforcement action.

(d) Actions taken by an employer, or others, which adversely affect an employee may be predicated upon nondiscriminatory grounds. The prohibition applies when the adverse action occurs because the employee has engaged in protected activities. An employee's engagement in protected activities does not automatically render him or her immune from discharge or discipline for legitimate reasons or from adverse action dictated by non-prohibited considerations.

(e) Each licensee and each applicant shall post Form NRC–3, "Notice to Employees," on its premises. Posting must be at locations sufficient to permit employees protected by this section to observe a copy on the way to or from their place of work. Premises must be posted not later than 30 days after an application is docketed and remain posted while the application is pending before the Commission, during the term of the license, and for 30 days following license termination.

Note.—Copies of Form NRC–3 may be obtained by writing to the Regional Administrator of the appropriate U.S. Nuclear Regulatory Commission Regional Office listed in Appendix D, Part 20 of this chapter or the Director, Office of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Subpart B—Licenses

§ 61.10 Content of application.

An application to receive from others, possess and dispose of wastes containing or contaminated with source, byproduct or special nuclear material by land disposal must consist of general information, specific technical information, institutional information, and financial information as set forth in §§ 61.11 through 61.16. An environmental report prepared in accordance with Part 51 of this chapter must accompany the application.

§ 61.11 General information.

The general information must include each of the following:

(a) Identity of the applicant including:

(1) The full name, address, telephone number and description of the business or occupation of the applicant;

(2) If the applicant is a partnership, the name, and address of each partner and the principal location where the partnership does business;

(3) If the applicant is a corporation or an unincorporated association, (i) the state where it is incorporated or organized and the principal location where it does business, and (ii) the names and addresses of its directors and principal officers; and

(4) If the applicant is acting as an agent or representative of another person in filing the application, all information required under this paragraph must be supplied with respect to the other person.

(b) Qualifications of the applicant:

(1) The organizational structure of the applicant, both offsite and onsite, including a description of lines of authority and assignments of responsibilities, whether in the form of administrative directives, contract provisions, or otherwise;

(2) The technical qualifications, including training and experience, of the applicant and members of the applicant's staff to engage in the proposed activities. Minimum training and experience requirements for personnel filling key positions described in Paragraph 61.11(b)(1) must be provided;

(3) A description of the applicant's personnel training program; and

(4) The plan to maintain an adequate complement of trained personnel to carry out waste receipt, handling, and disposal operations in a safe manner.

(c) A description of:

(1) The location of the proposed disposal site;

(2) The general character of the proposed activities;

(3) The types and quantities of radioactive waste to be received, possessed, and disposed of;

(4) Plans for use of the land disposal facility for purposes other than disposal of radioactive wastes; and

(5) The proposed facilities and equipment.

(d) Proposed schedules for construction, receipt of waste, and first emplacement of waste at the proposed land disposal facility.

§ 61.12 Specific technical information.

The specific technical information must include the following information needed for demonstration that the performance objectives of Subpart C of this part and the applicable technical requirements of Subpart D of this part will be met:

(a) A description of the natural and demographic disposal site characteristics as determined by disposal site selection and characterization activities. The description must include geologic, geotechnical, hydrologic, meteorologic, climatologic, and biotic features of the disposal site and vicinity.

(b) A description of the design features of the land disposal facility and

the disposal units. For near-surface disposal, the description must include those design features related to infiltration of water; integrity of covers for disposal units; structural stability of backfill, wastes, and covers; contact of wastes with standing water; disposal site drainage; disposal site closure and stabilization; elimination to the extent practicable of long-term disposal site maintenance; inadvertent intrusion; occupational exposures; disposal site monitoring; and adequacy of the size of the buffer zone for monitoring and potential mitigative measures.

(c) A description of the principal design criteria and their relationship to the performance objectives.

(d) A description of the design basis natural events or phenomena and their relationship to the principal design criteria.

(e) A description of codes and standards which the applicant has applied to the design and which will apply to construction of the land disposal facilities.

(f) A description of the construction and operation of the land disposal facility. The description must include as a minimum the methods of construction of disposal units; waste emplacement; the procedures for and areas of waste segregation; types of intruder barriers; onsite traffic and drainage systems; survey control program; methods and areas of waste storage; and methods to control surface water and groundwater access to the wastes. The description must also include a description of the methods to be employed in the handling and disposal of wastes containing chelating agents or other non-radiological substances that might affect meeting the performance objectives in Subpart C of this part.

(g) A description of the disposal site closure plan, including those design features which are intended to facilitate disposal site closure and to eliminate the need for ongoing active maintenance.

(h) An identification of the known natural resources at the disposal site, the exploitation of which could result in inadvertent intrusion into the low-level wastes after removal of active institutional control.

(i) A description of the kind, amount, classification and specifications of the radioactive material proposed to be received, possessed, and disposed of at the land disposal facility.

(j) A description of the quality control program for the determination of natural disposal site characteristics and for quality control during the design, construction, operation and closure of the land disposal facility and the receipt, handling, and emplacement of waste. Audits and managerial controls must be included.

(k) A description of the radiation safety program for control and monitoring of radioactive effluents to ensure compliance with the performance objective in § 61.41 of this part and occupational radiation exposure to ensure compliance with the requirements of Part 20 of this chapter and to control contamination of personnel, vehicles, equipment, buildings, and the disposal site. Both routine operations and accidents must be addressed. The program description must include procedures, instrumentation, facilities, and equipment.

(l) A description of the environmental monitoring program to provide data to evaluate potential health and environmental impacts and the plan for taking corrective measures if migration of radionuclides is indicated.

(m) A description of the administrative procedures that the applicant will apply to control activities at the land disposal facility.

§ 61.13 Technical analyses.

The specific technical information must also include the following analyses needed to demonstrate that the performance objectives of Subpart C of this part will be met:

(a) Pathways analyzed in demonstrating protection of the general population from releases of radioactivity must include air, soil, groundwater, surface water, plant uptake, and exhumation by burrowing animals. The analyses must clearly identify and differentiate between the roles performed by the natural disposal site characteristics and design features in isolating and segregating the wastes. The analyses must clearly demonstrate that there is reasonable assurance that the exposure to humans from the release of radioactivity will not exceed the limits set forth in § 61.41.

(b) Analyses of the protection of individuals from inadvertent intrusion must include demonstration that there is reasonable assurance the waste classification and segregation requirements will be met and that adequate barriers to inadvertent intrusion will be provided.

(c) Analyses of the protection of individuals during operations must include assessments of expected exposures due to routine operations and likely accidents during handling, storage, and disposal of waste. The analyses must provide reasonable assurance that exposures will be controlled to meet the requirements of Part 20 of this chapter.

(d) Analyses of the long-term stability of the disposal site and the need for ongoing active maintenance after closure must be based upon analyses of active natural processes such as erosion, mass wasting, slope failure, settlement of wastes and backfill, infiltration through covers over disposal areas and adjacent soils, and surface drainage of the disposal site. The analyses must provide reasonable assurance that there will not be a need for ongoing active maintenance of the disposal site following closure.

§ 61.14 Institutional information.

The institutional information must include:

(a) A certification by the Federal or State government which owns the disposal site that the Federal or State government is prepared to accept transfer of the license when the provisions of § 61.30 are met, and will assume responsibility for custodial care after site closure and postclosure observation and maintenance.

(b) Where the proposed disposal site is on land not owned by the Federal or a State government, the applicant must submit evidence that arrangements have been made for assumption of ownership in fee by the Federal or a State government before the Commission issues a license.

§ 61.15 Financial information.

The financial information must be sufficient to demonstrate that the financial qualifications of the applicant are adequate to carry out the activities for which the license is sought and meet other financial assurance requirements as specified in Subpart E of this part.

§ 61.16 Other information.

Depending upon the nature of the wastes to be disposed of, and the design and proposed operation of the land disposal facility, additional information may be requested by the Commission including the following:

(a) Physical security measures, if appropriate. Any application to receive and possess special nuclear material in quantities subject to the requirements of Part 73 of this chapter shall demonstrate how the physical security requirements of Part 73 will be met. In determining whether receipt and possession will be subject to the requirements of Part 73, the applicant shall not consider the quantity of special nuclear material that has been disposed of.

(b) Safety information concerning criticality, if appropriate.

(1) Any application to receive and possess special nuclear material in quantities that would be subject to the requirements of § 70.24, "Criticality accident requirements" of Part 70 of this chapter shall demonstrate how the requirements of that section will be met, unless the applicant requests an exemption pursuant to § 70.24(d). In determining whether receipt and possession would be subject to the requirements of § 70.24, the applicant shall not consider the quantity of special nuclear material that has been disposed of.

(2) Any application to receive and possess special nuclear material shall describe proposed procedures for avoiding accidental criticality, which address both storage of special nuclear material prior to disposal and waste emplacement for disposal.

§ 61.20 Filing and distribution of application.

(a) An application for a license under this part, and any amendments thereto, shall be filed with the Director, must be signed by the applicant or the applicant's authorized representative under oath, and must consist of 1 signed original and 2 copies.

(b) Another 85 copies of the application and environmental report must be retained by the applicant for distribution in accordance with written instructions from the Director or designee.

(c) *Fees.* Application, amendment, and inspection fees applicable to a license covering the receipt and disposal of radioactive wastes in a land disposal facility are required by Part 170 of this chapter.

§ 61.21 Elimination of repetition.

In its application or environmental report, the applicant may incorporate by reference information contained in previous applications, statements, or reports filed with the Commission if these references are clear and specific.

§61.22 Updating of application and environmental report.

(a) The application and environmental report must be as complete as possible in the light of information that is available at the time of submittal.

(b) The applicant shall supplement its application or environmental report in a timely manner, as necessary, to permit the Commission to review, prior to issuance of a license, any changes in the activities proposed to be carried out or new information regarding the proposed activities.

§ 61.23 Standards for issuance of a license.

A license for the receipt, possession, and disposal of waste containing or contaminated with source, special nuclear, or byproduct material will be issued by the Commission upon finding that the issuance of the license will not be inimical to the common defense and security and will not constitute an unreasonable risk to the health and safety of the public, and:

(a) The applicant is qualified by reason of training and experience to carry out the disposal operations requested in a manner that protects health and minimizes danger to life or property.

(b) The applicant's proposed disposal site, disposal design, land disposal facility operations (including equipment, facilities, and procedures), disposal site closure, and postclosure institutional control are adequate to protect the public health and safety in that they provide reasonable assurance that the general population will be protected from releases of radioactivity as specified in the performance objective in § 61.41, Protection of the general population from releases of radioactivity.

(c) The applicant's proposed disposal site, disposal site design, land disposal facility operations (including equipment, facilities, and procedures), disposal site closure, and postclosure institutional control are adequate to protect the public health and safety in that they will provide reasonable assurance that individual inadvertent intruders are protected in accordance with the performance objective in § 61.42, Protection of individuals from inadvertent intrusion.

(d) The applicant's proposed land disposal facility operations, including equipment, facilities, and procedures, are adequate to protect the public health and safety in that they will provide reasonable assurance that the standards for radiation protection set out in Part 20 of this chapter will be met.

(e) The applicant's proposed disposal site, disposal site design, land disposal facility operations, disposal site closure, and postclosure institutional control are adequate to protect the public health and safety in that they will provide reasonable assurance that long-term stability of the disposed waste and the disposal site will be achieved and will eliminate to the extent practicable the need for ongoing active maintenance of the disposal site following closure.

(f) The applicant's demonstration provides reasonable assurance that the applicable technical requirements of Subpart D of this part will be met.

(g) The applicant's proposal for institutional control provides reasonable assurance that institutional control will be provided for the length of time found necessary to ensure the findings in paragraphs (b)–(e) of this section and that the institutional control meets the requirements of § 61.59, Institutional requirements.

(h) The information on financial assurances meets the requirements of Subpart E of this part.

(i) The applicant's physical security information provides reasonable assurance that the requirements of Part 73 of this chapter will be met, insofar as they are applicable to special nuclear material to be possessed before disposal under the license.

(j) The applicant's criticality safety procedures are adequate to protect the public health and safety and provide reasonable assurance that the requirements of § 70.24, Criticality accident requirements, of Part 70 of this chapter will be met, insofar as they are applicable to special nuclear material to be possessed before disposal under the license.

(k) Any additional information submitted as requested by the Commission pursuant to § 61.16, Other information, is adequate.

(l) The requirements of Part 51 of this chapter have been met.

§ 61.24 Conditions of licenses.

(a) A license issued under this part, or any right thereunder, may be transferred, assigned, or in any manner disposed of, either voluntarily or involuntarily, directly or indirectly, through transfer of control of the license to any person, only if the Commission finds, after securing full information, that the transfer is in accordance with the provisions of the Atomic Energy Act and gives its consent in writing in the form of a license amendment.

(b) The licensee shall submit written statements under oath upon request of the Commission, at any time before termination of the license, to enable the Commission to determine whether or not the license should be modified, suspended, or revoked.

(c) The license will be transferred to the site owner only on the full implementation of the final closure plan as approved by the Commission, including postclosure observation and maintenance.

(d) The licensee shall be subject to the provisions of the Atomic Energy Act now or hereafter in effect, and to all rules, regulations, and orders of the Commission. The terms and conditions of the license are subject to amendment,

revision, or modification, by reason of amendments to, or by reason of rules, regulations, and orders issued in accordance with the terms of the Atomic Energy Act.

(e) Any license may be revoked, suspended or modified in whole or in part for any material false statement in the application or any statement of fact required under Section 182 of the Act, or because of conditions revealed by any application or statement of fact or any report, record, or inspection or other means which would warrant the Commission to refuse to grant a license to the original application, or for failure to operate the facility in accordance with the terms of the license, or for any violation of, or failure to observe any of the terms and conditions of the Act, or any rule, regulation, license or order of the Commission.

(f) Each person licensed by the Commission pursuant to the regulations in this part shall confine possession and use of materials to the locations and purposes authorized in the license.

(g) No radioactive waste may be disposed of until the Commission has inspected the land disposal facility and has found it to be in conformance with the description, design, and construction described in the application for a license.

(h) The Commission may incorporate in any license at the time of issuance, or thereafter, by appropriate rule, regulation or order, additional requirements and conditions with respect to the licensee's receipt, possession, and disposal of source, special nuclear or byproduct material as it deems appropriate or necessary in order to:

(1) Promote the common defense and security;

(2) Protect health or to minimize danger to life or property;

(3) Require reports and the keeping of records, and to provide for inspections of activities under the license that may be necessary or appropriate to effectuate the purposes of the Act and regulations thereunder.

(i) Any licensee who receives and possesses special nuclear material under this part in quantities that would be subject to the requirements of § 70.24 of Part 70 of this chapter shall comply with the requirements of that section. The licensee shall not consider the quantity of special nuclear material that has been disposed of.

(j) The authority to dispose of wastes expires on the date stated in the license except as provided in § 61.27(a) of this part.

§ 61.25 Changes.

(a) Except as provided for in specific license conditions, the licensee shall not make changes in the land disposal facility or procedures described in the license application. The license will include conditions restricting subsequent changes to the facility and the procedures authorized which are important to public health and safety. These license restrictions will fall into three categories of descending importance to public health and safety as follows: (1) those features and precedures which may not be changed without (i) 60 days prior notice to the Commission, (ii) 30 days notice of opportunity for a prior hearing, and (iii) prior Commission approval; (2) those features and procedures which may not be changed without (i) 60 days prior notice to the Commisson, and (ii) prior Commission approval; and (3) those features and procedures which may not be changed without 60 days prior notice to the Commission. Features and procedures falling in paragraph (a)(3) of this section may not be changed without prior Commission approval if the Commission, after having received the required notice, so orders.

(b) Amendments authorizing site closure, license transfer, or license termination shall be included in paragraph (a)(1) of this section.

(c) The Commission shall provide a copy of the notice for opportunity for hearings provided in paragraph (a)(1) of this section to State and local officials or tribal governing bodies specified in § 2.104(e) of Part 2 of this chapter.

§ 61.26 Amendment of license.

(a) An application for amendment of a license must be filed in accordance with § 61.20 and shall fully describe the changes desired.

(b) In determining whether an amendment to a license will be approved, the Commission will apply the criteria set forth in § 61.23.

§ 61.27 Application for renewal or closure.

(a) Any expiration date on a license applies only to the above ground activities and to the authority to dispose of waste. Failure to renew the license shall not relieve the licensee of responsibility for carrying out site closure, postclosure observation and transfer of the license to the site owner. An application for renewal or an application for closure under § 61.28 must be filed at least 30 days prior to license expiration.

(b) Applications for renewal of a license must be filed in accordance with §§ 61.10 through 61.16 and § 61.20. Applications for closure must be filed in accordance with §§ 61.20 and 61.28. Information contained in previous applications, statements or reports filed with the Commission under the license may be incorporated by reference if the references are clear and specific.

(c) In any case in which a licensee has timely filed an application for renewal of a license, the license for continued receipt and disposal of licensed materials does not expire until the Commission has taken final action on the application for renewal.

(d) In determining whether a license will be renewed, the Commission will apply the criteria set forth in § 61.23.

§ 61.28 Contents of application for closure.

(a) Prior to final closure of the disposal site, or as otherwise directed by the Commission, the applicant shall submit an application to amend the license for closure. This closure application must include a final revision and specific details of the disposal site closure plan included as part of the license application submitted under § 61.12(g) that includes each of the following:

(1) Any additional geologic, hydrologic, or other disposal site data pertinent to the long-term containment of emplaced radioactive wastes obtained during the operational period.

(2) The results of tests, experiments, or other analyses relating to backfill of excavated areas, closure and sealing, waste migration and interaction with emplacement media, or any other tests, experiments, or analysis pertinent to the long-term containment of emplaced waste within the disposal site.

(3) Any proposed revision of plans for:

(i) Decontamination and/or dismantlement of surface facilities;

(ii) Backfilling of excavated areas; or

(iii) Stabilization of the disposal site for post-closure care.

(4) Any significant new information regarding the environmental impact of closure activities and long-term performance of the disposal site.

(b) Upon review and consideration of an application to amend the license for closure submitted in accordance with paragraph (a) of this section, the Commission shall issue an amendment authorizing closure if there is reasonable assurance that the long-term performance objectives of Subpart C of this part will be met.

§ 61.29 Post-closure observation and maintenance.

Following completion of closure authorized in § 61.28, the licensee shall observe, monitor, and carry out

necessary maintenance and repairs at the disposal site until the license is transferred by the Commission in accordance with § 61.30. Responsibility for the disposal site must be maintained by the licensee for 5 years. A shorter or longer time period for post-closure observation and maintenance may be established and approved as part of the site closure plan, based on site-specific conditions.

§ 61.30 Transfer of license.

(a) Following closure and the period of post-closure observation and maintenance, the licensee may apply for an amendment to transfer the license to the disposal site owner. The license shall be transferred when the Commission finds:

(1) That the closure of the disposal site has been made in conformance with the licensee's disposal site closure plan, as amended and approved as part of the license;

(2) That reasonable assurance has been provided by the licensee that the performance objectives of Subpart C of this part are met;

(3) That any funds and necessary records for care will be transferred to the disposal site owner;

(4) That the post-closure monitoring program is operational for implementation by the disposal site owner; and

(5) That the Federal or State government agency which will assume responsibility for institutional control of the disposal site is prepared to assume responsibility and ensure that the institutional requirements found necessary under § 61.23(g) will be met.

(b) [Reserved]

§ 61.31 Termination of license.

(a) Following any period of institutional control needed to meet the requirements found necessary under § 61.23, the licensee may apply for an amendment to terminate the license.

(b) This application must be filed, and will be reviewed, in accordance with the provision of § 61.20 and of this section.

(c) A license is terminated only when the Commission finds:

(1) That the institutional control requirements found necessary under § 61.23(g) have been met; and

(2) That any additional requirements resulting from new information developed during the institutional control period have been met, and that permanent monuments or markers warning against intrusion have been installed.

Subpart C—Performance Objectives

§ 61.40 General requirement.

Land disposal facilities must be sited, designed, operated, closed, and controlled after closure so that reasonable assurance exists that exposures to humans are within the limits established in the performance objectives in §§ 61.41 through 61.44.

§ 61.41 Protection of the general population from releases of radioactivity.

Concentrations of radioactive material which may be released to the general environment in ground water, surface water, air, soil, plants, or animals must not result in an annual dose exceeding an equivalent of 25 millirems to the whole body, 75 millirems to the thyroid, and 25 millirems to any other organ of any member of the public. Reasonable effort should be made to maintain releases of radioactivity in effluents to the general environment as low as is reasonably achievable.

§ 61.42 Protection of individuals from inadvertent intrusion.

Design, operation, and closure of the land disposal facility must ensure protection of any individual inadvertently intruding into the disposal site and occupying the site or contacting the waste at any time after active institutional controls over the disposal site are removed.

§ 61.43 Protection of individuals during operations.

Operations at the land disposal facility must be conducted in compliance with the standards for radiation protection set out in Part 20 of this chapter, except for releases of radioactivity in effluents from the land disposal facility, which shall be governed by § 61.41 of this part. Every reasonable effort shall be made to maintain radiation exposures as low as is reasonably achievable.

§ 61.44 Stability of the disposal site after closure.

The disposal facility must be sited, designed, used, operated, and closed to achieve long-term stability of the disposal site and to eliminate to the extent practicable the need for ongoing active maintenance of the disposal site following closure so that only surveillance, monitoring, or minor custodial care are required.

Subpart D—Technical Requirements for Land Disposal Facilities

§ 61.50 Disposal site suitability requirements for land disposal.

(a) Disposal site suitability for near-surface disposal.

(1) The purpose of this section is to specify the minimum characteristics a disposal site must have to be acceptable for use as a near-surface disposal facility. The primary emphasis in disposal site suitability is given to isolation of wastes, a matter having long-term impacts, and to disposal site features that ensure that the long-term performance objectives of Subpart C of this part are met, as opposed to short-term convenience or benefits.

(2) The disposal site shall be capable of being characterized, modeled, analyzed and monitored.

(3) Within the region or state where the facility is to be located, a disposal site should be selected so that projected population growth and future developments are not likely to affect the ability of the disposal facility to meet the performance objectives of Subpart C of this part.

(4) Areas must be avoided having known natural resources which, if exploited, would result in failure to meet the performance objectives of Subpart C of this part.

(5) The disposal site must be generally well drained and free of areas of flooding or frequent ponding. Waste disposal shall not take place in a 100-year flood plain, coastal high-hazard area or wetland, as defined in Executive Order 11988, "Floodplain Management Guidelines."

(6) Upstream drainage areas must be minimized to decrease the amount of runoff which could erode or inundate waste disposal units.

(7) The disposal site must provide sufficient depth to the water table that ground water intrusion, perennial or otherwise, into the waste will not occur. The Commission will consider an exception to this requirement to allow disposal below the water table if it can be conclusively shown that disposal site characteristics will result in molecular diffusion being the predominant means of radionuclide movement and the rate of movement will result in the performance objectives of Subpart C of this part being met. In no case will waste disposal be permitted in the zone of fluctuation of the water table.

(8) The hydrogeologic unit used for disposal shall not discharge ground water to the surface within the disposal site.

(9) Areas must be avoided where tectonic processes such as faulting, folding, seismic activity, or vulcanism may occur with such frequency and extent to significantly affect the ability of the disposal site to meet the performance objectives of Subpart C of this part, or may preclude defensible modeling and prediction of long-term impacts.

(10) Areas must be avoided where surface geologic processes such as mass wasting, erosion, slumping, landsliding, or weathering occur with such frequency and extent to significantly affect the ability of the disposal site to meet the performance objectives of Subpart C of this part, or may preclude defensible modeling and prediction of long-term impacts.

(11) The disposal site must not be located where nearby facilities or activities could adversely impact the ability of the site to meet the performance objectives of Subpart C of this part or significantly mask the environmental monitoring program.

(b) Disposal site suitability requirements for land disposal other than near-surface (reserved).

§ 61.51 Disposal site design for land disposal.

(a) Disposal site design for near-surface disposal.

(1) Site design features must be directed toward long-term isolation and avoidance of the need for continuing active maintenance after site closure.

(2) The disposal site design and operation must be compatible with the disposal site closure and stabilization plan and lead to disposal site closure that provides reasonable assurance that the performance objectives of Subpart C of this part will be met.

(3) The disposal site must be designed to complement and improve, where appropriate, the ability of the disposal site's natural characteristics to assure that the performance objectives of Subpart C of this part will be met.

(4) Covers must be designed to minimize to the extent practicable water infiltration, to direct percolating or surface water away from the disposed waste, and to resist degradation by surface geologic processes and biotic activity.

(5) Surface features must direct surface water drainage away from disposal units at velocities and gradients which will not result in erosion that will require ongoing active maintenance in the future.

(6) The disposal site must be designed to minimize to the extent practicable the contact of water with waste during storage, the contact of standing water with waste during disposal, and the contact of percolating or standing water with wastes after disposal.

(b) Disposal site design for other than near-surface disposal (reserved).

§ 61.52 Land disposal facility operation and disposal site closure.

(a) Near-surface disposal facility operation and disposal site closure.

(1) Wastes designated as Class A pursuant to § 61.55, must be segregated from other wastes by placing in disposal units which are sufficiently separated from disposal units for the other waste classes so that any interaction between Class A wastes and other wastes will not result in the failure to meet the performance objectives in Subpart C of this Part. This segregation is not necessary for Class A wastes if they meet the stability requirements in § 61.56(b) of this part.

(2) Wastes designated as Class C pursuant to § 61.55, must be disposed of so that the top of the waste is a minimum of 5 meters below the top surface of the cover or must be disposed of with intruder barriers that are designed to protect against an inadvertent intrusion for a least 500 years.

(3) All wastes shall be disposed of in accordance with the requirements of paragraphs (a)(4) through (11) of this section.

(4) Wastes must be emplaced in a manner that maintains the package integrity during emplacement, minimizes the void spaces between packages, and permits the void spaces to be filled.

(5) Void spaces between waste packages must be filled with earth or other material to reduce future subsidence within the fill.

(6) Waste must be placed and covered in a manner that limits the radiation dose rate at the surface of the cover to levels that at a minimum will permit the licensee to comply with all provisions of § 20.105 of this chapter at the time the license is transferred pursuant to § 61.30 of this part.

(7) The boundaries and locations of each disposal unit (e.g., trenches) must be accurately located and mapped by means of a land survey. Near-surface disposal units must be marked in such a way that the boundaries of each unit can be easily defined. Three permanent survey marker control points, referenced to United States Geological Survey (USGS) or National Geodetic Survey (NGS) survey control stations, must be established n the site to facilitate surveys. The USGS or NGS control stations must provide horizontal and vertical controls as checked against USGSD or NGS record files.

(8) A buffer zone of land must be maintained between any buried waste and the disposal site boundary and beneath the disposed waste. The buffer zone shall be of adequate dimensions to carry out environmental monitoring activities specified in § 61.53(d) of this part and take mitigative measures if needed.

(9) Closure and stabilization measures as set forth in the approved site closure plan must be carried out as each disposal unit (e.g., each trench) is filled and covered.

(10) Active waste disposal operations must not have an adverse effect on completed closure and stabilization measures.

(11) Only wastes containing or contaminated with radioactive materials shall be disposed of at the disposal site.

(b) Facility operation and disposal site closure for land disposal facilities other than near-surface (reserved).

§ 61.53 Environmental monitoring.

(a) At the time a license application is submitted, the applicant shall have conducted a preoperational monitoring program to provide basic environmental data on the disposal site characteristics. The applicant shall obtain information about the ecology, meteorology, climate, hydrology, geology, geochemistry, and seismology of the disposal site. For those characteristics that are subject to seasonal variation, data must cover at least a twelve month period.

(b) The licensee must have plans for taking corrective measures if migration of radionuclides would indicate that the performance objectives of Subpart C may not be met.

(c) During the land disposal facility site construction and operation, the licensee shall maintain a monitoring program. Measurements and observations must be made and recorded to provide data to evaluate the potential health and environmental impacts during both the construction and the operation of the facility and to enable the evaluation of long-term effects and the need for mitigative measures. The monitoring system must be capable of providing early warning of releases of radionuclides from the disposal site before they leave the site boundary.

(d) After the disposal site is closed, the licensee responsible for post-operational surveillance of the disposal site shall maintain a monitoring system based on the operating history and the closure and stabilization of the disposal site. The monitoring system must be capable of providing early warning of releases of radionuclides from the

disposal site before they leave the site boundary.

§ 61.54 Alternative requirements for design and operations.

The Commission may, upon request or on its own initiative, authorize provisions other than those set forth in §§ 61.51 through 61.53 for the segregation and disposal of waste and for the design and operation of a land disposal facility on a specific basis, if it finds reasonable assurance of compliance with the performance objectives of Subpart C of this part.

§ 61.55 Waste classification.

(a) Classification of waste for near surface disposal.

(1) *Considerations.* Determination of the classification of radioactive waste involves two considerations. First, consideration must be given to the concentration of long-lived radionuclides (and their shorter-lived precursors) whose potential hazard will persist long after such precautions as institutional controls, improved waste form, and deeper disposal have ceased to be effective. These precautions delay the time when long-lived radionuclides could cause exposures. In addition, the magnitude of the potential dose is limited by the concentration and availability of the radionuclide at the time of exposure. Second, consideration must be given to the concentration of shorter-lived radionuclides for which requirements on institutional controls, waste form, and disposal methods are effective.

(2) *Classes of waste.* (i) Class A waste is waste that is usually segregated from other waste classes at the disposal site. The physical form and characteristics of Class A waste must meet the minimum requirements set forth in § 61.56(a). If Class A waste also meets the stability requirements set forth in § 61.56(b), it is not necessary to segregate the waste for disposal.

(ii) Class B waste is waste that must meet more rigorous requirements on waste form to ensure stability after disposal. The physical form and characteristics of Class B waste must meet both the minimum and stability requirements set forth in § 61.56.

(iii) Class C waste is waste that not only must meet more rigorous requirements on waste form to ensure stability but also requires additional measures at the disposal facility to protect against inadvertent intrusion. The physical form and characteristics of Class C waste must meet both the minimum and stability requirements set forth in § 61.56.

(iv) Waste that is not generally acceptable for near-surface disposal is waste for which waste form and disposal methods must be different, and in general more stringent, than those specified for Class C waste. In the absence of specific requirements in this part, proposals for disposal of this waste may be submitted to the Commission for approval, pursuant to § 61.58 of this part.

(3) Classification determined by long-lived radionuclides. If radioactive waste contains only radionuclides listed in Table 1, classification shall be determined as follows:

(i) If the concentration does not exceed 0.1 times the value in Table 1, the waste is Class A.

(ii) If the concentration exceeds 0.1 times the value in Table 1 but does not exceed the value in Table 1, the waste is Class C.

(iii) If the concentration exceeds the value in Table 1, the waste is not generally acceptable for near-surface disposal.

(iv) For wastes containing mixtures of radionuclides listed in Table 1, the total concentration shall be determined by the sum of fractions rule described in paragraph (a)(7) of this section.

TABLE 1

Radionuclide	Concentration, curies per cubic meter
C-14	[illegible]
C-14 in activated metal	[illegible]
Ni-59 in activated metal	220
Nb-94 in activated metal	0.2
Tc-99	3
I-129	[illegible]
Alpha emitting transuranic nuclides with half-life greater than five years	[1] 100
Pu-241	[1] 3,500
Cm-242	[1] 20,000

[1] Units are nanocuries per gram.

(4) Classification determined by short-lived radionuclides. If radioactive waste does not contain any of the radionuclides listed in Table 1, classification shall be determined based on the concentrations shown in Table 2. However, as specified in paragraph (a)(6) of this section, if radioactive waste does not contain any nuclides listed in either Table 1 or 2, it is Class A.

(i) If the concentration does not exceed the value in Column 1, the waste is Class A.

(ii) If the concentration exceeds the value in Column 1, but does not exceed the value in Column 2, the waste is Class B.

(iii) If the concentration exceeds the value in Column 2, but does not exceed the value in Column 3, the waste is Class C.

(iv) If the concentration exceeds the value in Column 3, the waste is not generally acceptable for near-surface disposal.

(v) For wastes containing mixtures of the nuclides listed in Table 2, the total concentration shall be determined by the sum of fractions rule described in paragraph (a)(7) of this section.

TABLE 2

Radionuclide	Concentration, curies per cubic meter		
	Col. 1	Col. 2	Col. 3
Total of all nuclides with less than 5 year half life	700	[1]	[1]
H-3	40	[1]	[1]
Co-60	700	[1]	[1]
Ni-63	3.5	70	700
Ni-63 in activated metal	35	700	7000
Sr-90	0.04	150	7000
Cs-137	1	44	4600

[1] There are no limits established for these radionuclides in Class B or C wastes. Practical considerations such as the effects of external radiation and internal heat generation on transportation, handling, and disposal will limit the concentrations for these wastes. These wastes shall be Class B unless the concentrations of other nuclides in Table 2 determine the waste to the Class C independent of these [illegible].

(5) Classification determined by both long- and short-lived radionuclides. If radioactive waste contains a mixture of radionuclides, some of which are listed in Table 1, and some of which are listed in Table 2, classification shall be determined as follows:

(i) If the concentration of a nuclide listed in Table 1 does not exceed 0.1 times the value listed in Table 1, the class shall be that determined by the concentration of nuclides listed in Table 2.

(ii) If the concentration of a nuclide listed in Table 1 exceeds 0.1 times the value listed in Table 1 but does not exceed the value in Table 1, the waste shall be Class C, provided the concentration of nuclides listed in Table 2 does not exceed the value shown in Column 3 of Table 2.

(6) Classification of wastes with radionuclides other than those listed in Tables 1 and 2. If radioactive waste does not contain any nuclides listed in either Table 1 or 2, it is Class A.

(7) The sum of the fractions rule for mixtures of radionuclides. For determining classification for waste that contains a mixture of radionuclides, it is necessary to determine the sum of fractions by dividing each nuclide's concentration by the appropriate limit and adding the resulting values. The appropriate limits must all be taken from the same column of the same table. The sum of the fractions for the column must be less than 1.0 if the waste class is to be determined by that column. Example: A waste contains Sr-90 in a

concentration of 50 Ci/m³ and Cs-137 in a concentration of 22 Ci/m³. Since the concentrations both exceed the values in Column 1, Table 2, they must be compared to Column 2 values. For Sr-90 fraction 50/150=0.33; for Cs-137 fraction, 22/44=0.5; the sum of the fractions=0.83. Since the sum is less than 1.0, the waste is Class B.

(8) *Determination of concentrations in wastes.* The concentration of a radionuclide may be determined by indirect methods such as use of scaling factors which relate the inferred concentration of one radionuclide to another that is measured, or radionuclide material accountability, if there is reasonable assurance that the indirect methods can be correlated with actual measurements. The concentration of a radionuclide may be averaged over the volume of the waste, or weight of the waste if the units are expressed as nanocuries per gram.

§ 61.56 Waste characteristics.

(a) The following requirements are minimum requirements for all classes of waste and are intended to facilitate handling at the disposal site and provide protection of health and safety of personnel at the disposal site.

(1) Waste must not be packaged for disposal in cardboard or fiberboard boxes.

(2) Liquid waste must be solidified or packaged in sufficient absorbent material to absorb twice the volume of the liquid.

(3) Solid waste containing liquid shall contain as little free standing and noncorrosive liquid as is reasonably achievable, but in no case shall the liquid exceed 1% of the volume.

(4) Waste must not be readily capable of detonation or of explosive decomposition or reaction at normal pressures and temperatures, or of explosive reaction with water.

(5) Waste must not contain, or be capable of generating, quantities of toxic gases, vapors, or fumes harmful to persons transporting, handling, or disposing of the waste. This does not apply to radioactive gaseous waste packaged in accordance with paragraph (a)(7) of this section.

(6) Waste must not be pyrophoric. Pyrophoric materials contained in waste shall be treated, prepared, and packaged to be nonflammable.

(7) Waste in a gaseous form must be packaged at a pressure that does not exceed 1.5 atmospheres at 20°C. Total activity must not exceed 100 curies per container.

(8) Waste containing hazardous, biological, pathogenic, or infectious material must be treated to reduce to the maximum extent practicable the potential hazard from the non-radiological materials.

(b) The requirements in this section are intended to provide stability of the waste. Stability is intended to ensure that the waste does not structurally degrade and affect overall stability of the site through slumping, collapse, or other failure of the disposal unit and thereby lead to water infiltration. Stability is also a factor in limiting exposure to an inadvertent intruder, since it provides a recognizable and nondispersible waste.

(1) Waste must have structural stability. A structurally stable waste form will generally maintain its physical dimensions and its form, under the expected disposal conditions such as weight of overburden and compaction equipment, the presence of moisture, and microbial activity, and internal factors such as radiation effects and chemical changes. Structural stability can be provided by the waste form itself, processing the waste to a stable form, or placing the waste in a disposal container or structure that provides stability after disposal.

(2) Notwithstanding the provisions in §§ 61.56(a) (2) and (3), liquid wastes, or wastes containing liquid, must be converted into a form that contains as little free standing and noncorrosive liquid as is reasonably achievable, but in no case shall the liquid exceed 1% of the volume of the waste when the waste is in a disposal container designed to ensure stability, or 0.5% of the volume of the waste for waste processed to a stable form.

(3) Void spaces within the waste and between the waste and its package must be reduced to the extent practicable.

§ 61.57 Labeling.

Each package of waste must be clearly labeled to identify whether it is Class A waste, Class B waste, or class C waste in accordance with § 61.55.

§ 61.58 Alternative requirements for waste classification and characteristics.

The Commission may, upon request or on its own initiative, authorize other provisions for the classification and characteristics of waste on a specific basis, if, after evaluation, of the specific characteristics of the waste, disposal site, and method of disposal, it finds reasonable assurance of compliance with the performance objectives in Subpart C of this part.

§ 61.59 Institutional requirements.

(a) *Land ownership.* Disposal of radioactive waste received from other persons may be permitted only on land owned in fee by the Federal or a State government.

(b) *Institutional control.* The land owner or custodial agency shall carry out an institutional control program to physically control access to the disposal site following transfer of control of the disposal site from the disposal site operator. The institutional control program must also include, but not be limited to, carrying out an environmental monitoring program at the disposal site, periodic surveillance, minor custodial care, and other requirements as determined by the Commission; and administration of funds to cover the costs for these activities. The period of institutional controls will be determined by the Commission, but institutional controls may not be relied upon for more than 100 years following transfer of control of the disposal site to the owner.

Subpart E—Financial Assurances

§ 61.61 Applicant qualifications and assurances.

Each applicant shall show that it either possesses the necessary funds or has reasonable assurance of obtaining the necessary funds, or by a combination of the two, to cover the estimated costs of conducting all licensed activities over the planned operating life of the project, including costs of construction and disposal.

§ 61.62 Funding for disposal site closure and stabilization.

(a) The applicant shall provide assurance that sufficient funds will be available to carry out disposal site closure and stabilization, including: (1) Decontamination or dismantlement of land disposal facility structures; and (2) closure and stabilization of the disposal site so that following transfer of the disposal site to the site owner, the need for ongoing active maintenance is eliminated to the extent practicable and only minor custodial care, surveillance, and monitoring are required. These assurances shall be based on Commission-approved cost estimates reflecting the Commission-approved plan for disposal site closure and stabilization. The applicant's cost estimates must take into account total capital costs that would be incurred if an independent contractor were hired to perform the closure and stabilization work.

(b) In order to avoid unnecessary duplication and expense, the Commission will accept financial sureties that have been consolidated with earmarked financial or surety arrangements established to meet

requirements of other Federal or State agencies and/or local governing bodies for such decontamination, closure and stabilization. The Commission will accept this arrangement only if they are considered adequate to satisfy these requirements and that the portion of the surety which covers the closure of the disposal site is clearly identified and committed for use in accomplishing these activities.

(c) The licensee's surety mechanism will be annually reviewed by the Commission to assure that sufficient funds are available for completion of the closure plan, assuming that the work has to be performed by an independent contractor.

(d) The amount of surety liability should change in accordance with the predicted cost of future closure and stabilization. Factors affecting closure and stabilization cost estimates include: inflation; increases in the amount of disturbed land; changes in engineering plans; closure and stabilization that has already been accomplished and any other conditions affecting costs. This will yield a surety that is at least sufficient at all times to cover the costs of closure of the disposal units that are expected to be used before the next license renewal.

(e) The term of the surety mechanism must be open ended unless it can be demonstrated that another arrangement would provide an equivalent level of assurance. This assurance could be provided with a surety mechanism which is written for a specified period of time (e.g., five years) yet which must be automatically renewed unless the party who issues the surety notifies the Commission and the beneficiary (the site owner) and the principal (the licensee) not less than 90 days prior to the renewal date of its intention not to renew. In such a situation the licensee must submit a replacement surety within 30 days after notification of cancellation. If the licensee fails to provide a replacement surety acceptable to the Commission, the site owner may collect on the original surety.

(f) Proof of forfeiture must not be necessary to collect the surety so that in the event that the licensee could not provide an acceptable replacement surety within the required time, the surety shall be automatically collected prior to its expiration. The conditions described above would have to be clearly stated on any surety instrument which is not open-ended, and must be agreed to by all parties. Liability under the surety mechanism must remain in effect until the closure and stabilization program has been completed and approved by the Commission and the license has been transferred to the site owner.

(g) Financial surety arrangements generally acceptable to the Commission include: surety bonds, cash deposits, certificates of deposits, deposits of government securities, escrow accounts, irrevocable letters or lines of credit, trust funds, and combinations of the above or such other types of arrangements as may be approved by the Commission. However, self-insurance, or any arrangement which essentially constitutes pledging the assets of the licensee, will not satisfy the surety requirement for private sector applicants since this provides no additional assurance other than that which already exists through license requirements.

§ 61.63 Financial assurances for institutional controls.

(a) Prior to the issuance of the license, the applicant shall provide for Commission review and approval a copy of a binding arrangement, such as a lease, between the applicant and the disposal site owner that ensures that sufficient funds will be available to cover the costs of monitoring and any required maintenance during the institutional control period. The binding arrangement will be reviewed periodically by the Commission to ensure that changes in inflation, technology and disposal facility operations are reflected in the arrangements.

(b) Subsequent changes to the binding arrangement specified in paragraph (a) of this section relevant to institutional control shall be submitted to the Commission for approval.

Subpart F—Participation by State Governments and Indian Tribes

§ 61.70 Scope.

This subpart describes mechanisms through which the Commission will implement a formal request from a State or tribal government to participate in the review of a license application for a land disposal facility. Nothing in this subpart may be construed to bar the State or tribal governing body from participating in subsequent Commission proceedings concerning the license application as provided under Federal law and regulations.

§ 61.71 State and Tribal government consultation.

Upon request of a State or tribal governing body, the Director shall make available Commission staff to discuss with representatives of the State or tribal governing body information submitted by the applicant, applicable Commission regulations, licensing procedures, potential schedules, and the type and scope of State activities in the license review permitted by law. In addition, staff shall be made available to consult and cooperate with the State or tribal governing body in developing proposals for participation in the license review.

§ 61.72 Filing of proposals for State and Tribal participation.

(a) A State or tribal governing body whose interest is affected by a near-surface disposal facility at the proposed site may submit to the Director a proposal for participation in the review of a license application. Proposals must be submitted within the following time periods:

(1) For the State in which the disposal facility will be located, or any State that is member of an interstate compact that includes the State in which the disposal facility is located, no later than 45 days following publication in the **Federal Register** of the notice of tendering of an application submitted under § 61.20.

(2) For any other State, or for a tribal governing body, no later than 120 days following publication in the **Federal Register** of the notice of tendering of an application submitted under § 61.20.

(b) Proposals for participation in the licensing process must be made in writing and must be signed by the Governor of the State or the official otherwise provided for by State or tribal law.

(c) At a minimum, proposals must contain each of the following items of information:

(1) A general description of how the State or tribe wishes to participate in the licensing process specifically identifying those issues it wishes to review.

(2) A description of material and information which the State or tribe plans to submit to the Commission for consideration in the licensing process. A tentative schedule referencing steps in the review and calendar dates for planned submittals should be included.

(3) A description of any work that the State or tribe proposes to perform for the Commission in support of the licensing process.

(4) A description of State or tribal plans to facilitate local government and citizen participation.

(5) A preliminary estimate of the types and extent of impacts which the State expects, should a disposal facility be located as proposed.

(6) If desired, any requests for educational or information services (seminars, public meetings) or other

actions from the Commission such as establishment of additional Public Document Rooms or exchange of State personnel under the Intergovernmental Personnel Act.

§ 61.73 Commission approval of proposals.

(a) Upon receipt of a proposal submitted in accordance with § 61.72, the Director shall arrange for a meeting between the representatives of the State or tribal governing body and the Commission staff to discuss the proposal and to ensure full and effective participation by the State or tribe in the Commission's license review.

(b) If requested by a State or tribal governing body, the Director may approve all or any part of a proposal if the Director determines that:

(1) The proposed activities are within the scope of Commission statutory responsibility and the type and magnitude of impacts which the State or tribe may bear are sufficient to justify their participation; and

(2) The proposed activities will contribute productively to the licensing review.

(c) The decision of the Director will be transmitted in writing to the governor or the designated official of the tribal governing body.

(d) Participation by a State or Indian tribe shall not affect their rights to participate in an adjudicatory hearing as provided by Part 2 of this chapter.

Subpart G—Records, Reports, Tests, and Inspections

§ 61.80 Maintenance of records, reports, and transfers.

(a) Each licensee shall maintain any records and make any reports in connection with the licensed activities as may be required by the conditions of the license or by the rules, regulations, and orders of the Commission.

(b) Records which are required by the regulations in this part or by license conditions must be maintained for a period specified by the appropriate regulations in this chapter or by license condition. If a retention period is not otherwise specified, these records must be maintained and transferred to the officials specified in paragraph (e) of this section as a condition of license termination unless the Commission otherwise authorizes their disposition.

(c) Records which must be maintained pursuant to this part may be the original or a reproduced copy or microfilm if this reproduced copy or microfilm is capable of producing copy that is clear and legible at the end of the required retention period.

(d) If there is a conflict between the Commission's regulations in this part, license condition, or other written Commission approval or authorization pertaining to the retention period for the same type of record, the longest retention period specified takes precedence.

(e) Notwithstanding paragraphs (a) through (d) of this section, copies of records of the location and the quantity of radioactive wastes contained in the disposal site must be transferred upon license termination to the chief executive of the nearest municipality, the chief executive of the county in which the facility is located, the county zoning board or land development and planning agency, the State governor and other State, local and Federal governmental agencies as designated by the Commission at the time of license termination.

(f) Following receipt and acceptance of a shipment of radioactive waste, the licensee shall record the date of disposal of the waste, the location in the disposal site, the condition of the waste packages as received, any discrepancies between materials listed on the manifest and those received, and any evidence of leaking or damaged packages or radiation or contamination levels in excess of limits specified in Department of Transportation and Commission regulations. The licensee shall briefly describe any repackaging operations of any of the waste packages included in the shipment, plus any other information required by the Commission as a license condition.

(g) Each licensee shall comply with the safeguards reporting requirements of §§ 30.55, 40.64, 70.53 and 70.54 of this chapter if the quantities or activities of materials received or transferred exceed the limits of these sections. Inventory reports required by these sections are not required for materials after disposal.

(h) Each licensee authorized to dispose of radioactive waste received from other persons shall file a copy of its financial report or a certified financial statement annually with the Commission in order to update the information base for determining financial qualifications.

(i)(1) Each licensee authorized to dispose of waste materials received from other persons, pursuant to this part, shall submit annual reports to the appropriate Commission regional office shown in Appendix D of Part 20 of this chapter, with copies to the Director of the Office of Inspection and Enforcement and the Director of the Division of Waste Management, USNRC, Washington, D.C., 20555. Reports shall be submitted by the end of the first calendar quarter of each year for the preceding year; (2) The reports shall include (i) specification of the quantity of each of the principal radionuclides released to unrestricted areas in liquid and in airborne effluents during the preceding year, (ii) the results of the environmental monitoring program, (iii) a summary of licensee disposal unit survey and maintenance activities, (iv) a summary, by waste class, of activities and quantities of radionuclides disposed of, (v) any instances in which observed site characteristics were significantly different from those described in the application for a license; and (vi) any other information the Commission may require. If the quantities of radioactive materials released during the reporting period, monitoring results, or maintenance performed are significantlly different from those expected in the materials previously reviewed as part of the licensing action, the report must cover this specifically.

(j) Each licensee shall report in accordance with the requirements of § 70.52 of this chapter.

(k) Any transfer of byproduct, source, and special nuclear materials by the licensee is subject to the requirements in §§ 30.41, 40.51, and 70.42 of this chapter. Byproduct, source and special nuclear material means materials as defined in these parts, respectively.

§ 61.81 Tests at land disposal facilities.

(a) Each licensee shall perform, or permit the Commission to perform, any tests as the Commission deems appropriate or necessary for the administration of the regulations in this part, including tests of:

(1) Radioactive wastes and facilities used for the receipt, storage, treatment, handling and disposal of radioactive wastes.

(2) Radiation detection and monitoring instruments; and

(3) Other equipment and devices used in connection with the receipt, possession, handling, treatment, storage, or disposal of radioactive waste.

(b) [Reserved]

§ 61.82 Commission inspections of land disposal facilities.

(a) Each licensee shall afford to the Commission at all reasonable times opportunity to inspect radioactive waste not yet disposed of, and the premises, equipment, operations, and facilities in which radioactive wastes are received, possessed, handled, treated, stored, or disposed of.

(b) Each licensee shall make available to the Commission for inspection, upon

reasonable notice, records kept by it pursuant to the regulations in this chapter. Authorized representatives of the Commission may copy and take away copies of, for the Commission's use, any record required to be kept pursuant to this part.

§ 61.83 Violations.

An injunction or other court order may be obtained prohibiting any violation of any provision of the Atomic Energy Act of 1954, as amended, or any regulation or order issued thereunder. A court order may be obtained for the payment of a civil penalty imposed pursuant to section 234 of the Act for violation of section 53, 57, 62, 63, 81, 82, 101, 103, 104, 107, or 109 of the Act, or section 206 of the Energy Reorganization Act of 1974, or any rule.

The following amendments are also made to existing parts of the regulations in this chapter.

PART 2—RULES OF PRACTICE

2. In § 2.101, paragraph (a)(2), (b), and (d) are revised and a new (g) is added to read as follows:

§ 2.101 Filing of application.

(a) * * *

(2) Each application for a license for a facility or for receipt of waste radioactive material from other persons for the purpose of commercial disposal by the waste disposal licensee will be assigned a docket number. However, to allow a determination as to whether an application for a construction permit or operating license for a production or utilization facility is complete and acceptable for docketing, it will be initially treated as a tendered application after it is received and a copy of the tendered application will be available for public inspection in the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Generally, that determination will be made within a period of thirty (30) days. However, in selected construction permit applications, the Commission may decide to determine acceptability on the basis of the technical adequacy of the application as well as its completeness. In such cases, the Commission, pursuant to § 2.104(a), will direct that the notice of hearing be issued as soon as practicable after the application has been tendered, and the determination of acceptability will generally be made within a period of sixty (60) days. For docketing and other requirements for applications pursuant to Part 61 of this chapter, see paragraph (g) of this section.

* * * * *

(b) After the application has been docketed each applicant for a license for receipt of waste radioactive material from other persons for the purpose of commercial disposal by the waste disposal licensee except applicants under Part 61 of this chapter, who must comply with paragraph (g) of this section, shall serve a copy of the application and environmental report, as appropriate, on the chief executive of the municipality in which the activity is to be conducted or, if the activity is not to be conducted within a municipality on the chief executive of the county, and serve a notice of availability of the application or environmental report on the chief executives of the municipalities or counties which have been identified in the application or environmental report as the location of all or part of the alternative sites, containing the following information: Docket number of the application; a brief description of the proposed site and facility; the location of the site and facility as primarily proposed and alternatively listed; the name, address, and telephone number of the applicant's representative who may be contacted for further information; notification that a draft environmental impact statement will be issued by the Commission and will be made available upon request to the Commission; and notification that if a request is received from the appropriate chief executive, the applicant will transmit a copy of the application and environmental report, and any changes to such documents which affect the alternative site location, to the executive who makes the request. In complying with the requirements of this paragraph (b) the applicant should not make public distribution of those parts of the application subject to § 2.790(d). The applicant shall submit to the Director of Nuclear Material Safety and Safeguards an affidavit that service of the notice of availability of the application or environmental report has been completed along with a list of names and addresses of those executives upon whom the notice was served.

* * * * *

(d) The Director of Nuclear Reactor Regulation or Director of Nuclear Material Safety and Safeguards, as appropriate, will give notice of the docketing of the public health and safety, common defense and security, and environmental parts of an application for a license for a facility or for receipt of waste radioactive material from other persons for the purpose of commercial disposal by the waste disposal licensee, except that for applications pursuant to Part 61 of this chapter paragraph (g) of this section applies, to the Governor or other appropriate official of the State in which the facility is to be located or the activity is to be conducted and will cause to be published in the **Federal Register** a notice of docketing of the application which states the purpose of the application and specifies the location at which the proposed activity would be conducted.

* * * * *

(g) Each application for a license to receive radioactive waste from other persons for disposal under Part 61 of this chapter and the accompanying environmental report shall be processed in accordance with the provisions of this paragraph.

(1) To allow a determination as to whether the application or environmental report is complete and acceptable for docketing, it will be initially treated as a tendered document, and a copy will be available for public inspection in the Commission's Public Document Room 1717 H Street NW., Washington, D.C. One original and two copies shall be filed to enable this determination to be made.

(i) Upon receipt of a tendered application, the Commission will publish in the **Federal Register** notice of the filed application and will notify the governors, legislatures and other appropriate State, county, and municipal officials and tribal governing bodies of the States and areas containing or potentially affected by the activities at the proposed site and the alternative sites. The Commission will inform these officials that the Commission staff will be available for consultation pursuant to § 61.71 of this chapter. The **Federal Register** notice will note the opportunity for interested persons to submit views and comments on the tendered application for consideration by the Commission and applicant. The Commission will also notify the U.S. Bureau of Indian Affairs when tribal governing bodies are notified.

(ii) The Commission will also post a public notice in a newspaper or newspapers of general circulation in the affected States and areas summarizing information contained in the applicant's tendered application and noting the opportunity to submit views and comments.

(iii) When the Director of Nuclear Material Safety and Safeguards determines that the tendered document is complete and acceptable for docketing, a docket number will be assigned and the applicant will be notified of the determination. If it is determined that all or any part of the

tendered document is incomplete and therefore not acceptable for processing, the applicant will be informed of this determination and the aspects in which the document is deficient.

(2) With respect to any tendered document that is acceptable for docketing, the applicant will be requested to (i) submit to the Director of Nuclear Material Safety and Safeguards such additional copies as the regulations in Parts 61 and 51 of this chapter require, (ii) serve a copy of the chief executive of the municipality in which the waste is to be disposed of or, if the waste is not be be disposed of within a municipality, serve a copy on the chief executive of the county in which the waste is to be disposed of, (iii) make direct distribution of additional copies to Federal, State, Indian Tribe, and local officials in accordance with the requirements of this chapter and written instructions from the Director of Nuclear Material Safety and Safeguards, and (iv) serve a notice of availability of the application and environmental report on the chief executives or governing bodies of the municipalities or counties which have been identified in the application and environmental report as the location of all or part of the alternative sites if copies are not distributed under paragraph (g)(2)(iii) of this section to the executives or bodies. All distributed copies shall be completely assembled documents identified by docket number. Subsequently distributed amendments, however, may include revised pages to previous submittals and, in such cases, the recipients will be responsible for inserting the revised pages. In complying with the requirements of paragraph (g) of this section the applicant shall not make public distribution of those parts of the application subject to § 2.790(d).

(3) The tendered document will be formally docketed upon receipt by the Director of Nuclear Material Safety and Safeguards of the required additional copies. Distribution of the additional copies shall be deemed to be complete as of the time the copies are deposited in the mail or with a carrier prepaid for delivery to the designated addressees. The date of docketing shall be the date when the required copies are received by the Director of Nuclear Material Safety and Safeguards. Within ten (10) days after docketing, the applicant shall submit to the Director of Nuclear Material Safety and Safeguards a written statement that distribution of the additional copies to Federal, State, Indian Tribe, and local officials has been completed in accordance with requirements of this section and written instructions furnished to the applicant by the Director of Nuclear Material Safety and Safeguards.

(4) Amendments to the application and environmental report shall be filed and distributed and a written statement shall be furnished to the Director of Nuclear Material Safety and Safeguards in the same manner as for the initial application and environmental report.

(5) The Director of Nuclear Material Safety and Safeguards will cause to be published in the **Federal Register** a notice of docketing which identifies the State and location of the proposed waste disposal facility and will give notice of docketing to the governor of that State and other officials listed in paragraph (g)(3) of this section and, in a reasonable period thereafter, publish in the **Federal Register** a notice pursuant to § 2.105 offering opportunity to request a hearing to the applicant and other affected persons.

3. Section 2.103(a) is revised to read as follows:

§ 2.103 Action on applications for byproduct, source, special nuclear material, and operator licenses.

(a) If the Director of Nuclear Reactor Regulation or the Director of Nuclear Material Safety and Safeguards, as appropriate, finds that an application for a byproduct, source, special nuclear material, or operator license complies with the requirements of the Act, the Energy Reorganization Act, and this chapter, he will issue a license. If the license is for a facility, or for receipt of waste radioactive material from other persons for the purpose of commercial disposal by the waste disposal licensee, or if it is to receive and possess high-level radioactive waste at a geologic repository operations area pursuant to Part 60 of this chapter, the Director of Nuclear Reactor Regulation or the Director of Nuclear Material Safety and Safeguards, as appropriate, will inform the State, tribal and local officials specified in § 2.104(e) of the issuance of the license. For notice of issuance requirements for licenses issued pursuant to Part 61 of this chapter, see § 2.106(d) of this part.

* * * * *

4. Section 2.104(e) is revised to read as follows:

§ 2.104 Notice of hearing.

* * * * *

(e) The Secretary will give timely notice of the hearing to all parties and to other persons, if any, entitled by law to notice. The Secretary will transmit a notice of hearing on an application for a facility license or for a license for receipt of waste radioactive material from other persons for the purpose of commercial disposal by the waste disposal licensee and all applications for disposal under Part 61 of this chapter or for a license to receive and possess high-level radioactive waste at a geologic repository operations area pursuant to Part 60 of this chapter to the governor or other appropriate official of the State and to the chief executive of the municipality in which the facility is to be located or the activity is to be conducted or, if the facility is not to be located or the activity conducted within a municipality, to the chief executive of the county (or to the Tribal organization, if it is to be so located or conducted within an Indian reservation).

5. Section 2.105(a)(2) is revised to read as follows:

§ 2.105 Notice of proposed action.

(a) * * *

(2) A license for receipt of waste radioactive material from other persons for the purpose of commercial disposal by the waste disposal licensee. All licenses issued under Part 61 of this chapter shall be so noticed.

* * * * *

6. Section 2.106 is amended by adding a new paragraph (d) to read as follows:

§ 2.106 Notice of issuance.

* * * * *

(d) The Director of Nuclear Material Safety and Safeguards will also cause to be published in the **Federal Register** notice of, and will inform the State and local officials or tribal governing body specified in § 2.104(e) of any licensing action with respect to a license to receive radioactive waste from other persons for disposal under Part 61 of this chapter or the amendment of such a license for which a notice of proposed action has been previously published.

7. A new Section 2.765 is added to read as follows:

§ 2.765 Immediate effectiveness of initial decision directing issuance or amendment of licenses under Part 61 of this chapter.

An initial decision directing the issuance of a license under Part 61 of this chapter (relating to land disposal of radioactive waste) or any amendment to such a license authorizing actions which may significantly affect the health and safety of the public, will become effective only upon order of the Commission. The Director of Nuclear Material Safety and Safeguards may not issue a license under Part 61 of this chapter, or any amendment to such a license which may significantly affect the health and safety of the public, until expressly authorized to do so by the Commission.

PART 19—NOTICES, INSTRUCTIONS AND REPORTS TO WORKERS; INSPECTIONS

§ 19.2 [Amended]

8. Section 19.2 is amended by adding "61," following "40, 60."

§ 19.3 [Amended]

9. In § 19.3, paragraph (d) is amended by adding "61," following "40, 60."

PART 20—STANDARDS FOR PROTECTION AGAINST RADIATION

§ 20.2 [Amended]

10. Section 20.2 is amended by adding "61," following "40, 60."

§ 20.3 [Amended]

11. In § 20.3, paragraph (a)(9) is amended by adding "61," following "40, 60."

12. In § 20.301 paragraph (a) is amended by adding "61," following "40, 60," and paragraph (b) is revised to read as follows:

§ 20.301 General requirement.

* * * * *

(b) As authorized under § 20.302 or Part 61 of this chapter; or

* * * * *

§ 20.302 [Amended]

13. In §20.302, paragraph (b) is removed and paragraph (c) is redesignated as paragraph (b).

14. A new § 20.311 is added to read as follows:

§ 20.311 Transfer for disposal and manifests.

(a) Purpose. The requirements of this section are designed to control transfers of radioactive waste intended for disposal at a land disposal facility and establish a manifest tracking system and supplement existing requirements concerning transfers and recordkeeping for such wastes. The reporting and recordkeeping requirements contained in this section have been approved by the Office of Management and Budget; OMB approval No. 3150–0014.

(b) Each shipment of radioactive waste to a licensed land disposal facility must be accompanied by a shipment manifest that contains the name, address, and telephone number of the person generating the waste. The manifest shall also include the name, address, and telephone number or the name and EPA hazardous waste identification number of the person transporting the waste to the land disposal facility. The manifest must also indicate as completely as practicable: a physical description of the waste; the volume; radionuclide identity and quantity; the total radioactivity; and the principal chemical form. The solidification agent must be specified. Waste containing more than 0.1% chelating agents by weight must be identified and the weight percentage of the chelating agent estimated. Wastes classified as Class A, Class B, or Class C in § 61.55 of this chapter must be clearly identified as such in the manifest. The total quantity of the radionuclides H–3, C–14, Tc–99 and I–129 must be shown. The manifest required by this paragraph may be shipping papers used to meet Department of Transportation or Environmental Protection Agency regulations or requirements of the receiver, provided all the required information is included. Copies of manifests required by this section may be legible carbon copies or legible photocopies.

(c) Each manifest must include a certification by the waste generator that the transported materials are properly classified, described, packaged, marked, and labeled and are in proper condition for transportation according to the applicable regulations of the Department of Transportation and the Commission. An authorized representative of the waste generator shall sign and date the manifest.

(d) Any generating licensee who transfers radioactive waste to a land disposal facility or a licensed waste collector shall comply with the requirements in paragraphs (d)(1) through (8) of this section. Any generating licensee who transfers waste to a licensed waste processor who treats or repackages waste shall comply with the requirements of paragraphs (d)(4) through (8) of this section. A licensee shall:

(1) Prepare all wastes so that the waste is classified according to § 61.55 and meets the waste characteristics requirements in § 61.56 of this chapter;

(2) Label each package of waste to identify whether it is Class A waste, Class B waste, or Class C waste, in accordance with § 61.55 of this chapter;

(3) Conduct a quality control program to assure compliance with §§ 61.55 and 61.56 of this chapter; the program must include management evaluation of audits;

(4) Prepare shipping manifests to meet the requirements of §§ 20.311 (b) and (c) of this part;

(5) Forward a copy of the manifest to the intended recipient, at the time of shipment; or, deliver to a collector at the time the waste is collected, obtaining acknowledgement of receipt in the form of a signed copy of the manifest or equivalent documentation from the collector;

(6) Include one copy of the manifest with the shipment;

(7) Retain a copy of the manifest and documentation of acknowledgement of receipt as the record of transfer of licensed material as required by Parts 30, 40, and 70 of this chapter; and,

(8) For any shipments or any part of a shipment for which acknowledgement of receipt has not been received within the times set forth in this section, conduct an investigation in accordance with paragraph (h) of this section.

(e) Any waste collector licensee who handles only prepackaged waste shall:

(1) Acknowledge receipt of the waste from the generator within one week of receipt by returning a signed copy of the manifest or equivalent documentation;

(2) Prepare a new manifest to reflect consolidated shipments; the new manifest shall serve as a listing or index for the detailed generator manifests. Copies of the generator manifests shall be a part of the new manifest. The waste collector may prepare a new manifest without attaching the generator manifests, provided the new manifest contains for each package the information specified in paragraph (b) of this section. The collector licensee shall certify that nothing has been done to the waste which would invalidate the generator's certification;

(3) Forward a copy of the new manifest to the land disposal facility operator at the time of shipment;

(4) Include the new manifest with the shipment to the disposal site;

(5) Retain a copy of the manifest and documentation of acknowledgement of receipt as the record of transfer of licensed material as required by Parts 30, 40, and 70 of this chapter, and retain information from generator manifests until disposition is authorized by the Commission; and,

(6) For any shipments or any part of a shipment for which acknowledgement of receipt is not received within the times set forth in this section, conduct an investigation in accordance with paragraph (h) of this section.

(f) Any licensed waste processor who treats or repackages wastes shall:

(1) Acknowledge receipt of the waste from the generator within one week of receipt by returning a signed copy of the manifest or equivalent documentation;

(2) Prepare a new manifest that meets the requirements of paragraphs (b) and (c) of this section. Preparation of the new manifest reflects that the processor is responsible for the waste;

(3) Prepare all wastes so that the waste is classified according to § 61.55

and meets the waste characteristics requirements in § 61.56 of this chapter;

(4) Label each package of waste to identify whether it is Class A waste, Class B waste, or Class C waste, in accordance with §§ 61.55 and 61.57 of this chapter;

(5) Conduct a quality control program to assure compliance with §§ 61.55 and 61.56 of this chapter. The program shall include management evaluation of audits;

(6) Forward a copy of the new manifest to the disposal site operator or waste collector at the time of shipment, or deliver to a collector at the time the waste is collected, obtaining acknowledgement of receipt in the form of a signed copy of the manifest or equivalent documentation by the collector;

(7) Include the new manifest with the shipment;

(8) Retain copies of original manifests and new manifests and documentation of acknowledgement of receipt as the record of transfer of licensed material required by Parts 30, 40, and 70 of this chapter; and

(9) For any shipment or part of a shipment for which acknowledgement is not received within the times set forth in this section, conduct an investigation in accordance with paragraph (h) of this section.

(g) The land disposal facility operator shall:

(1) Acknowledge receipt of the waste within one week of receipt by returning a signed copy of the manifest or equivalent documentation to the shipper. The shipper to be notified is the licensee who last possessed the waste and transferred the waste to the operator. The returned copy of the manifest or equivalent documentation shall indicate any discrepancies between materials listed on the manifest and materials received;

(2) Maintain copies of all completed manifests or equivalent documentation until the Commission authorizes their disposition; and

(3) Notify the shipper (i.e., the generator, the collector, or processor) and the Director of the nearest Commission Regional Office listed in Appendix D of this part when any shipment or part of a shipment has not arrived within 60 days after the advance manifest was received.

(h) Any shipment or part of a shipment for which acknowledgement is not received within the times set forth in this section, must:

(1) Be investigated by the shipper if the shipper has not received notification of receipt within 20 days after transfer; and

(2) Be traced and reported. The investigation shall include tracing the shipment and filing a report with the nearest Commission Regional Office listed in Appendix D of this part. Each licensee who conducts a trace investigation shall file a written report with the nearest Commission's Regional office within 2 weeks of completion of the investigation.

15. In § 20.401, paragraphs (b) and (c)(3) are revised to read as follows:

§ 20.401 Records of surveys, radiation monitoring, and disposal.

* * * * *

(b) Each licensee shall maintain records in the same units used in this part, showing the results of surveys required by § 20.201(b), monitoring required by §§ 20.205(b) and 20.205(c), and disposals made under §§ 20.302, 20.303, removed § 20.304,[1] and Part 61 of this chapter.

(c) * * *

(3) Records of disposal of licensed materials made pursuant to §§ 20.302, 20,303, removed § 20.304,[1] and Part 61 of this chapter are to be maintained until the Commission authorizes their disposition.

* * * * *

16. Section 20.408 is amended by adding a new paragraph (a)(7) to read as follows:

§ 20.408 Reports of personnel monitoring on termination of employment or work.

(a) * * *

(7) Receive radioactive waste from other persons for disposal under Part 61 of this chapter.

* * * * *

PART 21—REPORTING OF DEFECTS AND NONCOMPLIANCE

§ 21.2 [Amended]

17. Section 21.2 is amended by inserting "61," after "40, 60," in both the first and second sentences.

§ 21.3 [Amended]

18. In § 21.3, paragraphs (a)(2), (a–1)(1), (a–1)(2), and (k) are amended by adding "61," after "50, 60."

§ 21.21 [Amended]

19. Section 21.21 is amended by adding "61," after "50, 60," in paragraphs (b)(1)(i) and (b)(1)(ii).

[1] Section 20.304 provided for burial of small quantities of licensed materials in soil. Notice of its removal appears in the Federal Register of October 30, 1980 (45 FR 71762).

PART 30—RULES OF GENERAL APPLICABILITY TO DOMESTIC LICENSING OF BYPRODUCT MATERIAL

20. A new paragraph (d) is added to § 30.11 to read as follows:

§ 30.11 Specific exemptions.

* * * * *

(d) Except as specifically provided in Part 61 of this chapter, any licensee is exempt from the requirements of this part to the extent that its activities are subject to the requirements of Part 61 of this chapter.

21. In § 30.32, paragraph (f) is amended to read as follows:

§ 30.32 Application for specific licenses.

* * * * *

(f) An application for a license to receive and possess byproduct material for the conduct of any activity which the Commission determines will significantly affect the quality of the environment shall be filed at least 9 months prior to commencement of construction of the plant or facility in which the activity will be conducted and shall be accompanied by any Environmental Report required pursuant to Part 51 of this chapter.

22. In § 30.33, paragraph (a)(5) is revised to read as follows:

§ 30.33 General requirements for issuance of specific licenses.

(a)* * *

(5) In the case of an application for a license to receive and possess byproduct material for the conduct of any activity which the Commission determines will significantly affect the quality of the environment, the Director of Nuclear Material Safety and Safeguards or his designee, before commencement of construction of the plant or facility in which the activity will be conducted, on the basis of information filed and evaluations made pursuant to Part 51 of this chapter, has concluded, after weighing the environmental, economic, technical, and other benefits against environmental costs and considering available alternatives, that the action called for is the issuance of the proposed license, with any appropriate conditions to protect environmental values. Commencement of construction prior to such conclusion shall be grounds for denial of a license to receive and possess byproduct material in such plant or facility. As used in this paragraph the term "commencement of construction" means any clearing of land, excavation, or other substantial action that would adversely affect the

environment of a site. The term does not mean site exploration, necessary roads for site exploration, borings to determine foundation conditions, or other preconstruction monitoring or testing to establish background information related to the suitability of the site or the protection of environmental values.

* * * * *

PART 40—DOMESTIC LICENSING OF SOURCE MATERIAL

23. In § 40.14, a new paragraph (d) is added to read as follows:

§ 40.14 Specific exemptions.

* * * * *

(d) Except as specifically provided in Part 61 of this chapter any licensee is exempt from the requirements of this part to the extent that its activities are subject to the requirements of Part 61 of this chapter.

24. In § 40.31, paragraph (f) is revised to read as follows:

§ 40.31 Applications for specific licenses.

* * * * *

(f) An application for a license to possess and use source material for uranium milling, production of uranium hexafluoride, or for the conduct of any other activity which the Commission determines will significantly affect the quality of the environment shall be filed at least 9 months prior to commencement of construction of the plant or facility in which the activity will be conducted and shall be accompanied by any Environmental Report required pursuant to Part 51 of this chapter.

* * * * *

25. In § 40.32, paragraph (e) is revised to read as follows:

§ 40.32 General requirements for issuance of specific licenses.

* * * * *

(e) In the case of an application for a license to possess and use source and byproduct material for uranium milling, production of uranium hexafluoride, or for the conduct of any other activity which the Commission determines will significantly affect the quality of the environment, the Director of Nuclear Material Safety and Safeguards or his designee, before commencement of construction of the plant or facility in which the activity will be conducted, on the basis of information filed and evaluations made pursuant to Part 51 of this chapter, has concluded, after weighing the environmental, economic, technical and other benefits against environmental costs and considering available alternatives, that the action called for is the issuance of the proposed license, with any appropriate conditions to protect environmental values. Commencement of construction prior to such a conclusion shall be grounds for denial of a license to possess and use source and byproduct material in such plant or facility. As used in this paragraph the term "commencement of construction" means any clearing of land, excavation, or other substantial action that would adversely affect the environment of a site. The term does not mean site exploration, necessary roads for site exploration, borings to determine foundation conditions, or other preconstruction monitoring or testing to establish background information related to the suitability of the site or the protection of environmental values.

* * * * *

PART 51—LICENSING AND REGULATORY POLICY AND PROCEDURES FOR ENVIRONMENTAL PROTECTION

26. In §51.5, paragraphs (a)(6) and (b)(4)(iii) are revised, paragraph (b)(6) is amended by inserting "61" following "50, 60,", and (d)(3) is amended by inserting "61" following "50, 60." The revised paragraphs read as follows:

§ 51.5 Actions requiring preparation of environmental impact statements, negative declarations, environmental impact appraisals; actions excluded.

(a) * * *

(6) Issuance of a license authorizing receipt and disposal of radioactive waste from other persons under Part 61 of this chapter;

* * * * *

(b) * * *

(4) * * *

(iii) Authorizing receipt and disposal of radioactive waste from other persons under Part 61 of this chapter.

* * * * *

§ 51.40 [Amended]

27. In § 51.40, paragraph (c) is amended by inserting "61" after "30, 40."

PART 70—DOMESTIC LICENSING OF SPECIAL NUCLEAR MATERIAL

28. In § 70.14, a new paragraph (d) is added to read as follows:

§ 70.14 Specific exemptions.

* * * * *

(d) Except as specifically provided in Part 61 of this chapter, any licensee is exempt from the requirements of the regulations in this part to the extent that its activities are subject to the requirements of Part 61 of this chapter.

29. In § 70.21, paragraph (f) is revised to read as follows:

§ 70.21 Filing.

* * * * *

(f) An application for a license to possess and use special nuclear material for processing and fuel fabrication, scrap recovery or conversion of uranium hexafluoride, or for the conduct of any other activity which the Commission determines will significantly affect the quality of the environment shall be filed at least 9 months prior to commencement of construction of the plant or facility in which the activity will be conducted, and shall be accompanied by an Environmental Report required under Part 51 of this chapter.

* * * * *

30. In § 70.23, paragraph (a)(7) is revised to read as follows:

§ 70.23 Requirements for the approval of applications.

(a) * * *

(7) Where the proposed activity is processing and fuel fabrication, scrap recovery, conversion of uranium hexafluoride, or any other activity which the Commission determines will significantly affect the quality of the environment, the Director of Nuclear Material Safety and Safeguards or his designee, before commencement of construction of the plant or facility in which the activity will be conducted, on the basis of information filed and evaluations made pursuant to Part 51 of this chapter, has concluded, after weighing the environmental, economic, technical, and other benefits against environmental costs and considering available alternatives, that the action called for is the issuance of the proposed license, with any appropriate conditions to protect environmental values. Commencement of construction prior to such conclusions shall be grounds for denial to possess and use special nuclear material in such plant or facility. As used in this paragraph the term "commencement of construction" means any clearing of land, excavation, or other substantial action that would adversely affect the environment of a site. The term does not mean site exploration, necessary roads for site exploration, borings to determine foundation conditions, or other preconstruction monitoring or testing to establish background information related to the suitability of the site or the protection of environmental values.

* * * * *

PART 73—PHYSICAL PROTECTION OF PLANTS AND MATERIALS

31. In § 73.1, paragraph (b)(1)(iii) is revised to read as follows:

§ 73.1 Purpose and scope.

* * * * *

(b) * * *

(1) * * *

(iii) the physical protection of special nuclear material by any person who, pursuant to the regulations in Part 61 or 70 of this chapter, possesses or uses at any site or contiguous sites subject to the control by the licensee, formula quantities of strategic special nuclear material or special nuclear material of moderate strategic significance or special nuclear material of low strategic significance.

* * * * *

PART 170—FEES FOR FACILITIES AND MATERIALS LICENSES AND OTHER REGULATORY SERVICES UNDER THE ATOMIC ENERGY ACT OF 1954; AS AMENDED

32. Section 170.2 is revised to read as follows:

§ 170.2 Scope.

Except for persons who apply for or hold the permits, licenses, or approvals exempted in § 170.11, the regulations in this part apply to a person who is an applicant for, or holder of, a specific byproduct material license issued pursuant to Parts 30 and 32–35 of this chapter, a specific source material license issued pursuant to Part 40 of this chapter, a specific materials license issued under Part 61 of this chapter, a specific special nuclear material license issued pursuant to Part 70 of this chapter, a specific license for the storage of spent fuel issued pursuant to Part 72 of this Chapter, a specific approval of spent fuel casks and shipping containers issued pursuant to Part 71 of this chapter, a specific request for approval of sealed sources and devices containing byproduct material, source material, or special nuclear material, or a production or utilization facility construction permit and operating license issued pursuant to Part 50 of this chapter, to routine safety and safeguards inspections of a licensed person, to a person who applies for approval of a reference standardized design of a nuclear steam supply system or balance of plant, for review of a facility site prior to the submission of an application for a construction permit, for review of an independent spent fuel storage installation pursuant to Part 72 of this chapter, and for a special project review which the Commission completes or makes whether or not in conjunction with a license application on file or which may be filed.

(Amendments to all parts are issued pursuant to citations of authority presently codified or, in the case of 10 CFR Part 61, as set out after the list of sections in the new Part 61.)

Dated at Washington, D.C. this 9th day of December, 1982.

For the U.S. Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

10 CFR Part 4

Nondiscrimination in Federally Assisted Programs; Civil Rights Enforcement Program

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Availability and Request for Comments.

SUMMARY: The Nuclear Regulatory Commission (NRC) has developed an Implementation Plan as required by Executive Order 12250, "Leadership and Coordination of Nondiscrimination Laws", Section 1–403 (45 FR 72995). The Plan describes how NRC intends to meet its enforcement responsibilities regarding nondiscrimination in federally assisted programs.

DATE: Comments should be submitted by Februrary 28, 1983.

ADDRESS: Comments should be submitted to Nuclear Regulatory Commission, Office of Small and Disadvantaged Business Utilization/Civil Rights, MAIL STOP: MNBB 7203, Washington, DC 20555.

FOR FURTHER INFORMATION CONTACT: Mr. Edward E. Tucker, Office of Small and Disadvantaged Business Utilization/Civil Rights, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone (301) 492–7697.

SUPPLEMENTARY INFORMATION: The NRC has authority to fund assistance in the form of training for State and local government personnel under the State Agreements Program which provides for State assumption of certain areas of NRC regulatory activity. This program has been in effect since the inception of the Agency in 1975.

Beginning with Fiscal Year 1981, the NRC has also been entering into assistance relationships with a variety of eligible recipients to stimulate research and information exchange in technical areas related to nuclear safety assessment. The recipients for Fiscal Year 1981 were educational institutions and various nonprofit organizations.

Persons interested in submitting comments on NRC's Implementation Plan may request a copy by telephone or by writing to the address given above.

Dated at Bethesda, Maryland, this 15 day of December 1982.

For the Nuclear Regulatory Commission.

W. B. Kerr,

Director, Office of Small and Disadvantaged Business Utilization/Civil Rights.

FEDERAL RESERVE SYSTEM

12 CFR Part 201

Extensions of Credit By Federal Reserve Banks; Changes in Discount Rate

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors has amended its Regulation A, "Extensions of Credit by Federal Reserve Banks," for the purpose of adjusting discount rates. The further half-point reduction in the discount rate was taken in the light of current business conditions, strong competitive pressures on prices and further moderation of cost increases, a slowing of private credit demands, and present indications of some tapering off in growth of the broader monetary aggregates.

EFFECTIVE DATE: The changes were effective on the dates specified below.

FOR FURTHER INFORMATION CONTACT: William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202/452–3257).

SUPPLEMENTARY INFORMATION: Pursuant to the authority of 5 U.S.C. 553(b)(3)(B) and (d)(3), these amendments are being published without prior general notice of proposed rulemaking, public participation, or deferred effective date. The Board has for good case found that current economic and financial considerations required that these amendments must be adopted immediately.

List of Subjects in 12 CFR Part 201

Banks, banking, Credit, Credit unions, Foreign banks.

PART 201—[AMENDED]

Pursuant to section 10(b) and 14(d) of the Federal Reserve Act (12 U.S.C. 347b

and 357) Part 201 is amended as set forth below:

1. Section 201.51 is revised to read as follows:

§ 201.51 Short term adjustment credit for depository institutions.

The rates for short term adjustment credit provided to depository institutions under § 201.3(a) of Regulation A are:

Federal Reserve Bank	Rate	Effective
Boston	8½	Dec. 14, 1982
New York	8½	Dec. 15, 1982
Philadelphia	8½	Dec. 17, 1982
Cleveland	8½	Dec. 15, 1982
Richmond	8½	Do.
Atlanta	8½	Dec. 14, 1982
Chicago	8½	Do
St. Louis	8½	[illegible]
Minneapolis	8½	Do.
Kansas City	8½	Dec 15, 1982
Dallas	8½	Dec. 14, 1982.
San Francisco	8½	Do.

2. Section 201.52 is revised to read as follows:

§ 201.52 Extended credit to depository institutions.

(a) The rates for seasonal credit extended to depository institutions under § 201.3(b)(1) of Regulation A are:

Federal Reserve Bank	Rate	Effective
Boston	8½	Dec. 14, 1982.
New York	8½	Dec. 15, 1982.
Philadelphia	8½	Dec. 17, 1982.
Cleveland	8½	Dec. 15, 1982.
Richmond	8½	Do.
Atlanta	8½	Dec. 14, 1982.
Chicago	8½	Do.
St. Louis	8½	Do.
Minneapolis	8½	Do.
Kansas City	8½	Dec. 15, 1982.
Dallas	8½	Dec. 14, 1982
San Francisco	8½	Do.

(b) The rates for other extended credit provided to depository institutions under sustained liquidity pressures or where there are exceptional circumstances or practices involving a particular institution under § 201.3(b)(2) of Regulation A are:

Federal Reserve Bank	Rate	Effective
Boston	8½	Dec. 14, 1982.
New York	8½	Dec. 15, 1982.
Philadelphia	8½	Dec. 17, 1982.
Cleveland	8½	Dec. 15, 1982.
Richmond	8½	Do.
Atlanta	8½	Dec. 14, 1982.
Chicago	8½	Do.
St. Louis	8½	Do.
Minneapolis	8½	Do.
Kansas City	8½	Dec. 15, 1982.
Dallas	8½	Dec. 14, 1982.
San Francisco	8½	Do.

Note.—These rates apply for the first 60 days of borrowing. A 1 percent surcharge applies for borrowing during the next 90 days, and a 2 percent surcharge applies for borrowing thereafter.

By order of the Board of Governors of the Federal Reserve System, December 20, 1982.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 701

Statutory Lien; Final Interpretive Ruling and Policy Statement

AGENCY: National Credit Union Administration (NCUA).

ACTION: Final interpretive ruling and policy statement.

SUMMARY: Even if a member's loan is not secured by shares, under the Federal Credit Union Act a Federal credit union has the power to impress and enforce a lien upon that member's shares and dividends. NCUA is interpreting the Federal Credit Union Act to authorize a Federal credit union: (a) to impress a lien at the time the loan is granted, for instance, by noting the existence of the lien in its records at the same time the loan is granted, by reciting in the loan documents that shares and dividends are subject to the lien or are pledged to secure the loan, or by adopting a bylaw or board policy to the same effect; and (b) to enforce the lien by applying the shares and dividends directly to the amount due on the loan without obtaining a court judgment, even if the credit union has allowed the member to make withdrawals and even if a court judgment would be required under state law before a statutory lien could be enforced.

EFFECTIVE DATE: December 16, 1982.

FOR FURTHER INFORMATION CONTACT: Robert M. Fenner, Deputy General Counsel, or John L. Culhane, Jr., Senior Attorney, Department of Legal Services, National Credit Union Administration, 1776 G Street, NW., Washington, D.C. 20456 or telephone: (202) 357-1030.

SUPPLEMENTARY INFORMATION: Section 107(11) of the Federal Credit Union Act states that a Federal credit union "shall have the power * * * to impress and enforce a lien upon the shares and dividends of any member to the extent of any loan made to him and any dues or charges payable by him." 12 U.S.C. 1757(11). Since 1979, NCUA had taken the position that before a Federal credit union could enforce this lien it had to obtain a court judgment on the debt, unless state law would allow the credit union to enforce the lien without going to court; once the credit union were to obtain a court judgment, it could then apply the member's shares to the outstanding loan balance. *Credit Manual for Federal Credit Unions* 29 (Dec. 1979 ed.).

A credit union trade association and an attorney who represented several credit unions asked NCUA to reconsider this interpretation, noting that it placed a credit union at a disadvantage with respect to any other financial institution, which can usually offset a borrower's loan without going to court. After examining the legislative history of and prior administrative interpretations of the statute, NCUA proposed to interpret section 107(11) of the Federal Credit Union Act to preempt state law and to authorize a credit union to enforce the lien on the shares and dividends of a member by applying those shares and dividends to the outstanding loan balance, as that interpretation appeared to be more consistent with Congressional intent and with the contemporaneous administrative interpretations of the statutory language. 47 FR 44340 (1982).

Comments on the proposed interpretation were submitted by 31 credit unions, 4 state credit union leagues, 2 national credit union trade associations, and 3 attorneys (two of the attorneys represent state credit union leagues, the other attorney represents a number of credit unions). The commentors unanimously supported NCUA's proposed interpretation, although one of the attorneys and one of the trade associations requested that rather than limiting the interpretation to enforcement of the lien in the event of default, NCUA expand the interpretation to discuss when the lien may be impressed and to discuss the consequences of permitting withdrawals. The NCUA Board concurs with these commentors that it would be best to address these related issues in one interpretive ruling and policy statement.

Based on an examination of the legislative history and the contemporaneous administrative interpretations of the statutory language, NCUA believes that Congress intended for the statutory lien to be a "floating" lien. That is, a Federal credit union that has impressed a lien on a member's accounts possesses a lien on those accounts at any time to the extent of the unpaid loan balance together with interest, fees, and other charges. The lien "floats" as outstanding obligations, as well as account balances, vary from time to time. The lien enables a credit

union to take priority over other creditors when claims are asserted against a member's accounts. *See* D. Bridewell, *Bridewell on Credit Unions* 710 (1942 ed.) (quoting from the May–June, 1940 edition of *Cooperative Savings,* an official publication of the Farm Credit Administration, the agency then charged with administering the Federal Credit Union Act).

If the credit union evidences its intent to do so, it may impress the lien when the loan is granted. This may be done, for instance, by noting the existence of the lien in the credit union's records at the same time the loan is granted, by reciting in the loan documents that shares and dividends are subject to the lien or are pledged to secure the loan, or by adopting a bylaw or board policy to the same effect. *See Credit Manual for Federal Credit Unions,* 16, 17 (May 1972 ed.); *Handbook for Federal Credit Unions* 18 (July 1947 ed.). Further, even though the lien has been impressed, the credit union may permit routine withdrawals from a member's account without waiving the statutory lien, even if the withdrawals would reduce the account balance to a level below the outstanding indebtedness.

Generally, a credit union may enforce the lien on the shares and dividends of the member by applying those shares to the outstanding indebtedness. Section 107(11) of the Federal Credit Union Act preempts state law; the credit union does not have to obtain a court judgment to enforce the lien, even if a court judgment is usually required under state law before a statutory lien can be enforced. However, if the outstanding indebtedness is the result of extensions of credit under a credit card program, Section 169 of the Truth in Lending Act, 15 U.S.C. 1666h, and § 226.12(d) of Regulation Z, 12 CFR 226.12(d), will apply; these provisions generally prohibit a Federal credit union from offsetting a borrower's indebtedness arising from a consumer credit transaction under a credit card plan against funds held by the credit union.

PART 701—[AMENDED]

Accordingly, the NCUA Board is adopting a final interpretive ruling and policy statement to read as follows:

Interpretive Ruling and Policy Statement (IRPS) 82–5

Section 107(11) of the Federal Credit Union Act states that a Federal credit union "shall have the power * * * to impress and enforce a lien upon the shares and dividends of any member, to the extent of any loan made to him and any dues or charges payable by him." If a credit union evidences its intent to do so, it may impress the lien when the loan is granted. This may be done, for instance, by noting the existence of the lien in the credit union's records at the same time the loan is granted, by reciting in the loan documents that shares and dividends are subject to the lien or are pledged to secure the loan, or by adopting a bylaw or board policy to the same effect. The lien dates from the time it is impressed and applies to all of the member's shares outstanding at the time the loan is made. If during the loan term the member's shares are reduced by withdrawal or increased by deposit or dividend payments, the lien will apply to the balance of the same from time to time and may be enforced with respect to any shares in existence at the time of enforcement. The credit union may enforce the lien on the shares and dividends of the member by applying those funds directly to the outstanding indebtedness, which may include the unpaid loan balance together with interest, fees, and other charges. The credit union does not need to obtain a court judgment to enforce the lien, even if a court judgment is usually required under state law before a lien can be enforced.

By the National Credit Union Administration Board, December 16, 1982.

Rosemary Brady,

Secretary, National Credit Union Administration Board.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 101

[Amdt. 25; Rev. 2]

Delegation of Authority To Conduct Program Activities in Field Offices

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: The Regional Administrator in Region III has proposed a change to the Delegations of Authority for Field Offices which consolidates the Surety Bond Guarantee Program at the regional office level in his region. The change was approved. It adds the position of Supervisory Surety Bond Guarantee Specialist in the regional office and eliminates all surety guarantee authority for district offices in Region III.

EFFECTIVE DATE: December 27, 1982.

FOR FURTHER INFORMATION CONTACT: Ronald Allen, Paperwork Management Branch, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416. Telephone No. (202) 653–6538.

SUPPLEMENTARY INFORMATION: Part 101 consists of rules relating to the Agency's organization and procedures; therefore, notice of proposed rulemaking and public participation thereon as prescribed in 5 U.S.C. 553 is not required and this amendment to Part 101 is adopted without resort to those procedures. For the reasons set forth in the preamble and pursuant to authority in Section 5(b)(6) of the Small Business Act, 15 U.S.C. 634, Part 101, 13 CFR 101.3–2 is amended, following the index terms, as set forth below:

List of Subjects in 13 CFR Part 101

Authority delegations (Government agencies), Administrative practice and procedure, Organization and functions (Government agencies).

PART 101—[AMENDED]

§ 101.3–2 [Amended]

Part III, Section C, paragraph 1., subparagraphs d. through i. of § 101.3–2 are revised to read as follows:

d. Supervisory Surety Bond Guarantee Specialist, Philadelphia R. O.	500,000
e. District Director and Deputy District Director, San Francisco and all Region IV district offices only	500,000
f. Assistant District Director/F & I, San Francisco and all Region IV district offices only	500,000
g. Surety Bond Coordinator	250,000
h. Senior Surety Bond Guarantee Specialist	250,000
i. Surety Bond Officer	250,000

Dated: December 10, 1982.

Heriberto Herrera,

Deputy Administrator.

BILLING CODE 8025–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 82–ASW–76; Amdt. 39–4522]

Boeing Vertol Company Model 107–II and Kawasaki Heavy Duty, Ltd. Model KV107–II and KV107–IIA Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires initial and repetitive inspections and replacement as necessary of the main rotor hubs on

Boeing Vertol Model 107–II and Kawasaki Model KV107–II and KV107–IIA series helicopters. The inspection is needed to detect and correct structural fatigue cracks in the forward and aft main rotor hub which could result in failure of the rotor hub. The AD also limits use of the hub on the forward main rotor to prevent fatigue cracks in the hub.

DATE: Effective January 7, 1983.

Compliance required within the next 50 hours after the effective date of this AD unless already accomplished for all main rotor hubs with more than 2500 hours' time in service.

ADDRESSES: The applicable service information may be obtained from Boeing Vertol Company, A Division of the Boeing Company, P.O. Box 16858, Philadelphia, Pennsylvania 19142. These documents may be examined at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas 76106, or at the Rules Docket in Room 916, Federal Aviation Administration, 800 Independence Avenue, S.W., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: Joseph E. Chrastil, ANE–172, New York Aircraft Certification Office, Federal Aviation Administration, 181 South Franklin Avenue, Valley Stream, New York 11581, Telephone No. 516–791–6221.

SUPPLEMENTARY INFORMATION: There have been reports of fatigue cracks in the splined area of seven forward main rotor hubs on Boeing Vertol 107–II and Kawasaki KV107–II and KV107–IIA helicopters which could have caused rotor hub failure. Total time in service for the cracked hubs varied from 3500 hours to 14,807 hours, and time since last magnaflux inspection of these hubs varied from 395 hours to 3005 hours. Since this condition is likely to exist or develop on other helicopters of the same type designs, an Airworthiness Directive is being issued which requires initial and repetitive inspections of both forward and aft main rotor hubs for cracks and replacement as necessary on Boeing Vertol Model 107–II and Kawasaki Heavy Industries Model KV107–II and KV107–IIA helicopters.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Approximately 11 aircraft could be affected by the requirements of this AD for an estimated impact of 3500.00 per aircraft.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new Airworthiness Directive.

Boeing Vertol Company and Kawasaki Heavy Industries, Ltd.: Applies to Boeing Vertol Model 107–II and Kawasaki Model KV107–II and KV107–IIA helicopters certificated in all categories equipped with main rotor hubs, P/N's 107R2550–3, –5.

Compliance is required as indicated unless already accomplished.

To detect possible cracks in each main rotor hub, inspect both hubs within the next 50 hours' time in service from the effective date of this AD, or before the accumulation of 2500 hours' time in service on the main rotor hubs, whichever comes later, and thereafter at intervals not to exceed 2000 hours' time in service from the last inspection, accomplish the following:

(a) Remove the forward and aft rotor hubs from the aircraft. Inspect for cracks on the bottom surface of the hubs from the splines to a distance .75 inch out from the splines, using an eddy current inspection method. Inspect the bottom surface as stated above and the splined area from the lower surface upward for 1.0 inch using dye penetrant or equivalent inspection method.

(b) Remove from service hubs having cracks and replace with a serviceable part prior to further flight.

(c) Forward hubs that have 2500 or more hours' time in service and inspected in accordance with paragraph (a) and found free of cracks may not be re-installed on the forward head, however, they may be inverted and installed on the aft head.

(d) Aft hubs that are inspected in accordance with paragraph (a) and found free of cracks may remain on the aft head or may be installed on the forward head for 2500 additional hours' time in service; they may be re-installed on the aft head after accumulating 2500 hours' time in service on the forward head if inspected in accordance with paragraph (a) and found free of cracks.

(e) For the forward and aft rotor hubs, conduct the inspections contained in paragraph (a) at intervals not to exceed 2000 hours and comply with paragraphs (b), (c), and (d).

(f) New rotor hubs when installed must comply with paragraphs (c), (d), and (e).

(g) Boeing Vertol Service Bulletin Number 107–353 pertains to this subject.

(h) An equivalent method of compliance with this AD may be approved by the Manager, New York Aircraft Certification Office, 181 South Franklin Avenue, Valley Stream, New York 11581.

This amendment becomes effective January 7, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); 14 CFR 11.89)

Note.—The FAA has determined that this document involves a regulation that is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the final regulatory evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption "For Further Information Contact."

This rule is a final order of the Administrator. Under Section 1006(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1486(a)), it is subject to review by the various courts of appeals of the United States, or the United States Court of Appeals for the District of Columbia.

Issued in Forth Worth, Texas, on December 10, 1982.

F. E. Whitfield,

Acting Director, Southwest Region.

[FR Doc. 82–34925 Filed 12–23–82; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 82–ANE–31; Amdt. 39–4523]

Pratt & Whitney Aircraft Models JT9D–7, –7H, –7A, –7AH, –7F, and –7J Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) which requires replacement of the bleed control fuel signal manifold assembly on JT9D–7, –7H, –7A, –7AH, –7F, and –7J turbofan engines. This action provides for a more flexible bleed valve control fuel signal manifold assembly which minimizes the likelihood of cracking. Tube cracking during operation and subsequent fuel leakage may result in an engine fire that may be difficult to extinguish.

DATES: Effective date—January 27, 1983.

Compliance schedule—as prescribed in the text of the AD.

ADDRESSES: The applicable service bulletins may be obtained from Pratt & Whitney Aircraft, Commercial Products Division, 400 Main Street, East Hartford, Connecticut 06108.

A copy of each of the service bulletins is contained in the Rules Docket, FAA, Office of the Regional Counsel, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, and may be examined weekdays, except Federal

holidays, between 8:00 a.m. and 4:30 p.m.

FOR FURTHER INFORMATION CONTACT: Gordon Vertescher, Transport Engine Section, ANE–141, Engine Certification Branch, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone: (617) 273–7347.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations (14 CFR Part 39) by adding a new AD applicable to Pratt & Whitney Aircraft JT9D–7, –7H, –7A, –7AH, –7F, and –7J turbofan engines was published in the **Federal Register** on September 16, 1982 (47 FR 40811).

There have been at least 25 reports of fuel signal manifold cracking resulting in fuel leakage. Two of these leaks resulted in engine fires. In both cases the crew, after actuating both fire bottles, was not successful in extinguishing the fire. The cause of tube assembly fracture was high bending stresses due to installation tolerance, thermal, and vibratory loads. To reduce these loads, a design change providing a more durable tube was issued. The new design reduces stresses and minimizes the likelihood of cracking, which reduces chances of fuel leakage and engine fire. Removal of the old tube and the installation of a new tube, bracket, and clamp are required by the proposed AD.

Interested parties were invited to participate in this rulemaking by submitting written comments on the proposal to the FAA. Seven comments were received in response to the Notice of Proposed Rulemaking (NPRM). Four commentators confirmed that the affected engines in their fleets have been modified. Another confirmed that the completion of the proposed AD would not be a problem by the proposed compliance date. However, one commentator felt that a greater margin of safety exists when the tube is replaced on a shop visit instead of on wing. Accordingly, a compliance date of March 31, 1983, was suggested which would allow their engines to be modified during a shop visit.

Another commentator provided a more accurate estimate of cost to United States and foreign airlines to modify the remaining population. The original $138,000 estimated cost was the summation of labor and material costs. However, material costs are being incurred by Pratt & Whitney Aircraft under Financial Support Program #80377. Removal of material costs from the original estimate reduces the total cost by $103,000.

The FAA has given consideration to extending the AD compliance date to March 31, 1983, and has determined that sufficient evidence exists in the public interest of aviation safety to adopt the proposed rule with only the minor changes to the industry cost figure and compliance date. The compliance date change is in accordance with the Administrative Procedures Act. Since these changes are clarifying and relaxatory in nature, additional notice and public procedure hereon are unnecessary.

Approximately 298 engines will be affected by this AD. The estimated cost to United States and foreign airlines to modify these engines is $35,000. This cost is for labor. Therefore, the proposed rule is not considered to be major under the criteria of Executive Order 12291. Few, if, any, small entities within the meaning of the Regulatory Flexibility Act would be affected since the rule affects only B747 aircraft in which JT9D–7, –7H, –7A, –7AH, –7F, and –7J engines are installed, none of which are believed to be small entities.

List of Subjects in 14 CFR Part 39

Engines, Aircraft, and Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD:

Pratt & Whitney Aircraft: Applies to Pratt & Whitney Aircraft models.

JT9D–7, –7H, –7A, –7AH—Engines prior to and including S/N 695827.

JT9D–7F—Engine S/Ns 695600 through 695614, S/N 702000, S/N 702001, S/N 702550 through 702557 and all engines prior to and including S/N 689635.

JT9D–7J—Engines prior to S/N 701697.

Note.—This directive does not apply to JT9D engines obtained by conversion which do not incorporate Service Bulletin 3741.

Compliance required prior to February 27, 1983, unless already accomplished.

To prevent fuel signal manifold cracking in operation replace manifold assembly P/N 711391 with assembly P/N 783391, bracket P/N 5003038–01, and clamp P/N ST1104–06 in accordance with Pratt & Whitney Aircraft Service Bulletin Number 5202, Revision 2, dated August 16, 1982, or later revision approved by the Manager, Engine Certification Branch, New England Region.

All persons affected by this directive who have not already received the referenced service bulletin from the manufacturer may obtain copies upon request to Pratt & Whitney Aircraft, Division of United Technologies Corporation, 400 Main Street, East Hartford, Connecticut 06108. This document may also be examined at FAA, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803. A historical file on this AD which includes the material in full is maintained by the FAA at the New England Region office.

This amendment becomes effective on January 27, 1983:

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.89, Federal Aviation Regulations (14 CFR 11.89))

Note.—For reasons discussed earlier in the preamble, the FAA has determined that this document: (1) involves a regulation which is not major under Executive Order 12291 and (2) is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified that the rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A regulatory evaluation has been prepared for this regulation and has been placed in the docket. A copy of it may be obtained by contacting the person identified under the caption "**FOR FURTHER INFORMATION CONTACT.**"

Issued in Burlington, Massachusetts, on December 10, 1982.

Robert E. Whittington,

Director, New England Region.

BILLING CODE 4910–13–M

---

14 CFR Part 71

[Airspace Docket No. 82–ASO–56]

Alteration of Control Zone, Anderson, South Carolina

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment alters the Anderson, South Carolina, control zone by correcting the geographical coordinates of the Anderson County Airport and correcting the description of an arrival extension to coincide with a change to an instrument approach procedure which serves the airport. No significant change in airspace is intended by this action.

DATES: Effective date: 0901 G.M.T., February 17, 1983.

Comments must be received on or before January 17, 1983.

ADDRESSES: Send comments on the rule in triplicate to: Federal Aviation Administration, Manager, Airspace and Procedures Branch, ASO–530, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763–7646.

FOR FURTHER INFORMATION CONTACT:
Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763–7646.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves correcting the geographical coordinates of the Anderson County Airport and correcting the description of an arrival extension due to realignment of the final approach course from 171° to 176° true and, thus, was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the description of the Anderson, South Carolina, control zone by correcting the geographical coordinates of the airport and by realigning the arrival area extension for an instrument approach procedure serving the airport. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3 dated January 29, 1982. Under the circumstances presented, the FAA concludes that there is a need for a regulation to alter the control zone so that the arrival extension is aligned properly with the instrument approach procedure final approach course. Therefore, I find that notice or public procedure under 5 U.S.C. 553(b) is unnecessary and that good cause exists for making this amendment effective in less than 60 days after its publication in the **Federal Register.**

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Control zone.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.M.T., February 17, 1983, as follows:

Anderson County Airport, SC—Amended

By deleting the words, "* * * (latitude 34°39'40" N., longitude 82°42'30" W.) * * *" and "* * * 171° * * *", and substituting for them the words, "* * * (Lat. 34°39'42" N., Long. 82°42'33" W.) * * *" and "* * * 176° * * *".

(Secs. 307(a) and 313 (a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)), and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on December 15, 1982.

George R. LaCaille,
Acting Director, Southern Region.

Designation of Federal Airways, Area Low Routes, Controlled Airspace, and Reporting Points; Alteration of Control Zone, Beaver Falls, Pennsylvania

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the control zone over Beaver County Airport, Beaver, Pennsylvania by permitting a variation of the hours of operation of the control zone. This will permit a more efficient utilization of the tower for training of airmen by the Community College. The authorization allows the hours to be varied by publication of a notice in the Notices to Airmen (NOTAMS).

EFFECTIVE DATE: December 27, 1982.

FOR FURTHER INFORMATION CONTACT:
Glenn Bales, Airspace and Procedures Branch, AEA–530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 917–1228.

SUPPLEMENTARY INFORMATION: The Beaver County Airport is operated by the Community College of Beaver County and is used for training students to qualify for a control tower operator's certificate. The present need for a rule change resulted from a requirement for more available hours of control zone operation to increase the amount of training time available. It appears that a more flexible method of extending or even reducing hours of operation would be to give such authority to vary the hours to meet training requirements by merely requiring publication of Notices to Airmen. Since this amendment will not burden any parties and the Community College is preparing its curriculum for the start of the new calendar year, good cause exists for waiving the notice and public comment procedures and the amendment may be made effective in less than 30 days.

Control zones.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective December 27, 1982, as follows:

1. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the text of the description of the Beaver Falls, Pennsylvania, Control Zone by deleting, "this control zone is effective from 0900 to 2100 hours, local time daily, June 1 through August 31, and from 0900 to 1700 hours, local time daily, September 1 through May 31" and by substituting, "this control zone is effective from 0900 to 2100 hours, local time daily, June 1 through August 31, and from 0900 to 1900 hours, local time daily, September 1 through May 31, or during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory," therefore.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this amendment only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) Is not a "major rule" under

Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Jamaica, New York on December 21, 1982.

Timothy L. Hartnett,

Acting Director, Eastern Region.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket C-3099]

BATUS Inc.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement requires, among other things, that a Louisville, Kentucky management and holding company timely divest 200,000 square feet of its retail floor space, and reduce the volume of its retail sales by $20 million of 1981 sales. Further, the company is barred from making certain acquisitions in prescribed areas without prior Commission approval.

DATE: Complaint and order issued December 6, 1982.*

FOR FURTHER INFORMATION CONTACT: FTC/CS-4, Daniel P. Ducore, Washington, D.C. 20580. (202) 724-1268.

SUPPLEMENTARY INFORMATION: On Tuesday, July 20, 1982, there was published in the **Federal Register**, 47 FR 31392, a proposed consent agreement with analysis In the Matter of BATUS Inc., a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

A comment was filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Acquiring Corporate Stocks or Assets: Section 13.5 Acquiring corporate stocks or assets; 13.5-20 Federal Trade Commission Act. Subpart—Corrective Actions and/or Requirements: Section 13.533 Corrective Actions and/or Requirements.

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1306

Ban of Urea-Formaldehyde Foam Insulation; Confirmation of Effective Date

AGENCY: Consumer Product Safety Commission.

ACTION: Confirmation of effective date of final rule.

SUMMARY: The Commission confirms that the effective date of the ban of new installations of urea-formaldehyde foam insulation in schools and residences was August 10, 1982, as estimated when the ban was originally promulgated. This announcement is made at this time since at the time of the original announcement of the effective date, the Commission stated that the ban would not go into effect until the day after the expiration of the period provided by law for consideration of a congressional veto if that date was later than August 10, 1982. Also, the effective date could have been stayed by a court pending judicial review of the ban. Since neither of these events occurred, the ban went into effect as originally scheduled.

DATE: The ban applies to all urea-formaldehyde foam insulation installed after August 10, 1982, in residences or schools.

ADDRESSES: All materials relevant to this proceeding may be seen in, or copies obtained from, the Office of the Secretary, Consumer Product Safety Commission, Third Floor, 5401 Westbard Avenue, Bethesda, Maryland 20207, telephone (301) 492-6800.

FOR FURTHER INFORMATION CONTACT: Paul Galvydis, Directorate for Compliance and Administrative Litigation, Consumer Product Safety Commission, Washington, D.C. 20207, telephone (301) 492-6400.

SUPPLEMENTARY INFORMATION: On April 2, 1982, the Commission published in the **Federal Register** a rule banning urea-formaldehyde foam insulation installed in schools and residences after August 10, 1982 (47 FR 14366). The ban was issued because the Commission concluded that there was an unreasonable risk of injury from irritation, sensitization, and cancer from the release of formaldehyde gas from the product after it is installed and because no feasible standard, including labeling or information disclosure, would adequately protect the public from these risks of injury. A detailed explanation of the Commission's reason for issuing the ban is contained in the preamble of the **Federal Register** notice that issued the ban.

However, during the 90 calendar day period of continuous session following promulgation of the ban, Congress could have exercised its right to disapprove the ban pursuant to section 36 of the Consumer Product Safety Act, 15 U.S.C. 2083. Therefore, the ban was made effective August 10, 1982, or the day after the expiration of the time provided for Congress to consider its right to disapprove the rule, whichever is later. The August 10, 1982, date was selected because the Commission estimated that the time for consideration of the congressional veto provision would have expired by that time. However, since there was some possibility that changes in the congressional schedule would extend the 90 calendar days of continuous session past the August 10 date, the Commission indicated that it would publish a document at a later time confirming the effective date of the ban. In fact, the 90 calendar days of continuous session expired prior to August 10, 1982, and the installation of urea-formaldehyde foam insulation in residences and schools has been prohibited, beginning on August 11, 1982.

Another reason for confirming the effective date of the ban at this time is that several actions challenging the Commission's ban are now pending in the United States Court of Appeals for the Fifth Circuit,* and the court could

* Copies of the Complaint and the Decision and Order filed with the original document.

*Case numbers 82-4135, 82-4136, 82-4210 and 82-4311.

have ordered that the effective date of the ban be stayed pending the judicial review of the Commission's ban. However, the court denied the requests for a stay that were made in some of those cases, and the ban is currently in effect.

BILLING CODE 6355-01-M

---

16 CFR Part 1500

Federal Preemption of State and Local Labeling Requirements; Revocation of Rule

AGENCY: Consumer Product Safety Commission.

ACTION: Revocation of Rule.

SUMMARY: The Commission is revoking a regulation concerning the preemption of state and local labeling requirements. The regulation is no longer valid because it is based on a provision of the Federal Hazardous Substances Act that was substantially amended in 1976.

EFFECTIVE DATE: The revocation will become effective on January 26, 1983.

FOR FURTHER INFORMATION CONTACT: Alan Shakin, Office of the General Counsel, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 492-6980.

SUPPLEMENTARY INFORMATION: In 1966 Congress amended the Federal Hazardous Substances Labeling Act, 15 U.S.C. 1261, *et seq.;* Pub. L. 89-756. Among other changes—including a name change to the Federal Hazardous Substances Act (FHSA)—a preemption provision was added to the statute as section 18(b).

The Food and Drug Administration, the agency that then administered the FHSA, subsequently issued a regulation that implemented this preemption provision. 21 CFR Part 191. When the Consumer Product Safety Commission came into existence in May 1973, it took over the responsibility for administering the FHSA. In September 1973 the Commission re-issued the FHSA premption regulation, with minor modification, and transferred it to 16 CFR 1500.7. 38 FR 27012, Sept. 27, 1973.

In May 1976 Congress amended the FHSA preemption provision, section 18(b), significantly. Consumer Product Safety Commission Improvements Act of 1976; Pub. L. 94-284. The regulation that implemented the 1966 version, 16 CFR 1500.7, became incompatible with the new statutory provision. Therefore, the Commission is now revoking this regulation.

Under the Administrative Procedure Act, the issuance of rules must generally be preceded by a notice of proposed rulemaking and an opportunity for submission of written comments. An exception exists when "the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impractical, unnecessary, or contrary to the public interest." 5 U.S.C. 553(b). In this case, the Commission finds that a notice and comment rulemaking procedure is unnecessary because the statutory basis of the existing FHSA preemption regulation no longer exists.

PART 1500—[AMENDED]

§ 1500.7 [Removed and reserved]

Therefore, pursuant to provisions of the Administrative Procedure Act, 5 U.S.C. 553, § 1500.7 of Title 16, Chapter II, Subchapter C of the Code of Federal Regulations is revoked, removed, and reserved. *Effective date*: The revocation shall become effective on January 26, 1983.

BILLING CODE 6355-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 7

[T.D. 7863]

Transfers Involving Foreign Corporations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary income tax regulations that amend the existing temporary regulations relating to the treatment of certain exchanges of stock in a foreign corporation for stock in another foreign corporation by a United States person that are described in section 367 of the Internal Revenue Code of 1954. The temporary regulations are necessary to provide the public with the immediate guidance needed to meet the requirements of section 367. The regulations are also necessary to provide guidance to officers and employees of the Internal Revenue Service with respect to the requirements of that section. The text of the temporary regulations set forth in this document also serves as the text of proposed regulations cross-referenced in the Proposed Rules section of today's **Federal Register**.

DATES: The amendments are effective for certain exchanges that are described in both section 354 and in either section 351 or 361 and that begin after January 26, 1983 and, at the option of the taxpayer, to any other such exchange that begins after December 31, 1977, and during an open taxable year.

FOR FURTHER INFORMATION CONTACT: Martha E. Kadue of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, Attention: CC:LR:T (202-566-3238).

SUPPLEMENTARY INFORMATION:

Background

On December 27, 1977, temporary income tax regulations under section 367 were adopted (42 FR 65152). On October 2, 1979, those regulations were amended to provide examples (44 FR 57390). Under § 7.367(b)-4(b), the temporary regulations provided that, in the event of an overlap between section 351 or 361 and a section 368(a)(1)(B) reorganization (hereinafter referred to as an "overlap transaction"), the transaction was to be considered as a section 351 or 361 exchange and not as a section 368(a)(1)(B) reorganization. As a consequence, the transaction was considered to be governed by the rules pertaining to section 367(a) and not by the rules pertaining to section 367(b). Two overlap transactions were illustrated in § 7.367(b)-13, example (14). The temporary regulations provided in this document change the rule of the previous temporary regulations and treat overlap transactions as exchanges described in section 367(b).

The temporary regulations set forth herein provide that the rules of § 7.367(b)-7 are applicable to overlap transactions if the exchanging shareholder is a United States shareholder (within the meaning of

§ 7.367(b)–2(b)) of the corporation whose stock is exchanged. Gain realized, if any, on the exchange in excess of the section 1248 amount taken into account under § 7.367(b)–7 must be included, as a general rule, in gross income.

In overlap transactions in which the exchanging shareholder is not a United States shareholder (within the meaning of § 7.367(b)–2(b)) of the corporation whose stock is exchanged, these temporary regulations provide that, as a general rule, all gain realized in connection with the exchange will be currently included in gross income.

A United States person (whether or not a United States shareholder) can avoid current inclusion of gain in gross income (but only to the extent the gain exceeds the section 1248 amount, if any, in the case of a United States shareholder) if such person treats the exchange as an exchange to which the rules of section 367(a) apply and if, under the regulations applicable to section 367(a), the gain would not be currently recognized (i.e., if a favorable ruling is received or if the exchange is an exchange exempted from the ruling requirement procedure by regulations, when issued, under section 367(a)(2)). Moreover, if the transferee corporation is a controlled foreign corporation after the transfer and if the exchanging shareholder is a United States shareholder (within the meaning of § 7.367(b)–2(b)) of the transferee corporation after the transfer and of the corporation whose stock is transferred both before and after the transfer, then the attribution rules of § 7.367(b)–9 apply, as provided by § 7.367(b)–7, and the excess gain inclusion rules of § 7.367(b)–4(b) do not apply. These rules apply only to exchanges that are reorganizations described in section 368(a)(1)(B), and any intention on the part of the transferee corporation at the time of the transaction to dispose of the acquired stock may adversely affect the qualification of the exchange as a reorganization.

This document also contains an amendment to example (14) of § 7.367(b)–13 to illustrate the application of this new rule. Since these overlap transactions are considered to be transfers described in section 367(b) and not in section 367(a), under these temporary regulations section 7477 does not apply. These regulations are issued under the authority contained in sections 367(b) (90 Stat. 1634; 26 U.S.C. 367(b)) and 7805 (68A Stat. 917; 26 U.S.C. 7805) of the Internal Revenue Code of 1954.

Need for Temporary Regulations

In general, under section 367, a foreign corporation will not be considered to be a corporation unless the requirements of that section and the regulations thereunder are met. If a foreign corporation is not considered to be a corporation, then various nonrecognition rules applicable to transfers involving corporations will not apply. Therefore, for taxpayers and officers and other employees of the Internal Revenue Service to be able to determine whether a nonrecognition provision will apply to a transaction, it is essential that the consequences of the transaction be clearly defined. Because of the importance of this matter and in response to comments received from taxpayers with respect to the earlier notice of proposed rulemaking, the Internal Revenue Service is adopting on a temporary basis the rules contained in these temporary regulations. In addition, because of the need for immediate guidance with respect to these provisions, the Internal Revenue Service has found it to be necessary to issue these regulations prior to giving notice and providing for public procedures as outlined under section 553(b) of Title 5 of the United States Code.

Drafting Information

The principal author of these temporary regulations is Martha E. Kadue of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and the Treasury Department participated in developing the regulations on matters of substance and style.

List of Subjects in 26 CFR Part 7

Income taxes, Tax Reform Act of 1976.

PART 7—[AMENDED]

Adoption of Amendments to the Temporary Regulations

Accordingly, 26 CFR Part 7 is amended as follows:

Paragraph 1. Section 7.367(b)–4 is amended by revising paragraph (b) to read as follows:

§ 7.367(b)–4 Certain exchanges described in more than one Code provision.

* * * * *

(b) *Treatment of certain exchanges described in both section 354 and in either section 351 or 361*—

(1) *In general.* If an exchange of stock in a foreign corporation (whether or not a controlled foreign corporation) by a United States person (whether or not a United States shareholder within the meaning of § 7.367(b)–2(b)) pursuant to a reorganization described in section 368(a)(1)(B) involving a foreign corporation transferee is described in section 351 or section 361 as well as in section 354, such exchange is not an exchange described in section 367(a)(1) and—

(i) If the exchanging shareholder is a United States shareholder (within the meaning of § 7.367(b)–2(b)) of the corporation whose stock is exchanged—

(A) The exchange shall be subject to the rules of § 7.367(b)–7, and

(B) The excess of the gain realized (i.e., the fair market value of the stock received over the adjusted basis of the stock exchanged) over the section 1248 amount taken into account under § 7.367(b)–7 shall be included in the gross income of the exchanging shareholder as gain recognized from the sale or exchange of the stock exchanged; or

(ii) If the exchanging shareholder is not a United States shareholder (within the meaning of § 7.367(b)–2(b)) of the corporation whose stock is exchanged, the entire amount of gain realized (i.e., the fair market value of the stock received over the adjusted basis of the stock exchanged) shall be included in the gross income of the exchanging shareholder as gain recognized from the sale or exchange of the stock exchanged.

(2) *Exceptions.* This subparagraph (2) applies only to the gain treated as gain recognized on the sale or exchange of the stock exchanged and does not apply to any amount subject to the rules of § 7.367(b)–7, as provided in paragraph (b)(1)(i)(A) of this section.

(i) *Specified treatment.* If the United States person treats its exchange of stock in the foreign corporation as an exchange to which the rules under section 367(a) apply and—

(A) Pursuant to a request filed in accordance with the regulations pertaining to transfers under section 367(a)(1), it is established to the satisfaction of the Commissioner that such exchange is not in pursuance of a plan having as one of its principal purposes the avoidance of Federal income taxes, then the gain otherwise required to be included in gross income under paragraph (b)(1)(i)(B) or paragraph (b)(1)(ii) of this section shall not be currently recognized and shall not be included in gross income; or

(B) The exchange of stock is the type of exchange designated by the Secretary pursuant to regulations (not as yet issued) under section 367(a)(2) as not requiring the filing of a request under section 367(a)(1), then the gain required

to be included in gross income under paragraph (b)(1)(i)(B) or paragraph (b)(1)(ii) of this section shall be treated instead in accordance with the regulations under section 367(a)(2).

(ii) *Controlled foreign corporations.* If—

(A) The transferee corporation is a controlled foreign corporation after the transfer, and

(B) The exchanging shareholder is a United States shareholder (within the meaning of § 7.367(b)–2(b)) of the corporation whose stock is exchanged both before and after the transfer and of the transferee corporation after the transfer, then paragraph (b)(1)(i)(B) of this section shall not apply.

(3) *Effective date.* The rules of this paragraph (b) apply to exchanges that begin after January 26, 1983. For the rules applicable to exchanges that began before that date, see 26 CFR 7.367(b)–4(b) as it appeared in the Code of Federal Regulations revised as of April 1, 1982. However, the rules contained in paragraph (b) (1) and (2) of this section for the treatment of certain exchanges described in that paragraph may, at the option of the taxpayer, apply also to any exchange beginning after December 31, 1977, and during a taxable year with respect to which action by the Internal Revenue Service is not barred by any statute of limitations.

* * * * *

Par. 2. Example (14) of § 7.367(b)–13 is revised to read as follows:

§ 7.367(b)–13 Examples. * * *

Example (14). (a) F is a foreign corporation that was organized in country C on January 1, 1978. At all times since that date, A, a domestic corporation, has owned 100 percent of the outstanding stock of F. All of F's assets are used in a manufacturing business. The F stock does not comprise substantially all of A's assets. On January 1, 1983, A exchanges all of its stock of F for 80 percent of the outstanding voting stock of Y, an unrelated foreign corporation organized in country C. At the time of the exchange, A's Y stock received in the exchange has a fair market value of $600, A's adjusted basis in its F stock is $300, and A's section 1248 amount attributable to its F stock is $200. The exchange of stock of F by A would be described in section 351 if the status of Y as a corporation is recognized. This exchange would also be described in section 354 (a reorganization described in section 368(a)(1)(B)) if the status of F and Y as corporations is recognized. Under § 7.367(b)–4(b)(1)(i)(A), the exchange is considered to be one to which § 7.367(b)–7 applies. Under § 7.367(b)–7(b), the exchange is treated as one to which § 7.367(b)–0 applies, and under that latter section the section 1248 amount of $200 must be attributed to the Y stock received in the exchange. If § 7.367(b)–4(b)(2)(i) or (ii) did not apply, then under § 7.367(b)–4(b)(1)(i)(B), A would have to include $100 in gross income as gain from the exchange of the F stock. This amount is equal to the excess of the gain realized, or $300 ($600 minus $300), over the section 1248 amount taken into account under § 7.367(b)–4(b)(1)(i)(A), or $200. However, since Y is a controlled foreign corporation after the transfer and since A is a United States shareholder (within the meaning of § 7.367(b)–2(b)) of F both before and after the transfer and of Y after the transfer, by reason of § 7.367(b)–4(b)(2)(ii) no gain is recognized on the transfer under § 7.367(b)–4(b)(1)(i)(B), but the section 1248 amount of $200 must be attributed to the Y stock received in the exchange under § 7.367(b)–4(b)(1)(i)(A).

(b) The facts are the same as in paragraph (a) of this example, except that A receives only 30 percent of the Y stock, unrelated foreign persons receive an additional 50 percent of the Y stock in exchange for their contribution of property to Y, and Y is not a controlled foreign corporation after the exchange. Under § 7.367(b)–7(c)(1)(i), A must include in gross income the $200 section 1248 amount attributable to the F stock exchange. Unless § 7.367(b)–4(b)(2)(i) applies, under § 7.367(b)–4(b)(1)(i)(B) of this section, A must also include $100 in gross income as gain from the exchange of the F stock.

(c) The facts are the same as in paragraph (b) of this example, except that under § 7.367(b)–4(b)(2)(i)(A), A receives a favorable ruling that the exchange is not considered to be in pursuance of a plan having as one of its principal purposes the avoidance of Federal income taxes. As a result, A is only required to include in gross income the $200 section 1248 amount determined pursuant to § 7.367(b)–4(b)(1)(i)(A) and is not required to include in gross income the $100 determined pursuant to § 7.367(b)–4(b)(1)(i)(B).

(d) The facts are the same as in paragraph (a) of this example, except that A owns only five percent of the outstanding S stock, B (an unrelated domestic corporation) owns 75 percent of the outstanding F stock, and both A and B exchange their F stock for F and 75 percent, respectively, of the outstanding stock in Y. Although A is a United States person at the time of the exchange, A is not and has never been a United States shareholder (within the meaning of § 7.367(b)–2(b)) of F. Therefore, A's section 1248 amount with respect to its F stock is zero. Unless § 7.367(b)–4(b)(2)(1) applies, under § 7.367(b)–4(b)(1)(ii) A must include $300 in gross income as gain from the exchange of its F stock.

(e) The facts are the same as in paragraph (a) of this example, except that the F stock does comprise substantially all of A's assets. A transfers all of its stock in F to Y in exchange for 70 percent of Y's outstanding stock, and A remains in existence and does not distribute the Y stock received in the exchange to its shareholders. The exchange of stock of F by A would be described in section 361 (a reorganization described in section 368(a)(1)(C)) if the status of Y as a corporation is recognized. This exchange would also be described in section 354 (a reorganization described in section 368(a)(1)(B)) if the status of F and Y as corporations is recognized. Under § 7.367(b)–4(b), the exchange is considered to be one to which section 367(b) applies. The remaining tax consequences of this exchange are the same as the consequences illustrated in paragraph (a) of this example.

(f) The facts are the same as in paragraph (a) of this example, except that on January 1, 1982, A sells 60 percent of the voting stock of F to a foreign corporation at a gain and reports such gain as required under the Code. At the time of the January 1, 1983 exchange of F stock by A for Y stock, A's adjusted basis in the retained stock of F is $300 and A's section 1248 amount attributable to the retained stock of F is $200. While F is no longer a controlled foreign corporation, A is treated as a United States shareholder of F for five years following the sale of F stock under § 7.367(b)–2(b). Therefore, § 7.367(b)–4(b)(1)(i)(A) and the exception of § 7.367(b)–4(b)(2)(ii) apply to the January 1, 1983 exchange of F stock by A for Y stock, and the tax consequences of that exchange are the same as the consequences illustrated in paragraph (a) of this example.

BILLING CODE 4830–01–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 199

[DOD Reg. 6010.8–R, Amdt. No. 18]

Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Morbid Obesity

AGENCY: Office of the Secretary of Defense, DOD.

ACTION: Final rule.

SUMMARY: This amendment clarifies the Program exclusion of all services related to obesity, permitting consideration only for surgical treatment of morbid obesity. This clarification is necessary to set forth very limited criteria which will permit individual case review of life-endangering instances. This exception applies to gastric bypass, gastric stapling or gastroplasty for those individuals who are morbidly obese. Program payment may not be made for any other surgical or nonsurgical treatment, even if morbid obesity is present.

EFFECTIVE DATE: December 27, 1982.

FOR FURTHER INFORMATION CONTACT: Ms. Rose M. Sabo, Policy Branch, OCHAMPUS, telephone (303) 361–8608.

SUPPLEMENTARY INFORMATION: The proposed amendment was published in 46 FR 34352–34353, July 1, 1981, and invited comments for 30 days. Comments were received from three interested organizations and agencies.

1. All of the comments endorsed the proposal but suggested we delete the intestinal bypass from coverage because of serious complications that have been documented. We have accepted the recommendation and deleted the intestinal bypass from coverage.

2. One of the comments recommended there be no requirement for an associated complication because the incidence of sudden death is significantly increased by the 100 pound increase in weight. The commenter felt that complications should be prevented by early treatment when possible. The commenter also felt that a somewhat lower weight should be accepted when there are medical complications, for example, 75% or 75 pounds above ideal.

The morbid obesity benefit actually provides payment for the following two categories of patients:

—Those with a specific severe medical condition who are 100 pounds over their ideal weight; and

—Those who are 200% or more over their ideal weight. (This category does not require medical complications to be present.)

These criteria were professionally developed, and the definition of morbid obesity reflects the general opinion as to which cases justify surgical intervention. We have found it necessary to be very specific in benefit parameters as a matter of fiscal responsibility and to protect Program beneficiaries. Surgical intervention is not intended to be the treatment of choice for obesity. The definition of morbid obesity developed for CHAMPUS is very similar to the definition used by other major health care plans. Because of these considerations, it does not seem appropriate to revise the definition.

3. Some comments recommended that individual consideration be given to cases for which surgery is usually contraindicated and for which the patient does not fall within the age 18 to 50 category. The commenters felt this would allow consideration of unique cases in which surgery would be medically appropriate.

We have accepted this recommendation and deleted the previous restriction. Instead of denying automatically those cases that do not fall within the specified age limits and those cases for which surgery would usually be contraindicated, we will permit individual case review. This will allow for special consideration of those unique cases in which surgery may indeed be the appropriate course of treatment.

Numerous studies, as well as medical literature, report a large number of intestinal bypasses (such as the jejunoileal) which later require a second surgery because of the serious complications that result. The surgeon will, in many cases, do a gastric bypass, gastric stapling or gastroplasty to help the patient avoid regaining the weight that was lost. In this situation, even though the patient's condition may not meet technically the definition of morbid obesity because of the weight that has already been lost, payment will be made. This amendment is being revised to provide special benefit consideration for those cases.

In addition to the substantive changes, the language of the morbid obesity section is being simplified.

List of Subjects in 32 CFR Part 199

Health insurance, Military personnel, Handicapped.

Accordingly, 32 CFR, Chapter I, is amended as follows:

PART 199—IMPLEMENTATION OF THE CIVILIAN HEALTH AND MEDICAL PROGRAM OF THE UNIFORMED SERVICES

1. Section 199.6 is amended by adding, following paragraph (b)(108), *Missing in Action,* a new paragraph (b)(109), *Morbid Obesity,* as set forth below and by redesignating present paragraphs, (b)(109) through (179) as (b)(110) through (180).

§ 199.6 Definitions.

* * * * *

(b) *Specific definitions.*

* * * * *

(109) *Morbid Obesity.* "Morbid Obesity" means the body weight is 100 pounds over ideal weight for height and bone structure, according to the most current Metropolitan Life Table, and such weight is in association with severe medical conditions known to have higher mortality rates in association with morbid obesity; or, the body weight is 200% or more over ideal weight for height and bone structure according to the most current Metropolitan Life Table. The associated medical conditions are diabetes mellitus, hypertension, cholecystitis, narcolepsy, pickwickian syndrome (and other severe respiratory diseases), hypothalmic disorders, and severe arthritis of the weight-bearing joints.

* * * * *

2. Section 199.10 is amended by adding a new paragraph (e)(15) and revising paragraph (g)(28) as set forth below:

§ 199.10 Basic program benefits.

* * * * *

(e) *Special benefit information.*

* * * * *

(15) *Morbid obesity.* The CHAMPUS morbid obesity benefit is limited to the gastric bypass, gastric stapling or gastroplasty method.

(i) *Conditions for coverage.* Payment may be extended for the gastric bypass, gastric stapling or gastroplasty method only when one of the following conditions is met:

(*a*) The patient is 100 pounds over the ideal weight for height and bone structure and has an associated severe medical condition. These associated medical conditions are diabetes mellitus, hypertension, cholecystitis, narcolepsy, pickwickian syndrome (and other severe respiratory diseases) hypothalmic disorders and severe arthritis of the weight-bearing joints.

(*b*) The patient is 200% or more over the ideal weight for height and bone structure. An associated medical condition is not required for this category.

(*c*) The patient has had an intestinal bypass or other surgery for obesity and, because of complications, requires a second surgery (a takedown). The surgeon will, in many case, do a gastric bypass, gastric stapling or gastroplasty at the same time as the takedown to help the patient avoid regaining the weight that was lost. In this situation payment is authorized, even though the patient's condition may not technically meet the definition of morbid obesity because of the weight that was already lost following the initial surgery.

(ii) *Exclusions.* (*a*) CHAMPUS payment may not be made for nonsurgical treatment of obesity or morbid obesity, for dietary control or weight reduction.

(*b*) CHAMPUS payment may not be made for surgical procedures other than the gastric bypass, gastric stapling or gastroplasty, even if morbid obesity is present.

* * * * *

(g) *Exclusions and limitations.* * * *

(28) *Obesity: weight reduction.* Services and supplies related to obesity or weight reduction whether surgical or nonsurgical; wiring of the jaws or any

procedure of similar purpose regardless of the circumstances under which performed; except that benefits may be provided for the gastric bypass, gastric stapling and gastroplasty procedures in connection with "morbid obesity" as provided in paragraph (e)(15) of this part.

BILLING CODE 3810-01-M

Department of the Air Force

32 CFR Part 802

Air Force Technical Order System

AGENCY: Air Force Department, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Air Force is amending its administration regulations by removing Part 802 on Air Force technical order system of Chapter VII, Title 32. The source document, Air Force Regulation (AFR) 8-2, has been revised. It is intended for internal guidance and has limited applicability to the general public. This action is a result of departmental review in an effort to insure that only regulations which substantially affect the public are maintained in the Air Force portion of the Code of Federal Regulations.

EFFECTIVE DATE: December 27, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Stiegmann, USAF, AF/LEYE, Pentagon, Washington, D.C., telephone (202) 697-9179.

SUPPLEMENTARY INFORMATION:

PART 802—[REMOVED]

Accordingly, 32 CFR is amended by removing Part 802.

BILLING CODE 3910-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD7 82-14]

Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, Indian River, Brevard County, Florida and Atlantic Intracoastal Waterway, Halifax River, Volusia County, Florida

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This amendment revokes the regulations for the drawbridge across the AIWW (Halifax River), mile 824.9, Granada Avenue (State Road 40), Ormond Beach and the drawbridge across the AIWW (Indian River), mile 918.2, State Road 518 at Melbourne because adjacent high level fixed bridges have been opened to vehicular traffic and demolition of the drawbridges is in progress. Notice and public procedure have been omitted from this action due to the removal of the bridges concerned.

EFFECTIVE DATE: This amendment becomes effective on January 26, 1983.

FOR FURTHER INFORMATION CONTACT: J. R. Kretschmer, Seventh Coast Guard District, telephone (305) 350-4108.

SUPPLEMENTARY INFORMATION: This action has no economic consequences. It merely revokes regulations that are now meaningless because they pertain to drawbridges that remain open to navigation. Consequently, this action cannot be considered to be a major rule under Executive Order 12291. Furthermore, it has been found to be nonsignificant under the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of May 22, 1980), and does not warrant preparation of an economic evaluation. Because no notice of proposed rulemaking is required under 5 U.S.C. 553, this action is exempt from the Regulatory Flexibility Act (5 U.S.C. 605(b)). However, this action will not have a significant effect on a substantial number of small entities.

Drafting Information:

The drafters of this rule are: J. R. Kretschmer, Project Officer, and Lieutenant Michael T. Harris, Project Attorney.

BILLING CODE 4910-14-M

---

33 CFR Part 117

[CGD7 82-12]

Drawbridge Operation Regulations; St. Lucie River, Okeechobee Waterway, Mile 7.5 at Stuart, Martin County, Florida

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the City of Stuart, the Coast Guard is changing the regulations governing the Roosevelt drawbridge at Stuart, Florida by permitting the number of openings to be limited during certain periods. This change is being made because periods of peak vehicular traffic have changed. This action will accommodate the needs of vehicular traffic and still provide for the reasonable needs of navigation.

EFFECTIVE DATE: This rule becomes effective on January 26, 1983.

FOR FURTHER INFORMATION CONTACT: James R. Kretschmer, Bridge Administrator, Seventh Coast Guard District, telephone (305) 350-4108.

SUPPLEMENTARY INFORMATION: On August 30, 1982, the Coast Guard published a proposed rule (47 FR 38154) concerning this amendment. The Commander, Seventh Coast Guard District, also published these proposals as a Public Notice dated September 24, 1982. In each notice, interested persons were given until October 14, 1982 to submit comments.

Drafting Information:

The principal persons involved in drafting this rule are: James R. Kretschmer, Project Officer, and Lieutenant Michael T. Harris, Project Attorney.

Discussion of Comments

No comments were received in response to publication in the Federal Register. Sixteen responses to the public

notice were received. Ten comments agreed with the proposed rule. Three commentors suggested that the restricted hours be extended throughout the day. Since the bridge presently opens less than twice per hour outside the restricted periods, further restrictions are not considered justified. One commentor suggested that the bridge not open at all during morning and evening rush hours. Since the bridge presently opens an average of one time during the morning and evening rush hours, this additional restriction to navigation is not considered justified. Two commentors objected to the proposed rule limiting openings to the hour and half-hour between noon and 2 p.m. indicating that when the adjacent railway bridge is in a down position, waterborne traffic will be subject to long delays during the restricted periods. An additional paragraph has been added to the final rule to provide that if the adjacent railway bridge is in a "down" or closed position, the highway bridge need not open for east bound vessels. However, the bridge shall open as soon as the railway bridge resumes its "up" or open position if any vessels are waiting to pass. This a non-substantive addition to the rule and requires no additional comment since the railroad bridge is remotely operated, and provides a lesser vertical clearance in a closed position than the highway bridge. Since this rule exempts tugs with tows, the major commercial users of the waterway, it is expected that there will be only minimal economic impact.

Economic Assessment and Certification

These final regulations have been reviewed under the provisions of Executive Order 12291, and have been determined not to be major rules. They are considered to be nonsignificant in accordance with guidelines set out in the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of May 22, 1980). As explained above, an economic evaluation has not been conducted since its impact is expected to be minimal. In accordance with 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), it is also certified that these rules will not have a significant impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

PART 117—DRAWBRIDGE OPERATION REGULATIONS

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations, is amended by revising § 117.438b to read as follows:

§ 117.438b St. Lucie River, Okeechobee Waterway, mile 7.5, Roosevelt Bridge, U.S. Highway No. 1, Stuart, Florida.

(a) From 7:30 a.m. to 9:00 a.m.; 12 noon to 2:00 p.m.; and 4:00 p.m. to 6:00 p.m., Monday through Friday, the draw need not open for passage of vessels except that on the hour and half-hour the draw shall open to pass all accumulated vessels. At all other times the draw shall open on signal.

(b) When the adjacent Florida East Coast Railway bridge is in a closed position on the hour or half-hour, during the restricted periods, the draw need not open for eastbound vessels. When the railway bridge opens, the draw shall open upon signal to pass all accumulated vessels.

(c) The draw shall open at any time for the passage of public vessels of the United States; state, or local government vessels used for public service, tugs with tows; and vessels in distress. The opening signal from these vessels is five short blasts of a whistle, horn, other sound producing device, or by shouting.

(d) The owner of or agency controlling the bridge shall conspicuously post notices containing the substance of these regulations both upstream and downstream, on the bridge or elsewhere, in such a manner that they can easily be read at all times from an approaching vessel.

(33 U.S.C. 499; 49 U.S.C. 1655(g)(2); 49 CFR 1.46 (c)(5); 33 CFR 1.05–1(g)(3))

Dated: December 8, 1982.

A. D. Breed,

Deputy Commander, U.S. Coast Guard Seventh District.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

41 CFR Ch. 7

[AIDPR Notice 83–3]

Deletion of AID Procurement Regulation (AIDPR) Appendix C; Contractor Performance Evaluation Report

AGENCY: Agency for International Development.

ACTION: Final rule.

SUMMARY: This Agency for International Development Procurement Regulation (AIDPR) Notice deletes the title and text of AIDPR Appendix C relating to Contractor Performance Evaluation Report, reserving Appendix C for future use. This action represents a change in the Agency's internal procedures for the handling of contractor performance evaluation information.

EFFECTIVE DATE: This AIDPR notice is effective on Nov. 26, 1982.

FOR FURTHER INFORMATION CONTACT: V. Henry Walker, M/SER/CM/SD/POL, Agency for International Development, Washington, D.C. 20523. Telephone (703) 235–9107.

SUPPLEMENTARY INFORMATION: This AIDPR Notice is a procurement regulation, and has been exempted from the requirements of Executive Order 12291 of February 17, 1981, pursuant to Section 8(b) of the Order, by the Director, OMB, in a letter dated April 8, 1981, as amended December 2, 1981. The determination required by paragraph 4a of OFPP Policy Letter 80–5, and the certification required by the Regulatory Flexibility Act have been made and are included in the body of this AIDPR Notice.

List of Subjects in 41 CFR Ch. 7

Government procurement.

Appendix C to Ch. 7—[Removed and Reserved]

1. The Table of Contents of the Appendices, which commence at the end of the AIDPR text, is amended as follows: "Appendix C—Contractor Performance Evaluation Report," is revised to read as follows: "Appendix C—[Reserved]."

Appendix C—[Removed and Reserved]

2. The title and text of Appendix C is removed and reserved.

Determination

As required by paragraph 4a of OFPP Policy Letter 80–5, I hereby determine that this AIDPR Notice has been reviewed against the policies set forth in paragraphs (1) through (8) of Section 2 of the Office of Federal Procurement Policy Act (Pub. L. 93–400, as amended by Pub. L. 96–83, hereinafter referred to as the Act), and policy directives issued by OFPP under Section 6(h) of the Act.

Based on this review, I hereby determine that this AIDPR Notice is not inconsistent with the policies set forth in paragraphs (1) through (8) of Section 2 of the Act, and policy directives issued by OFPP under Section 6(h) of the Act.

Certification

Pursuant to the Regulatory Flexibility Act, I hereby certify as head of the Agency, under AIDPR 7–1.204, that this regulation will not have a significant economic impact on a substantial

number of small entities, including small businesses, small organizational units and small governmental jurisdictions.

Authority: This AIDPR Notice is issued under 41 CFR 7-1.008-51.

Dated: December 7, 1982.

John F. Owens,

Deputy Assistant to the Administrator for Management.

ENVIRONMENTAL PROTECTION AGENCY

41 CFR Part 15-3

[OA-FRL-2274-1]

Procurement by Negotiation; Small Purchases

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is amending its procurement regulation relating to small purchases. The intended effect of this revision is to eliminate Agency regulations duplicating the Federal Procurement Regulations (FPR).

EFFECTIVE DATE: December 27, 1982.

FOR FURTHER INFORMATION CONTACT: Pamela John, Procurement and Contracts Management Divison (PM-214), Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, (202/382-5026).

SUPPLEMENTARY INFORMATION: (a) EPA's procurement regulation prescribes policies and procedures relating to small purchases. This rule removes these policies and procedures as they duplicate guidance in the FPR.

(b) The Agency has not invited public comments on this rule as its purpose is to reduce the proliferation of regulations on small purchases.

(c) The Office of Management and Budget (OMB) has exempted this regulation from the requirements of Executive Order 12291 pursuant to Section 8(b) of that Order.

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 65

[Docket No. FEMA 6471]

List of Withdrawal of Flood Insurance Maps Under the National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities where Flood Insurance Rate Maps or Flood Hazard Boundary Maps published by the Director, Federal Emergency Management Agency, have been temporarily withdrawn for administrative or technical reason. During that period that the map is withdrawn, the insurance purchase requirement of the National Flood Insurance Program is suspended.

EFFECTIVE DATES: The date listed in the fifth column of the table.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, National Flood Insurance Program, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0237.

SUPPLEMENTARY INFORMATION: The list includes the date that each map was withdrawn, and the effective date of its republication, if it has been republished. If a flood-prone location is now being identified on another map, the community name for the effective map is shown.

The Flood Disaster Protection Act of 1973 (Pub. L. 93-234), as amended, requires, at Section 102, the purchase of flood insurance as a condition of Federal financial assistance if such assistance is:

(1) For acquisition and construction of buildings, and

(2) For buildings located in a special flood hazard area identified by the Director of Federal Emergency Management Agency.

The insurance purchase requirement with respect to a particular community may be altered by the issuance or withdrawal of the Federal Emergency Management Agency's (FEMA) official Flood Insurance Rate Map (FIRM) or the Flood Hazard Boundary Map (FHBM). A FHBM is usually designated by the letter "E" following the community number. If the FEMA withdraws a FHBM for any reason the insurance purchase requirement is suspended during the period of withdrawal. However, if the community is in the Regular Program and only the FIRM is withdrawn but a FHBM remains in effect, then flood insurance is still required for properties located in the identified special flood hazard areas shown on the FHBM, but the maximum amount of insurance available for new applications or renewal is first layer coverage under the Emergency Program, since the community's Regular Program status is suspended while the map is withdrawn. (For definitions see 44 CFR Part 59 et seq.).

List of Subjects in 44 CFR Part 65

Flood insurance, Flood plains.

This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities. As the purpose of this revision is the convenience of the public, notice and public procedure are unnecessary, and cause exists to make this amendment effective upon publication.

PART 65—[AMENDED]

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. Accordingly, Subchapter B of Chapter 1 of Title 44 of the Code of Federal Regulations is amended as follows:

1. Present § 65.6 is revised to read as follows:

§ 65.6 Administrative withdrawal of maps.

(a) *Flood Hazard Boundary Maps (FHBM's).*

The following is a cumulative list of withdrawals pursuant to this Part:

40 FR 5149
40 FR 17015

KEY TO SYMBOLS:
E. The community is participating in the Emergency Program. It will remain in the Emergency Program without a FHBM.
R. The community is participating in the Regular Program.
1. The Community appealed its flood-prone designation and FIA determined the Community would not be inundated by a flood having a one-percent chance of occurrence in any given year.
2. FIA determined the Community would not be inundated by a flood having a one-percent chance of occurrence in any given year.
3. The Flood Hazard Boundary Map (FHBM) contained printing errors or was improperly distributed. A new FHBM will be prepared and distributed.
4 The community lacked land-use authority over the special flood hazard area.
5. The FHBM does not accurately reflect the Community's special flood hazard areas (i.e., sheet flow flooding, extremely inaccurate map, etc.). A new FHBM will be prepared and distributed.
6. The Flood Insurance Rate Map was rescinded because of inaccurate flood elevations contained on the map.
7. The Flood Insurance Rate Map was rescinded in order to re-evaluate the mudslide hazard in this Community.
8. The T&E or H&E Map was rescinded.
9. A revision of the FHBM within a reasonable period of time was not possible. A new FHBM will be prepared and distributed.
10. Miscellaneous.

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968); effective Jan. 28, 1969 (33 FR 17804, Nov. 28, 1968), as amended, 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to the Associate Director, State and Local Programs and Support)

Issued: December 6, 1982.

Dave McLoughlin,

Acting Associate Director, State and Local Programs and Support.

Proposed Rules

Federal Register
Vol. 47, No. 248
Monday, December 27, 1982

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 82-AGL-25]

Proposed Alteration of Transition Area and Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The nature of this Federal action redescribes both the control zone and transition area designated for Brainerd, Minnesota. The intended effect of this action is to accommodate a new NDB Runway 23 instrument approach procedure while, at the same time, returning some designated airspace to a non-controlled status. Also, it is to ensure segregation of aircraft using instrument approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions.

DATE: Comments must be received on or before January 23, 1983.

ADDRESS: Send comments on the proposal in triplicate to FAA Office of Regional Counsel, AGL-7, Attention: Rules Docket Clerk, Docket No. 82-AGL-25, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

The official docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

An informal docket will also be available for examination during normal business hours in the Airspace, Procedures, and Automation Branch, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace, Procedures, and Automation Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

SUPPLEMENTARY INFORMATION: The development of an NDB Runway 23 approach procedure for Brainerd-Crow Wing County Airport requires that the current designated airspace for Brainerd, Minnesota, be altered to ensure the procedure is contained within controlled airspace although the minimum descent altitude for the procedure may be established below the floor of the 700 foot controlled airspace. During the review of the alteration, it was noted that current procedures at Brainerd-Crow Wing County Airport do not require all of the designated airspace in effect. This action returns designated airspace to a non-controlled status involving two main areas approximately 6 miles by 6 miles in size. One area is located northwest of Brainerd-Crow Wing and the other is southeast of Brainerd-Crow Wing. Both areas extend approximately from the 8 mile radius to the 14 mile radius of Brainerd Crow Wing County Airport. Aeronautical maps and charts will reflect the defined areas which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 82-AGL-25." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2, which describes the application procedures.

Proposal

The FAA is considering an amendment to Sections 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the control zone and transition area near Brainerd, Minnesota.

Sections 71.171 and 17.181 of Part 71 of the Federal Aviation Regulations were published in Advisory Circular AC 70-3 dated January 29, 1982.

List of Subjects in 14 CFR Part 171

Control zones, Transition areas, Aviation safety.

Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend §§ 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

§ 71.171 [Amended]

Brainerd, Minnesota

Within a 5-mile radius of Brainerd-Crow Wing County Airport (latitude 46°23'52"N, longitude 94°08'12"W.); within 2 miles each side of the Brainerd Runway 23 localizer course extending from the 5-mile radius zone to 5.5 miles northeast of the airport. This control zone will be effective during the

specific dates and times established in advance by a Notice to Airmen and continuously published in the Airport/Facility Directory.

§ 71.181 [Amended]

Brainerd, Minnesota

That airspace extending upward from 700 feet above the surface within a 8.5-mile radius of the Brainerd-Crow Wing County Airport (latitude 46°23'52"N, longitude 94°08'12"W.).

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(C)); and 14 CFR 11.65.)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It is certified that this—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Illinois, on December 6, 1982.

Monte R. Belger,

Acting Director, Great Lakes Region.

14 CFR Part 71

[Airspace Docket No. 82-ASO-57]

Proposed Alteration of Control Zone, Anniston, Alabama

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the Anniston, Alabama, control zone by correcting the geographical coordinates of the airport and increasing the size of the control zone arrival extension. The arrival extension presently established is not of sufficient size to contain aircraft while they are executing the nondirectional radio beacon instrument approach procedure to Runway 5 (NDB RWY 5). This proposed action will provide the required controlled airspace.

DATE: Comments must be received on or before January 30, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Attn: Manager, Airspace and Procedures Branch, ASO-530, P.O. Box 20636, Atlanta, Georgia 30320. The official docket may be examined in the Office of Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No.——." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAS personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch (ASO-530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should slao request a copy of Advisory Circular No. 11-2 which describes the application procedures.

Proposal

The FAA is considering an amendment to §71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that will correct the geographical coordinates for Anniston-Calhoun County Airport and increase the size of the control zone arrival extension associated with the NDB RWY 5 instrument approach procedure. The present size of the extension is not sufficient for containment of aircraft while executing the instrument approach procedure. Section §71.171 Part 71 of the Federal Aviation regulations was republished in Advisory Circular AC 70-3 dated January 29, 1982.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Control zone.

Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend §71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

Anniston-Calhoun County Airport, AL [Amended]

By deleting the words, "* * * (latitude 33°35'23"N., longitude 85°51'20"W.); within 1 mile each side of the ILS localizer SW course, extending from the 5-mile zone to the OM * * *", and substituting for them the words, "* * * (Lat. 33°35'24"N., Long. 85°51'20"W); within 3 miles each side of the 235° bearing from the Anniston RBN, extending from the 5-mile radius zone to 8.5 miles southwest of the RBN * * *".

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on December 15, 1982.

George R. LaCaille,

Acting Director, Southern Region.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 812 3006]

Meredith Corp.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require a Des Moines, Iowa franchisor and operator of the Better Homes and Gardens Real Estate Service (Service), among other things, to cease making false or misleading representations regarding the Service, its members, or services offered. The order would prohibit the dissemination of advertisements and promotional materials which represent that all Service members offer consumers "settling-in" services; participate in a home-building program; and offer "exclusive" home-protection insurance, unless the advertisement clearly discloses that not all members offer these services. The corporation would also be barred from making unsubstantiated representations concerning the Service's selectivity in choosing members; training of sales associates of Service members; market size, rank and leadership in terms of sales volume of Service members; or any statement which compares Service members to other real estate franchisors as to calibre of members or membership standards. Further, the order would require the corporation to send to all members of the Better Homes and Gardens Real Estate Service a letter recalling certain advertising and promotional materials, and an acknowledgement form.

DATE: Comments must be received on or before February 25, 1983.

ADDRESS: Comments should be directed to: FTC/S, Office of the Secretary, Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: FTC/PA, Andrew B. Sacks, Washington, D.C. 20580. (202) 724-1490.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

Before Federal Trade Commission

[File No: 812-3006]

MEREDITH Corp., a corporation; Agreement Containing Consent Order To Cease and Desist

The Federal Trade Commission having initiated an investigation of certain acts and practices of Meredith Corporation, a corporation, and it now appearing that Meredith Corporation, hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated:

It is hereby agreed by and between Meredith Corporation, by its duly authorized officer and its attorney, and counsel for the Federal Trade Commission, that:

1. Proposed respondent Meredith Corporation is a corporation organized, existing and doing business under and by virtue of the laws of the State of Iowa with an office and principal place of business located at 1716 Locust Street, Des Moines, Iowa.

2. Proposed respondent admits all the jurisdictional facts set forth in the proposed complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of complaint contemplated thereby and related material pursuant to Rule 2.34, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated or that any of the facts alleged in the draft complaint here attached are true, except for jurisdictional facts, which are hereby admitted.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby, and it understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order, and that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

It is ordered that respondent Meredith Corporation ("Meredith"), a corporation, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with advertising and promotional materials for Better Homes and Gardens Real Estate Service ("respondent's real estate service"), in or affecting "commerce" as defined in the FTC Act, do forthwith cease and desist from making the statements or representations, directly or by implication, listed below, contrary to fact at the time of their dissemination:

(A) The following statements or representations concerning services offered consumers by respondent's real estate service members:

1. All respondent's real estate service members offer consumers "settling-in" services.

2. All respondent's real estate service members participate in home-building progam, and offer this program to consumers.

3. All respondent's real estate service members offer consumers a home-protection insurance plan, in states where it is legal to do so.

4. The home-protection plan offered by respondent's real estate service members is "exclusive," provided that, for purposes of this order, a representation, direct or indirect, that a home-protection plan is exclusive shall mean that home-protection insurance providing comparable coverage is not available from other sources.

5. Any statements or representations that settling-in services, the home-building program, or the home-protection plan are offered to consumers by respondent's real estate service members, unless it is clearly and prominently disclosed within the advertisement where the representation appears that not all members offer the services. Such disclosure shall be in close proximity to the representation or noted by an asterisk to the representation referring to the disclosure.

(B) The following statements or representations concerning respondent's real estate service selection of members.

1. Included in the selection process for all prospective members is screening based on: the prospective firm's training programs for its sales associates, the excellence in training of sales associates employed by the prospective member; or the firm's ability to obtain financing for consumers.

2. Respondent's real estate service received over 18,000 "inquiries" from prospective members.

3. Only one out of every seventy-two "inquiries" or "applicants is "good enough" to become, or only one out of 72 "inquiries" or "applicants" did become a member of respondent's real estate service.

(C) That all members of respondent's real estate service are "market leaders" in terms of sales volume in their respective communities.

(D) That the sales associates of members of respondent's real estate service all receive training in addition to the basic training required to obtain and retain a real estate license.

II

(A) It is further ordered that Meredith, a corporation, its successors and assigns, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with advertising and promotional materials, for Better Homes and Gardens Real Estate Service, an operating group of Meredith Corporation, in or affecting commerce as defined in the Federal Trade Commission Act, do forthwith cease and desist from making any statements or representations, directly or by implication, concerning: programs offered by respondent's real estate service members; respondent's real estate service's selection process or slectivity in choosing members; market size, market rank, or market leadership in terms of sales volume of respondent's real estate service members; training of sales associates of respondent's real estate service members; or any statement or representations comparing, directly or by implication, respondent's real estate service to other real estate franchisors as to membership standards or member calibre, unless respondent possesses and relies upon a reasonable basis for such statements or representations.

(B) (1) For purposes of paragraph II(A), a reasonable basis shall consist of reliable and competent evidence that substantiates such statements.

(2) To the extent the evidence of a reasonable basis consists of scientific or professional tests, analyses, research, studies or any other evidence based on expertise of professionals in the relevant area, such evidence shall be "reliable and competent" for purposes of paragraph II(B)(1) only if those tests, analyses, research, studies, or other evidence,

(a) are conducted and evaluated in a disinterested and sufficiently skilled fashion; and

(b) use procedures generally accepted in the profession or science, so that accurate and reliable results are best insured.

III

It is further ordered that the respondent shall initiate and pay the cost of sending, within thirty (30) days of the date this Order is final, to all members of the real estate service, a copy of this order and consent agreement, an accompanying cover letter (attached, and hereto incorporated, as Attachment A,) and an acknowledgment form (attached, and hereto incorporated, as Attachment B). No liability will be imposed on respondent on account of any member of respondent's real estate service which willfully, or otherwise, refuses, in any manner to comply with said request, or which engages in any advertising or utilizes promotional material which respondent is prohibited from disseminating or utilizing under Paragraph I above, provided respondent has complied with this paragraph, and paragraph IV (D) of this order.

IV

(A) It is further ordered that respondent notify the Commission at least thirty (30) days prior to any proposed change in respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation of dissolution of subsidiaries of any other chance in the corporation which may affect compliance obligations arising out of the Order.

(B) It is further ordered that respondent shall, within ninety (90) days after this Order becomes final, file with the Commission a report, in writing, signed by respondent, setting forth in detail the manner and form of its compliance with this Order.

(C) Is it further ordered that respondent shall maintain files and records of all substantiation related to the requirements of this Order for a period of three (3) years after the dissemination of any advertisement, which shall be made available to the Commission upon request for inspection and copying.

(D) It is further ordered that respondent shall maintain files and records of all acknowledgment forms (Attachment B) and advertising and promotional materials returned to it by its real estate service's members pursuant to Paragraph III of this order for a period of six (6) months after this order becomes final, which shall be made available to the Commission upon request for inspection and copying.

Attachment A

Dear: _____

Enclosed please find a copy of a provisionally accepted consent order entered into between Meredith Corporation and the Federal Trade Commission. The agreement stems from an FTC investigation of certain advertisements and promotional materials for Better Homes and Gardens Real Estate Service. The agreement is for settlement purposes only and does not constitute an admission by Meredith Corporation or the Real Estate Service that the law has been violated or that the facts are true as alleged in a proposed complaint submitted by the Federal Trade Commission to Meredith.

Please review the enclosed consent order which we have entered into with the Federal Trade Commission. As part of our settlement, we request that you no longer use, and return to us, the following promotional and advertising materials:

I. *Ads To Be Returned:*

A. *Openings/Anniversaries*

1. "Important News"—60-second radio

B. *Front Yard*

1. "Front Yard"—60-second radio

C. *Myth/Fact*

1. "Five Myths" (1–5)—print—local and national

2. "More Myths" (6–10), (11–15)—print—local and national

3. "Four Myths" (1–4)—print—local

D. *Selection*

1. "Crowd"—30-second-television—local and national

2. "Crowd"—10-second-television—local

3. "Finance II"—30-second radio

4. "Finance III"—60-second radio

5. "Mortgage"—60-second radio

6. "Leaders"—30-second radio

7. "Good Selection"—60-second radio

8. "Out Of Every 72 . . ." crowd print—national

6. "The Home Protection Plan . . ." (seller) brochure
7. "Fifty-six Years Of Trust" ad reprints
8. "This Means A Lot More . . ." (clock) print—national

You should be advised that the Federal Trade Commission may treat the dissemination of any such advertising or promotional materials as a violation of Section 5 of the Federal Trade Commission Act. We further request that you return the attached acknowledgement form, which must be made available to the Federal Trade Commission staff upon request.

Thank you for your prompt attention to this matter.

Sincerely,

Meredith Corporation

Attachment B

I hereby acknowledge receipt of the consent agreement entered into between Meredith Corporation and the Federal Trade Commission. Pursuant to that order, I am returning to Meredith Corporation the following advertising and promotional materials (identified by number):

I understand that dissemination of any of the advertising or promotional material covered by the order may be found to violate the Federal Trade Commission Act.

IN THE MATTER OF MEREDITH CORPORATION

[File No. 812–3006]

Analysis of Proposed Consent Order To Aid Public Comment

AGENCY: Faderal Trade Commission.

ACTION: Provisional Acceptance of Consent Order In the Matter of Meredith Corporation, File No. 812–3006.

SUMMARY: This document contains an analysis of a proposed consent order to aid public comment on the Federaal Trade Commission's provisisonal acceptance of a consent order in the matter of Meredith Corporation, File No. 812–3006.

SUPPLEMENTARY INFORMATION: The Federal Trade Colmmission has provisionally accepted an agreement to a proposed consent order from the Meredith Corporation relating to advertisements for Better Homes and Gardens Real Estate Service, an operating group of the Meredith Corporation.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public recored. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreements's proposed order.

The complaint charged the respondent with disseminating advertisements containing several false, misleading, or unsubstantiated representations regarding Better Homes and Gardens Real Estate Service, ("The Service".) The complaint alleged that, contrary to fact, these advertisements claimed that (1) all Service members are market leaders in their respective communities in terms of sales volume; (2) all prospective franchise members are screened on the basis of their ability to obtain financing for consumers and training of sales associates; (3) that the Service has received 18,000 "inquiries" from prospective members, and only one out of every seventy-two "inquiries" or "applicants" are "good enough" to become, or otherwise become, members of the Better Home & Gardens Real Estate Service; (4) all franchise members of the Better Homes & Gardens Real Estate Service offer consumers "settling-in" services, a home building program, and an exclusive home protection insurance plan: and (5) all sales associates of franchise members in the Service receive special training.

Based upon its investigation, staff alleges:

(1) Not all franchise members are leaders in their respective markets in terms of sales volume. Company documents indicate that while many members are among the top three firms in their respective markets in terms of sales volume, a substantial number of members are not. In fact, a significant number of members are not within the top six in their respective markets in terms of sales volume;

(2) Training of sales associates and a real estate firm's ability to obtain financing are not systematically applied as criteria by Better Homes & Gardens Real Estate Service in the process of selecting franchise members;

(3) The actual number of inquiries received is very much smaller than 18,000, and the adtual ratio of members to "inquiries" or "applicants" is very much smaller than one out of seventy-two;

(4) Participation in the "settling-in," home-protection, and home-building programs is optional for service members. A substantial number of members do not participate in each program and, therefore, do not offer these services. In addition, the home-protection insurance plan is not "exclusive," in that comparable insurance is available through other real estate franchise services;

(5) Not all sales associates of franchise member firms receive special training. A significant number of these sales associates have received no training in addition to the basic training needed to acquire a real estate license.

The consent order contains various provisions designed to remedy the alleged advertising violations.

Paragraph I of the order prohibits dissemination of each of the statements or representations, discussed above, which the complaint alleges were contrary to fact, as long as those statements or representations remain contrary to fact.

In addition, Paragraph I(A)(5) prohibits any statements or representation that settling-in services, the home building program, or the home protection plan are offered to consumers by members of the Service, unless it is clearly and prominently disclosed within the advertisement that not all members offer these services.

Paragraph II(A) of the order prohibits the following statements or representations, unless respondent possesses and relies upon a reasonable basis for such statements or representations: statements concerning: services offered by Service members; the Service's selection process or selectivity in choosing members; market size, market rank or market leadership in terms of sales volume of Service members; training to sales associates of Service members; or any statements or representations comparing Service members to other real estate franchisors as to caliber of members of membership standards.

Paragraph II(B)(1) defines a reasonable basis for purposes of Paragraph (II)(A) as reliable and competent evidence substantiating the statements. Part II(B)(2) requires that evidence of a reasonable basis in the form of scientific or professional tests, analyses, research, studies or any other evidence based on expertise of professionals, be conducted and evaluated in a disinterested and sufficiently skilled fashion, and use procedures generally accepted in the profession or science.

Paragraph III of the order requires that respondent initiate, and pay the cost of, sending within thirty (30) days of the date the order is final, to all service members, a copy of the order and consent agreement, an accompanying cover letter (Attachment A to the order), and an acknowledgement form (Attachment B to the order). Attachment A requests that certain advertisements and promotional materials in the possession of members be returned to respondent, advises members that the Federal Trade Commission may treat use of such materials as a violation of the Federal Trade Commission Act, and requests return of the acknowledgement form. Attachment B acknowledges receipt of the consent agreement by individual members and indicates which materials are being returned by the member returning the form. Part III further provides that no liability will be imposed on respondent from any members use of advertising or promotional materials prohibited by the order, provided respondent has complied with Parts III and IV(D) of the order.

Paragraph IV(A) requires respondent to notify the Commission at least thirty (30) days prior to any proposed change in respondent which may affect compliance obligations arising out of the order.

Paragraph IV(B) requires respondent to file a compliance report with the Commission within ninety (90) days after the order becomes final.

Paragraph IV(C) requires respondent to maintain files of all substantiation related to the requirements of this order for three years after dissemination of any advertisement, which shall be made available to the Commission upon request for inspection and copying.

Paragraph IV(D) requires respondents to maintain files of all acknowledgement forms (Attachment B) which are returned by members for six months after the order becomes final.

The purpose of this analysis is to facilitate public comment on the proposed order. It is not intended to constitute an official interpretation of the complaint, agreement and proposed order or to modify in any way their terms.

Carol M. Thomas,

Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[LR-2-78]

Transfers Involving Foreign Corporations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of Proposed Rulemaking by cross-reference to temporary regulations.

SUMMARY: This document contains a notice of proposed rulemaking with respect to the treatment of certain exchanges of stock in a foreign corporation for stock in another foreign corporation by a United States person that are described in section 367 of the Internal Revenue Code of 1954. In the Rules and Regulations portion of this Federal Register, temporary income tax regulations relating to the same subject are published. Those temporary regulations are incorporated herein and also serve as part of this notice of proposed rulemaking for final income tax regulations.

DATE: Written comments and requests for a public hearing must be delivered or mailed before February 25, 1983.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-2-78), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Martha E. Kadue of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, Attention: CC:LR:T (LR-2-78), 202-566-3228.

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations published in the Rules and Regulations portion of this issue of the Federal Register amend 26 CFR Part 7 and relate to temporary income tax regulations under section 367(b) of the Internal Revenue Code. The final regulations that are proposed to be based on the temporary regulations would amend 26 CFR Part 1 to add regulations under section 367 of the Internal Revenue Code of 1954.

On December 27, 1977, temporary income tax regulations under section 367 were adopted (42 FR 65152). On October 2, 1979, those temporary regulations were amended to provide examples illustrative of the rules contained in thjose temporary regulations (44 FR 57390). Both of those temporary regulations were issued simultaneously as notices of proposed rulemaking. This document, therefore, also serves to amend both notices of proposed rulemaking. These regulations are proposed to be issued under the authority contained in sections 367(b) (90 Stat. 1634; 26 U.S.C. 367(b)) and 7805 (68A Stat. 917; 26 U.S.C. 7805) of the Internal Revenue Code of 1954.

Description of Proposed Regulations

For a description of the subject matter of these proposed regulations relating to the treatment of certain exchanges by a United States person described in section 367, see the description and text of the temporary regulations incorporated in this notice as §§ 7.367(b)-4(b) and 7.367(b)-13 (Example (14)) FR Doc. 82-35038, [T.D.7863] published in the Rules and Regulations portion of this issue of the Federal Register.

Comments and Requests for a Public Hearing

Before adopting as final regulations the proposed regulations referred to in this document, consideration will be given to any written comments that are submitted (preferably seven copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register.

Certification of Nonapplicability of Regulatory Flexibility Act of 1980 and Executive Order 12291

This regulation will not have a significant economic impact on a substantial number of small entities and is, therefore, not subject to the requirements of the Regulatory Flexibility Act of 1980 (5 U.S.C. chapter 6). This regulation will generally only affect large U.S. corporations that have significant holdings in foreign corporations. The Commissioner of Internal Revenue has determined that this proposed rule is not subject to Executive Order 12291.

Drafting Information

The principal author of these regulations is Martha E. Kadue of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of substance and style.

List of Subjects in 26 CFR 1.301-1 Through 1.385-6

Income taxes, Corporations, Corporate distributions, Corporate adjustments, Reorganizations.

Proposed Amendments to the Regulations

For the text of the proposed amendments to 26 CFR Part 1, see the temportary regulations for §§ 7.367(b)-4(b) and 7.367(b)-13 (Example (14)) appearing in the Rules and Regulations portion of this issue of Federal Register.

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

26 CFR Part 1

[LR-187-82]

Terminal Rental Adjustment Clauses in Certain Motor Vehicle Agreements; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to terminal rental adjustment clauses in certain motor vehicle agreements.

DATES: The public hearing will be held on February 10, 1983, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by January 27, 1983.

ADDRESS: The Public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Intenal Revenue Building, 1111 Constitution Avenue, NW., Washington, D.C. The outlines should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (LR-187-82), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Charles Hayden of the Legislation and Regulations Division, Office of Chief Counsel, Intenal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, 202–566–3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under sections 168(f)(8) of the Internal Revenue Code of 1954. The proposed regulations appeared in the **Federal Register** for Tuesday, November 23, 1982 (47 FR 52729).

The rules of § 601.601(a)(3) of the Statement of Procedural Rules (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and also desire to present oral comments at the hearing on the proposed regulations should submit an outline of the comments to be presented at the hearing and the time they wish to devote to each subject by January 27, 1983.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

George H. Jelly,

Acting Director, Legislation and Regulations Division.

26 CFR Parts 1, 7 and 301

Ruling Requests Relating to Certain Transfers by United States Persons to Foreign Corporations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to the requirement that a ruling be obtained in order for a foreign corporation to be treated as a corporation for purposes of determining the amount of gain to be recognized on certain transfers by United States persons to foreign corporations. Changes to the applicable tax law were made by the Tax Reform Act of 1976. The regulations would provide the public with the guidance needed to obtain a ruling and would affect United States persons transferring property to foreign corporations in exchanges, reorganizations, and certain liquidations and distributions. This notice supersedes a portion of the notice of proposed rulemaking published on December 30, 1977, but does not supersede temporary regulations published on the same date (42 FR 65152).

DATE: Written comments and requests for a public hearing must be delivered or mailed by February 25, 1983. These amendments are proposed to be effective with respect to transfers of property made after the date which is 30 days after publication of final regulations by a Treasury decision in the **Federal Register**.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T, (LR–24–81), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Martha E. Kadue of the Legislation and Regulations Division of the Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, Attention: CC:LR:T, 202–566–3238, not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) and the Temporary Income Tax Regulations under the Tax Reform Act of 1976 (26 CFR Part 7) under section 367(a)(1), and the Regulations on Procedure and Administration (26 CFR Part 301) under section 7477, both of the Internal Revenue Code of 1954. These amendments are proposed to conform the regulations to section 1042 of the Tax Reform Act of 1976 (90 Stat. 1634) and would be issued under the authority contained in sections 367(a)(1) (90 Stat. 1634; 26 U.S.C. 367(a)(1)) and 7805 (68A Stat. 917; 26 U.S.C. 7805) of the Internal Revenue Code of 1954.

A notice of proposed rulemaking and temporary regulations containing provisions relating to the amount of gain to be recognized on certain transfers of property by United States persons to foreign corporations were published in the **Federal Register** on December 30, 1977 (42 FR 65152). Many interested parties have commented on that proposal. These comments have been considered and taken into account as appropriate in the preparation of the proposed regulations contained in this document. The temporary regulations published on December 30, 1977, will continue in effect until final regulations become effective.

Discussion; Statutory Provisions

Section 367(a)(1), as added by section 1042 of the Tax Reform Act of 1976, relates to transfers of property by United States persons to foreign corporations in connection with an exchange described in section 332, 351, 354, 355, 356, or 361. The foreign corporation will not be considered to be a corporation for purposes of determining the amount of gain to be recognized on such a transfer unless it is established to the satisfaction of the Secretary or his delegate that the exchange is not pursuant to a plan having the avoidance of Federal income taxes as one of its principal purposes. A determination is made pursuant to a ruling request filed not later than the close of the 183rd day after the beginning of the transfer. Transfers by a United States person of stock in a foreign corporation that is a party to the exchange or a party to the reorganization are subject to section 367(b) and the regulations issued pursuant to that section. To the extent exchanges and transfers are exempt from the section 367(a)(1) ruling requirement by regulations that may be issued under section 367(a)(2), section 367(a)(1) and these proposed regulations will not apply.

Proposed Regulations

The proposed regulations reorganize, modify, and ampify the rules contained in the notice of proposed rulemaking under section 367(a)(1) published on December 30, 1977. Rules relating solely to transfers and exchanges beginning before January 1, 1978, are not included in the proposed regulations.

Section 1.367(a)–1(a) of the proposed regulations sets forth a general description of the operation of section 367(a)(1). Paragraph (a)(2) states that exceptions to the ruling requirement of section 367(a)(1) may be provided by regulations issued under section 367(a)(2).

Paragraph (b)(1) describes the transfers made directly, indirectly, or constructively by a United States person to a foreign corporation that are subject to section 367(a)(1). Transfers of stock or securities of a foreign corporation that is a party to the exchange or a party to the reorganization are not subject to section 367(a)(1) but are subject to section 367(b). If a foreign corporation's stock is

transferred by a United States person to a foreign corporation in a transaction that qualifies as a reorganization and that foreign corporation is a party to the reorganization, the transfer is subject to section 367(b). This result occurs even though the transaction also qualifies as another type of reorganization or exchange to which such foreign corporation is not a party. See, § 7.367(b)–4(b).

Certain reorganizations involving a domestic target corporation and a domestic acquiring corporation result in indirect transfers described in section 367(a)(1) when stock of a foreign corporation is used as consideration.— These transactions are described in paragraph (b)(2). In a merger of one domestic corporation into another domestic corporation to which section 368(a)(2)(D) applies, a transfer of assets by the target corporation is a transfer subject to section 367(a)(1) if the corporation that is in control of the acquiring corporation is a foreign corporation. An indirect outbound transfer of assets also results from the acquisition of the properties of one domestic corporation by another domestic corporation in a reorganization described in section 368(a)(1)(C) when the stock of the foreign corporation in control of the acquiring corporation is received by the target corporation, whether or not that stock is distributed to shareholders of the target corporation and whether or not such shareholders are United States persons. An indirect outbound transfer of stock in a domestic corporation by a United States person results from a reorganization described in section 368(a)(1)(B) when a United States shareholder receives stock of a foreign corporation that controls the acquiring domestic corporation. A merger of two domestic corporations to which section 368(a)(2)(E) applies may involve a transfer described in section 367(a)(1) if voting stock of a foreign corporation in control of one of the domestic corporations is used in the transaction. However, the proposed regulations reserve the issue of whether the shareholders of the domestic surviving corporation who are United States persons (if any) or the surviving corporation itself is the transferor for purposes of section 367(a)(1) and is thus the party required to request a ruling. The rules of paragraph (b)(2) are based on the language and reasoning in H.R. Rep. No. 94–658, 94th Cong., 1st Sess. 243 n.38 (1975), and S. Rep. No. 94–938, 94th Cong., 2d Sess. 265 n. 32 (1976) (Committee Reports for Tax Reform Act of 1976).

Paragraph (b)(3) contains the rule for determining whether a transfer made by a domestic or foreign partnership to a foreign corporation is a transfer described in section 367(a)(1). As a partnership is not a taxable entity, a transfer of property by a partnership to a foreign corporation is treated for purposes of section 367(a)(1) as an indirect transfer of the property by the partners, with each partner indirectly transferring the portion of each asset transferred that is attributable to that partner's interest in the partnership. The indirect transferor can not be a partnership. Thus, if a partnership is a partner in the transferor partnership, the transfer is considered to be made by the partners of the first partnership who would be required to include any recognized gain from the transfer in their gross income. Sections 701 through 761 and the regulations thereunder provide guidance for determining the portion of partner's interest. Section 367(a)(1) applies only to the indirect transfers by partners who are United States persons.

Paragraph (b) (4) and (5) relate to transfers by trusts and estates. Transfers made by domestic trusts, other than grantor trusts, and by domestic estates are considered transfers by United States persons, regardless of whether the beneficiaries of the trust or estate are United States or foreign persons. Transfers by foreign trusts, other than grantor trusts, or foreign estates are considered transfers by foreign persons. A transfer by a trust of a portion or all the property of such trust which is treated as owned by a grantor or other person under sections 671 through 679 is considered to be a transfer of such portion or all of the property of the trust by that grantor or other person.

Paragraph (b)(6) treats the termination of a section 1504(d) election as a constructive transfer of property by a domestic corporation to a foreign corporation for purposes of section 367(a)(1). A corporation organized in Canada or Mexico that meets the requirements of section 1504(d) is treated as a domestic corporation for all purposes of subtitle A of the Code. Thus, upon the loss of section 1504(d) status the corporation regains its status as a foreign corporation, with the result that the constructive transfer is a transfer described in section 367(a)(1) if the facts and circumstances cause it to be characterized as part of an exchange described in section 332, 351, 354, 355, 356, or 361.

The constructive transfer resulting from a change in classification of a foreign entity due to a change in the governing documents is described in paragraph (b)(7). If the characteristics of the entity are altered due to changes in the documents governing the entity so that an entity previously considered a partnership, a trust, or an estate under the Code is treated as an association taxable as a corporation, a constructive exchange described in section 351 occurs (*i.e.*, a constructive transfer of the assets of the old entity to the new corporation in exchange for all its stock). The transferor for purposes of section 367(a)(1) is determined under the rules contained in paragraph (b) (3) through (5) of these proposed regulations.

Paragraph (c) contains rules concerning the time and manner of submitting a request for a section 367(a)(1) ruling. A request must be filed no later than the close of the 183rd day following the beginning of a transfer. Paragraph (c)(2) provides the address to which requests for section 367(a)(1) rulings must be delivered and the rules for determining when a request is delivered and filed. The request will be treated as filed only when the information and materials submitted meet the minimum standards described in paragraph (c)(3)(i). If the minimum standards relating to the relevant facts and circumstances and to the description of the plan are not satisfied, the person requesting the ruling may supply the necessary information or materials within sixty days of the notice describing such deficiency, and the later submission will relate back to the original submission date for purposes of determining the timeliness of the request. Any submissions made to satisfy the minimum standards after the sixty day period will not relate back, and the date the request will be considered as filed is determined by reference to the date of such later submission. Requests for information or materials in addition to those required to satisfy the minimum standards will not affect the date the request is considered to be filed, but the Internal Revenue Service may decline to issue a ruling until the requested data is submitted.

Paragraph (c)(4) defines the date on which a transfer begins for purposes of determining whether a ruling request was filed not later than the close of the 183rd day after the beginning of the transfer. Generally a transfer begins on the earliest date the transfer of title, possession, or the right to the use of the property pursuant to the plan takes effect. Special rules for transfers by persons who have made an election

under section 6013 (g) or (h), or for constructive transfers due to a change in entity classification are included to insure that a taxpayer has an opportunity to file a timely ruling request. The fact that a transfer is subject to a condition that the exchange will be rescinded if an unfavorable ruling is issued does not affect the date on which the beginning of the transfer is considered to occur.

Paragraph (c)(5) describes the transfers made pursuant to a single plan. This description is important in determining which transfers must be described in the ruling request. Generally, any transfer of property necessary and germane to an exchange described in sections 332, 351, 354, 355, 356, or 361 is pursuant to the plan of the exchange. The concept of the scope of a "plan" is based on § 1.368–2(g).

Paragraph (d) describes persons who must request a ruling to obtain the nonrecognition of gain provided by sections 332, 351, 354, 355, 356, or 361. Generally, any United States person who makes a transfer described in section 367(a)(1) that is not excepted from the ruling requirement pursuant to the section 367(a)(2) regulations must request a ruling to obtain the benefits of section 332, 351, 354, 355, 356, or 361.

Paragraph (d)(2) allows a corporation to request a ruling on behalf of its shareholders who are transferors of its stock pursuant to a single plan and for whom the tax consequences (such as gain realized, gain recognized, and basis in property received) can be determined in the same manner. Thus, the corporation can obtain a ruling on behalf of its shareholders who can determine their gain and basis by using the same mathematical formula. A corporation may request a ruling on behalf of a group of its shareholders to which this rule applies even if other exchanging shareholders will have different tax consequences and cannot be covered by the ruling request. A partnership may request a ruling on behalf of its partners for whom the tax consequences are determined in the same manner. Notwithstanding the foregoing, each shareholder and partner retains the option to file a separate ruling request rather than relying on a ruling obtained on his or her behalf. A ruling obtained by a corporation or partnership on behalf of its shareholders or partners will not be effective with respect to a shareholder or partner who files a separate request.

When a corporation or partnership requests a ruling on behalf of its shareholders or partners, the corporation or partnership may also file an administrative protest to an unfavorable ruling on behalf of its shareholders or partners. However, as section 7477 requires a petition for a declaratory judgment to be filed with the United States Tax Court by the transferor or transferee, the shareholders or partners must file any such petition on their own behalf.

The ruling obtained by or on behalf of a United States person has effect only if the United States person complies with the requirements of paragraph (d)(3). That paragraph describes the document or statement that must be attached by the United States person to the return for the period in which the transfer described in section 367(a)(1) began. The failure to attach this information to a return for the period in which a transfer described in section 367(a)(1) begins will cause the favorable ruling to be void and of no effect.

A failure to comply with section 367(a)(1) is described in paragraph (e)(1) to include: (1) the failure to obtain a favorable ruling, whether due to the failure to request a ruling in a timely manner or due to a ruling that the avoidance of Federal income taxes is one of the principal purposes of the plan, (2) the failure to comply with terms and conditions to which a favorable ruling is subject, or (3) the carrying out of the plan in a manner that varies materially from the description of the plan contained in the ruling request.

Paragraph (e)(2) states that the failure to comply with section 367(a)(1) with respect to a transfer described in that section will generally result in the foreign corporation not being considered a corporation for purposes of determining the amount of gain to be recognized and the basis in property transferred or received. For all other purposes, however, such as the determination of whether a loss shall be recognized and the operation of section 381, the foreign corporation will be considered to be a corporation. The amount of loss realized but not recognized on one transfer does not reduce the amount of gain recognized on another transfers, even though both transfer are pursuant to the same plan.

A material variance is defined in paragraph (e)(3) to include any variance which would influence the Commissioner in determining whether a favorable ruling should be issued. If the plan is carried out in a manner that varies materially from the description in the ruling request, the ruling has no effect for any transfers. If a particular transfer is disclosed in a ruling request but is not accorded nonrecognition treatment because the ruling request was not timely filed with respect to such transfer, the execution of such transfer nevertheless will not be considered to constitute a variance from the plan as described in the ruling request.

In the case of multiple transfers pursuant to the same plan, the general material variance rule would negate the effect of a favorable ruling if a material transfer was omitted from the request. Paragraph (e)(3)(iii) contains an exception to this general rule based on the Conference Committee Report, H.R. Rep. No. 94–1515, 94th Cong., 2d Sess. (1976), as reported in 122 Cong. Rec. 30120 (1976). If a separate favorable ruling is obtained for the omitted transfer and the request for that ruling describes the entire plan, that separate favorable ruling will apply to each transfer pursuant to the plan for which a ruling request was timely filed. A favorable ruling may be obtained with respect to transfers that begin no more than 183 days before the request is filed, even though another transfer pursuant to the same plan begins more than 183 days before the request is filed and is taxable.

Paragraph (e)(4) contains an exception to the general rule on the consequences of failure to comply with section 367(a)(1). In situations he deems appropriate, the Commissioner has discretion to treat the foreign corporation as a corporation even though the taxpayer fails to comply with section 367(a)(1). This rule is based on the Report of the Conference Committee, H.R. Rep. No. 94–1515, *supra*.

Paragraph (f) describes the administrative and judicial appeals available. An administrative protest may be filed if an unfavorable ruling is issued or if terms and conditions are imposed on a favorable ruling. Additional details may be found in § 601.201(e)(19) of the Statement of Procedural Rules and in Rev. Proc. 77–5, 1977–1 C.B. 536. The rules for appeals to the United States Tax Court are contained in section 7477 and the regulations under that section.

Paragraph (h)(1) defines a "United States person" to include those persons described in section 7701(a)(30). The provision also provides that an individual who elects to be treated as a resident of the United States under section 6013 (g) or (h) (relating to nonresident alien individuals married to residents or citizens of the United States) is a United States person for purposes of section 367(a)(1). The actual or deemed conduct of a U.S. trade or business during a taxable year does not cause a foreign corporation or nonresident alien individual to be considered a United States person for purposes of section 367. Nor does the

fact that a nonresident alien individual has been in the United States for 183 days or more during the taxable year cause that individual to be a United States person for purposes of section 367(a)(1).

Paragraph (h)(2) defines the term "favorable ruling." This definition is included solely to simplify the language for the proposed regulations and does not have any effect on administrative or judicial appeal procedures.

The proposed amendments to regulations under section 7477 are made to conform those regulations, relating to the declaratory judgment procedure in the United States Tax Court, to the proposed regulations under section 367(a)(1).

Withdrawal of Notice of Proposed Rulemaking

The portion of the notice of proposed rulemaking relating to section 367(a)(1) published in the **Federal Register** (42 FR 65152) on December 30, 1977, is hereby withdrawn. The temporary regulations published in the **Federal Register** (42 FR 65152) on December 30, 1977, continue in effect, however, until final regulations take effect.

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably seven copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the **Federal Register**.

Regulatory Flexibility Act And Executive Order 12291

Although this document is a notice of proposed rulemaking which solicits public coment, the Internal Revenue Service has concluded that the proposed regulations are interpretative and that the notice and public comments procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6). The Commissioner of Internal Revenue has determined that this proposed rule is not subject to Executive Order 12291.

Drafting Information

The principal author of these proposed regulations is Martha E. Kadue of the Legislation and Regulations Divison of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing these regulations both on matters of substance and style.

26 CFR Part 7

Income taxes, Tax Reform Act of 1976.

26 CFR Part 301

Administrative practice and procedure, Bankruptcy, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Investigations, Law enforcement, Penalties, Pensions, Statistics, Taxes, Disclosure of information, Filing requirements.

Proposed amendments to the regulations.

The proposed amendments to 26 CFR Parts 1, 7, and 301 are as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. A new § 1.367(a)–1 is added, immediately after § 1.362–2, to read as follows:

§ 1.367(a)–1 Ruling requests under section 367(a)(1) relating to certain transfers to a foreign corporation.

(a) *Introduction*—(1) *General rule.* For purposes of determining the amount of gain to be recognized on a transfer of property by a United States person to a foreign corporation in connection with an exchange described in section 332, 351, 354, 355, 356, or 361, the foreign corporation shall not be considered a corporation unless, pursuant to a request for a ruling filed not later than 183 days after the beginning of the transfer, it is established to the satisfaction of the Commissioner that the exchange is not pursuant to a plan having the avoidance of Federal income taxes as one of its principal purposes. Transfers subject to this section are described in paragraph (b) of this section. The time and manner for filing ruling requests is set forth in paragraph (c) of this section. Persons who are to request rulings are described in paragraph (d) of this section. The consequences of failure to comply with this section are described in paragraph (e) of this section. The procedure for the protest and appeal of a ruling is described in paragraph (f) of this section. Terms used in this section are defined in paragraph (g) of this section.

(2) *Section 367(a)(2) exception.* This section shall not apply to exchanges and transfers described in regulations that may be issued under section 367(a)(2) to the extent such regulations except the exchanges and transfers from the requirements of this section.

(b) *Transfers described in section 367(a)(1)*—(1) *General rule.* A transfer described in section 367(a)(1) is a transfer of property, other than stock or securities of a foreign corporation that is a party to the exchange or a party to the reorganization (as defined in section 368(b)), made directly, indirectly, or constructively by a United States person (as defined in paragraph (g)(1) of this section) to a foreign corporation in connection with an exchange described in section 332, 351, 354, 355, 356, or 361. Thus, a transfer of stock of a foreign corporation by a United States person to another foreign corporation pursuant to a reorganization described in section 368(a)(1)(B) is not a transfer described in section 367(a)(1) because the foreign corporation whose stock is transferred is a party to the reorganization, even though that foreign corporation may not be a party to other types of reorganizations or exchanges for which the transaction also qualifies. Such transfer is subject to the rules of § 7.367(b)–4(b). The following special rules apply in determining whether a transfer of property is a transfer described in section 367(a)(1).

(2) *Reorganizations*—(i) *Mergers.* A transfer in connection with a reorganization described in section 368(a)(1)(A) to which either section 368(a)(2) (D) or (E) applies may be a transfer described in section 367(a)(1) if the reorganization involves the merger of two domestic corporations and if stock of a foreign corporation which controls one of such domestic corporations is exchanged in such reorganization. The transfers in connection with such a reorganization that are described in section 367(a)(1) are as follows—

(A) *Reorganizations described in section 368(a)(1)(A) to which section 368(a)(2)(D) applies.* A domestic corporation is considered to make a transfer of property described in section 367(a)(1) if it transfers substantially all its properties to another domestic corporation in connection with a reorganization described in section 368(a)(1)(A) to which section 368(a)(2)(D) applies and if the controlling corporation (within the meaning of section 368(a)(2)(D)) is a foreign corporation. The rule of this

paragraph (b)(2)(i)(A) is illustrated by the following example.

Example. F, a foreign corporation, owns all the stock of S, a domestic corporation. In a reorganization described in section 368(a)(1)(A) to which section 368(a)(2)(D) applies, S acquires substantially all the properties of W, a domestic corporation, in a merger of W into S. The stock of F is used as consideration. The reorganization includes an indirect asset transfer described in section 367(a)(1) by W.

(B) *Reorganizations described in section 368(a)(1)(A) to which section 368(a)(2)(E) applies.* [Reserved].

(ii) *Reorganizations described in section 368(a)(1)(B).* An exchanging shareholder who is a United States person is considered to make a transfer described in section 367(a)(1) if, in connection with a reorganization described in section 368(a)(1)(B), such shareholder exchanges his stock in a domestic corporation for voting stock of a foreign corporation that is in control (as defined in section 368(c)) of the domestic acquiring corporation. The rule of this paragraph (b)(2)(ii) is illustrated by the following example.

Example. F, a foreign corporation, owns all the stock of S, a domestic corporation. In a reorganization described in section 368(a)(1)(B), S acquires all the stock of domestic corporation Y, and the shareholders of Y receive voting stock of F. The reorganization includes an indirect stock transfer described in section 367(a)(1) by those shareholders of Y who are United States persons.

(iii) *Reorganizations described in section 368(a)(1)(C).* A domestic corporation is considered to make a transfer described in section 367(a)(1) if it transfers substantially all of its properties to another domestic corporation in connection with a reorganization described in section 368(a)(1)(C) and if it receives voting stock in a foreign corporation that is in control (as defined in section 368(c)) of the acquiring corporation. The rule of this paragraph (b)(2)(iii) is illustrated by the following example.

Example. F, A foreign corporation, owns all the stock of S, a domestic corporation. In a reorganization described in section 368(a)(1)(C), S acquires substantially all the properties of Z, a domestic corporation, and Z receives voting stock of F. The reorganization includes an indirect asset transfer described in section 367(a)(1) by Z, whether Z retains the stock of F or distributes the stock to its shareholders and whether the shareholders of Z are United States persons or foreign persons.

(3) *Transfers by partnerships.* A transfer of property by a United States person indirectly to a foreign corporation results from a transfer of property by a partnership (whether foreign or domestic) to a foreign corporation in an exchange described in section 367(a)(1), to the extent that the partnership property transferred to the foreign corporation is attributable to partnership interests held by one or more United States persons. Attribution of partnership assets to interests held by United States persons shall be determined under the rules and principles of sections 701 through 761 of the Internal Revenue Code and the regulations thereunder. The rule of this paragraph (b)(3) is illustrated by the following example.

Example. P is a partnership having five equal general partners, two of whom are United States persons. P transfers property to F, a foreign corporation, in connection with an exchange described in section 351. The exchange includes an indirect transfer of property by the partners to F. The transfers of property attributable to those partners who are United States persons, that is, 40 percent of each asset transferred to F, are transfers described in section 367(a)(1).

(4) *Transfers by trusts and estates.* Except as otherwise provided in paragraph (b)(5) of this section, a transfer of property by a trust or an estate to a foreign corporation in an exchange described in section 37(a)(1) is considered a direct, indirect, or constructive transfer by a United States person only if the trust or estate is a domestic trust or a domestic estate. Except as otherwise provided in paragraph (b)(5) of this section, a transfer by a foreign trust or foreign estate (as defined in section 7701(a)(31)) is not a transfer described in section 367(a)(1). These rules apply irrespective of whether the beneficiaries of the trust or estate are United States persons or foreign persons.

(5) *Transfers by grantor trusts.* A transfer of a portion or all of the assets of a foreign or domestic trust to a foreign corporation in an exchange described in section 367(a)(1) is considered a transfer by any United States person who is treated as the owner of any such portion or all of the assets of the trust under section 671 through 679.

(6) *Termination of election under section 1504(d).* The termination of an election under section 1504(d), relating to treatment of certain contiguous country corporations as domestic corporations, shall be considered to be a transfer of property by a domestic corporation to a foreign corporation. The characterization of the transfer for purposes of section 367(a)(1) depends on the facts and circumstances. The rule of this paragraph (b)(6) is illustrated by the following examples.

Example 1. Domestic corporation Y previously made a valid election under section 1504(d) to have its wholly owned Canadian subsidiary, C, treated as a domestic corporation. On July 1, 1983, C fails to continue to qualify for the election under section 1504(d). A constructive reorganization described in section 386(a)(1)(D) occurs, and the constructive transfer of assets by "domestic" corporation C to Canadian corporation C included in that reorganization is a transfer described in section 367(a)(1).

Example 2. Domestic corporation Z previously made a valid election under section 1504(d) to have its wholly owned Canadian subsidiary, S, treated as a domestic corporation. On August 1, 1983, Z sells all the stock of S to an unrelated United States person. Because S is no longer directly or indirectly wholly owned or controlled by Z, it is no longer subject to the section 1504(d) election. No direct, indirect, or constructive transfer described in section 367(a)(1) has occurred.

(7) *Changes in classification of an entity.* If a foreign entity is classifed as an entity other that an association taxable as a corporation for United States tax purposes, and subsequently a change is made in the governing documents, ariticles, or agreements of the entity so that the entity is thereafter classified as an association taxable as a corporation, the change in classification is considered a transfer of property to a foreign corporation in connection with an exchange described in section 351. For purposes of section 367(a)(1), the transfer of property is considered as made by the persons determined under the rules set forth in paragraph (b)(3) of this section, with respect to partnerships, and paragraph (b) (4) or (5), with respect to trusts and estates, and the rules of such paragraphs apply in determining whether a transfer described in section 367(a)(1) has been made.

(8) *Contributions to capital.* For rules with respect to treating a contribution to the capital of a foreign corporation as a transfer described in section 376(a)(1), see section 367(c)(2) and the regulations thereunder.

(c) *Time and manner of filing a request for a section 367(a)(1) ruling—* (1) *In general.* A request for a ruling that a transfer of property in connection with an exchange described in section 367(a)(1) is not a transfer pursuant to a plan (as defined in paragraph (c)(5) of this section) having the avoidance of Federal income taxes as one of its principal purposes must be filed no later than the close of the 183d day after the beginning of the transfer (as defined in paragraph (c)(4) of this section). A favorable ruling (as defined in paragraph (g)(2) of this section) will not be issued with respect to a ruling

request that does not meet the requirements of this paragraph (c).

(2) *Delivery and filing.* A request for a ruling under this section shall be delivered during regular business hours to the Commissioner of Internal Revenue, Attn: CC:IND:S, 1111 Constitution Avenue, NW., Washington, D.C. 20224. If the ruling request is delivered by United States mail, the provisions of section 7502 and the regulations thereunder shall apply in determining the date of delivery. A request for a ruling under this section is considered to be filed on the date that the documents which satisfy the minimum standards described in paragraph (c)(3) of this section are delivered to the Commissioner.

(3) *Minimum standards*—(i) *Requirements.* A request for a ruling under section 367(a)(1) must—

(A) Set forth all the facts and circumstances relating to the plan in sufficient detail to apprise the Commissioner of nature of the plan and the purpose for which the request is submitted,

(B) Be accompanied by a written copy (if any) of the plan of reorganization or exchange, including a description of all property (other than U.S. currency if its transfer does not affect the type of exchange or reorganization that occurs) to be transferred,

(C) Be submitted in accordance with the procedural rules set forth in 26 CFR 601.201(e) (Statement of Procedural Rules) and in substantial compliance with any revenue procedures relating to the submission of ruling requests, and

(D) Be executed by the person filing the request or the corporation or partnership described in paragraph (d) of this section, under penalties of perjury.

(ii) *Failure to satisfy minimum standards.* A request for a ruling that does meet the minimum standards of paragraph (c)(3)(i) (C) and (D) of this section but does not meet the minimum standards of paragraph (c)(3)(i) (A) or (B) of this section will be acknowledged and the person submitting the request will be notified in writing of the minimum standards that have not been satisfied. If the information or materials necessary to satisfy the minimum standards are then delivered to the Internal Revenue Service within 60 days of the date of the letter notifying the taxpayer of the failure, that information or materials will be treated as if received with the original submission of the request for a ruling. If the information or materials necessary to satisfy the minimum standards are not delivered within the 60-day period, the ruling request will not be treated as filed on the date the original ruling was delivered. Such additional information or materials delivered after the 60-day period will instead be treated (together with the original submission) as a new request for a ruling delivered and filed on the date the additional information or materials are received, but only if the minimum standards of paragraph (c)(3)(i) of this section are satisfied by all the information and materials submitted. The date on which the additional information or materials required by this paragraph (c)(3)(ii) are considered to be delivered shall be determined by the same rules as those set forth in paragraph (c)(2) of this section, which apply to the delivery and filing of ruling requests.

(iii) *Requests for additional information.* If the minimum standards described in paragraph (c)(3)(i) of this section are satisfied but additional information or materials are required to make a determination under this section, the Internal Revenue Service will request the additional information or materials. The person requesting the ruling shall deliver the information or materials to the Internal Revenue Service within 30 days of the date of the request for such information or materials, or shall deliver within such 30-day period a written statement explaining why the information or materials are unavailable. The request for additional information or materials will not alter the date the ruling request is considered as filed. However, unless the taxpayer establishes reasonable cause for not timely providing the information or materials, the Commissioner may decline to make a determination until the requested information or materials are provided or may issue an unfavorable ruling. In determining whether reasonable cause exists for failure to provide the additional information or materials, the significance of such information or materials to the determination of the Commissioner as to whether a favorable ruling should be issued shall be taken into account. The date on which the additional information or materials or statement required by this paragraph (c)(3)(iii) are considered to be delivered shall be determined pursuant to the same rules as those set forth in paragraph (c)(2) of this section, which apply to the delivery and filing of ruling requests.

(4) *Beginning of a transfer*—(i) *In general.* A transfer described in section 367(a)(1) will be considered to begin on the earliest date on which title, possession of, or right to the use of stock, securities, or other property passes pursuant to the plan for purposes of subtitle A of the Internal Revenue Code. A transfer will not be considered to begin with a decision of a board of directors or similar action unless the transaction otherwise takes effect for tax purposes on that date.

(ii) *U.S. resident under section 6013 (g) or (h).* A transfer made by an alien individual who is considered to be a United States resident by reason of a timely election made under section 6013 (g) or (h) will be considered to begin—

(A) On the date such election under section 6013 (g) or (h) is made, if such date is later than the date the transfer otherwise would be considered to begin under this section, or

(B) On the date the transfer otherwise would be considered to begin under this section, if such date is later than the date the election under section 6013 (g) or (h) is made.

The rule of this paragraph (c)(4)(ii) is illustrated by the following example.

Example. D is a nonresident alien individual who is married to a United States citizen. On March 1, 1983, D transfers property to a foreign corporation in an exchange described in section 351. On April 15, 1984, D and the spouse timely file an election under section 6013(g) with their tax return for the taxable year ended December 31, 1983, for D to be treated as a United States resident. The election is effective on January 1, 1983. The transfer described in section 367(a)(1) made by D in connection with the section 351 exchange is considered to begin on April 15, 1984, the date on which the timely election was made under section 6013(g).

(iii) *Termination of section 1504(d) election.* A transfer deemed to occur as a result of the termination of an election under section 1504(d) will be considered to begin on the date the contiguous country corporation first fails to continue to qualify for the election under section 1504(d). The rule of this paragraph (c)(4)(iii) is illustrated by the following example.

Example. Domestic corporation W previously made a valid election under section 1504(d) to have its Mexican subsidiary, S, treated as a domestic corporation. On August 1, 1984, W disposes of its right, title, and interest in 10 percent of the stock of S by selling such stock to an unrelated United States person who is not a director of S. S first fails to continue to qualify for the election under section 1504(d) on August 1, 1984, since on such date it ceases to be directly or indirectly wholly owned or controlled by W. The constructive transfer of assets from "domestic" corporation S to Mexican corporation S is considered to begin on that date.

(iv) *Change in classification.* A transfer deemed to occur as a result of a change in classification of an entity

caused by a change in the governing documents, articles, or agreements of the entity (as described in paragraph (b)(7) of this section) will be considered to begin on the date such changes take effect for purposes of subtitle A of the Internal Revenue Code.

(v) *Conditional transfers.* A transfer will be considered to begin on the date otherwise determined under paragraph (c)(4) (f) through (iv) of this section even though it is made subject to a condition that if there is a failure to obtain a favorable ruling from the Commissioner, the transaction will not be consummated and to the extent possible the assets transferred will be returned. For purposes of the preceding sentence, a ruling that an exchange is not pursuant to a plan having the avoidance of Federal income taxes as one of its principal purposes may be treated as an unfavorable ruling if it imposes conditions in addition to any already agreed to in the ruling request. The rule of this paragraph (c)(4)(v) relates only to determining the date on which a transfer is considered to begin for purposes of section 367(a)(1) and does not have any substantive effect on the tax consequences arising from the rescission of or failure to consummate a transaction.

(5) *Transfers pursuant to a plan.* For purposes of this section, transfers pursuant to a plan are direct, indirect, and constructive transfers of property in connection with an exchange described in section 332, 351, 354, 355, 356, or 361. A transfer may be pursuant to a plan even though it is not described in any document relating to the plan, and a transfer described in a document relating to a plan is not necessarily made pursuant to the plan. The rule of this paragraph (c)(5) is illustrated by the following example.

Example. X, a domestic corporation, exchanges stock of Y corporation for voting stock of F, a foreign corporation, in a reorganization described in section 368(a)(1)(B). The documents describing the exchange also describe a lease of Blackacre by X to F for a five-year term at a fair market rental value. The exchange of Y stock for F voting stock is pursuant to the plan of reorganization. The transfer of the leasehold interest in Blackacre to F is not pursuant to the plan of reorganization.

(d) *Persons who must request rulings*—(1) *In general.* Any United States person who makes a direct, indirect, or constructive transfer of property to which this section applies must request a ruling as provided in paragraph (c) of this section, receive a favorable ruling, and comply with paragraph (d)(3) of this section for the foreign corporation to be considered to be a corporation, within the meaning of sections 332, 351, 354, 355, 356, or 361, for purposes of determining the amount of gain to be recognized by the United States person.

(2) *Special rules for shareholders and partners*—(i) *Shareholders.* A corporation may request a ruling on behalf of its shareholders who are transferors of its stock with respect to a single plan and for whom the tax consequences of the transfers will be determined in the same manner. Each such shareholder who satisfies the requirements of paragraph (d)(3) of this section will be considered to be a person who requested the ruling, except that any shareholder who requested a separate ruling cannot be so considered. The rule of this subdivision (i) is illustrated by the following example.

Example. All the shareholders of domestic corporation X transfer their stock of X to foreign corporation F solely in exchange for voting stock of F in a reorganization described in section 368(a)(1)(B). X may request a ruling with respect to the plan on behalf of all of its shareholders who are United States persons, since the grain or loss realized by each such shareholder onthe exchange of stock and basis in the stock of F received is determined in the same manner, even though each such shareholder may have a different basis and holding period with respect to stock of X. Each such shareholder who satisfies the requirements of paragraph (d)(3) of this section will be treated as a person who requested the ruling. Each such shareholder also has the opportunity to request a separate ruling that will have effect only for that shareholder; but if a separate request is made, the shareholder cannot be treated as requesting the ruling obtained by the corporation on behalf of its shareholders. If neither a shareholder nor the corporation on behalf of the shareholder timely requests a ruling and receives a favorable ruling, the shareholder will not be entitled to nonrecognition of gain under section 354.

(ii) *Partners.* A partnership may request a ruling on behalf of its partners who are considered transferors either of property of the partnership or of interests in the partnership pursuant to a single plan and for whom the tax consequences of the transfers will be determined in the same manner. Each such partner who satisfies the requirements of paragraph (d)(3) of this section will be considered to be a person who requested the ruling, except that any partner who requested a separate ruling cannot be so considered.

(3) *Attachments to tax return.* Any taxpayer to whom this section applies shall file with its income tax return for any period during which one or more transfers subject to section 367(a)(1) and this section begins either—

(i) A copy of any ruling relating to the transfer that is received by or on behalf of the taxpayer prior to filing the return,

(ii) If a ruling has been requested but has not been received prior to filing the return, a written summary of any ruling request relating to the transfer that has been filed by or on behalf of the taxpayer, indicating the date it was filed, or

(iii) If no ruling request relating to the transfer has been filed, a written statement disclosing—

(A) That the transfer is subject to section 367(a)(1),

(B) That no ruling relating to the transfer has been requested by or on behalf of the taxpayer,

(C) The date of the beginning of the transfer (as defined in paragraph (c)(4) of this section), and

(D) Whether the taxpayer intends to file a request for a ruling relating to the transfer within the time limit specified in paragraph (c)(1) of this section.

A copy of any ruling received after the return is filed or a statement that the ruling request has been withdrawn shall be forwarded by the person who requested the ruling to the district director or the service center where the return was filed within 60 days of the receipt or withdrawal, together with an identification of the return to which the ruling or statement relates. Any amended return that is required due to the ruling or the withdrawal of the ruling request must also be submitted with the ruling or statement. The failure to satisfy the requirements of this paragraph (d)(3) results in any favorable ruling being void and having no effect with respect to the transfers that began during the taxable year for which the return is filed.

(e) *Failure to comply with section 367(a)(1)*—(1) *Action or inaction constituting a failure to comply.* A taxpayer fails to comply with section 367(a)(1) and this section if, with respect to a transfer described in section 367(a)(1) to which this section applies, either—

(i) The taxpayer fails to obtain a favorable ruling (as defined in paragraph (g)(3) of this section) with respect to the transfer,

(ii) The taxpayer fails to comply with all of the terms and conditions imposed as part of a favorable ruling, or

(iii) The plan is carried out in a manner that constitutes a material

variance (as defined in paragraph (e)(3) of this section) from the plan as described in the ruling request.

(2) *Consequences of failure to comply.* Except as provided in paragraph (e)(4) of this section, if a taxpayer fails to comply with section 367(a)(1) and this section with respect to a transfer described in section 367(a)(1) a foreign corporation shall not be considered to be a corporation for purposes of determining the amount of gain to be recognized on the transfer and of determining the basis of property transferred or received. For all other purposes, including the determination of whether a loss shall be recognized and whether corporate attributes shall be carried over pursuant to section 381, the foreign corporation shall be considered to be a corporation. Any loss realized but not recognized on a transfer described in section 367(a)(1) does not reduce the amount of gain realized or recognized on any other transfer described in section 367(a)(1), regardless of whether both transfers are made pursuant to the same plan.

(3) *Material variance*—(i) *In general.* A material variance is a variance to which the Commissioner would reasonably attach importance in determining whether the transfer was pursuant to a plan having the avoidance of Federal income taxes as one of its principal purposes. A variance is material if, had it been known by the Commissioner, it would have had an influence or bearing on his determination. The variance need not directly control the determination contained in the ruling to be material. Examples of a variance that is not material may include a relatively insignificant overstatement or understatement of the value of assets transferred if such overstatement or understatement does not affect the type of exchange or reorganization that occurs.

(ii) *Taxable transfers disclosed in a ruling request.* If a transfer is disclosed in a ruling request that is filed more than 183 days after the transfer began, such transfer (although taxable) will not constitute a variance from the plan as described in the ruling request. A favorable ruling may be issued with respect to other transfers pursuant to the same plan which begin no more than 183 days before the ruling request is filed.

(iii) *Transfers covered by separate or amended ruling request.* If a material variance would result from the execution of a particular transfer pursuant to a plan, which transfer is not described in a ruling request that is filed timely with respect to other transfers pursuant to the same plan, a favorable ruling may nevertheless be obtained with respect to all transfers pursuant to the plan—

(A) If a separate ruling request is timely filed with respect to the omitted transfer and if all other transfers described in the initial ruling request are also described in such separate ruling request, or

(B) If the initial ruling request is still pending, an amendment to the initial ruling request describing the omitted transfer is filed timely with respect to such transfer.

The rules of this subdivision (iii) apply only if the omitted transfer is described in accordance with the minimum standards set forth in paragraph (c)(3) of this section.

(iv) *Cash transfers.* No ruling under section 367(a)(1) is required with respect to the transfer of solely U.S. currency to a foreign corporation. The undisclosed transfer of U.S. currency to a foreign corporation in connection with an exchange described in section 367(a)(1) generally will not constitute a material variance from the plan as described in the ruling request. However, if the transfer of U.S. currency affects the type of exchange or reorganization that occurs, the undisclosed transfer of U.S. currency will result in a material variance.

(4) *Exception.* The failure to comply with section 367(a)(1) and this section may not be used by the taxpayer to its advantage. In those situations the Commissioner deems appropriate, a foreign corporation will be treated as a corporation even if the taxpayer fails to comply with section 367(a)(1).

(f) *Protests and appeals*—(1) *Administrative remedies.* A person requesting a ruling under this section (including a corporation or partnership that requests a ruling on behalf of its shareholders or partners under paragraph (d) of this section) may file an administrative protest of a ruling not later than the 45th day after the date of the ruling letter. The protest must include a copy of the ruling letter, the reason for the protest (including the grounds of the protest and arguments in support thereof), a statement as to whether a conference is requested, and the names of the persons expected to attend the conference if one is requested. A protest that meets the requirements of this paragraph (f)(1) is considered to be filed upon delivery to the Commissioner pursuant to the rules of paragraph (c)(2) of this section, which apply to the delivery and filing of ruling requests.

(2) *Judicial appeals.* Provisions for petitioning the United States Tax Court with respect to a transfer subject to section 367(a)(1) and this section are set forth in section 7477 and the regulations thereunder. Such a proceeding is the exclusive means for obtaining judicial review of the determination of the Commissioner.

(g) *Definitions.* The following definitions apply for purposes of this section.

(1) *United States person.* The term "United States person" includes those persons described in section 7701(a)(30). Such term includes a citizen or resident of the United States, a domestic partnership, a domestic corporation, and any estate or trust other than an estate or trust described in section 7701(a)(31) as a foreign estate or foreign trust. For purposes of this section, an individual with respect to whom an election has been made under section 6013 (g) or (h) is considered to be a resident of the United States while such election is in effect. A nonresident alien or a foreign corporation will not be considered a United States person merely because of its actual or demed conduct of a trade or business within the United States during a taxable year. Nor will a nonresident alien individual be considered to be a United States person solely on the basis that such individual has been present in the United States for 183 days or more during the taxable year.

(2) *Favorable ruling.* A favorable ruling is a ruling that a transfer described in section 367(a)(1) is not in connection with an exchange pursuant to a plan having the avoidance of Federal income taxes as one of its principal purposes, including such a ruling that is subject to terms and conditions.

PART 7—TEMPORARY INCOME TAX REGULATIONS UNDER THE TAX REFORM ACT OF 1976

§§ 7.367(a)-1 and 7.367-2 [Removed]

Par. 2. Sections 7.367(a)-1 and 7.367-2 are removed.

PART 301—PROCEDURE AND ADMINISTRATION

Par. 3. Section 301.7477-1 is amended by revising paragraph (a)(3) and the last sentence of paragraph (b)(2) to read as follows:

§ 301.7477-1 Declaratory judgments relating to transfers of property from the United States.

(a) *Petition*— * * *

(3) *Beginning of exchange.* An exchange generally shall be considered to begin upon the beginning of the first transfer of property pursuant to the plan

under which the exchange is to be made. For rules determining the beginning of a transfer, see § 1.367(a)–(c)(4).

* * * * *

(b) *Judgment*— * * *

(2) *Exhaustion of administrative remedies.* * * * In no event shall the Internal Revenue Service be deemed to have had a reasonable time to act if a failure to act has occurred because the petitioner did not proceed with due diligence or because the petitioner has not provided all available information or materials reasonably requested by the Internal Revenue Service.

BILLING CODE 4830–01–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 902

Submission of the Alaska Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Reopening of public comment period.

SUMMARY: OSM is reopening the period for review and comment on portions of the submission by Alaska of its program for the regulation of surface coal mining and reclamation in the State. OSM is reopening the comment period to allow the public sufficient time to consider and comment on additional materials submitted by Alaska subsequent to the close of the initial public comment period. Comments on program portions not affected by the additional documents will not be considered.

DATE: Written comments, data or other relevant information must be received on or before 4:00 p.m. January 26, 1983 to be considered.

ADDRESSES: Comments on the supplemental material to the program submission should be sent or hand-delivered to: Office of Surface Mining, Administrative Record Office, Room 5315, 1100 L Street, NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Arthur W. Abbs, Chief, Division of State Program Assistance, Office of Surface Mining, Interior South Building, Room 210, 1951 Constitution Avenue, NW., Washington, D.C. 20240. Phone: (202) 343–5351.

SUPPLEMENTARY INFORMATION: On August 3, 1982, at 47 FR 33520–33522, the Office of Surface Mining published a notice of the public hearing and the public comment period on the Alaska program submission. The public hearing was held September 24, 1982, and the public comment period ended September 30, 1982. On September 9 and 23, 1982, OSM personnel and Alaska State regulatory officials met in executive session. Subsequent to those meetings, Alaska submitted certain material to OSM, dated December 13, 1982, including the State's final surface mining regulations, a Supplemental Narrative and an Attorney General's Opinion. Certain portions of the submission were also discussed in a telephone conversation between OSM and State personnel on October 27, 1982.

OSM is reopening the public comment period to allow the public sufficient time to review and comment on the summaries of the above two meetings and telephone conversation, and the new material submitted by Alaska.

This announcement is made in keeping with OSM's commitment to public participation as a vital component in fulfilling the purposes of the Surface Mining Control and Reclamation Act of 1977.

Dated: December 20, 1982.

J. Steven Griles,

Acting Director, Office of Surface Mining.

[FR Doc. 82–35031 Filed 12–23–82; 8:45 am]

BILLING CODE 4310–05–M

30 CFR Part 914

Permanent State Regulatory Program of Indiana

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing procedures for the public comment period and for a public hearing on the substantive adequacy of a program amendment submitted by Indiana to satisfy certain conditions imposed by the Secretary of the Interior on the approval of the Indiana State Program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

The amendment consists of a set of modifications to Indiana's surface and underground coal mining regulations and is intended to satisfy the specific conditions found at 30 CFR 914.11(a), (b)(1), (b)(3) in part, (b)(4)–(6), (c), (d), (e), (f), (g)(2), and (i). The amendment also consists of other changes to seven Indiana rules which are not related to the conditions of approval.

OSM is also proposing that the deadline for meeting condition 914.11(b)(3) in part be extended to July 1, 1983, for reasons set forth later in this document.

This document sets forth the times and locations that the Indiana program and proposed amendment are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment (IN–291) and information pertinent to the public hearing.

DATE: Written comments relating to Indiana's proposed modification of its program not received on or before 4:00 p.m. on January 26, 1983, will not necessarily be considered in the Secretary's decision on whether the proposed program amendment satisfies the above conditions.

If requested, a public hearing will be held on January 17, 1983, beginning at 10:00 a.m. at the location shown below under "**ADDRESSES**".

ADDRESSES: Written comments should be mailed or hand-delivered to: Mr. Richard D. McNabb, Director, Indiana Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204, Telephone: (317) 269–2600.

If a public hearing is held, its location will be at: OSM Indiana Field Office, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204.

FOR FURTHER INFORMATION CONTACT: Mr. Richard D. McNabb, Director, Indiana Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204, Telephone: (317) 269–2600.

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

Availability of Copies

Copies of the Indiana program, a listing of any scheduled public meeting and all written comments received in response to this notice will be available for review at the OSM offices and the Office of the State Regulatory Authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays:

Office of Surface Mining Reclamation and Enforcement, Room 5315, 1100 L Street NW., Washington, D.C. 20240

Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204

Indiana Department of Natural Resources, 608 State Office Building, Indianapolis, Indiana 46204.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or at locations other than Indianapolis, Indiana, will not necessarily be considered and included in the Administrative Record for the final rulemaking.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under "FOR FURTHER INFORMATION CONTACT" by the close of business three working days before the date of the hearing. If no one requests to comment at the public hearing, the hearing will not be held.

If only one person requests to comment, a public meeting, rather than a public hearing, may be held and the results of the meeting included in the Administrative Record.

Filing of a written statement at the time of the hearing is requested and will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment, have been heard.

Public Meeting

Persons wishing to meet with OSM representatives to discuss the proposed amendment may request a meeting at the OSM office listed in "ADDRESSES" by contacting the person listed under "FOR FURTHER INFORMATION CONTACT."

All such meetings are open to the public and, if possible, notices of meetings will be posted in advance in the Administrative Record. A written summary of each public meeting will be made a part of the Administrative Record.

II. Background on Conditional Approval

Under 30 CFR 737.13(j), the Secretary may conditionally approve a state permanent regulatory program which contains minor deficiencies where the deficiencies are of such a size and nature as to render no part of the program incomplete, the State is actively proceeding with the steps to correct the deficiencies, and the State agrees to correct the deficiencies according to a schedule set in the notice of conditional approval.

III. Background on the Indiana State Program

Information regarding the general background on the Indiana State Program, including the Secretary's Findings, the disposition of comments and a detailed explanation of the conditions of approval of the Indiana program can be found in the July 26, 1982, **Federal Register** (47 FR 32071–32108).

The nine minor conditions of approval agreed to by the Secretary and the State of Indiana are set forth below:

Condition (a) requires Indiana to submit copies of promulgated rules or otherwise amend its program to:

(1) Require productivity levels for post-mining land use as required by 30 CFR 817.111(b);

(2) Require the design criteria for diversions as required by 30 CFR 816.43 and 817.43;

(3) Provide criteria for steep slope mining and variance from approximate original contour in a manner no less effective than the requirements of 30 CFR 826.15 and assure that no general variance for approximate original contour will be allowed.

(4) Delete the provisions for hilltop removal found in 310 IAC 12–5–149; and assure that no permits for hilltop removal are granted; and

(5) Require the protection of fish and wildlife in a manner no less effective than that required by 30 CFR 816.97(a), (c) and (d) and 817.97 (a), (c) and (d).

Condition (b) requires Indiana to submit copies of promulgated rules or otherwise amend its program to:

(1) Require a plan for control and treatment of surface and ground water drainage and impose ground water limits on pollutants in the discharges as required by 30 CFR 780.21(b);

(2) Require that each permit application require the applicant to certify that all reclamation fees due under 30 CFR 870.12 have been paid;

(3) Require that each permit application contain a list of all other licenses and permits needed by the applicant to conduct the proposed surface or underground mining activities including all the information required by 30 CFR 778.19 and 782.19;

(4) Require the narrative analysis of "the known history of any previous uses before mining," as required by 30 CFR 779.22 and 30 CFR 783.22;

(5) Require information concerning utility and capacity of reclaimed land for all lands, and not just those where an alternative land use is proposed as required by 30 CFR 780.23;

(6) Provide criteria for permit requirements for steep slope mining and variance from approximate original contour in a manner no less effective than 30 CFR 785.16.

Condition (c) requires Indiana to submit copies of promulgated rules or otherwise amend its program to:

(1) Require that the notice of intent to explore, when less than 250 tons of coal will be removed, include a description of the practices proposed to be followed to protect the environment as required by 30 CFR 776.11(b)(6);

(2) Require that core drilling and drilling of boreholes during coal exploration activities be conducted in accordance with Section 512(a)(2) or SMCRA and in manner no less effective than 30 CFR 815.15(j).

Condition (d) requires Indiana to submit copies of promulgated rules or otherwise amend its program to:

(1) Require that the criteria for the determination that a pattern of violations exists or has existed meet the requirements of 30 CFR 843.13 and require that lack of diligence be considered with regard to unwarranted failure to comply;

(2) Require that the conference officer have the authority to increase a penalty as required by 30 CFR 845.16(b)(3);

Condition (e) requires Indiana to submit copies of promulgated rules or otherwise amend its program to:

(1) Require the replacement of a bond for long term operations 120-days prior to the expiration of the existing permit as required by 30 CFR 801.13(b);

(2) Change the phrase "suspension of revocation" to "suspension or revocation" in Indiana rule 310 IAC 12–4–10(e)(1) to correct the typographical error and make the Indiana rule no less effective than 30 CFR 806.12(e)(6)(i);

(3) Require that the advertisement published by the bond release applicant contain notice of the public right of participation as required by 30 CFR 807.11(b)(7).

Condition (f) requires Indiana to submit copies of promulgated rules or otherwise amend its program to:

(1) Require that no extension of an abatement period will be allowed unless it meets the criteria of 30 CFR 843.12(f).

(2) Require the issuance of a cessation order where the operation fails to meet an interim step in abatement as required by 30 CFR 843.12(d).

Condition (g) requires Indiana to submit:

(1) Copies of a statutory amendment or to otherwise amend its program to require that a petitioner would only have to present evidence which would "tend to establish allegations of fact," to be in accordance with Section 522(c) of SMCRA and no less effective than 30 CFR 764.13(b)(2).

(2) Copies of promulgated rules or otherwise amend its program to require that the Director, IDNR, must use the information in the data base and inventory system in reaching decisions to designate lands unsuitable as required by 30 CFR 764.19, and to provide for the right for any person to intervene up to within three days prior to the hearing as required by 30 CFR 764.16(c).

Condition (h) requires Indiana to submit statutory amendments or otherwise amend its program to:

(1) Provide for the award of attorney and expert witness fees in surface mining related common law damage actions as required by Section 510(f) of SMCRA.

(2) Provide for administrative review of a permit on any final decision of the regulatory authority in accordance with the provisions of Section 514(c) of SMCRA and in a manner no less effective than the requirements of 30 CFR Part 787.

Condition (i) requires Indiana to submit copies of promulgated rules or otherwise amend its program to provide for justification of positions exempted from conflict of interest requirements and makes its provision no less effective than 30 CFR 705.11(d).

In accepting the Secretary's conditional approval, Indiana agreed to satisfy conditions (a), (b)(1), (b)(3)–(6), (c), (d), (e), (f), (g)(2), and (i) by December 31, 1982.

Condition (b)(2l) was to have been met by September 1, 1982. On September 1, 1982, Indiana submitted its amended permit application forms to meet condition (b)(2). See IN–*0290*. The Secretary's decision on the amendment to meet that condition is being published separately.

Conditions (g)(1) and (h) require legislative action and are scheduled to be met by September 30, 1983.

IV. Discussion of the Proposed Amendment and Proposed Deadline Extention for One Condition

On December 9, 1982, OSM received a set of regulation amendments from the Indian Department of Natural Resources intended to meet conditions (a), (b)(1), (b)(3) in part, (b)(4–(6), (c), (d), (e), (f), (g)(2), and (i). See IN–*291*.

In the State's transmittal letter, the Director of the Department of Natural Resources stated that due to an error, the revisions to Indiana rule 310 IAC 12–3–63 was omitted. That change was necessary to comply with that part of condition 30 CFR 914–11(b)(3) requiring each underground permit application to contain a list of all other licenses and permits needed by the applicant to conduct the proposed underground mining activities as required by 30 CFR 782.19.

The Director of the Department of Natural Resources also indicated that the required state procedure to make that change was initiated on November 19, 1982, with an anticipated promulgation date as early as May 30, 1983.

In response to the information expressed by the Director of the Department of Natural Resources, OSM is hereby proposing to extend the deadline to July 1, 1983, for Indiana to meet that part of condition (b)(3) concerning 30 CFR 782.19.

Additionally, the proposed modification contains changes to seven other State rules that are not related to the conditions of approval. These rules are: 310 IAC 12–3–1, 12–3–21, 12–3–59, 12–3–81, 12–3–102, 12–5–24, and 12–5–90

Thus, the Secretary request comments on the substantive adequacy of the proposed amendment (IN–0291) to satisfy the conditions listed above, on the proposed deadline extension for part of condition (b)(3) and on the substantive adequacy of the proposed changes to the other seven Indiana rules.

Procedural Matters

Paperwork Reduction Act.

There are no information collection requirements in 30 CFR 914.11 requiring approval by the Office of Management and Budget under 44 U.S.C. 3507.

National Environmental Policy Act.

The Secretary has determined that pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no Environmental Impact Statement need be prepared on this rulemaking.

Executive Order 12291

On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval of conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, Pub L. 96–354, I have certified that this proposed rule will not have a significant economic impact on a substantial number of small entities.

30 CFR Part 946

Public Disclosure of Comments Received From Federal Agencies on the Virginia Proposed Program Amendments

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Disclosure of comments on the Virginia proposed program amendments from Federal agencies.

SUMMARY: Before the Director, OSM, may approve State regulatory program amendments submitted under Section 503(a) of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), the views of certain Federal agencies must be solicited and disclosed. The Director has solicited comments from these agencies, and is today announcing their public disclosure.

ADDRESSES: Copies of the comments received are available for public review during business hours at:

Office of Surface Mining Reclamation and Enforcement, Room 5315, 1100 "L" Street, NW., Washington, D.C.

Office of Surface Mining Reclamation and Enforcement, Highway 23, South, Big Stone Gap, Virginia 24219

Office of Surface Mining Reclamation and Enforcement, Flannagan and Carroll Streets, Lebanon, Virginia 24266

Virginia Division of Mined Land Reclamation, 630 Powell Avenue, Big Stone Gap, Virginia 24219

FOR FURTHER INFORMATION CONTACT: Mr. Arthur Abbs, Chief, Division of State Program Assistance, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, South Building, 1951 Constitution Avenue, NW., Washington, D.C. 20240, Telephone: (202) 343–5351.

SUPPLEMENTARY INFORMATION: The Director is evaluating the proposed amendments submitted by Virginia for his review on September 30, 1982 (Administrative Record No. VA 431). See the November 1, 1982 **Federal Register** (47 FR 49412). In accordance with Section 503(b)(1) of SMCRA and 30 CFR 732.17(h)(10)(i), these amendments to Virginia's program may not be approved until the Director has solicited and publicly disclosed the views of the Administrator of the Environmental Protection Agency, the Secretary of Agriculture, and the heads of other Federal agencies concerned with or having special expertise relevant to the program amendment as proposed. In this regard, the following Federal agencies were invited to comment on the Virginia program amendments:

Department of Agriculture:

Soil Conservation Service
Forest Service

Advisory Council on Historic Preservation

Department of Labor:

Mine Safety and Health Administration

Environmental Protection Agency

Department of the Interior:

Bureau of Land Management
Bureau of Mines
Fish and Wildlife Service
National Park Service
Geological Survey

U.S. Army Corps of Engineers of those agencies invited to comment, OSM received comments from the following offices:

Department of the Interior:

Minerals Management Services
Fish and Wildlife Service

Department of Labor:

Mine Safety and Health Administration

U.S. Army Corps of Engineers

Environmental Protection Agency

These comments are available for review and copying during business hours at the locations listed above under "Addresses".

Dated: December 17, 1982.

William B. Schmidt,

Assistant Director, Program Operations and Inspection, Office of Surface Mining.

BILLING CODE 4310-05-M

POSTAL RATE COMMISSION

39 CFR Part 3001

[Docket No. RM83-3]

Rules of Practice; Release of In Camera Orders

December 21, 1982.

AGENCY: Postal Rate Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Postal Rate Commission, pursuant to 39 U.S.C. 3603, proposes a change in its rules of practice. The Commission proposes to change rule 31a(c) so that notice will be provided in cases of release of in camera information to government agencies. It also provides that such notice be waived in extraordinary circumstances and for good cause.

DATE: Comments responsive to this Notice should be filed on or before January 31, 1983.

ADDRESSES: Comments and other correspondence relating to this Notice should be sent to David F. Harris, Secretary of the Commission, 2000 L Street, NW., Washington, D.C. 20268 (telephone: 202/254–3880).

FOR FURTHER INFORMATION CONTACT: Stephen L. Sharfman, Assistant General Counsel, 2000 L Street, NW., Washington, D.C. 20268 (telephone: 202/254–3836).

SUPPLEMENTARY INFORMATION: This rulemaking is an outgrowth of a rule change establishing rule 42a regarding FOIA requests, Docket No. RM83–1. In that rule, we stated that documents generated pursuant to proceedings under our rules of practice were protected by rule 31a. The Postal Service submitted its comments and suggested that the Commission delete the last line of rule 31a(c) which allows the release of in camera information to government agencies. The Service stated: "Government agencies should not be in a more favorable position than other intervenors." Postal Service Comments at 2.

In Docket No. RM83–1, the Commission did not pass on the Service's request but noted it was a proposal that would be considered at a later date. This rulemaking is in response to that request.

Rather than delete the last line of rule 31a(c), as the Service suggests, the following proposed rule is designed to provide additional protections when release to a government agency is in question. First, it provides that "reasonable notice of the impending disclosure" be provided to the affected party. In present rule 31a(c), information may be released to a government agency without notice. The rule does, however, contain a caveat. It provides that this notice may be waived "in extraordinary circumstances for good cause." Thus, the proposed rule contains sufficient flexibility for the Commission to release information immediately to a government agency where appropriate.

We also note that the proposed rule 31a(c) allows release of information when requested by another government agency, rather than on the Commission's motion alone.

List of Subjects in 39 CFR Part 3001

Administrative practice and procedure.

PART 3001—RULES OF PRACTICE AND PROCEDURE

Accordingly, under the authority of 39 U.S.C. 3603, and for the reasons set out above, we propose to amend Title 39 of the Code of Federal Regulations, Part 3001, by revising § 300.131a(c) to read as follows:

§ 3001.31a In camera orders

* * * * *

(c) Release of *in camera* information. *In camera* documents and testimony shall constitute a part of the confidential records of the Commission and shall be subject to the provisions of § 3001.42 of this chapter. However, the Commission, on its own motion or pursuant to a request, may make *in camera* documents and testimony available for inspection, copying, or use by any other governmental agency. The Commission shall, in such circumstances, give reasonable notice of the impending disclosure to the affected party. However, such notice may be waived in estraordinary circumstances for good cause.

* * * * *

By the Commission.

David F. Harris,

Secretary.

Office of the Secretary

41 CFR Parts 3-16 and 3-50

Procurement Forms and Administrative Matters

AGENCY: Office of the Secretary, HHS.

ACTION: Proposed rule.

SUMMARY: The Office of the Secretary, Department of Health and Human Services, is proposing to amend 41 CFR Part 3-50, Administrative Matters, by adding a new subpart, 3-50.8, Determination of Adequacy of Contractors' Accounting and Billing Systems and Preparation of Invoices.

This new subpart will establish uniform Departmental billing and financial reporting requirements for inclusion in cost-reimbursement type contracts. The objective of the new subpart are: (a) Streamlining the reporting of financial data; (b) establishing the requirements for determination of the adequacy of a contractor's accounting and billing system; and (c) establishing guidelines for the preparation of invoices for cost-reimbursement type contracts.

Part 3-16, Procurement Forms, will be amended by the addition of three subsections to Subpart 3-16.9, Illustration of Forms. These subsections illustrate the financial reporting form and contain instructions for filling out the form and preparing invoices under cost reimbursement type contracts.

When issued as a final rule, this regulation will supersede Procurement Circular HEW-78.1, Billing Instructions and Financial Reporting Requirements dated April 12, 1978, except for § 3-50.803(b).

Paragraph 3-50.803(b) has been superseded by Procurement Circular HHS 82.04, Prompt Payment, dated October 1, 1982.

DATE: Comments must be received by February 10, 1983. Any person or organization wishing to submit data, views, or comments pertaining to the proposed amendment may do so by filing them, at the address listed in "For Further Information Contact".

FOR FURTHER INFORMATION CONTACT: Charles M. Lord, Division of Procurement Policy, OPAP-OPAL-OS, Room 539H, Hubert H. Humphrey Building, Department of Health and Human Services, Washington, D.C. 20201 (202-245-6154).

List of Subjects

41 CFR Part 3-16

Government procurement.

41 CFR Part 3-50

Government procurement.

It is therefore proposed to amend 41 CFR Chapter 3, Parts 3-16 and 3-50 in the manner set forth below.

Dated: December 7, 1982.

Henry G. Kirschenmann, Jr.,

Deputy Assistant Secretary for Procurement, Assistance and Logistics.

PART 3-50—[AMENDED]

1. Under Part 3-50, Administrative Matters, Subpart 3-50.8, Determination of Adequacy of Contractors' Accounting and Billing Systems and Preparation of Invoices, is added. In addition, the table of contents for Part 3-50 is amended to add the following:

Subpart 3-50.8—Determination of Adequacy of Contractors' Accounting and Billing Systems and Preparation of Invoices

Sec.
3.50.800 Scope of subpart.
3.50.801 Applicability.
3.50.802 Purpose.
3.50.803 Adequacy of accounting and billing systems.
3.50.804 Preparation of invoices/vouchers.
3.50.805 Financial reporting requirements.

Subpart 3-50.8—Determination of Adequacy of Contractors' Accounting and Billing Systems and Preparation of Invoices

§ 3-50.800 Scope of subpart.

This subpart establishes the requirement for a written determination concerning the adequacy of a contractor's accounting and billing systems. It also contains invoice preparation procedures and financial reporting requirements to be included in cost-reimbursement type contracts and prescribes the use of forms for these purposes.

§ 3-50.801 Applicability.

This subpart is applicable to all cost-reimbursement type contracts, including the cost-reimbursement portion of fixed-price contracts, letter contracts which provide for reimbursement of costs, time and material contracts and labor-hour contracts.

§ 3-50.802 Purpose.

The purpose of this subpart is to require a written determination of compliance with § 1-3.405-1(b)(1), to establish uniform Departmental billing procedures which satisfy contractual payment provisions and to streamline finacial reporting requirements.

§ 3-50.803 Adequacy of accounting and billing systems.

(a) Prior to the award of all cost-reimbursement type contracts, including those approved for payment under a letter of credit, the contracting officer shall determine whether the prospective contractor's accounting system is adequate for determining costs applicable to such contracts (see § 1-3.405-1(b)) and whether the prospective contractor's procedures for preparing reimbursement claims provide assurance that such claims will be prepared in accordance with the terms of the contract.

(b) The contracting officer shall base this judgment on current preaward surveys or audit reports which assess the adequacy of the prospective contractor's accounting and billing systems. When current information is not available, such data shall be requested from the office providing cost advisory services.

(c) If a prospective contractor's accounting and billing systems are judged to be adequate for the purposes stated above, the contract file shall be

documented to show the basis for the judgment.

(d) Except as provided for in paragraph (f) of this section, if a prospective contractor's accounting or billing system (or both) is determined to be inadequate, corrective action must be taken before that organization is awarded a contract. (See § 1–3.801–3(b)(3)).

(e) When dealing with high risk organizations, i.e., new organizations, those with known problems, and those with accounting system deficiencies, the contracting officer shall utilize every reasonable means available to protect the Government from the improper expenditure of Federal funds. Actions should include at least one of the following: preaward and postaward audits; direct idenfification of cost with deliverables; billing by contract phases or tasks; fidelity bonding or other guarantees by the parent company or principals of the organization; increased scrutiny of vouchers and financial reports; or frequent site visits to verify the incurrence of specific costs and the relationship of technical progress with the amount billed.

(f) When it is determined that corrective action cannot be completed until after the award, but the contracting officer determines that the award must be made, he/she shall consult with cognizant cost advisors and take the appropriate actions set forth in § 1–3.403(a) to assure that the Government's interests will be protected and the contract will be adequately costed and administered. Such awards may only be made with the written approval of the principal official responsible for procurement as defined in § 3–1.250.

§ 3–50.804 Preparation of invoices/vouchers.

(a) Pursuant to the invoice article of the contract, the contractor should prepare vouchers in accordance with Form HHS–647, Guide for Preparing Vouchers Under Cost Reimbursement Type Contracts.

(b) Contracts to be financed under the letter of credit method of payment need not contain the billing instructions which will be set forth in Form HHS–647. Interim vouchers shall not be required of such contractors since they provide financial data on Form HHS–646, Financial Report of Individual Project/Contract. However, these contracts shall require the submission of completed and final vouchers.

(c) Pursuant to Form HHS–647, the contractor may attach to the SF–1034, Public Voucher for Purchases and Services Other than Personal, Form HHS–646, or SF–1035, Continuation Sheet.

§ 3–50.805 Financial reporting requirements.

(a) The contracting officer shall require the contractor to submit reasonable and necessary data to achieve effective technical and financial contract monitoring and administration. This data shall be submitted on Form HHS–646 in accordance with the instructions in Form HHS–646A, Instructions for Completing Form HHS–646, Financial Report of Individual Project/Contract, and the requirements set forth in the clause in § 3–7.5003, HHS contract financial report. However, submission of both the SF–1035 and Form HHS–646 shall not be required.

(b) It is the policy of HHS to require contractors to furnish only that amount of financial data which is reasonably needed to assure effective monitoring and administration and to avoid excessive reporting which multiplies the administrative costs of the contractor without commensurate improvement in contract management. Therefore, prior to the release of any RFP which will contain the clause set forth in § 3–7.5003, the contracting officer and project officer shall agree on the frequency and amount of detail to be submitted by the contractor on Form HHS–646. Under no conditions will the RFP merely require the contractor to complete the form in accordance with the attached instructions. Each RFP and resultant contract shall specify the expenditure categories to be reported. The contractor shall be required to report only totals for each column unless the contract specifically identifies detailed expenditure categories to be reported within each column. Reporting of the percentage of effort should be requested, when necessary, for effective contract monitoring. The data to be reported shall be included in the RFP so that offerors may give it consideration in the development of their proposals. Necessary reporting requirements will be established by agreement between the contracting officer and the prospective contractor prior to award. This information will become part of the contract when executed.

(c) Upon receipt of Form HHS–646, the contracting officer, in consultation with the project officer, shall review the form to determine if the nature of the items reported is in consonance with the contract terms and whether the financial report reflects expenditure levels commensurate with technical progress under the contract. This may entail additional site visits to verify accuracy of technical and financial reporting. If any deficiencies are found, the contracting officer shall document whatever action is taken to correct them. The contracting officer should initial the Form HHS–646 and indicate on it the dates received and reviewed.

(d) With regard to contracts where work is to be performed by phases or tasks, Form HHS–646 should require reporting by phases or tasks.

PART 3–16—[AMENDED]

2. Under Subpart 3–16.9, Illustration of Forms of Part 3–16, Procurement Forms, §§ 3–16.950–646, –646A and –647 are added. In addition, the table of contents of Part 3–16 is amended to add the following:

Subpart 3–16.9—Illustration of Forms

HHS-646

3-16.950-646A Instructions for Completing Form HHS-646 (OMB No. 0990-0991), Financial Report of Individual Project/Contract.

General Information

Form HHS-646 is designed to: (1) Provide a management tool for use by HHS in monitoring the application of financial and manpower resources to HHS contracts, (2) provide contractors with financial and manpower management data which is usable in their management processes, (3) indicate promptly potential areas of contract underruns or overruns by making possible comparisons of actual performance and projections with prior estimates on individual elements of cost and manpower, and (4) obtain contractor's analyses of cause and effect of significant variations between actual and prior estimates of financial and manpower performance.

Reporting Requirements

(a) *Scope.* Necessary reporting requirements will be established by agreement between the contracting officer and contractor prior to contract aware. The Government will limit frequency and details of the reporting requirements to those which are necessary to accomplish the goal of contract management without being unduly burdensome on the contractor.

(b) *Number of copies and mailing address.* An original and three (3) copies of the report(s) shall be sent to the contracting officer at the address shown on the face page of the contract no later than the 30th day after the end of the period to be reported.

Reporting Statistics

A modification which extends the period of performance of an existing contract will not require reporting on a separate Form HHS-646, except where it is determined by the contracting officer that separate reporting is necessary. Furthermore, when incrementally funded contracts are involved, each separate allotment is not considered a separate contract entity (only a funding action). Therefore, the statistics under incrementally funded contracts should be reported cumulatively from the inception of the contract through completion.

Guidelines for Completing Form HHS-646

The contractor shall insert in column A the expenditure categories specifically identified in the clause of the contract entitled Contract Financial Report. In the remainder of the columns, the contractor shall report data on expenditures. The following guidelines are applicable to Form HHS-646.

(a) *Personnel—Professional.* Include by name and job title all personnel listed in the key personnel clause. The listing must be kept up to date.

(b) *Personnel—Other.* Do not include names and job titles. Report as one amount unless otherwise required by the contract.

(c) *Fringe benefits.* Include allowances and services provided by

the contractor to employees as compensation in addition to regular salaries and wages. If a fringe benefit rate has been established, the rate will be applied to the base agreed upon. If a rate has not been established, the various fringe benefits costs may be required to be shown separately. Fringe benefits which are included in the indirect cost rate should not be shown here.

(d) *Supplies.* Include the cost of supplies and material and equipment charged directly to the contract, but exclude the cost of capitalized nonexpendable equipment, as defined in subparagraph (k) below.

(e) *Travel.* Include in the detail required by the contract all direct costs of travel, i.e., transportation, subsistence and miscellaneous expenses. The following items shall be listed separately:

(1) Travel of consultants;

(2) Travel of contractor's staff;

(3) Domestic travel; and

(4) Foreign travel.

(f) *Premium pay.* Include the amount of salaries and wages over and above the basic rate of pay.

(g) *Other direct costs.* Include any direct costs which are not reported under individual line items. Depending upon the contractor's accounting system, other direct costs may include some of the above categories.

(h) *Overhead/Indirect costs.* Cite the rate and the base.

(i) *General and Administrative expense.* Cite the rate and the base. In the case of nonprofit organizations, this item will usually be included in the indirect cost.

(j) *Fee.* If any, include the fee earned in the appropriate column(s).

(k) *Capitalized nonexpendable equipment.* Include personal property of a capital nature; i.e., property acquired at a cost of $300 or more that has a service life of more than one year. However, if the contractor is an educational institution, the definition of capitalized nonexpendable equipment is changed to property acquired at an acquisition cost of $500 or more and a service life of 2 years or more. If required by the contract, Form 565, Report of Capitalized Nonexpendable Equipment, as outlined in the Departmental Manual "Control of Property in Possession of Contractors," will accompany the contractor's public voucher (SF 1034/1035),[1] or the Form HHS–646, if the Form HHS–565 was not previously submitted.

(l) *Inpatient Care.* Include costs associated with a patient occupying a bed in a patient care setting (e.g., hospitals, clinics, infirmaries and sanatoria). These costs will include both routine and ancillary costs. (Routine costs are those costs associated with occupying a bed.)

(m) *Outpatient Care.* Include costs associated with a patient while not occupying a bed in a patient care setting.

(n) *Consultant Fees.* Include fees paid to consultants.

(o) *Total Costs to the Government.* Include total costs to the Government as the last entry in the column. This is not an expenditure category *per se,* but, a total of the expenditures.

Preparation Instructions

These instructions are keyed to the columns on Form HHS–646.

Column A—Expenditure Category. Enter in column A the expenditure categories required by the contract.

Column B—Percentage of Effort/ Hours Funded. Enter in column B the percentage of effort or number of hours agreed to during contract negotiations for each expenditure category listed in column A.

Column C—Percentage of Effort/ Hours-Actual. The contractor will enter the cumulative percentage of effort or number of hours worked by each employee or group of employees listed in column A.

Column D—Cumulative Incurred Cost at End of Prior Period. This column should show the cumulative incurred costs up to the end of the prior reporting period. This column will be blank at the time of the submission of the initial report.

Column E—Incurred Cost Current Period. The contractor should enter the costs which were incurred during the current period.

Column F—Cumulative Incurred Cost to Date. The contractor should enter the combined total of columns D and E.

Column G—Estimated Cost to Complete. Entries need only be made when the contractor estimates that a particular expenditure category will vary from the amount funded in which case all expenditure categories must be filled in.

Column H—Estimated Cost at Completion. Entries shall only be made in column H if entries are made in column G. The contractor should enter the combined total of columns F and G.

Column I—Funded Contract Amount. Enter in this column the costs agreed to during contract negotiations for all expenditure categories listed in column A.

Column J—Variance (Over or Under). This column need not be filled in when column H is blank. When entries have been made in column H, this column should show the difference between the estimated costs at completion (column H) and funded costs (column I). When a line item varies by plus or minus 15%, i.e., the percentage arrived at by dividing column J by column I, an explanation of the variance should be submitted. Any variance projected on this form shall not be considered by the contractor to have satisfied its notice obligations under the Limitation of Cost (Funds) clause of the contract.

Note.—Any modification in the amount funded for an item since the preceding report should be listed in the appropriate cost category with the word "modification" immediately following the listed element in column A and with all columns filled in including the new funded amount. A line should be drawn through the old cost element. Subtotals among cost categories should be changed where necessary.

Note.—An expenditure made at the discretion of the contractor in the performance of its contract for an item for which no amount was funded should be listed in the appropriate cost category and all columns filled in except for I. Column J will, of course, show a 100% variance and will be eplained along with those identified under J above.

§ 3–16.950–647 Guide for Preparing Invoices Under Cost-Reimbursement Type Contracts

I. Introduction

General

This Guide presents recommended procedures for the preparation of the contractor's reimbursement claims under: (1) Cost-reimbursement type contracts; (2) the cost-reimbursement portions of fixed-price contracts; (3) letter contracts which provide for reimbursement of cost; (4) time and material contracts; and (5) labor-hour contracts.

Desk Audit

To expedite final payment on contracts subject to desk audit, the contractor may be required to provide the information set forth in III, C., of this Guide.

Prescribed Government Forms

Standard Form 1034, Public Voucher for Purchases and Services Other Than Personal (Figure 1), and Standard Form 1035, Public Voucher for Purchases and Services Other Than Personal—

[1] Filed as part of the original document.

Continuation Sheet (Figure 2), should be utilized by contractors to show the amount claimed for reimbursement and to provide the necessary supporting detail, respectively. The contractor may attach to the SF–1034, Public Voucher for Purchases and Services Other Than Personal, Form HHS–646, Financial Report of Individual Project/Contract, or SF–1035, Continuation Sheet. The SF–1035 may also be used to furnish any additional information as may be required by the contracting officer in accordance with the terms of the contract. The invoice and continuation sheet may be submitted on reproduced copies of the firms providing they conform to the official Government forms in format and are marked "Original."

Time for Submission

Invoices may be submitted at the beginning of each billing period for costs incurred during the preceding billing period. Costs incurred earlier than the preceding billing period, but the amount and month(s) in which such costs were incurred must be stated in the SF–1035 or equivalent form. Invoices shall not be submitted more frequently than once each month unless arrangement is made with the contracting officer.

Cost Incurrence Period

Costs must be incurred within the contract performance period or the period covered by precontract cost provisions.

Contractor's Fiscal Year

Invoices must be prepared in such a manner that costs claimed can be associated or identified with the contractor's fiscal year. This will ensure proper application of indirect cost rates to the direct costs of a particular fiscal year.

II. Preparation of Public Vouchers

General

The information which a contractor should submit in its public invoices (SF–1034 and SF–1035) is set forth in the explanation notes which follow. These notes are keyed to the entries on the illustrative public vouchers, Figures 1 and 2.

Completion of SF–1034

The following information should be submitted on SF–1034 or equivalent (Refer to Figure 1):

(a) U.S. Department, Bureau or Establishment and Location—enter the complete address as shown in the contract.

(b) Date Voucher Prepared—insert the date on which the voucher was prepared.

(c) Contract Number and Date—insert the number and the date of the contract under which reimbursement is claimed.

(d) All blocks lettered (d) should normally be left blank.

(e) Voucher No.—insert the appropriate serial number of each voucher including the completion and final voucher. A separate series of consecutive numbers, beginning with number 1, shall be used by the contractor for each contract.

(f) Payee's Name and Address—Name where practicable, title, phone number, and complete mailing address of responsible official to whom payments will be sent. In the case of an assignment of claims, also insert the organization to which payments have been assigned.

(g) Payee's Account Number—this space may be used by the contractor to record the account or job number assigned to the contract.

(h) Number and Date of Order—enter the number and date of the applicable order. (Applicable only when billings are subsequent to work assignments or task orders.)

(i) Date of Delivery/Service—show the month and year, beginning and ending dates of the cost incurrence period.

(j) Articles or Services—insert the following: "For detail see attached page(s)."

(k) Amount and Total—insert the amount claimed for the period indicated in (i) above.

(l) Identification—each voucher submitted must be prominently identified as one of the following:

(1) "Interim Voucher;"

(2) "Completion Voucher;" or

(3) "Final Voucher."

(m) Type the following certification, signed by an authorized official, on the face of the SF–1034.

"I certify that all payments requested are for appropriate purposes and in accordance with the contract."

(Name of Official) _____

(Title) _____

Completion of SF–1035

The following information should be submitted on SF–1035 or equivalent (Refer to Figure 2):

(a) Insert the name of the Government Agency as shown under (a) of the SF–1134.

(b) Insert the voucher number as shown on the SF–1034.

(c) Schedule No.—leave blank.

(d) If more than one sheet is used, insert the sheet number in numerical sequence, showing Sheet No. —— of ——." Use as many sheets as necessary to show the required information.

(e) Insert Payee's name and address as on the SF–1034.

(f) Insert the contract number as shown on the SF–1034.

(g) Insert the latest: Total Estimated Cost; Total Fee (if applicable); Total Contract Value; and Amount of Fee Payable (if applicable).

(h) Insert: "Summary of Claimed Current and Cumulative Costs" (and "Fee Earned" if applicable).

(i) Unless otherwise required by the contract, insert the major elements of incurred cost which was defined as follows:

Major Cost Elements

(1) *Direct Labor.* This consists of salaries and wages for direct performance of the contract.

(2) *Fringe Benefits.* This represents fringe benefits applicable to direct labor and billed as a direct cost. Fringe benefits included in indirect costs should not be identified here.

(3) *Capitalized Nonexpendable Equipment.* This represents personal property of a capital nature, i.e., property acquired at a cost of $300 or more that has a service life of more than one year. However, if the contractor is an educational institution the definition of capitalized nonexpendable equipment is changed to property acquired at an acquisition cost of $500 or more and a service life of 2 years or more. Form HHS–565, Report of Capitalized Nonexpendable Equipment, as outlined in the HHS manual "Control of Property in Possession of Contractors" will accompany the contractor's public voucher (SF–1034–SF–1035) as required.

(4) *Materials, Supplies, and Non-capitalized Equipment.* These are consumable materials, supplies and equipment other than those described in (c) of this section.

(5) *Premium Pay.* This renumeration in excess of the basic hourly rate.

(6) *Consultants Fee.* These are fees paid to consultants. List names, time and charges for the current billing period.

(7) *Travel.* Domestic travel is travel within the United States, its territories, possessions, and Canada. It should be billed separately from foreign travel.

(8) *Other.* List all other direct costs in total unless significant in amount. If significant, list cost elements and dollar amount separately, e.g., subcontracts.

(9) *Subcontracts.* Costs claimed for cost-type subcontracts must be supported by information similar to the SF–1035 for each subcontractor. Costs

claimed for fixed-price subcontracts must be on the basis of items delivered or services received, accepted and paid for by the prime contractor.

(10) *Total Direct Costs.* This is the sum of items (i)(1) through (i)(9) of this section.

(11) *Overhead/Indirect Costs (cite formula).* Cite the formula (rate and base) in effect during the time the cost was incurred and for which reimbursement is claimed.

(12) *Total Costs Exclusive of G&A.* This is the sum of (i)(10) and (i)(11) of this section.

(13) *G&A Expense (cite formula).* Cite the formula (rate and base) in effect during the time the cost was incurred and for which reimbursement is claimed.

(j) Insert the current costs claimed by major cost elements. Costs claimed for reimbursement can be only those amounts that are consistent with the term cost as defined in the "Allowable Cost and Payment" clause. Where it is found that amounts claimed do not meet this definition, such costs together with their associated costs and fee will be disallowed. All adjustments included herein must be explained in detail.

(k) Insert the cumulative costs claimed by major cost elements.

(l) Insert the total costs claimed for the current and cumulative periods.

(m) If the contract provides for an incentive or fixed-fee, insert the fee earned for the current and cumulative periods and the formula for such computation.

(n) Insert the total costs claimed and the fixed fee due for the current and cumulative periods.

(o) Insert the amount previously reimbursed.

(p) Insert the total costs claimed and the fee due for the current and cumulative periods.

(q) If applicable, resubmission of any previously claimed amounts which were suspended should be shown below the current amount claimed and footnoted to cite the number of the public voucher on which the deduction was made and the date and number of the related suspension notice. Suspensions from which the contractor has successfully appealed shall be identified by referencing contracting officer's letter of approval.

(r) Insert current amount claimed. Transfer this amount to SF–1034.

III. General Instructions

Cost Requiring Prior Authorization and Approval

The contractor should be aware of the requirement for prior written approval from the contracting officer for certain contract costs (e.g., premium pay, foreign travel). Whenever the voucher includes such costs not authorized by the contract, reference must be made to the contracting officer's authorization letter.

Withholding of Fixed Fee

After payment of 85% of the fee, the contracting officer may withhold further payment of fee to establish a reserve to protect the interests of the Government. This reserve may not exceed 15% of the total fee, or $100,000, whichever is less. Any fee withheld is payable upon submission of appropriate closing documents after final audit of the contract has been completed and all audit exceptions have been resolved. (See HSSPR § 3–50.502–3.)

Withholding and Release of Contract Reserves

Contractual provisions covering fees, patents, royalties, etc. usually provide for the accumulation of reserves until certain contract requirements are met to the satisfaction of the contracting officer. It is the contractor's responsibility to include appropriate adjustments in its reimbursement claims to cover the required accumulation and release of contract reserves. The contractor should resolve any questions regarding the amount of these reserves with the contracting officer.

Contractor's Completion Invoice

After all costs have been alloted to the contract and all contract performance provisions have been completed, the contractor shall promptly submit, but in any event within twelve (12) months to the office designated in the contract (and an additional copy directly to the contracting officer, if that office is not designated in the contract as the office to which invoices are to be sent by the contractor) in order to finalize the financial settlement of the contract. This invoice must be specifically identified as the completion invoice and should include the remaining costs, fees, and reserves claimed to be due to the contractor. It will not include items and amounts which may be set out in any qualifications in the contractor's release of claims. A separate completion invoice shall be submitted for each individual project or task order for which a separate series of public vouchers has been submitted. Final payment on certain contracts may be made on the basis of a desk audit. (See HHSPR § 3–50.502–3 for determination of which contracts.)

Contractor's Final Invoice and Closing Documents

After completion of the final audit and all suspensions and/or audit exceptions have been resolved and there is mutual agreement between the contractor and the contracting officer on the final allowable cost and fee, if any, the contractor shall submit its final invoice and the appropriate closing documents to the office designated in the contract. This invoice shall be specifically identified as the final invoice, and must be supported by the following documents:

(a) Contractor's Release.

(b) Assignee's Release, if applicable.

(c) Contractor's Assignment of Refunds, Rebates, Credits and Other Amounts.

(d) Assignee's Assignment of Refunds, Rebates, Credits, and Other Amounts, if applicable.

(e) Contractor's Affidavit or Waiver of Lien, when required by the contract.

Government Liaison

Any questions concerning delays in payment of contractor's invoices should be addressed to the office designated to receive the invoice; questions concerning performance under the contract or the instructions set forth in this Guide should be addressed to the contracting officer.

BILLING CODE 4110–12–M

GENERAL SERVICES ADMINISTRATION

Public Buildings Service

41 CFR Part 101–20

Management of Buildings and Grounds; Standard Level of Protection Services

AGENCY: Public Buildings Service, General Service Administration.

ACTION: Proposed rule.

SUMMARY: The General Services Administration proposes to amend its regulations regarding the standard level of protective services to be provided occupants of GSA-owned or -controlled space as part of the standard level user charge. The present definition of standard level protective services is ambiguous and leads to disputes concerning what services are to be provided to occupants. The proposed regulation is intended to provide a more definitive description of standard level protective services in keeping with current program emphases.

DATE: Comments must be received by January 26, 1983.

ADDRESS: Comments should be addressed to General Services Administration (PS), Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: James R. Boyd, Planning Specialist, Program, Planning and Coordination Staff (202–566–0244).

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. The General Services Administration has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society for this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

List of Subjects in 41 CFR Part 101–20

Blind, Concessions, Crime, Federal buildings and facilities, Fire prevention, Government property management, Safety, Security measures.

GSA proposes to amend Part 101–20 as follows:

1. The table of contents for Part 101–20 is amended to revise or reserve the following entries:

PART 101–20—MANAGEMENT OF BUILDINGS AND GROUNDS

Sec.

* * * * *

101–20.003–10 [Reserved]
101–20.003–11 [Reserved]

Subpart 101–20.1—Building Operations, Maintenance, Protection, and Alterations

* * * * *

101–20.104 Protection.

Subpart 101–20.5—Protection

* * * * *

101–20.502 [Reserved]
101–20.503–1 Protection.

§§ 101–20.003–10 and 101–20.003–11 [Reserved]

2. Sections 101–20.003–10 and 101–20.003–11 are removed and reserved as follows:

Subpart 101–20.1—Building Operations, Maintenance, Protection, and Alterations

3. Section 101–20.104 is revised to read as follows:

§ 101–20.104 Protection.

GSA will provide or arrange for the provision of protective services to ensure the safety of all visitors and occupants, to maintain order, to safeguard the Government's real and personal interest, and to prevent interference with or the disruption of the normal process of Government. Supart 101–20.5 prescribes the policies and procedures regarding the protection of GSA-owned or -controlled space.

4. Sections 101–20.105 (b) and (c) are revised to read as follows:

§ 101–20.105 Reimbursable service.

* * * * *

(b) Specialized security services performed by uniformed and other personnel which result because of an occupant's mission or the nature of the business conducted within a building, to include guarding as well as ingress-egress control, inspection of packages, directed security patrols, special physical security surveys, and other similar activities.

(c) Design, installation, maintenance, and operation of sophisticated electronic monitoring and communications systems such as intrusion-detection devices, duress-holdup alarms, and remote monitoring systems. Additionally, various target hardening procedures that may include, but not be limited to, the use of architectural and other barriers, access restrictions, and controlled vehicular and personnel traffic flows.

* * * * *

Subpart 101–20.5—Protection

5. Sections 101–20.500 and 101–20.501 are revised to read as follows:

§ 101–20.500 Scope of subpart.

This subpart prescribes the policies and requirements for the protection of persons and property under the charge and control of GSA; delineates GSA and occupant responsibilities; requires the active participation of occupant agencies in establishing tenant awareness programs and accomplishing crime prevention activities; requires that occupant and user agencies report crime on GSA property to the Federal Protective Service; and establishes an occupant emergency program mandating occupant participation in planning and organizing to deal with emergency situations in buildings or facilities.

§ 101–20.501 Basic policy.

For all buildings and grounds under its charge and control, GSA will provide standard level protective services consisting of timely responses to criminal occurrences, incidents, and life-threatening events; investigation of crimes and violations of Federal statutes; implementation of crime prevention activities, including tenant awareness programs; coordination of a comprehensive occupant emergency program; installation and maintenance of perimeter security devices and systems; performance of physical security surveys and vulnerability assessments of all properties on a recurring basis; and a wide range of physical security advisory and consulting services. Protective and security services above these levels engendered by an agency's mission and other special requirements may be provided on a reimbursable basis in accordance with Subpart 101–21.4.

5. Section 101–20.502 is removed and reserved as follows:

§ 101–20.502 [Reserved]

6. Section 101–20.503–1 is retitled and revised to read as follows:

§ 101–20.503–1 Protection.

GSA provides standard level protective services as defined in § 101–20.501 through the use of personnel resources (consisting of uniformed Federal Protective Officers and other qualified security professionals), technical resources (comprising technical equipment, security devices, and communications networks), and arrangements with other law enforcement agencies. Other protective services which may include, but are not limited to, security guarding; specialized security patrols; and installing and maintaining specialized security systems and devices, may be performed on a reimbursable basis.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486 (c))

Dated: November 23, 1982.

Richard O. Haase,

Commissioner.

Intent to Propose Rulemaking

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to propose rulemaking.

SUMMARY: As part of the Department of the Interior's ongoing effort to

streamline existing regulations, the Bureau of Land Management is considering the revision of regulations found at 43 CFR Groups 3700 and 3800 dealing with acquisition of rights and development of mineral resources under the mining laws, 30 U.S.C. 22 *et seq.*, and other special Acts of Congress. Public comment is invited as to how the regulations found at 43 CFR Groups 3700 and 3800, other than subparts 3802, 3809, and 3833, could be improved, whether by elimination of unnecessary or burdensome provisions, by the clarification or amplification of ambiguous provisions, or by the inclusion of standards or procedures not now found in the regulations. In furtherance of the Department of the Interior's policy of seeking public input, the public is invited to arrange meetings with representatives of the Director, Bureau of Land Management, to discuss, for the record, their comments.

DATE: Comments should be submitted by February 1, 1983. Comments received or postmarked after that date will be considered if it is practical to do so, but assurance cannot be given that any comments except those received or postmarked on or before this date will be given consideration.

ADDRESS: Written comments should be addressed to: Director (140), Bureau of Land Management, 18th and C Streets, NW., Washington, D.C. 20240. Comments will be available for public review in Room 5555 of the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

Those wishing to arrange meetings to present comments should contact the Assistant Director, Mineral Resources at (202) 343–5554 to schedule their presentation. A record will be made of all meetings, will be made part of the comment docket, and will be available for public review. The record will include the name, address and organizational affiliation of any individual participating in the meetings concerning this proposal.

FOR FURTHER INFORMATION CONTACT: William Condit, Bureau of Land Management, 18th and C Streets, NW., Washington, D.C. 20240; telephone (202) 343–8537.

SUPPLEMENTARY INFORMATION: The public is invited to submit comments on, but not limited to, the following issues:

1. Procedures for patenting mining claims and mill sites under the mining laws;

2. Definition, consistent with existing case law, of discovery of a valuable mineral deposit (including the concepts of the prudent man rule and marketability);

3. Definition of the term "valid mining claim";

4. Clarification of the distinction between an amended location and a relocation;

5. Method of showing a patent applicant's title to a claim; and

6. Definition of the showing to be made to support a mining claimant's allegation of discovery.

Because of their special interest, members of the public who conduct mining activities that may be affected by the regulations in 43 CFR Groups 3700 and 3800, other than Subparts 3802, 3809 and 3833, are asked to give careful consideration to these parts and submit their comments for consideration.

Because the regulations found at 43 CFR Subparts 3802, 3809, and 3833 have been the subject of recent rulemaking and proposed rulemaking, the Bureau of Land Management will review those regulations separately from this notice of intent. Accordingly, comments on those parts are not specifically solicited.

BILLING CODE 4310-84-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6286]

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule; revision.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Delavan, Walworth County, Wisconsin.

Due to recent engineering analysis, this proposed rule revises the proposed determinations of base (100-year) flood elevations published in the *Delavan Enterprise* on July 8, 1982 and July 15, 1982, and at 45 FR 19393 on May 5, 1982, and hence supersedes those previously published rules.

DATES: The period for comment will be ninety (90) days following the second publication of this notice in a newspaper of local circulation in the above named community.

ADDRESSES: See table below:

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: Proposed base (100-year) flood elevations are listed below for selected locations in the City of Delavan, Walworth County, Wisconsin, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a)).

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the (proposed) flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

The proposed base (100-year) flood elevations for selected locations are:

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS

[illegible]	City/town/county	Source of flooding	[illegible]	#Depth in feet above ground. *Elevation in feet (NGVD)
Wisconsin	(C) Delavan Walworth County	Turtle Creek	About 2,300 feet downstream of Richmond Road	*879
			Just downstream of Dam at Comus Lake	*885
		Swan Creek	At mouth	*881
			About 700 feet upstream of Richmond Road	[illegible]
			Abut 500 feet downstream of Walworth Street	*892
			Just upstream of Washington Street	*900
			At southern corporate limit about 3,300 feet downstream of Milwaukee, St. Paul and Pacific Railroad	*912
		Comus Lake	Shoreline	*891

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 23

Proposed Additions to the Appendices to the Convention on International Trade in Endangered Species of Wild Fauna and Flora

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of United States proposals.

SUMMARY: The convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) regulates international shipment of certain wildlife and plant species, which are listed in appendices to this treaty. The United States, as a Party to CITES, may propose amendments to Appendix I or II for consideration by the other Parties.

This notice announces the Service's decisions on proposals that are being submitted by the United States for considertion by CITES Party national at their next regular meeting. This notice addresses proposals other than those resulting from a review of North American animal and plant species that are already listed in the appendices, which were addressed in a separate notice.

ADDRESS: Please send correspondence concerning this notice to the Office of the Scientific Authority, U.S. Fish and Wildlife Service, Washington, D.C. 20240. Materials received will be available for public inspection from 7:45 a.m. to 4:15 p.m., Monday through Friday, in room 537, 1717 H Street, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Dr. Richard L. Jachowski, Office of the Scientific Authority, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone (202) 653–5948.

SUPPLEMENTARY INFORMATION:

Background

CITES regulates import, export, reexport, and introduction from the sea of certain animal and plant species. Species for which trade is controlled are included in three appendices. Appendix I includes species threatened with extinction that are or may be affected by trade. Appendix II includes species that although not necessarily threatened with extinction may become so unless trade in them is strictly controlled. It also lists species that must be subject to regulation in order that trade in other currently or potentially threatened species may be brought under effective control. Such listings frequently are required because of difficulty in distinguishing specimens of currently or potentially threatened species from other species at ports of entry. Appendix III includes species that any Party nation identifies as being subject to regulation within its jurisdiction for purposes of preventing or restricting exploitation, and for which it needs cooperation of other Parties in controlling trade.

Any Party nation may propose amendments to Appendices I and II for consideration at meetings of the Conference of the Parties. The text of any proposal must be communicated to the CITES Secretariat at least 150 days before the meeting. The Secretariat must then consult the other Parties and interested intergovernmental bodies, and communicate their responses to all Parties no later than 30 days before the meeting. Amendments are adopted by a two-thirds majority of the Parties present and voting.

The purpose of this notice is to announce results of the Service's review of certain animal and plant species that were identified in previous notices (47 FR 6772, February 16, 1982, and 47 FR 39219, September 7, 1982) as candidates for United States proposals. The Service considered comments and information received in response to the notices and views of authorities in the various countries where these species occur, in determining if proposals described below should be submitted to the CITES Secretariat for consideration by the Parties in April 1983 at their fourth regular meeting.

Candidate Animal Species

The Service's notices of February 16 and September 7, 1982, identified the following species as candidates for proposals. This section presents a discussion of the species, comments received on them, and reasons for the Service's final decisions.

1. Indian pangolin (*Manis crassicaudata*)—Based on data indicating a rapidly increasing trade in skins of this species, which occurs in Pakistan, India, Yunnan Province of China, and Sri Lanka, TRAFFIC (U.S.A.) asked the Service to consider proposing its transfer from CITES Appendix II to I. Dr. Wang Sung of the Academia Sinica

in China informed the Service that the species is thought to be rare in that country, but that he would prefer retaining it in Appendix II. India does not allow the export of pangolin skins, even under CITES Appendix II. The Service has not obtained information about the population status of this species that is needed to determine if it is threatened with extinction. Informal discussion of the proposal with the CITES Central Committee confirmed the lack of such information. Therefore, the Service has decided not to submit this proposal.

2. Malayan pangolin (*Manis javanica*)—A rapid increase in trade in this species led TRAFFIC (U.S.A.) to suggest that it also be proposed for transfer from Appendix II to I. There is a similar lack of population status information on this species, which occurs in Burma, Thailand, Indochina, Sumatra, Java, Borneo, and S.W. Philippines. Dr. Boonsong Lekagul (Association for the Conservation of Wildlife, Thailand) informed the Service that both this species and *M. pentadactyla* are hunted illegally for meat in Thailand and that they are becoming increasingly rare in that country. He wrote that he would support the transfer of these species to Appendix I. The Assistant Director of the Philippines Bureau of Forest Development commented that pangolins are protected in that country, although they are collected in Palawan Province for meat and scales. His agency would support the transfer of *M. javanica* to Appendix I. However, without information on population status indicating this species to be threatened with extinction, the Service cannot make this proposal.

3. Chinese pangolin (*Manis pentadactyla*)—TRAFFIC (U.S.A.) suggested that this species be proposed for transfer from Appendix II to I for the same reason as the species discussed above. Population status information also is lacking on this species, which occurs in Nepal, South China from Yunnan eastward to Fukien Province, N. Indochina, and Taiwan. Dr. Wang Sung of the Academia Sinica wrote that it is a common species in China, but its population has declined in the last decades due to over-collection for meat and scales. He stated that he would consider its status as threatened or vulnerable, but that he would prefer retaining it in Appendix II. Dr. Boonsong Lekagul informed the Service that he believed the species to be threatened in Thailand. Without more definitive information on population status, the Service cannot determine if this species should be transferred to Appendix I. However, in the case of these three pangolin species, the Service will urge the Parties to control trade more effectively under the current Appendix II listing.

4. White-lipped peccary (*Tayassu pecari*)—TRAFFIC (U.S.A.) recommended that this species be considered for inclusion in Appendix II, on the basis of information showing a substantial international trade in skins from South America and reports of declining populations of the species. The species occurs from Mexico to W. Ecuador, Brazil, and N.E. Argentina.

Various reports mention loss of habitat and hunting for local consumption as factors affecting the species. The CITES Scientific Authority for Paraguay stated that there does not seem to be great demand on this species or on *T. tajacu* for trade in hides. The Director General of Forests and Wildlife in Peru informed the Service that although both species of *Tayassu* occur in the Amazonian region, where they are hunted for local consumption, they are not in danger and should not be listed in Appendix I or II. Commercial harvesting of them is controlled under a quota system in Peru. On the other hand, the Acting Director of the Department of National Parks and Equivalent Reserves in Brazil commented that both species of *Tayassu* are hunted because their skins have commercial value, so populations might be reduced. He approved their inclusion in Appendix II. The Scientific Authority for Ecuador wrote that these species are subject to commercial skin trade as well as habitat destruction and local consumption. He recommended listing *T. pecari* in Appendix I or II, but not listing *T. tajacu* in either appendix insofar as Ecuador is concerned. It appears that *T. pecari* might benefit from inclusion in Appendix II, but information on population status is not adequate to justify a proposal at this time.

5. Collared peccary or javelina (*Tayassu tajacu*)—The comments summarized above also apply to this species. It occurs from N. Argentina and N.W. Peru to N.C. Texas, S.W. New Mexico, and Arizona. Generally, reports suggest that this species is more abundant and resistant to human disturbance than *T. pecari*. The Director of the Arizona Game and Fish Department commented that *T. tajacu* is managed as a big game species and is not threatened in Arizona, New Mexico, and Texas. The Service has decided not to propose listing it in Appendix II.

6. Africa wild ass (*Equus asinus*)—The Service received a request from Mr. Bill Clark of the Hai-bar Arava Wildlife reserve in Israel to propose the listing of this species in Appendix I. The wild form of this species, as distinct from domesticated stock, now occurs only in N.E. Ethiopia, N. Somalia and Sudan. Wild populations are estimated at 3,400 to 4,600 animals in all. The species is much reduced in distribution and subject to hunting, although it is afforded legal protection in the countries of origin. There is a documented potential for international trade in live specimens. The Director of the Wildlife Conservation Organization of the Ethiopian Government and the CITES Scientific Authority for Israel both support the listing of this species in Appendix I. The Service has decided to submit this proposal, excluding domesticated stock from the listing.

7. Caninde macaw (*Ara caninde*)—TRAFFIC (U.S.A.) requested the Service to consider proposing the transfer of this species from Appendix II to I. The Service had considered a similar request from the International Council for Bird Preservation (U.S. Section) in 1980, and decided then that the information on population status was inadequate to show that the species was threatened with extinction. Since then, Mr. D. V. Lanning conducted a survey of *A. caninde* and *A. rubrogenys* in Bolivia. This is the only country in which both species are now known to occur. Mr. Lanning estimated the total population of *A. caninde* to be 500–1,000 birds, and he reported that trapping for the export trade is the major threat to this species. He added that only a few were trapped and exported until 1981, when about 60 adults and young were exported. The Service has requested comments from Bolivian CITES authorities on this species and others discussed in this notice, but has not yet received a reply. Based on evidence of low numbers, restricted distribution, and growing international trade, the Service has decided to propose transferring this species from Appendix II to I.

8. Red-fronted macaw (*Ara rubrogenys*)—The preceding discussion also applies to this species. Mr. Lanning estimated the total population of *A. rubrogenys* to be 3,000–5,000 birds, and he stated that trapping for the export trade is the major threat to this species. Data from the United States and United Kingdom show a rapid increase in the numbers of birds imported each year since the first records in 1977. Exports to only these two countries amounted to about 460 birds in 1981. The Service has decided to propose transferring this species from Appendix II to I for the

same reasons given in the case of *A. caninde.*

9. Wattled crane (*Bugeranus carunculatus*)—Dr. George Archibald suggested the listing of this species in Appendix I on the grounds that it is acutely endangered and in trade. Information given to the Service by W. Tarburton of the Transvaal Provincial Administration (South Africa) and by D. H. Day of the Southern Africa Ornithological Society indicates that the species is threatened in South Africa and Zimbabwe. However, wattled cranes are distributed over the southern third of Africa with a small isolated population in Ethiopia. a survey by P. M. Konrad in 1978–79 of six large wetlands in Zambia and two in Botswana revealed from 250 to 3,000 birds in individual wetlands during the peak season. Konrad reported the species to be declining in numbers throughout its historic range due to alteration of its riverine wetland habitat by man in combination with low reproductive rates. From 6 to 12 of the birds are captured for trade in Botswana each year, according to Konrad. The Service has decided not to propose listing this species in Appendix I. The species is not yet threatened with extinction, although it may become so in the future unless measures are taken to protect its habitat. International trade does not appear to be a significant factor in the decline of wattled cranes.

10. Yacare (*Caiman crocodilus yacare*)—TRAFFIC (U.S.A.) suggested that the Service consider proposing the transfer of this subspecies to Appendix I on the basis of reports that its populations are declining as the result of hunting for international trade. There is extensive international trade in skins and manufactured products of *C. crocodilus,* some of which involves this subspecies. TRAFFIC (U.S.A.) stated, however, that there does not appear to be enough information on the population status of the yacare to support this proposal. The Service has contacted authorities in Brazil, Bolivia, and Paraquay about further research. The Acting Director of the Department of National Parks and Equivalent Reserves in Brazil informed the service that his agency approves the listing of yacare in Appendix I because its population is decreasing as a result of illegal hunting and clandestine trade. He added that the related subspecies *C. c. crocodilus* also should be included in Appendix I. The Service has decided not to submit this proposal, pending the results of further research.

11. Black softshell turtle (*Trionyx ater*)—Dr. F. W. King, Deputy Chairman of the Species Survival Commission, IUCN, and Dr. R. E. Honegger of the Zurich Zoo, Switzerland, suggested that the Service propose removing this species from Appendix I. The basis for the suggestion is a report that this species is becoming genetically swamped by *T. spiniferus.* It occupies a highly restricted range in Coahuila, Mexico. The Service has obtained no data to determine whether genetic swamping has actually occurred. Therefore, the Service has decided it would be premature to propose delisting *T. ater* at this time.

Candidate Plant Species

On February 16, 1982, the Service published a list of 111 individual plant species and two plant genera (*Dudleya* and *Echeveria*) that it felt to be potential candidates for adding to the CITES appendices (47 FR 6772–6773). The notice sought population and trade status information for each species and comments from the public on the appropriateness of each listing. On September 7, 1982, after a thorough review of the large volume of information and comments received in response to the February 16 notice, the Service published a reduced list of 30 plant species and single plant genus (*Dudleya*) which it then considered to be viable candidates for possible addition to the CITES appendices. In that notice, the Service requested detailed population data and trade statistics on each of these species in order to develop final proposals to submit to the CITES Secretariat for consideration at the meeting of the Parties in April 1983. The Service contacted a number of knowledgeable individuals by phone or letter in its search for the most accurate and up-to-date information on each species.

The current notice presents a list of those species for which the Service has received population and trade data that it considers to be sufficient to clearly warrant addition to the CITES appendices. The volume of information and comments received by the Service in response to its two previous notices, both verbally and in writing, is too great to discuss in detail in the current notice. However, written information is available for public inspection at the Office of the Scientific Authority. The Service has prepared proposals to add each of the following plant species to the CITES appendices and is submitting them for consideration by the CITES Parties:

Add to Appendix I:

Agavaceae (Agave family)

Agave arizonica (New River agave)—AZ
A. parviflora (Santa Cruz striped agave)—AZ, Mex.
Nolina interrata (Dehesa bear-grass)—CA, Mex.

Berberidaceae (Barberry family)

Mahonia nevinii (Nevin's barberry)—CA
M. sonnei (Truckee barberry)—CA

Crassulaceae (Orpine family)

Dudleya stolonifera (Laguna Beach dudleya)—CA
D. traskiae (Santa Barbara Island dudleya)—CA

Ericaceae (Health family)

Rhododendron chapmanii (Chapman's rhododendron)—FL
R. prunifolium (Plumleaf azalea)—AL, GA

Fouquieriaceae (Candlewood family)

Fouquieria fasciculata (Abrol de Barril)—Mex.
F. purpusii)—Mex.

Liliaceae (Lily family)

Lilium grayi (Gray's lily)—NC, TN, VA
L. iridollae (Pot-of-gold lily)—AL, FL
L. occidentale (Western lily)—CA, OR
L. pitkinense (Pitkin Marsh lily)—CA

Add to Appendix II:

Agavaceae (Agave family)

Agave victoriae-reginae (Queen Victoria agave)—Mex.

Diapensiaceae (Diapensia family)

Shortia galacifolia (Oconee-bells)—GA, NC, SC

Ericaceae (Heath family)

Kalmia cuneata (White wicky)—NC, SC

Fouquieriaceae (Candlewood family)

Fouquieria columnaris (Boojum tree)—Mex.

Liliaceae (Lily family)

Lilium parryi (Parry's lemon lily)—AZ, CA

Portulacaceae (Purslane family)

Lewisia cotyledon (Siskiyou lewisia)—CA, OR
L. maguirei (Maguire's lewisia)—NV
L. serrata (Saw-toothed lewisia)—CA
L. tweedyi (Tweedy's lewisia)—WA, Can.

Copies of animal and plant proposals that the Service decided to submit are available upon request from the Office of the Scientific Authority at the above address.

This notice is issued under authority of the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.; 87 Stat., 884, as amended). It was prepared by Richard L. Jachowski and Joseph J. Dowhan, Office of the Scientific Authority.

Forest Service

Quartz Hill Molybdenum Mine; Tongass National Forest, Ketchikan Area, Ketchikan, Alaska; Intent To Prepare an Environmental Impact Statement

The Department of Agriculture, Forest Service will prepare, through a third party consultant, an Environmental Impact Statement for the development of a proposed Molybdenum Mine at Quartz Hill within the non-wilderness portion of Misty Fiords National Monument. The Plan of Operations submitted by the U.S. Borax and Chemical Corporation on behalf of Pacific Coast Molybdenum includes:

1. Contruction and operation of an open pit capable of producing 60,000 tons of ore per day for more than 70 years.

2. Contruction and use of an access road suitable for mine development.

3. Contruction and operation of a mill capable of processing 60,000 tons of ore per day.

4. Contruction and and operation of a 100 megawatt power plant.

5. Contruction and use of tunnels for transportation of crushed ore and tailings.

6. Disposal of tailings in the marine environment of the Boca de Quadra Fiord.

7. Contruction and use of a town adjacent to Bakewell Arm.

8. Contruction and use of a wharf and docking facility.

Possible alternatives that will be discussed include, townsite locations, townsite vs. commute, water supply sources, processing capacity, power source, the method of tailings disposal and the location of tailings disposal areas.

The scoping process for this proposal will begin in December 1982 and end in February 1983. The scoping process will consist of:

1. A public scoping meeting in Ketchikan in the latter part of January 1983.

2. Letters will be sent to individuals and organizations who have expressed an interest in the project, soliciting their comments on concerns, issues and opportunities.

3. Interdisciplinary Team meetings will be held to discuss agency concerns, issues and opportunities.

All interested parties are invited to participate in the scoping process. The scoping process will:

1. Identify those issues, concerns and opportunities to be addressed.

2. Identify those issues, concerns and opportunities to be addressed in depth.

3. Eliminate insignificant issues, concerns, and opportunities or those that have been covered by a previous environmental review.

The following groups have been invited to be members of the Interdisciplinary Team preparing the Environmental Impact Statement:

Alaska Department of Transportation and Public Facilities
Alaska Department of Community and Regional Affairs
Alaska Department of Environmental Conservation
Alaska Department of Natural Resources
Alaska Department of Commerce and Economic Development
Alaska Department of Fish and Game
National Marine Fisheries Service
U.S. Bureau of Mines
U.S. Fish and Wildlife Service
Southern Southeast Regional Aquaculture Association
U.S. Army Corps of Engineers
U.S. Environmental Protection Agency
Ketchikan Gateway Borough
U.S. Borax and Chemical Corporation

John Sandor, Regional Forester of the Alaska Region, located in Juneau, Alaska, is the responsible official.

The analysis is expected to take about 10 months. The draft environmental impact statement shold be available for public review by October 1983. The final environmental impact statement is scheduled to be completed in March 1984.

Written comments and suggestions should be sent to Win Green, Forest Supervisor, Ketchikan Area, Tongass National Forest, Department QH, Federal Building, Ketchikan, Alaska 99901.

Questions about the proposed action and environmental impact statement should be directed to Ed Johnson, Minerals and Watershed Staff Officer/ Borax IDT Leader, Ketchikan Area, Tongass National Forest, phone (907) 225–3101.

Dated December 15, 1982.

John Sandor,

Regional Forester.

BILLING CODE 3410–11–M

Soil Conservation Service

Beasha Creek Watershed, Mississippi; Intent To Deauthorize Federal Funding

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of Intent to Deauthorize Federal Funding.

SUMMARY: Pursuant to the Watershed Protection and Flood Prevention Act, Pub. L. 83–566, and the Soil Conservation Service Guidelines (7 CFR Part 622), the Soil Conservation Service gives notice of the intent to deauthorize Federal funding for the Beasha Creek Watershed project, Leake and Neshoba Counties, Mississippi.

FOR FURTHER INFORMATION CONTACT: Billy C. Griffin, State Conservationist, Soil Conservation Service, Suite 1321, Federal Building, 100 West Capitol Street, Jackson, Mississippi 39269, telephone 601–960–5205.

SUPPLEMENTARY INFORMATION: A determination has been made by Billy C. Griffin that the proposed works of improvement for the Beasha Creek Watershed project will not be installed. The sponsoring local organizations have concurred in this determination and agree that Federal funding should be deauthorized for the project. Information regarding this determination may be obtained from Billy C. Griffin, State Conservationist, at the above address and telephone number.

No administrative action on implementation of the proposed deauthorization will be taken until 60 days after the date of this publication in the **Federal Register.**

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention. Office of Management

and Budget Circular A-95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable.)

Dated: December 15, 1982.

Billy C. Griffin,

State Conservationist.

BILLING CODE 3410-16-M

Sam Houston RC & D Area; Magnolia Independent School District, Critical Area Treatment RC & D Measure, Texas

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Magnolia Independent School District Critical Area Treatment RC & D Measure, Montgomery County, Texas.

FOR FURTHER INFORMATION CONTACT: George C. Marks, State Conservationist, Soil Conservation Service, W. R. Poage Federal Building, 101 South Main, Temple, Texas 76503, telephone 817-774-1214.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, George C. Marks, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for treatment of erosion and reducing sedimentation problems in about 4,800 feet of drainageways by installing 1,150 feet of concrete-block channel blanket and 2,775 feet of grassed waterway. This will require 2.58 acres of land to be shaped for 0.41 acre (18,002 square feet) of concrete-block channel blanket and 2.17 acres for grass vegetation.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and intersted parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting George C. Marks.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

ARMS CONTROL AND DISARMAMENT AGENCY

Hubert H. Humphrey Fellowship Competition

The U.S. Arms Control and Disarmament Agency will conduct a competition in 1983 for one year Hubert H. Humphrey Fellowships in arms control and disarmament. The fellowships will support unclassified doctoral dissertation research in the field. Law candidates for the Juris Doctor or any higher degree are also eligible, if they are writing a substantial paper in partial fulfillment of degree requirements. The fellowship stipends for Ph.D. candidates will be $5,000, plus applicable tuition and fees up to a maximum of $3,400. Stipends and tuition for law candidates will be prorated according to the credits given for the research paper. Fellows must be citizens or nationals of the U.S. and degree candidates at a U.S. university. The application deadline for the awards, which are for a 12-month period beginning either September, 1983 or January 1, 1984, is March 1, 1983 and announcement of final selection will be on May 15, 1983. For information and application materials write: Hubert H. Humphrey Fellowship Program, Office of Congressional and Public Affairs, U.S. Arms Control and Disarmament Agency, Washington, D.C. 20451.

Dated: December 17, 1982.

Joseph Lehman,

Public Affairs Advisor.

CIVIL AERONAUTICS BOARD

[Docket 41163]

Newark-London Back-Up Case; Prehearing Conference

Notice is hereby given that a prehearing conference in the above-titled matter is assigned to be held on December 29, 1982, at 10:00 a.m. (local time), in Room 1027, Universal Building, 1825 Connecticut Avenue NW., Washington, D.C., before the undersigned.

Board Order 82-12-88 instituting this proceeding contained a proposed request for information and evidence and proposed procedural dates. The order set December 23, 1982, as the date for answers to the proposed evidence request and December 27, 1982, as the date for responses thereto. Such answers and responses shall be served on each party and prospective party with six copies to the Judge. The answers shall contain (1) proposed statements of issue, (2) proposed stipulations, (3) suggested amendments to the Board's proposed information and evidence requests, (4) statements of position, and (5) proposed amendments to the procedural dates suggested in the Board's order.

Dated at Washington, D.C., December 20, 1982.

William A. Kane, Jr.,

Administrative Law Judge.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

Final Affirmative Countervailing Duty Determinations and Countervailing Duty Orders; Toy Balloons (Including Punchballs) and Playballs From Mexico

AGENCY: International Trade Administration, Commerce.

ACTION: Final affirmative countervailing duty determinations and countervailing duty orders.

SUMMARY: We have determined that certain benefits which constitute bounties or grants within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Mexico to toy balloons (including punchballs) and playballs as described in the "Scope of Investigations" section of this notice. The net bounty or grant is 5.97 percent *ad valorem* for toy ballons (including punchballs) and 6.23 percent *ad valorem* for playballs.

EFFECTIVE DATE: December 27, 1982.

FOR FURTHER INFORMATION CONTACT: Mary A. Martin, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, telephone (202) 377-1276.

SUPPLEMENTARY INFORMATION:

Final Determinations and Final Orders

Based upon our investigations and in accordance with section 705(a) of the Tariff Act of 1930, as amended (the Act), we have determined that the government of Mexico provides certain benefits which constitute bounties or grants within the meaning of section 303 of the Act to manufacturers, producers, or exporters in Mexico of toy balloons (including punchballs) and playballs, as described in the "Scope of Investigations" section of this notice. We have determined the net bounty or grant to be 5.97 percent *ad valorem* for toy balloons (including punchballs) and 6.23 percent *ad valorem* for playballs.

Case History

On may 18, 1982, we received a petition from National Latex Products Company of Ashland, Ohio, on behalf of the U.S. industry producing toy balloons (Including punchballs) and playballs. The petition alleged that certain benefits which constitute bounties or grants within the meaning of section 303 of the Act are being provided, directly or indirectly, to the manufacturers, producers, or exporters of toy balloons (including punchballs) and playballs in Mexico.

Since Mexico is not a "country under the Agreement" within the meaning of section 701(b) of the Act, section 303 of the Act applies to these investigations. Although the subject merchandise is nondutiable, there is no "international obligation" within the meaning of section 303(a)(2) of the Act which requires an injury determination for nondutiable merchandise from Mexico. Therefore, the domestic industry is not required to allege that, and the U.S. International Trade Commission is not required to determine whether, imports of these products cause or threaten to cause material injury to a U.S. industry.

We reviewed the petition and on May 26, 1982, determined that investigations should be initiated (47 FR 23798).

On June 8, 1982, we presented a questionnaire concerning the allegations to the government of Mexico at its embassy in Washington, D.C. On July 21, 1982, we determined that the case was extrordinarily complicated within the meaning of section 703(c)(1)(B) of the Act, and we published a notice of the postponement of the preliminary countervailing duty determinations (47 FR 32557). On September 8, 1982, we received a partial response to the questionnaire. No information was provided by the Mexican government on the use by the manufacturers, producers, and exporters of the subject merchandise of pre-export financing loans from the Fund for the Promotion of Mexican Manufactured Products (FOMEX).

The government of Mexico requested that its response to our questionnaire be classified pursuant to Executive Order 12356 (effective August 1, 1982). In a letter dated September 27, 1982, we declined to accept the response as classified confidential foreign government information and returned the response to the government of Mexico. On October 6, 1982, the Mexican government submitted its earlier response on a non-confidential basis. No request for classification pursuant to Executive Order 12356 was included. In a response dated October 25, 1982, the government of Mexico provided information modifying its earlier submission on Industrias Salver's exports and FOMEX export loans.

On October 15, 1982, we issued our preliminary determinations in these investigations (47 FR 46874). These stated that the government of Mexico provided certain benefits which constitute bounties or grants within the meaning of section 303 of the Act to manufacturers, producers, or exporters in Mexico of toy balloons (including punchballs) and playballs. The programs preliminarily determined to bestow countervailable benefits were the preferential financing programs of the FOMEX.

Scope of Investigations

The merchandise covered by these investigations consists of toy balloons (including punchballs) and playballs. Balloons and punchballs are inflatable, thin-walled articles made by dipping non-porous forms (called "mandrels") in natural latex. Punchballs have slightly thicker walls than balloons and are sold packaged with bands. A playball is a hollow sphere produced from polyvinyl chloride (a thermoplastic resin) and other thermoplastics that will bounce when inflated with air and which yields diameters from 4 to 20 inches. Playballs are not nylon-wound or made of rubber, and are not to be confused with sportballs (used in athletic activities). Playballs are not an athletic product, because they are lighter in weight and smaller in size; however, styles of the vinyl playballs include models resembling footballs, basketballs, and other sports-oriented items. Balloons and punchballs are currently classifiable under item number 737.9536 and playballs under item number 735.0990 of the *Tariff Schedules of the United States Annotated.*

Latex Occidental, S.A., is the only know producer and exporter of balloons and punchballs; and Industrias Slaver, S.A. is the only known producer and exporter of playballs. The period for which we are measuring subsidization is the first half of 1982. In its responses, the government of Mexico provided data for the applicable periods. Latex Occidental and Industrias Salver provided information on their use of FOMEX pre-export financing loans.

Analysis of Programs

Based upon our analysis of the petition, the responses to our questionnaire, our verification and oral and written comments by interested parties, we determine the following.

I. Programs Determined To Confer Bounties or Grants

We have determined that bounties or grants are being provided to manufacturers, Producers, or exporters in Mexico of toy ballons (including

punchballs) and playballs under the FOMEX programs.

FOMEX is a trust established by the government of Mexico to promote the manufacture and sale of exported products. The fund is administered by the Mexican Treasury Department, with the Bank of Mexico acting as the trustee. The Bank of Mexico administers the financing of FOMEX loans through financial institutions. The financial institutions establish contracts for lines of credit with manufacturers and exporters of merchandise.

Latex Occidental and Industrias Salver obtained loans from FOMEX for two purposes: pre-export (production) financing and export financing.

In order for a company to be eligible for FOMEX financing for exports, the following requirements must be met: (1) The product to be manufactured must be included on a list made public by FOMEX; (2) the articles to be exported must have a minimum of 30 percent national content in direct production costs; (3) loans granted for pre-export must be in Mexican currency, while loans for export sales are established in U.S. dollars or any other foreign currency acceptable to the Bank of Mexico; and (4) the exporter must carry insurance against commercial risks to the extent of the loans. The maximum annual interest rate that credit institutions may charge borrowers for FOMEX pre-export financing is 8 percent in Mexican pesos. The maximum annual interest rate for FOMEX export financing is 6 percent in the currency of the country of importation. Both Latex Occidental and Industrias Salver receive some FOMEX loans at rates below the maximum rates.

We used as benchmarks for the commercial rate of interest in Mexico the national average commercial rate for comparable short-term peso or dollar-denominated loans, as applicable during the first half of 1982. We have determined that during the first six months of 1982, comparable peso-denominated loans were available at 48.95 percent, and comparable dollar-denominated loans were available at 18.7 percent. The peso rate was determined from information on comparable short-term commercial loans supplied by the Department of the Treasury and the dollar rate was determined from information on comparable short-term commercial loans supplied by the Federal Reserve Board. This source of dollar rates in Mexico was used because access to U.S. dollars in Mexico is generally at terms and rates reflected in the U.S. market.

For those FOMEX loans obtained by manufacturers during the period January 1, 1982–June 30, 1982, we computed the difference in interest rates between the FOMEX loans and that which would have been incurred had the loans been made at the commercial benchmark rates of interest. We allocated the amount of benefits for all pre-export FOMEX loans for the merchandise under investigation over the value of total exports of that merchandise, because the loans were for exports to all countries and the companies were unable to segregate loans which were associated only with merchandise exported to the United States. We then allocated the amount of benefit for export financing FOMEX loans to the United States for the merchandise under investigation over the value of exports to the United States of the subject merchandise during the same period.

We determined the net amount of the benefit for loans granted for pre-export financing of ballons (including punchballs) to be 2.65 percent *ad valorem* and the net amount of the benefit for export financing to be 3.32 percent *ad valorem*, for a total bounty or grant under the two programs of 5.97 percent *ad valorem* for the subject merchandise. We determine the net amount of benefit for loans granted for pre-export financing of playballs to be 2.81 percent *ad valorem* and the net amount of the benefit for export financing to be 2.1 percent *ad valorem*, for a total bounty or grant under the two programs of 6.23 percent *ad valorem*.

II. Program Determined Not To Confer Bounties or Grants

We determined that bounties or grants are not being provided to manufacturers, producers, or exporters in Mexico of toy balloons (including punchballs) and playballs under the export insurance program.

The petition alleges that the Mexican Credit Insurance Company (COMESEC) provides subsidized export insurance premium rates. COMESEC, which is a company funded by law and owned by private insurance companies, insured the exports to the United States of the merchandise under investigation. We verified that COMESEC experienced and operating profit on insurance activities.

III. Program Determined To Be Suspended and Not Used Recently

The CEDI is a tax certificate issued by the government of Mexico in an amount equal to a percentage of the f.o.b. value of the exported merchandise or, if national insurance and transportation are used, a percentage of the c.i.f. value of the exported product. The Secretary of Commerce of Mexico is responsible for setting the CEDI rate, which is not published. Exporters are required to apply for each CEDI by providing to the Ministry of Commerce (SECOM) documentation with respect to each individual shipment of qualifying exports. SECOM processes the application and, on approval, instructs the Ministry of the Treasury to issue the CEDIs in the amount specified. The CEDIs are non-transferable and may be applied against a wide range of federal tax liabilities (including payroll taxes, value added taxes, federal income taxes, and import duties) over a period of five years from the date of issuance. In prior investigations, we have concluded that benefits bestowed under the CEDI program are countervailable. See *Final Affirmative Countervailing Duty Determination; Ceramic Tile from Mexico and Countervailing Duty Order*, 47 FR 20012 (1982).

The government of Mexico suspended the eligibility of the products under investigation for CEDI tax rebates by an executive order published on August 25, 1982, in the *Diario Oficial de la Federacion* (Official Gazette). The order abrogates prior executive orders which contained the lists of products eligible to receive CEDI certificates. Suspension of the eligibility to apply for the CEDI was effective one day after publication of the executive order in the *Diario Oficial*.

Although exporters of the merchandise under investigation received benefits under the CEDI program during the first half of 1982, the CEDIs ceased to be available after August 25, 1982. Because the exporters used the CEDI certificates on a current basis, the toy balloons (including punchballs) and playballs that we accorded benefits under this program are not likely to enter the United States on or after the date of suspension of liquidation of the merchandise. Therefore, although the CEDI program is countervailable, the cash deposit rate established by these determinations and orders does not reflect a rate for CEDI. if this program is reactivated, the Department will review its application to respondents in the annual reviews under section 751 of the Act.

IV. Programs Determined Not To Be Used

We determined that the programs listed below which were listed in the notice of "Initiation of Countervailing Duty Investigation, Toy Balloons (Including Punchballs) and Playballs from Mexico" are not being used by the manufactures, producers, or exporters in Mexico of toy balloons (including punchballs) and playballs.

A. Other Preferential Financing Programs

Petitioner alleged that producers, manufacturers, or exporters in Mexico of toy ballons (including punchballs) and playballs received a bounty or grant through the receipt of preferential loans from the Guarantee Fund for the Development of Small and Medium sized Industries (FOGAIN), the Industrial Equipment Fund (FONEI), and the National Fund for Industrial development (FOMIN).

We verified the government of Mexico's response that neither of the companies producing or exporting the merchandise under investigation received loans under the FOGAIN, FONEI, and FOMIN programs.

B. The CEPROFI Program

In 1979, the government of Mexico introduced a four-year National Industrial Development Plan (NIDP) which spells out broad economic goals for the country. Tax credits, which are called Certificates of Fiscal Promotion (CEPROFIs), are used to promote the NIDP goals, which include increased employment, the promotion of regional decentralization, and industrial development, particularly of small and medium sized firms. We verified the government of Mexico's response that neither of the companies producing or exporting the merchandise under investigation received CEPROFIs.

C. Trade Development Services

The petition alleges that the Mexican Foreign Trade Institute (IMCE) has aided firms producing and exporting the merchandise under investigation by providing services in helping to develop foreign markets for their products. We verified the government of Mexico's response to our questionnaire that neither of the companies producing or exporting the merchandise under investigation received or requested services from IMCE.

D. Free Zone and In-Bond Assembly Programs

The petition alleges that the Mexican manufacturers of toy balloons (including punchballs) and playballs may qualify for free zone and in-bond assembly benefits. We verified the government of Mexico's response that neither of the companies producing or exporting the subject merchandise participated in the free zone or the in-bond assembly programs.

E. Rail Freight Rebates

The petition alleges that some Mexican companies have benefitted in the past from rebates on railroad freight rates. We verified that neither of the companies producing the merchandise under investigation uses the railroad to transport the subject merchandise.

V. Petitioner's comments

Comment 1. The Department erred in not determining that the CEDI program is a subsidy.

DOC Position. In earlier investigations, we determined that the CEDI program is countervailable. Because the program has been suspended since August 25, 1982, and the exporters used the CEDIs on a current basis, we are not countervailing against this program at this time. As noted above, the continuing status of CEDI will be reviewed during our annual reviews under section 751 of the Act.

Comment 2. The Department should seek further information from the government of Mexico regarding the Mexican Industrial Development Plan of 1979. The period of inquiry should be lengthened to determine whether CEPROFIs were received in an earlier time period.

DOC Position. We verified that neither Latex Occidental nor Industrias Salver has ever received a CEPROFI.

Comment 3. The Department should determine whether the government Mexico is maintaining dual exchange rates as a stimulant to exports.

DOC Position. This allegation was not made in a timely manner permitting its thorough investigation and verification. Accordingly, we cannot consider this issue until we conduct administrative reviews under section 751 of the Act. If the allegations prove to be true at that time, the benefit conferred as a result of this program will be reflected in the amount of countervailing duties actually assessed upon liquidation.

Comment 4. Export insurance fees cannot be considered as an offset against FOMEX preferential financing subsidies.

DOC Position. We agree. See DOC position in response to respondent's Comment 2 discussed below.

VI. Respondent's Comments

Comment 1. Latex Occidental asserts that the appropriate benchmarks for comparison with FOMEX pre-export and export financing should be the company's commercial loans rates for peso and dollar-dominated loans.

DOC Position. We have used as a benchmark, for pre-export loans a comparable countrywide peso loan rate of 46.95 percent and as a benchmark for export loans a comparable countrywide dollar-denominated loan rate of 18.7 percent. Since FOMEX is part of a broad, national lending program, we use national average commercial interest rates on comparable loans as our benchmarks rather than the rates at which individual companies received loans. Loans in the national currency of the country are not considered comparable to loans in a foreign currency. Accordingly, we have considered pre-export and export financing FOMEX loans separately.

Comment 2. Respondents contend that the FOMEX rate for export financing should be increased by the fee for commercial risk insurance because the FOMEX Rules of Operation list as a requirement that the exporter have an insurance policy to cover the credit issued by a company authorized to insure against commercial risks.

DOC Position. It is common commercial practice in Mexico for exporters to obtain commercial risks insurance on their shipments to the United States. While banks may not explicitly require such insurance as a condition to receipt of a commercial export loan, it is reasonable to expect that the terms would be adjusted accordingly in the absence of insurance.

The Department has no evidence to indicate that exporters of this merchandise: (a) Do not normally obtain commercial risk insurance for their non-FOMEX export loans, or (b) that the terms for obtaining a commercial export loan would not be adjusted to reflect the fact that the shipments are uninsured.

Verification

In accordance with section 776(a) of the Act, we verified the data used in making our final determinations. During this verification, we followed normal procedures, including inspection of documents, discussions with government officials and on-site inspection of manufacturer's operations and records.

Administrative Procedures

The Department has afforded interested parties an opportunity to present oral views in accordance with its regulations (19 CFR 355.35). No request for a public hearing was received in these investigations. In accordance with the Department's regulations (19 CFR 355.34(a)), written views have been received and considered.

The suspension of liquidation ordered in our preliminary affirmative countervailing duty determinations shall remain in effect until further notice. The net bounty or grant is 5.97 percent *ad valorem* for balloons (including punchballs) and 6.23 percent *ad valorem*

for playballs. We are directing the United States Customs Service to require a cash deposit in the amount indicated above for each entry of the subject merchandise entered or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the **Federal Register.**

The Department intends to conduct administrative reviews within 12 months of the publication of these determinations as provided in section 751 of the Act.

(Secs. 303 and 706 of the Act (19 U.S.C. 1303, 1671e)).

Dated: December 17, 1982.

Lawrence J. Brady,

Assistant Secretary for Trade Administration.

[FR Doc. 82-34852 Filed 12-23-82; 8:45 am]

BILLING CODE 3510-25-M

Final Affirmative Countervailing Duty Determinations; Certain Steel Products From the Republic of Korea

AGENCY: International Trade Administration, Commerce.

ACTION: Final affirmative countervailing duty determinations.

SUMMARY: We have determined that certain benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in the Republic of Korea (Korea) of certain steel products as described in the "Scope of the Investigations" section of this notice. The estimated net subsidy for each firm and for each product is indicated under the "Suspension of Liquidation" section of this notice. The U.S. International Trade Commission (ITC) will determine whether these imports are materially injuring or threatening to materially injure a U.S. industry, before the later of 120 days after the Department made its preliminary affirmative determinations or 45 days after the publication of this notice.

EFFECTIVE DATE: December 27, 1982.

FOR FURTHER INFORMATION CONTACT: Richard Rimlinger, or Steven Lim, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Ave., N.W., Washington, D.C. 20230; telephone (202) 377-1276.

SUPPLEMENTARY INFORMATION:

Final Determinations

Based upon our investigations, we have determined that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Korea of certain steel products, as described in the "Scope of Investigations" section of this notice. The following programs are found to be subsidies: (1) Preferential export financing; (2) preferential tax incentives for exporters; (3) special tax exemptions for government-owned firms; (4) special tax exemptions for steel producers; (5) preferential utility rates and port charges for steel producers; (6) tariff incentives, and (7) Masan Free Export Zone or Foreign Capital Inducement Law benefits. The estimated net subsidy for each firm and for each product is indicated under the "Suspension of Liquidation" section of this notice.

Case History

On May 7, 1982, we received a petition from the United States Steel Corporation on behalf of the U.S. industry producing small diameter (16" and under) welded carbon steel pipes and tubes, hot-rolled carbon steel plate, cold-rolled carbon steel sheet, hot-rolled carbon steel sheet and galvanized carbon steel sheet. The petition alleged that certain benefits which constitute subsidies within the meaning of section 701 of the Act are being provided directly or indirectly to the manufacturers, producers, or exporters in Korea of this merchandise.

We found the petition to contain sufficient grounds upon which to initiate countervailing duty investigations, and initiated these investigations on May 27, 1982 (47 FR 24166). We stated that we expected to issue preliminary determinations by August 2, 1982. We subsequently determined that these investigations are "extraordinarily complicated" as defined in section 703(c) of the Act, and on July 22, 1982, we postponed our preliminary determinations for 65 days, until October 4, 1982 (47 FR 32758). On June 21, 1982, the ITC found that there is a reasonable indication that these imports of certain steel products from Korea, with the exception of imports of cold-rolled carbon steel sheet, are materially injuring, or threatening to materially injure, a U.S. industry. The ITC found no reasonable indication that imports of cold-rolled carbon steel sheet from Korea are materially injuring, or threatening to materially injure, a U.S. industry, and the investigation was terminated with respect to this particular merchandise. The ITC published its determinations in the **Federal Register** on June 30, 1982 (47 FR 28481 and 28488).

We presented questionnaires concerning the allegations to the government of Korea in Washington, D.C. By August 31, 1982, we had received responses from the government of Korea, and eight Korean manufacturers of the remaining products under investigation. We believe that these eight manufacturers account for virtually all current exports of the products under investigation to the United States.

On October 4, 1982 we preliminarily determined that the government of Korea was providing its manufacturers, producers, or exporters of certain steel products with benefits that are subsidies within the meaning of the countervailing duty law (47 FR 44807).

On November 3-14, 1982, we verified in Korea the questionnaire responses submitted by the government of Korea and the Korean steel producers.

Our notice of preliminary determination gave interested parties an opportunity to submit written and oral views, and on November 23, 1982, we held a public hearing.

Scope of the Investigations

The merchandise covered by these investigations is:

- Small diameter welded carbon steel pipes and tubes;
- Hot-rolled carbon steel plate;
- Hot-rolled carbon steel sheet;
- Galvanized carbon steel sheet.

For a further description of these products see the Appendix to this notice.

The period for which we are measuring subsidization is calendar year 1981. In addition to receiving a questionnaire response from the government of Korea, we have also received questionnaire responses from the following:

Firms	*Carbon steel products*
Pohang Iron and Steel Co., Ltd (POSCO).	Hot-rolled carbon steel plate, hot-rolled carbon steel sheet and galvanized carbon steel sheet.
Union Steel Mfg., Co., Ltd. (Union Steel).	Galvanized carbon steel sheet, and small diameter welded carbon steel pipes and tubes.
Dong Kuk Heavy Industries, Ltd. (DHI).	Small diameter welded carbon steel pipes and tubes.
Fuji Works Korea, Ltd. (Fuji)	Small diameter welded carbon steel pipes and tubes.
Hyundai Pipe Co., Ltd. (Hyundai).	Small diameter welded carbon steel pipes and tubes.
Korea Steel Pipe Co., Ltd. (Korea Pipe).	Small diameter welded carbon steel pipes and tubes.
Masan Steel Tube Co., Ltd. (Masan Tube).	Small diameter welded carbon steel pipes and tubes.

Firms	Carbon steel products
Pusan Steel Pipe Ind., Co. Ltd. (Pusan Pipe).	Small diameter welded carbon steel pipes and tubes.

Analysis of Programs

The following programs were alleged in the petition to be subsidies: (1) Preferential export financing; (2) preferential tax incentives for exporters; (3) special tax exemptions for government-owned firms; (4) special tax exemptions for steel producers; (5) preferential utility rates and port chargers for steel producers; (6) tariff incentives; (7) preferential financing and government loan guarantees for steel producers; (8) wage controls for government-run firms; (9) government purchases of steel at inflated prices; (10) government capital grants; (11) a "special steel export subsidy"; (12) indirect subsidies to purchasers of machinery used to make iron and steel; (13) indirect subsidies to purchasers of hot-rolled sheet or coil, and (14) loans at favorable foreign currency exchange rates. Based on our experience in other Korean cases, we also included in our investigation special benefits offered to firms located in the Masan Free Export Zone or offered throught the Foreign Capital Inducement Law. We also investigated POSCO's dual pricing system for hot-rolled sheet or coil sold to producers of small diameter welded carbon steel pipes and tubes.

In their responses, the government of Korea and the eight Korean steel producers provided data for the applicable period. Based upon our analysis of the petition and responses to our questionnaires, we have determined the following:

Programs Determined To Confer Subsidies

We have determined that subsidies are being provided under the programs listed below to manufacturers, producers, or exporters in Korea of small diameter welded carbon steel pipes and tubes, hot-rolled carbon steel plate, hot-rolled carbon steel sheet, or galvanized carbon steel sheet.

Preferential Export Financing

Under the "Regulations for Export Financing," promulgated by the Korean government on February 25, 1972, short-term financing of up to 90 days is provided to exporters at interest rates which are less than the generally available commercial rates. During 1981, the interest rate for short-term export financing was 12 percent (27 percent if late payment is made), as opposed to normal commercial rates, which ranged between 15–20 percent for most of 1981. This rate also varied depending on the credit rating of the borrower.

Export financing was available for production expenses and for the purchase of raw materials for export production. A loan ceiling for short-term export loans was established based upon the value of a company's total exports in a preceding period.

The government's response indicates that financing was provided by individual private foreign exchange banks and not by the Korean government, that no government guarantees are involved and that the banks are acting in conformance with the regulations. We determine that, regardless of the private ownership of the banks, this program is countervailable because the preferential financing is the direct result of a government mandate. All firms investigated took advantage of this program.

In addition, several firms reported long-term preferential export loans under a special fund for export industries set up by government direction. These loans, which were funded and transacted in 1981, are secured with the firm's assets through a commercial bank and no government guarantees are involved. The responses indicate that a firm must export to qualify for this loan; however, the loan rate is not dependent on continued exportation by the firm. Since this program is also traceable to government mandate, we determine it to be countervailable.

In order to calculate the amount of the benefit to each steel producer resulting from these preferential short-term export financing programs, we computed the total difference between the amount of interest paid on all short-term export loans which were transacted in 1981, and the amount of interest that the firm would have to pay on a comparably timed and sized loan under normal commercial financing. The short-term commercial rates which we used are national rates which are published in monthly bulletins issued by the Bank of Korea. The amount of the total benefit received under this program was divided by that firm's total value of export sales for 1981 to determine the *ad valorem* subsidy to that firm. Since long-term preferential export loans were transacted in 1981 and interest payments were made monthly, we calculated the benefit to each steel producer from these loans beginning in 1981 (when repayments began).

On an overall basis we found that the net benefits, attributable to preferential export loans, to the Korean steel producers, based on the f.o.b. value of the exported merchandise, were as follows:

Product	Ad valorem rate
Small diameter welded carbon steel pipes and tubes	1.16
Hot-rolled carbon steel plate	0.52
Hot-rolled carbon steel sheet	0.52
Galvanized carbon steel sheet	0.60

Subsequent to the period for which subsidization is being measured, on June 28, 1982, the government of Korea reduced the maximum allowable interest rate to be charged by commercial banks on all commercial loans, including export loans, to ten percent. In taking this action, the government eliminated interest rate preferences that previously existed for exporters. Therefore, we note that the *ad valorem* subsidy amounts shown in the "Suspension of Liquidation" section of this notice do not reflect the above listed percentages since loan preferences have not been in effect since June 28, 1982. Consequently, entries which would be subject to suspension of liquidation would not benefit from this program.

Preferential Tax Incentives for Exporters

Article 25 of the Korean Tax Exemption Regulations Law permits a firm earning more than 50 percent of its total proceeds from foreign exchange to increase its normal depreciation by 30 percent. If the corporation has received less than 50 percent of its total proceeds from foreign exchange, it can still claim some accelerated depreciation which is determined by a formula based on the firm's foreign exchange earnings and total business earnings. Of the firms investigated, Hyundai, Masan Tube, POSCO and Pusan Pipe used accelerated depreciation in 1981, and only Masan Tube and POSCO used accelerated depreciation in 1980.

To calculate the benefits from the accelerated depreciation program for the period for which we are measuring subsidization (calendar year 1981), we have determined the tax savings received in 1981 based on accelerated depreciation which has been deducted from 1980 income taxes. We used this method because the exact amount of tax and tax benefit for 1980 is not known until 1981 when a firm's operational results are known and tax liability must be settled. The amount of the tax

savings received under this program was divided by the total value of sales in 1981 to determine the *ad valorem* subsidy.

In addition, Article 12 of the Corporate Tax Law provides for the deduction from taxable income of a number of different reserves relating to export activities. These reserves cover export losses, overseas market development and price fluctuation losses.

Under the program governing export losses, a corporation engaged in export or tourist activities may establish a reserve amounting to one percent of foreign exchange earnings, or 50 percent of net income in the applicable period, whichever is smaller. If certain export losses occur, they are offset from the reserve funds. If there are no offsets for export losses, the reserve is credited to income and taxed, after a one-year grace period, over a three-year period.

Under the program governing overseas market exploration expenses, a corporation engaged in export activities may establish a reserve fund amounting to one percent of its foreign exchange earnings in the export business for the respective business year. Expenses incurred in exploring overseas markets are offset from the reserve fund. As in the case of the export loss reserve fund, if there are no offsets for expenses, the reserve is credited to income and taxed, after a one-year grace period, over a three year period.

With respect to the price fluctuation loss program, a corporation engaged in export activities may establish reserves equivalent to five percent of the book value of the products and works in progress to be exported at the close of the business year. This reserve may be used to offset losses incurred from the fluctuation of prices for export goods. These losses may be offset by returning an amount equivalent to the losses to the income account. If not so utilized, the reserve is returned to the income account the following business year.

The balance in all three reserve funds is not subject to corporate tax, although all moneys in the reserve funds are eventually reported as income and subject to corporate tax either by means of offsetting export losses or by the expiration of the one-year grace period. All export reserve programs serve as an interest free loan to the corporation of the tax savings on these funds. Accordingly, we have quantified the benefits from these reserve funds to each applicable steel producer by calculating the amount of taxes that normally would be due on these funds under Korean law and applying a rate of interest which the firm would have had to pay on a comparably timed and sized loan under normal commercial financing. The amount of the total benefit received umder this program was divided by that firm's total value of export sales for 1981 to determine the *ad valorem* subsidy to that firm. Hyundai, Korea Pipe, and Pusan Pipe reported using export activity reserve funds. On an overall basis, we found that the net benefit to the Korean steel producers under these programs, based on the f.o.b. value of the exported merchandise was as follows:

Product	Ad valorem rate
Small diameter welded carbon steel pipes and tubes	0.08
Hot-rolled carbon steel plate	1.45
Hot-rolled carbon steel sheet	1.45
Galvanized carbon steel sheet	1.31

Special Tax Exemptions for Government-Owned Firms

Of the firms investigated, POSCO was the only firm owned either directly or indirectly by the government of Korea.

POSCO's questionnaire response indicates that, under Korea's tax exemption control law, the firm was exempt from corporation tax until December 31, 1981. However, because POSCO was exempt from paying corporation taxes, the firm was obliged to pay a higher defense tax than was paid by other corporations. POSCO also indicates that it was exempt, until December 31, 1981, from the following additional taxes:

- Residence tax;
- Property tax;
- Registration tax;
- Property acquistion tax.

To calculate the benefits from the corporation and residence tax exemption programs for the period for which we are measuring subsidization (calendar year 1981), we have determined POSCO's tax savings received in 1981 based on 1980 income. We used this method because the exact amount of POSCO's tax benefit for 1980 is not known until 1981 when POSCO's operational results are known and tax liability must be settled. To calculate the benefits from the property, registration and property acquistion tax exemption programs for the period for which we are measuring subsidization, we have determined POSCO's tax savings based on taxes actually exempted in 1981. We used this method because POSCO knows in 1981 how much tax is due that year and would actually pay the tax in 1981 if the firm was not exempted.

We have quantified the benefits from these tax exemptions to POSCO by calculating the amount of each tax that normally would be due if the tax exemption was not granted. In the case of corporation tax, we adjusted for the additional defense tax which had to be paid in order to receive the corporation tax exemption. The value of these tax exemptions was allocated over POSCO's total sales in 1981. The tax exemptions resulted in a total subsidy to POSCO of 0.46 percent of the f.o.b. value of the exported merchandise. Although POSCO's tax exemptions expired on December 31, 1981, the firm received benefits from the corporation and residence tax exemption programs which cannot be quantified and known until 1982. Therefore, we have included 0.33 percent of the above amount (that which is attributable to these two programs) in the "Suspension of Liquidation" section of this notice.

Special Tax Incentives for Steel Producers

Under Article 24–5 of the Corporation Tax Act (which was deleted as of December 31, 1981, from this statute and transferred to the Tax Exemption and Control Law under Article 72), the government provides special investment tax credits on a case-by-case basis, if the government decides that a particular investment is needed. Among the investments covered by this tax credit are those investments made by small and medium enterprises between July 1, 1980, and June 30, 1981, in machinery and equipment used directly for manufacturing and mining purposes.

Only one firm investigated, Masan Tube, reported benefits under this provision during the period for which we are measuring subsidization. Masan Tube received an eight percent tax credit on an investment in machinery and equipment.

Although this program is not expressly intended solely for steel producers, we find that its implementation was preferential and confers a subsidy. Since this tax benefit was received in 1982, which is outside the period for which we are measuring subsidization, we have not quantified this benefit nor included an amount for this program in the "Suspension of Liquidation" section of this notice. We will review and quantify, as appropriate, this program in the context of a future section 751 administrative review.

Preferential Utility Rates and Port Charges for Steel Producers

Petitioner alleges that Korean steel producers are eligible for reduced rates

for utilities and related services as "designated companies" under the Iron and Steel Industry Rehabilitation Order (Presidential decree No. 10,002, August 23, 1980). It is further alleged that steel producers qualify for a deferred payment plan with the Korea Electric Company.

During the period for which we are measuring subsidization, POSCO received a 50 percent reduction on its port charges under this program. The program is discretionary and can be implemented by the authority of the applicable tax ministry. However, POSCO is the only firm under investigation which is known to have benefited from this program with respect to its reduced port charges. We had preliminarily determined POSCO's port charge reduction to be a subsidy, but did not know at that time that the benefits were received under the above-cited provision.

We do not know how much of the reduction in port charges is attributable to exports and how much to domestic sales. Therefore, for this final determination, we have allocated the reduction in port charges to both export and total sales according to the percentages that export and domestic sales form of total sales of POSCO as the best evidence available. We found POSCO's net benefit under this program to be 0.05 percent of the f.o.b. value of the exported merchandise.

Tariff Incentives

Article 29 of the Korean Foreign Trade Enforcement Ordinance authorizes rebates of tariffs to cover wastage or imported raw materials to be incorporated into manufactured items for export. Petitioner alleged that wastage allowances are being claimed which are higher than the actual wastage levels. Petitioner further alleges that steel producers importing capital equipment are permitted to pay tariffs on an installment basis.

The government's response indicates that wastage allowance is based upon data submitted to the government by the Korean industry showing the amount of raw material necessary to produce any given finished product. The wastage allowance used by the government is the average of all producers. The wastage allowance is updated periodically by the government and the information submitted by the producers is verified by the tax office. Our review of the responses submitted by the steel producers under investigation indicates that the wastage allowance of the government accurately reflected the actual wastage rates incurred by these firms, and we determine that no subsidy exists with respect to this program.

The government's response did indicate that deferred payment of import duties is allowed, if the private sector applies with the Ministry of Finance for approval. While the government encourages payment of customs duties on all imports as rapidly as possible, exceptions are made to ease the burden of Korean industry. Copies of the Korean Customs Act and an annex listing eligible industries were obtained at the time of verification. Based on our review of these materials we have concluded that the program is written to benefit only certain industries and it appears that certain industries benefit to a greater extent than others. Since use of this program is not freely available to all Korean industries and the benefits from this program flow to certain industries more than others, we determine that it confers a subsidy on these steel producers which have received approval to defer duty payments. The deferred duty program serves as an interest free loan to the corporation of the amount of duty deferred. Accordingly, we have quantified the benefits from this program to each applicable steel producer by calculating the amount of interest that normally would be due if the deferred duties had been borrowed at a rate of interest which the firm would have had to pay on a comparably timed and sized loan under normal commercial financing. The amount of the total benefit received under this program was divided by the firm's total value of sales for 1981 to determine the *ad valorem* subsidy to that firm. Of the firms investigated, Hyundai, Korea Pipe, POSCO, Pusan Pipe and Union Steel reported using deferred duty payments. Masan Pipe and Fuji are located in the duty-free Masan Zone and do not benefit from this program. On an overall basis we found that the net benefits to the Korean steel producers under this program, based on the f.o.b. value of the exported merchandise, were as follows:

Product and manufacturer/producer/exporter	Ad valorem rate
Small diameter welded carbon steel pipes and tubes	0.05
Hot-rolled carbon steel plate	0.05
Hot-rolled carbon steel sheet	0.05
Galvanized carbon steel sheet	0.05

Masan Free Export Zone or Foreign Capital Inducement Law Benefits

The government's response indicates that the benefits granted to firms located in the Masan Free Export Zone are, essentially, tax incentives of a temporary nature. Only foreign investors and joint ventures (the portion owned by foreign partners) are eligible to receive such benefits. Firms which are wholly or partially foreign owned and located outside the Masan Free Export Zone still receive these tax benefits under the Foreign Capital Inducement Law. Of the eight firms investigated, only Masan Tube was eligible to receive benefits during the period for which we are measuring subsidization. In 1980, the firm received 50 percent exemptions from the following taxes:

Corporation tax
Defense tax
Corporate residence tax
Property tax

We have determined Masan Tube's tax savings in 1981 based on 1980 income. We used this method because the exact amount of Masan Tube's tax benefit is not known until 1981 when Masan Tube's operational results are known and tax liability must be settled. At the time of our preliminary determination, we have calculated tax benefits of 2.93 percent of the total f.o.b. value of Masan Tube's exports in 1981. However, erroneously included in our tax benefit totals were corporation and resident taxes assessed on dividends which foreign stockholders were liable for—not Masan Tube. Masan Tube was merely withholding these taxes on behalf of foreign stock owners as required by Korean law. Therefore, we have deducted from our tax benefit totals the amount of taxes Masan Tube withheld on behalf of foreign shareholders and have revised the amount of our *ad valorem* subsidy to 1.72 percent of the total f.o.b. value of Masan Tube's exports in 1981. Masan Tube indicated that its eligibility for benefits under this program expired on August 23, 1982.

Programs Determined Not To Confer Subsidies

We have determined that subsidies are not being provided to manufacturers, producers, or exporters in Korea of small diameter welded carbon steel pipes and tubes, hot-rolled carbon steel plate, hot-rolled carbon steel sheet, or galvanized carbon stell sheet under the following programs.

Preferential Financing and Government Loan Guarantees For Steel Producers

Petitioner alleged that government-owned or controlled banks are directed to provide credit to stragegic industries such as steel in preference to other non-strategic industries. Petitioner further alleged that government loans at

preferential rates or government guaranteed loans are being supplied to the steel industry either directly or through commercial banks.

The government's response, which we verified, indicates that it does not direct banks to supply credit to strategic industries, such as the steel industry, in preference to other industries, but that banks in Korea are allowed to lend funds to all industrial and agricultural sectors on a commercial basis. In this regard, all manufacturing sectors can borrow from banks at commercial rates of interest. Decisions by individual banks concerning whether to lend to particular enterprises and what rate to charge are based upon the commercial assessment by the bank of the creditworthiness of the customer, and other circumstances surrounding any particular loan. General loans of this type are available at commercial, not preferential, rates. The government does not participate in the particular lending decisions of the individual banks. Based on our investigation, we have determined that there are no preferential loans for the steel industry and that the government did not guarantee any loans received by the steel producers.

Wage Controls for Government-Run Firms

Petitioner alleged that the Korean government limits wage increases for government-run firms such as POSCO, resulting in lower production costs for this segment (state-owned organizations) of the Korean industry.

Based on our investigation, we have determined that there are no mandatory wage controls for any industry in Korea. The government does not control or influence the wages paid to POSCO workers, nor does it control or regulate the wages paid by private companies. Furthermore, POSCO's response indicates that its wage levels compare favorably with other national wage indicators.

Government Purchases of Steel at Inflated Prices

Petitioner alleged that the Office of Supply of the Republic of Korea (OSROK) purchases large quantities of steel at inflated prices to eliminate excess inventories of steel producers. Petitioner also alleged that OSROK agrees to advanced payment before actual product delivery to supply funds to steel producers for operation and investment.

With respect to the products under investigation, OSROK purchased only pipe in 1981. The government's response indicates that OSROK purchases steel strictly to meet its own needs. Based on our investigation, we have verified that OSROK does not make advance payment, and that the prices and terms of sale to OSROK are comparable to the prices and terms of sale to other customers.

Government Capital Grants

Petitioner alleged that the Korean government provides substantial capital grants to the Korean steel industry. Petitioner further cites past government equity investments in POSCO and contends that, since the firm does not pay cash dividends and prospects in the steel industry have not been bright in recent years, such investments are not "arms-length" transactions at market value, but represent a subsidization scheme of capital grants.

The responses received from the government and the steel producers under investigation indicate that the government has never provided a grant to any steel producer and, with one exception, has never assumed an expense on behalf of a steel producer. The one exception indicated is the assumption by the government of interest expenses incurred by POSCO on a loan during the period February 22, 1973, through December 31, 1974. Because this interest charge is normally expensed, this program does not confer benefits to POSCO on sales made during the period for which we are measuring subsidization. Also, all interest has been paid by POSCO each year since December 31, 1974, with no reimbursement by the government.

With respect to the government's equity participation in POSCO, the record indicates the following facts. POSCO was incorporated in April 1968. The government has had substantial participation in the ownership of POSCO since its inception. POSCO's first plate and hot strip mills were completed in 1972, but its first blast furnace did not begin production until 1973. The company has grown steadily during the past decade, increasing raw steel capacity from 1.03 million tons in 1973 to 8.5 million tons at the end of 1981. POSCO is a closed corporation whose stock is not traded on any organized stock market.

Under the statute, government equity ownership gives rise to a potential subsidy only when such ownership is on terms which are inconsistent with commercial considerations. We do not believe this is the case with respect to POSCO. Our review of all financial statements issued by POSCO since 1972 indicates that the firm has been profitable since completion of its initial pouring facilities in 1973. Key indicators such as debt to equity ratios, interest coverage, etc., have all been healthy. Furthermore, government studies used in the decision to invest in POSCO projected a strongly profitable operation; the firm's continuous access to both domestic and foreign capital private markets attests to its commercial viability. For these reasons we have determined that the purchase of equity in POSCO by the government is not inconsistent with commercial considerations and, therefore, does not give rise to a potential subsidy.

Special Steel Export Subsidy

The petitioner alleged the existence of a special steel export subsidy and has cited the December 1980 issue of the Kosa Bulletin, published by the Korea Iron and Steel Association, which makes reference to such a program.

The questionnaire responses received from the government and the steel producers under investigation indicate that no such program exists. At the verification, we found no evidence of such a program.

Indirect Subsidies To Purchasers of Machinery Used To Make Iron and Steel

Petitioner alleged that, until December 31, 1981, producers of machinery for iron and steel manufacturing enjoyed special tax deductions and exemptions which reduced the capital costs to iron and steel producers.

The question presented is whether the products under investigation have benefited from subsidies, not whether producers of machinery for iron and steel manufacturing have received subsidies. As we stated in our final determination in the countervailing duty investigation of certain steel wire nails from Korea, which was announced on September 8, 1982 (47 FR 39549), we believe that benefits bestowed upon the manufacturer of an input do not necessarily flow down to the purchaser of that input, if the sale is transacted at arm's length. In an arm's length transaction and a general equilibrium situation, we believe it is reasonable to assume that the seller generally attempts to maximize its total revenue by charging as high a price and selling as large a volume as the market will bear. Thus, it is not likely the seller will pass countervailable benefits through to the purchaser. In the absence of evidence to the contrary, we have determined that purchasers of machinery for iron and steel manufacturing machinery do not receive indirect benefits as a result of subsidies to producers of such machinery.

Indirect Subsidies To Purchasers of Hot-Rolled Sheet or Coil

The petitioner alleged that producers of welded carbon steel pipes and tubes benefit from the purchase of Korean hot-rolled sheet or coils at subsidized prices. Petitioner contended the government's domestic subsidies to POSCO and other hot-rolled plate and sheet producers constitute an indirect subsidy on raw materials used by the Korean pipes and tubes producers.

As indicated above, we believe that benefits bestowed upon the manufacturer of an input do not flow down to the purchaser of that input if the sale is transacted at arm's length. However, our investigation of POSCO's dual pricing systems is related to this allegation and is discussed below.

POSCO's Dual Pricing System

In our countervailing duty investigation of certain steel wire nails from Korea, a dual pricing system used by POSCO to sell rod to nail producers was examined by the Department to determine if this system, as implemented by a government-owned firm, conferred a subsidy to the nail producers that purchase rod, Since this dual pricing system also applies to sales of hot-rolled sheet or coil (coil) to pipe and tube producers, we have examined POSCO's pricing for purposes of this investigation a well.

As in the case of rod, coil is purchased on a cash or local letter of credit basis. The letter of credit price is stated in U.S. dollars but paid for in Korean won at the official Bank of Korea exchange rate prevailing on the date of delivery. All cash purchases are made in Korean won. Coil purchased on the basis of a local letter of credit must be used to produce an export product, and POSCO requires evidence that such coil is destined for export use. Coil purchased on a cash basis can be used for both domestic or export sales. The letter of credit price is generally lower than the cash price, though there are exceptions.

The result is a dual pricing system, one for coil used in products which must be exported, the other for coil in products for either domestic or export use.

The government of Korea attributes the differences in prices in both markets to Korea's import duties. The Korean domestic market for coil is protected by a tariff. The market for coil used for export production, however, is unprotected as a result of a duty drawback system which generally results in a more competitive market for inputs destined for export.

Imported steel in Korea is subject to normal customs duties. As is commonly the practice, these duties are refunded if the steel is exported, whether or not further processing occurs. This is known as duty drawback, and does not confer a subsidy within the meaning of the countervailing duty law. However, this practice can create a dual pricing structure with respect to imported inputs, because the price for imported inputs used for products destined for the domestic market will include customs duty, while the duty will not be included in the price of imported inputs used in products destined for export. Since a domestic producer of the inputs acts to maximize revenues, his price to producers for the domestic market will be increased by an amount equal to the effective protection afforded by the tariff. The domestic producer of the inputs will not include that amount is its price to exporters of products using those imputs since no effective protection is afforded where duty drawback applies. Were he to do otherwise the exporters would turn to foreign sources for their inputs.

We have therefore determined that the different prices for purchases do not arise from a scheme to subsidize exports, but rather are a commercial response to a segmented market, one segment being protected and the other fully open to foreign competition.

Information on the record indicates that POSCO faces competition from producers of coil in Australia, France, and Japan who sell in the Korean market at comparable prices to POSCO's letter of credit prices. Our conclusion that POSCO's dual coil pricing system does not confer any countervailable benefit is consistent with the illustrative list of Export Subsidies (the List), annexed to the *Agreement on Interpretation and Application of Article VI, XVI and XXIII of the General Agreement on Tariffs and Trade.* Under item (d) of the List, price preferences for inputs to be used in the production of export goods constitute a subsidy only if the preference lowers the price of the input below that which the input purchaser would pay on world markets. *See* the list, item (d). Although this item applies specifically to subsidies provided by governments or their agencies, the principle contained in item (d) applies with equal force to these circumstances.

Loans at Favorable Foreign Currency Exchange Rates

The petitioner alleged that loans are made to Korean steel producers at fixed or manipulated rates of exchange that are more favorable than official or actual exchange rates.

Based on our investigation and verification, the Department has found no evidence of the existence of such a program.

Petitioner's Comments

Comment 1. Petitioner disputes International Trade Administration's (ITA) finding that the Korean government did not make preferential loans to steel producers and cites a large, long-term loan to POSCO at a 3.5 percent rate as evidence that such loans are being made.

DOC Position, Verified information indicates that the source of this loan was a war reparations fund negotiated between Japan and the government of Korea. The transaction in question was not a loan of funds to POSCO, but rather an installment purchase of Japanese steelmaking equipment in which the Japanese government supplied equipment to POSCO, but rather an installment purchase of Japanese steelmaking equipment in which the Japanese government supplied equipment to POSCO through the Korean government. POSCO paid the Korean government which in turn repaid the Japanese government. This program provides for the payment of war reparations by the government of Japan to the government of Korea through low-interest Japanese supplier's credits on a project by project basis. While each project is evaluated by the government of Japan for economic viability, there are no restrictions on the types of projects which may receive approval. In fact, evidence on the record indicates that a wide range of projects have been approved, including public works projects as well as commercial projects. Thus, assistance flowing from the war reparations fund is not restricted to an industry or group of industries, but rather is generally available. Therefore, we find that no subsidy exists with respect to this program.

In addition to this conclusion, the Department also notes that war reparations are the result of unique circumstances and reflect political and economic considerations which are outside of the realm of activities which are contemplated by the countervailing duty statute. Thus, the Department cannot envision an instance in which benefits flowing from payments made by one country to another as a result of war reparations confer countervailable subsidies within the meaning of the Act. Certainly in this case we find that there is no countervailable subsidy arising from war reparations.

Comment 2. Petitioner disputes ITA's finding that the Korean government did not guarantee any loans received by the steel producers and cites a loan from an Austrian source to POSCO in which the government-owned Korean Development Bank had guaranteed the repayment of the loan on behalf of POSCO.

DOC Position. Our investigation indicates that the loan in question was actually an installment purchase of equipment at a rate of interest negotiated on an arm's-length basis between POSCO and the Austrian lender. As part of the agreement, POSCO was required to obtain a loan guarantee which the Korean Development Bank granted in exchange for a loan guarantee fee. We have determined that the fee paid by POSCO was equivalent to that which the Korean Development Bank would charge other customers in similar circumstances. Therefore, since POSCO's loan guarantee does not appear to be preferential, we do not find it to confer a subsidy.

Comment 3. Petitioner objects to ITA's decision not to countervail preferential export loans as a result of the action taken by the Korean government on June 28, 1982, at which time all preferential interest rates were eliminated. Petitioner argues that ITA's decision is contrary to the ITA's methodology for measuring subsidization during calendar year 1981. Petitioner also argues that ITA's decision is inconsistent with its decision not to countervail a special investment tax credit by Masan Tube which was based on a 1981 investment but considered quantifiable in 1982.

DOC Position. The Department's policy is to encourage foreign governments to eliminate all forms of subsidization. In this case, since benefits were eliminated on June 28, 1982, and suspension of liquidation did not take place until October 12, 1982, the entires subject to potential countervailing duty liabilities were no longer benefiting from preferential financing and the previous benefits quantified in 1981 should not be considered in establishing the estimated duty deposit rate for future entries.

This issue is distinguishable from our decision regarding investment tax credits; in that instance, we do not believe the subsidy can be quantified until 1982 when company books are closed for the tax year 1981. We will quantify any subsidy received under this program for assessment purposes within the context of a section 751 review.

Comment 4. Petitioner argues that the ITA cannot use commercial bank interest rates to determine the interest rate that recipients of preferential government financing would pay absent government subsidies. Petitioner contends that Korean commercial banks are largely government controlled and generally carry out the government policy of providing subsidized credit to favored industries. Therefore, absent preferential government financing, Korean steel producers would be forced to obtain at least some, if not all, of their funds from the private or "curb" market at substantially higher rates than those charged by commercial banks. Therefore, petitioner argues that "curb" market interest rates should be used as the benchmark for quantifying any subsidies attributable to preferential financing.

DOC Position. Verified information obtained in this and our recently completed countervailing duty investigation involving certain steel wire nails from Korea indicates that the government of Korea does not require commercial banks to make available credit to certain borrowers. Lending decisions are left to individual banks, which decide whether to grant each loan on the basis of their individual assessment of a loan applicant's creditworthiness. Also, we verified that the government of Korea does not control the amount of funds an individual bank allocates to export loans and normal commercial loans. This decision is also made by individual banks. Banks may give preferences to Korea's production industries and export industries. However, these preferences do not result from government direction or subsidization, but from each bank's own evaluation of how its loan funds can best be secured and effectively used.

Furthermore, the "curb" market has serviced, in the past, those high risk borrowers which are normally excluded from Korea's primary and secondary sources of credit. Recently, the Korean government has restricted the activities of the "curb" market and taken steps to permit borrowers to obtain loans through authorized Korean financial institutions. Since the steel producers under investigation indicate that commercial loans were their alternate source of credit to export loans, and since these loans were freely administered by commercial banks, we believe that the rates on these loans were properly used to quantify the amount of subsidies received from the preferential export financing programs.

Comment 5. Petitioner argues that, since no cash dividends have been paid by POSCO since the date of its establishment, the Korean government's provision of equity capital to POSCO is inconsistant with commercial considerations because Korean investors demand cash dividends. Therefore, petitioner argues the government's equity investment in POSCO constitutes a countervailable subsidy.

DOC Position. We have learned that it is not uncommon in Korea for a closed corporation, such as POSCO, to elect not to pay cash dividends but, rather, to retain earnings for capital expansion. Our principal consideration in judging whether a government's participation in a firm is consistent with commercial considerations is the firm's profitability and commercial viability during the period under consideration. We find that POSCO has shown consistent profits since it became fully operational in 1973 and our examination of its financial ratios (see above section on "Governmental Capital Grants") shows a healthy firm. Therefore, we find the government's equity investments to be commercially acceptable. The fact that the government chose not to take capital out of the firm in the form of dividends is not enough, in and of itself, to lead us to change our position.

Comment 6. Petitioner challenges the ITA's assumption that, in the case of subsidies paid to an upstream supplier, the seller generally attempts to maximize its total revenues, and that benefits, bestowed upon the manufacturer of an input, do not necessarily flow down to the purchaser of that input, if the sale is transacted at arm's length. Petitioner contends that, in the absence of monopolistic power, a firm maximizes profits and not revenues. Furthermore, subsidies to an industry induce new entry into that industry and force prices down. Petitioner further asserts that the Department cannot consider the availability of alternate, unsubsidized sources of raw materials.

DOC Position. The position of the petitioner rests upon a faulty interpretation of the legislative history of the Trade Agreements Act of 1979 (TAA). Nothing in the legislative history of the TAA precludes the Department from considerations of this type. The floor debates cited by petitioner relate to the question of regional development programs and comparative advantage, not the question of alternate sources of supply. It makes no economic sense for the Department to find that a subsidy exists simply because an exporter chose one source of supply over another where no price differential exists. Since alternate supplies are available to producers of pipe and tube, and there is no evidence of a pricing pattern by POSCO which undercuts f.o.b. prices

available from other suppliers, inlcuding non-Korean suppliers, there is no reason to believe that any subsidies which may have been conferred upon POSCO have been passed through to procedures of pipe and tube.

Comment 7. Petitioner contends that benefits derived from deferred payment of tariffs on imported equipment or from reduced port charges should be divided by a firm's total value of export sales instead of the firm's total value of sales to arrive at the *ad valorem* benefit for that firm. Petitioner asserts that these subsidies particularly benefit exports.

DOC Position. We have determined that these benefits are related to domestic and export sales. Therefore, for allocation purposes, we have separated the subsidy according to the percentages that domestic and export sales represent of total sales. The portion allocated to export sales is considered an export subsidy and divided by total exports; the other portion is divided by total sales.

Comment 8. Petitioner states that there is no legal basis for ITA to adjust the benefit to POSCO from its exemption from corporate tax for any additional defense taxes paid by that firm.

DOC Position. Under Korean tax law, a firm cannot receive a corporate tax exemption unless it pays additional defense tax. Section 771 of the Act allows an offset to benefits for any payment made in order to qualify for, or to receive the benefit of, the subsidy.

Comment 9. Petitioner asserts that POSCO has enjoyed massive government infrastructure aid in the form of road, rail and harbor construction.

DOC Position. Our investigation indicates that government infrastructure aid to Pohang area was not earmarked especially for POSCO but for all industries using these facilities. Under these circumstances, we do not consider government infrastructure expenditure to be countervailable.

Comments of Other Domestic Parties To the Proceeding.

Comments were received from counsel on behalf of Bethlehem Steel Corporation (Bethlehem Steel), a party to this proceeding. These comments extensively paralleled the comments submitted by U.S. Steel which were addressed above. However, there were certain additional comments submitted by bethlehem steel which are addressed below.

Comment 1. Bethlehem Steel argues that all benefits attributable to preferential export financing are not exhausted during the year in which they were received and their effect continues throughout subsequent years—in the form of increased equity capital, increased market value of the stock, increased working capital or increased asset base. Bethlehem Steel concludes that a subsidy such as preferential interest rates must be treated by the ITA as an infusion of capital and amortized or capitalized for a period of time after their receipt.

DOC Position. Since the loans in question were either short-term (90 days or less) or long-term loans with preferential treatment which was of short-term duration (less than one year), the department allocated these benefits over the year in which these loans were transacted. We believe that such programs which offer only limited short-term benefits are properly allocated in the year of their receipt.

Comment 2. Bethlehem Steel indicates that there is a possibility that shipments of this merchandise, which have received preferential interest rate financing, entered the United States after the notice of suspension of liquidation and that the correct deposit rate for at least these shipments must include the *ad valorem* equivalent of the preferential interest rates received.

DOC Position. Information available to the department indicates that, on the average, this merchandise enters the United states approximately 90 days after purchase.Although it is conceivable that some individual shipments of this merchandise may have taken longer to enter the United States, we are satisfied that our bonding requirements accurately reflect the overall economic impact of the subsidies received by Korean producers.

Comment 3. Bethlehem Steel argues that the government either directly or indirectly controls wages in the steel sector and that this is evidenced by comparing the average percentage of monthly income increase for workers reported by POSCO in its response to published country-wide average labor statistics.

DOC Position. Comparisons of varying percentage figures can be misleading in that many different variables affect the total compensation paid by a firm to its employees. ITA has uncovered no evidence of either direct or indirect government control of steel sector wages.

Comment 4. Bethlehem Steel alleges that Korean steel producers may have benefitted from preferential financing from the Korean Long-Term Credit Bank (KLB).

DOC Position. The Department has found no evidence of Korean steel producers receiving preferential loans from the KLB.

Comment 5. Bethlehem Steel indicates that Korean steel producers may be receiving special infrastructure aid from the government under Korea's Fourth Five-Year economic development plan.

DOC Position. Although Korea's Fourth Five-Year economic development plan includes plans for infrastructure improvements, ITA has no evidence on record that this infrastructure aid is being targeted to a particular company or industry and therefore it is not considered countervailable.

Respondent's Comments

Comment 1. Counsel for respondents argues that the Department incorrectly calculated the benefit received by steel producers attributable to the program providing accelerated depreciation for exporters. Respondents contend that any manufacturer operating its facilities more than 12 hours a day, on an annual basis, is eligible for an additional 20 percent accelerated depreciation. Since the export depreciation program provides for an additional 30 percent accelerated depreciation, respondents contend that ITA should have countervailed only 10 percent of the accelerated depreciation instead of the entire 30 percent.

DOC Position. Since ITA cannot determine with certainty whether the steel producers which used the special export depreciation program would have received benefits under the other program in question, we have not made this hypothetical adjustment and have considered the entire 30 percent to be a countervailable subsidy.

Comment 2. Respondents dispute ITA's methodology of attributing tax benefits for POSCO to 1982 despite the fact that the tax exemptions expired on December 31, 1981.

DOC Position. It is our opinion that tax benefits should be attributable to the year in which their exact amounts become known by the recipients. Since POSCO did not settle its tax liabilities for 1981 until April 1982, we believe a benefit under this program may have continued in 1982 and have thus included this subsidy in our estimated duty deposit rate for future entries.

Comment 3. Respondents argue that almost all industries in Korea are eligible for deferred payment of customs duties and that ITA should not consider this program to be a subsidy

DOC Position. Our review of the law on which this deferral is based showed that there are definite limiting criteria by which certain industries, and certain companies within industries, benefit to a

greater extent than others. Therefore we consider this program to confer a domestic subsidy.

Comment 4. Union Steel objects to the Department calculating benefits on an industry-wide basis, for programs available to all firms within that industry, when not all firms have utilized the program.

DOC position. In general, it has been our long-standing administrative practice to calculate benefits on a country-wide basis except in cases in which a countervailable program is company-specific.

Comment 5. Respondents object to the use of the Masan Tube bonding rate for bonding requirements of any other pipe and tube producer not investigated. Respondents argue that Masan Tube benefited from special Masan Free Export Zone benefits which are not available to all pipe and tube producers. Respondents cite the example of Dong Jin Steel Co., Ltd. (Dong Jin), a new subsidiary of POSCO, which does not qualify for these benefits.

DOC Position. The Department cannot know in advance whether any new pipe and tube producers are located in the Masan Zone or have foreign ownership and are eligible for benefits under the Foreign Capital Inducement Law. Until an investigatory record can be established for new firms, we must continue to assume possible receipt of benefits from all existing programs. Since we have investigated Dong Jin's situation during the course of verifying the responses, we will set that firm's bonding rate equivalent to that of POSCO's bonding rate based on the best available information. Dong Jin will also be listed with POSCO in our "Suspension of Liquidation" section. We are also listing POSCO and Dong Jin within the pipe and tube industry should the firm commence exportation of this merchandise to the United States in the future. POSCO's rate will also be applied to all other manufacturers, producers, or exporters of pipe and tube which were not investigated.

Comment 6. Respondents object to the failure of the Department to exclude certain pipe and tube producers from this determination in spite of a "zero" bonding requirement.

DOC Position. During the period for which we are measuring subsidization, pipe and tube producers received benefits from perferential export financing in amounts which were greater than *de minimis*. We have waived bonding requirements for these producers since the Korean government eliminated all preferential financing rates on June 28, 1982. However, since the program still exists, and preferential rates can still be reinstated in the future, we are not excluding any firms which may receive future benefits.

Verification

In accordance with section 776 (a) of the Act, we verified the data relied upon in our final determinations. During this verification, we followed standard procedures, including inspection of documents, discussions with government officials and on-site inspection of manufacturers' operations and records. We also spoke with officials of a private commercial bank in Korea during this investigation.

Suspension of Liquidation

The suspension of liquidation ordered in our preliminary determinations shall remain in effect until further notice. The estimated net subsidy for each product is as follows:

Products and manufacturer/producer/exporter	Ad valorem rate
Hot-rolled carbon steel plate: All manufacturers/ producers/exporters	1.88
Hot-rolled carbon steel sheet: All manufacturers/ producers/exporters	[illegible]
Galvanized carbon steel sheet:	
POSCO (Dong Jin)	1.74
Union Steel	1.36
All other manufacturers/producers/exporters	1.74
Small diameter welded carbon steel pipes and [illegible]:	
Masan Tube	1.86
POSCO (Dong Jin)	1.88
Other manufacturers investigated	[illegible]
All other manufacturers/producers/exporters	1.88

We are using a zero cash deposit or bonding rate for all firms investigated which produce pipes and tubes, except for Masan Tube and Dong Jin, because they received benefits of 0.14 percent which is *de minimis*. However, they are not excluded from these final affirmative determinations.

Our reason for not excluding these firms is that all of them had received benefits, which were more than *de minimis*, from preferential short-term export financing programs during the period for which we are measuring subsidization. We did not include these totals in the above estimated subsidy rates because the government subsequently eliminated the preferential loan rate for export loans on June 28, 1982. However, the programs themselves have not been eliminated and there remains a possibility that preferential rates will be resumed in the future.

With respect to these preferential short-term export financing programs, we have concluded that no entries subject to this suspension of liquidation have benefited from these programs and we have not included the amounts of subsidies found on these programs in 1981 in the subsidy amounts shown above.

We are directing the U.S. Customs Service to require a cash deposit or bond in the amount indicated above for each entry of the subject merchandise entered on or after the date of the publication of this notice in the **Federal Register**.

Where the manufacturer is not the exporter, and the manufacturer is known, the rate for the manufacturer shall be used in determining the cash deposit or bond amount. If the manufacturer is unknown, the rate for all other manufacturers/producers/exporters shall be used.

Where a company specifically listed above, with the exception of POSCO and Dong Jin, has not exported a particular product during the period for which we are measuring subsidization, the cash deposit or bond amount shall be based on the highest rate for products that were exported by that company. We are directing the U.S. Customs Service to require a cash deposit or bond in the amount indicated above for each entry of the subject merchandise entered on or after the date of publication in the **Federal Register**.

ITC Notification

In accordance with section 705(d) of the Act, we will notify the ITC of this action and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information either publicly or under any administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

This notice is published pursuant to section 705(d) of the Act and section 355.33 of the Department of Commerce Regulations (19 CFR 355.33).

Lawrence Brady,

Assistant Secretary for Trade Administration.

December 16, 1982.

APPENDIX

Description of Products

For purpose of this investigation:

1. The term *"hot-rolled carbon steel plate"* covers carbon steel products, whether or not corrugated or crimped; not pickled; not cold-rolled; not in coils; not cut, not pressed, and not stamped to non-rectangular shape; 0.1875 of an inch or more in thickness and over 8 inches in width; as currently provided for in items 607.6615, or 607.94, of the *Tariff Schedules of the United States*

Annotated ("TSUSA"); and hot- or cold-rolled carbon steel plate which has been coated or plated with zinc including any material which has been painted or otherwise covered after having been coated or plated with zinc, as currently provided for in items 608.0710 or 608.11 of the TSUSA. Semi-finished products of solid rectangular cross section with a width at least four times the thickness in the cast condition or processed only through primary mill hot-rolling are not included.

2. The term *"hot-rolled carbon steel sheet"* covers the following hot-rolled carbon steel products. Hot-rolled carbon steel sheet is a hot-rolled carbon steel product, whether or not corrugated or crimped and whether or not pickled; not cold-rolled; not cut, not pressed, and not stamped to non-rectangular shape; not coated or plated with metal; over 8 inches in width and in coils or if not in coils under 0.1875 of an inch in thickness and over 12 inches in width; as currently provided for in items 607.6610, 607.6700, 607.8320, 607.8342, or 607.9400 of the *Tariff Schedules of the United States Annotated "TSUSA". Please note that the definition of hot-rolled carbon steel sheet includes some products classified as "plate" in the TSUSA (Items 607.6610 and 607.8320.*

3. The term *"cold-rolled carbon steel sheet"* covers the following cold-rolled carbon steel products. Cold-rolled carbon steel sheet is a cold-rolled carbon steel product, whether or not corrugated or crimped and whether or not pickled; not cut, not pressed, and not stamped to non-rectangular shape; not coated or plated with metal; over 8 inches in width and in coils or if not in coils under 0.1875 of an inch in thickness and over 12 inches in width; as currently provided for in items 607.8320 or 607.8344 of the *Tariff Schedules of the United States Annotated ("TSUSA"). Please note that the definition of cold-rolled carbon steel sheet includes some products classified as "plate" in the TSUSA (Item 607.8320).*

4. The term *"Galvanized carbon steel sheet"* covers hot- or cold-rolled carbon steel sheet which has been coated or plated with zinc including any material which has been painted or otherwise covered after having been coated or plated with zinc, as currently provided for in items 608.0710, 608.0730, 608.11 or 608.13 of the *Tariff Schedules of the United States Annotated ("TSUSA"). Note that the definition of galvanized carbon steel sheet includes some products classified as "plate" in the TSUSA (Item 608.0710 and 608.11).* Hot- or cold-rolled carbon steel sheet which has been coated or plated with metal other than zinc is not included.

5. The term *"small diameter welded carbon steel pipes and tubes"* covers welded carbon steel pipes and tubes with walls not thinner than 0.065 of an inch, of circular cross section and 0.375 of an inch or more in outside diameter but not more than 16 inches as currently provided for in items 610.3208, 610.3209, 610.3231, 610.3232, 610.3241, 610.3244, and 610.3247, of the *Tariff Schedules of the United States Annotated ("TSUSA").* Pipes or tubes suitable for use in boilers, superheaters, heat exchangers, condensers, and feedwater heaters, or conforming to A.P.I. specifications for oil well tubing, with or without couplings, cold drawn pipes and tubes and cold-rolled pipes and tubes with wall thickness not exceeding 0.1 inch are *not included.*

BILLING CODE 3510-25-M

Elemental Sulphur From Canada; Preliminary Results of Administrative Review of Antidumping Finding and Tentative Determination To Revoke in Part

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Results of Administrative Review of Antidumping Finding and Tentative Determination to Revoke in Part.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on elemental sulphur from Canada. The review covers 43 of the 49 known producers and/or exporters of this merchandise to the United States currently covered by the finding, generally for the period December 1, 1980 through November 30, 1982. The review indicates the existence of dumping margins in particular periods for certain exporters.

As a result of this review the Department has preliminarily determined to assess dumping duties for individual exporters equal to the calculated differences between United States price and foreign market value on each of their shipments during the period of review. Where company-supplied information was inadequate or no information was received, the Department has used the best information available. The Department has also tentatively determined to revoke the finding with respect to the following companies: Tiger Chemicals, Ltd., Pan Canadian Petroleum, Ltd., Amoco Canada Petroleum Company, Ltd., Exxon Chemical Americas, Inc. (merchandise manufactured by Imperial Oil, Ltd. and exported by Exxon Chemical), Canterra Energy, Ltd. (formerly known as Aquitaine Company of Canada, Ltd.), CDC Oil & Gas, Ltd., and Dome Petroleum, Ltd.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: December 27, 1982.

FOR FURTHER INFORMATION CONTACT: Jonathan Seiger or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-5255.

SUPPLEMENTARY INFORMATION:

Background

On April 5, 1982, the Department of Commerce ("the Department") published in the Federal Register (47 FR 14507) the final results of its last administrative review of the antidumping finding on elemental sulphur from Canada and announced its intent to conduct the next administrative review by the end of December 1982. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of elemental sulphur, currently classifiable under item 415.4500 of the Tariff Schedules of the United States Annotated (TSUSA).

The Department knows of a total of 49 producers and/or exporters to the United States of elemental sulphur from Canada still covered by the finding, 43 of which are covered by this notice. For three of the six other firms, Hudson's Bay Oil & Gas, Ltd., Chevron Standard, Ltd., and Gulf Oil Canada, Ltd., we published the preliminary results of our first administrative review and tentative determination to revoke the finding on April 9, 1981 (46 FR 21214). We made those results final on July 23, 1982 (47 FR 31911).

For Mobil Oil Canada, Ltd. and Union Oil Company of Canada, Ltd., we published the preliminary results of our first administrative review on September 15, 1982 (46 FR 45789). In view of the Department's failure to obtain information from Cansulex, Ltd. concerning third country sales made on behalf of Mobil and Union, the Department is considering alternative assessment approaches for these two firms.

Therefore, the results of our first administrative review for Mobil and

Union have not yet been made final. For Home Oil Company, Ltd. we published the preliminary results of our second administrative review and intent to revoke in part on April 27, 1982 (47 FR 18016). We made those results final on July 22, 1982 (47 FR 31716). Our current review generally covers the period from December 1, 1980 through November 30, 1981. The applicable periods are indicated for each firm under *Preliminary Results of the Review*. For each firm, periods not listed were covered either in our first administrative review or by the Treasury Department.

Seventeen exporters did not export elemental sulphur to the U.S. during the period December 1, 1980 through November 30, 1981. The estimated duty deposit rates for these firms will be the most recent information for each firm. Ten exporters failed to respond to our questionnaire or gave inadequate information. For these non-responsive exporters we used the best information available to determine the assessment and estimated duty deposit rates. The best information available is the most recent rate for each firm, or the highest current rate among all responding firms with shipments during the review period, whichever is higher.

Petrofina Canada was acquired by Petro-Canada Exploration, Inc. on February 1, 1981. Petro-Canada stated in its response that it was unable to provide information on sales made by Petrofina prior to the acquisition. Therefore, we have used the best information available with regard to Petrofina for sales made prior to February 1, 1981.

Pacific Petroleum was acquired by Petro-Canada on September 30, 1979. In our last review we completed review of all Pacific entries made prior to the acquisition. Therefore, with the exception of merchandise produced by Pacific and shipped by Canamex during 1974 and 1975, we are not covering pacific in this review or future section 751 reviews. This is not a proposal to revoke the finding with respect to Pacific. Should Pacific begin exporting the covered merchandise to the U.S., we shall treat the firm as a new exporter.

United States Price

In calculating United States price the Department used purchase price or exporter's sales price, as appropriate, as defined in section 772 of the Tariff Act or sections 203 or 204 of the Antidumping Act of 1921 ("the 1921 Act"). Purchase price was based either on the packed, delivered price to an unrelated purchaser in the U.S. or to an unrelated trading company for export to the U.S. Exporter's sales price was based on the ex-factory, packed price to the first unrelated purchaser in the United States. Where applicable, we deducted U.S. and Canadian inland freight. No other adjustments were claimed or allowed.

With regard to merchandise shipped by Canamex Commodity Corporation, the Department has reversed its position outlined in Comments 12 and 13 of its notice of final results of administrative review of the finding of April 5, 1982 (47 FR 14507). Accordingly, the Department has used the price to Canamex from the manufacturer to establish United States price.

Foreign Market Value

In calculating foreign market value the Department used home market price, sales to third countries, or constructed value, as appropriate, all as defined in section 773 of the Tariff Act or sections 205 and 206 of the 1921 Act. For companies where we used home market price, at least 5.12 percent of total sulphur sales (and at least 6.98 percent of the amount sold to third countries) was sold in the home market during the covered period. The Department based home market prices on the packed, delivered price to unrelated customers, with deductions, where applicable, for Canadian inland freight and remelting costs. The Department adjusted third-country prices, where applicable, for ocean freight, Canadian inland freight, and handling charges. No other adjustments were claimed or allowed. For Canamex, the Department has used the manufacturer's prices to home market customers to establish foreign market value.

Preliminary Results of the Review and Tentative Determination to Revoke in Part

As a result of our comparison of United States price to foreign market value, we preliminarily determine that the following margins exist:

Manufacturer and exporter	Time period	Margin (percent)
Amerada Minerals	12/01/80–11/30/81	'28.90
Amoco Canada	12/01/80–11/30/81	0

West Decalta Petroleum	12/01/80–11/30/81	'6.90
Westcoast Transmission	12/01/80–11/30/81	'26.90

'No shipments during the period

The Department has concluded that, for the period July 1, 1978 through November 30, 1981, all sales by Canterra Energy, Ltd. were made at not less than fair value. All sales by Pan Canadian Petroleum, Ltd. and Tiger Chemicals, Ltd., with the exception of a few for which we found *de minimis* margins, were made at not less than fair value from January 1, 1979 through November 30, 1981, and from November 1, 1978 through November 30, 1981, respectively.

All sales by Amoco Canada were made at not less than fair value from January 1, 1979 through November 30, 1981. Prior Treasury Department review found that all sales by Amoco were made at not less than fair value from July 1, 1978 through December 31, 1978. All sales of elemental sulphur manufactured by Imperial Oil and exported by Exxon Chemical Americas were made at not less than fair value from March 1, 1977 through November 30, 1981. There have been no known shipments of elemental sulphur to the U.S. from Canada by CDC Oil & Gas, Ltd. since the date of the finding, December 17, 1973, through November 30, 1981. Lastly, Dome Petroleum has not shipped elemental sulphur from Canada to the U.S. from December 17, 1973 through November 30, 1980, and all sales by Dome were made at not less than fair value from December 1, 1980 through November 30, 1981. There is no evidence of any sales at less than fair value by these seven companies since November 30, 1981. As provided for in § 353.54(e) of the Commerce Regulations, all seven firms have agreed in writing to an immediate suspension of liquidation and reinstatement of the finding if circumstances develop which indicate that elemental sulphur produced and/or exported by these companies and thereafter imported into the United States is being sold by them at less than fair value.

Therefore, as a result of our review we also tentatively determine to revoke the finding on elemental sulphur from Canada with respect to Canterra Energy, Ltd., Pan Canadian Petroleum, Ltd., Tiger Chemicals, Ltd., CDC Oil & Gas, Ltd., Dome Petroleum, Ltd., Amoco Canada Petroleum Ltd., and elemental sulphur manufactured by Imperial Oil, Ltd. and exported by Exxon Chemical Americas, Inc. If this partial revocation is made final it will apply to entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 30 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made within 5 days of the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all appropriate entries made with purchase or export dates during the time periods involved. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue assessment instructions on each exporter directly to the Customs Service.

Further, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based upon the most recent of the margins calculated above shall be required on all shipments of elemental sulphur by these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. Since CDC Oil & Gas has not shipped elemental sulphur to the U.S. since the date of the finding, the Department intends not to require cash deposits on shipments by CDC entered after publication of this notice. The Department also intends to waive the cash deposit requirement for Pan Canadian Petroleum, Petro-Canada Exploration, Brimstone Export (except for elemental sulphur produced by Canterra Energy), and Petrofina/Canamex since the weighted-average margins for these firms are less than 0.5 percent and, therefore, *de minimis*. These deposit requirements and waivers shall remain in effect until publication of the final results of the next administrative review.

This administrative review, tentative determination to revoke in part, and notice are in accordance with section 751(a)(1) and (c) of the Tariff Act (19 U.S.C. 1675(a)(1), (c)) and §§ 353.53 and 353.54 of the Commerce Regulations (19 CFR 353.53, 353.54).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

December 17, 1982.

BILLING CODE 3510-25-M

Fish Netting of Man-Made Fibers From Japan; Revised Preliminary Results of Administrative Review of Antidumping Finding and Tentative Determination to Revoke in Part

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of revised Preliminary Results of Administrative Review of Antidumping Finding and Tentative Determination to Revoke in Part.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on fish netting of man-made fibers from Japan. The review covers 74 of the 81 known manufacturers, exporters, and third-country resellers of this merchandise to the United States and varying time periods through May 31, 1980.

We originally published preliminary results of this review on May 5, 1981. interested parties were given an opportunity to comment and we held a hearing on June 12, 1981. Based on the comments received we permitted various firms to rectify specific deficiencies in their responses or, in the cases of firms initially not responding, to furnish the Department with the requested information.

As a results of the review of all of the information submitted (including the supplemental responses), the Department has preliminarily determined to assess dumping duties for certain firms equal to the calculated differences between United States price and foreign market value on each of their shipments during the periods reviewed. Where company-supplied information was inadequate or no information was received, the Department has used the best information available. The Department also has tentatively determined to revoke the finding with respect to such fish netting manufactured and exported by Moribun Shoten. This firm made all sales to the United States at not less than fair value for at least two years. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: December 27, 1982.

FOR FURTHER INFORMATION CONTACT: Harry A. Patrick or David R. Chapman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, Telephone: (202) 377-2923.

SUPPLEMENTARY INFORMATION:

Background

On June 9, 1972, a dumping finding with respect to fish netting of man-made fibers from Japan was published in the **Federal Register** as Treasury Decision 72-158 (37 FR 11560). On May 5, 1981 the Department of Commerce ("the Department") published in the **Federal Register** (46 FR 25118-20) its preliminary results of its administrative review of this finding. Interested parties were given an opportunity to comment on the preliminary results and the Department

held a hearing on June 12, 1981. As a result of comments received, the Department decided to allow certain firms to submit additional data. These revised preliminary results incorporate changes on the supplementary submissions. The substantive provisions of the Antidumping Act of 1921 ("the 1921 Act") and the appropriate Customs Service regulations apply to all unliquidated entries made prior to January 1, 1980.

Scope of the Review

Imports covered by the review are shipments of fish netting of man-made fibers, currently classifiable under items 355.4520 and 355.4530 of the Tariff Schedules of the United States Annotated (TSUSA).

The Department knows of a total of 81 manufacturers, exporters, and third-country resellers of Japanese fish netting of man-made fibers to the United States. This review covers 74 of them for various time periods through May 31, 1980. Different time periods are involved for different firms. We will cover the remaining 7 firms in subsequent reviews. Shipments by the seven firms not covered occurred subsequent to May 31, 1980.

Twelve firms did not export fish netting of man-made fibers to the U.S. during the periods reviewed. The rate for cash deposit of estimated antidumping duties for these firms shall be based on the most recent information for each firm. In the absence of a prior rate for a firm, the cash deposit rate shall be based on the highest rate for responding firms with shipments during the most recent period reviewed.

Forty-four firms failed to respond or provided inadequate responses to our questionnaire. For these non-responsive exporters we used the best information available to determine the assessment rates. The best information available generally is the highest rate for responding firms in each period of non-response or the most recent previous rate for each non-responding firm, whichever is higher. The cash deposit rate shall be based on the most recent rate listed below for each firm.

We received requests from nine importers for revocation of the finding for shipments to them from eleven manufacturers and two trading companies. Three of the eleven manufacturers, Momoi Net Manufacturing Co., Ltd., Moribun Shoten, and Amikan Fishing Net Mfg. Co., Ltd., also requested revocation. Moribun Shoten made all sales to the United States at not less than fair value for at least a two-year period. As provided for by § 353.54(e) of the Commerce Regulations, Moribun Shoten has agreed in writing to an immediate suspension of liquidation and reinstatement of the finding if circumstances develop which indicate that fish netting of man-made fibers manufactured by Moribun Shoten and thereafter imported into the United States is being sold by Moribun at less than fair value. The other two manufacturers, Momoi Net Manufacturing Co., Ltd. and Amikan Fishing Net Mfg. Co., Ltd., did not meet the criteria set forth in § 353.54 of the Commerce Regulations requiring at least a two-year period of sales at not less than fair value. The Department therefore will not consider revocation for these two firms at this time. It is not our practice to revoke when presented with applications by importers because such firms have no control over, nor knowledge of, the prices at which a manufacturer, exporter, or third-country reseller sells the merchandise in its home market or to third countries. The importers therefore cannot assure us that there will be no sales at less than fair value.

United States Price

In calculating United States price the Department used purchase price, as defined in section 772 of the Tariff Act of 1930 ("the Tariff Act") or section 203 of the 1921 Act. Purchase price was based on the CIF, packed price to unrelated purchasers in the United States. Where applicable, deductions were made for ocean freight, marine insurance, and shipping charges. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value the Department used the price to unrelated purchasers in Japan, or to unrelated purchasers in countries other than Japan when home market sales were insufficient to be used as a basis for comparison, as defined in section 773 of the Tariff Act or section 205 of the 1921 Act, as appropriate. Foreign market value was based on the packed price with deductions, where applicable, for inland freight, differences in credit, and shipping charges. Further adjustments were made, where applicable, for differences in packing costs and differences in physical characteristics, in accordance with § 353.16 of the Commerce Regulations or § 153.11 of the Customs Regulations. Claimed adjustments for differences in physical characteristics were denied when they were not adequately quantified. An adjustment was claimed for a commission, but not adequately explained; therefore, the claim was disallowed. A claim for differences in profit between sales to the United States and sales in Japan was disallowed because there is no provision in the statute or our regulations for making such an adjustment.

Preliminary Results of the Review and Tentative Determination To Revoke in Part

As a result of our comparison of United States price to foreign market value, we preliminarily determine that the following margins exist:

T2Manufacturer/exporter	Time period	Margin (percent)
Amikan Fishing net Mfg. Co., Ltd.	12/1/78–5/31/79	0.53
	6/1/79–5/31/80	0
Amsho Kabushiki Kaisha, Ltd	5/1/71–5/31/80	[1]4.30

[1] No shipments during the period.

Also as a result of our review we tentatively determine to revoke the antidumping finding on fish netting of man-made fibers from Japan with regard to such fish netting manufactured and exported by Moribun Shoten. If this revocation is made final, it shall apply to all unliquidated entries of this merchandise manufactured and exported by Moribun Shoten entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 30 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all appropriate entries with purchase dates during the time periods involved. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue assessment instructions on each exporter directly to the Customs Service.

Further, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based upon the most recent of the margins calculated above shall be required on all shipments of Japanese fish netting of man-made fibers from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. The Department waives the deposit requirements for Inagaki Fishing Net Mfg. Co., Ltd. (exporter Nichimen Co., Ltd.) and Miye Seimo Co., Ltd. since their margins are less than 0.5 percent and therefore *de minimis*. These deposit requirements and waivers shall remain in effect until publication of the final results of the next administative review.

This administrative review, tentative determination to revoke in part, and notice are in accordance with sections 751(a)(1) and (c) of the Tarriff Act (19 U.S.C. 1675(a)(1), (c)) and §§ 353.53 and 353.54 of the Commerce Regulations (19 CFR 353.53, 353.54).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

December 17, 1982.

BILLING CODE 3510-25-M

Float Glass From the Federal Republic of Germany; Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Countervailing Duty Order.

SUMMARY: The Department of Commerce is issuing a countervailing duty order regarding imports of float glass from the Federal Republic of Germany. A cash deposit of estimated duties will be required in the amount of 1.20 percent of the f.o.b. invoice price on future entries of float glass from the Federal Republic of Germany.

EFFECTIVE DATE: December 27, 1982.

FOR FURTHER INFORMATION CONTACT: Stephen Nyschot or Richard Moreland, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On January 7, 1976, the Treasury Department published a negative "Notice of Final Countervailing Duty Determination" with respect to float glass from the Federal Republic of Germany ("the FRG") (41 FR 1300). The petitioners challenged that determination in court and on November 19, 1979, the Court of Customs and Patent Appeals ("the C.C.P.A.") ruled that bounties or grants within the meaning of section 303 of the Tariff Act of 1930 ("the Tariff Act") had been given on float glass from the FRG, and remanded the case to the Customs Court, now the Court of International Trade ("the C.I.T."), for action not inconsistent with its decision (67 C.C.P.A. 11, C.A.D. 1237, 610 F.2d 770 (1979)). Liquidation of entries was suspended following the C.C.P.A.'s decision.

In a subsequent decision of August 21, 1981 (69 C.C.P.A. ——, 657 F.2d 1226),

the C.C.P.A. clarified its earlier opinion, stating that the C.I.T. is the appropriate forum for determining "what the net bounty or grant is or, at least, the method by which it is to be determined." The case has been pending before the C.I.T. since that time.

The authority for administering the countervailing duty law was transferred from the Treasury Department to the Department of Commerce ("the Department") by Reorganization Plan No. 3 of 1979, effective January 2, 1980.

Section 104(b) of the Trade Agreements Act of 1979 ("the TAA") provides that the government of a "country under the Agreement," as defined by section 701(b) of the Tariff Act, or exporters of merchandise covered by certain countervailing duty orders, may request an injury determination by the International Trade Commission ("the ITC"). Section 104(b)(1)(C) of the TAA states that a countervailing duty order "which is in effect on January 1, 1980, or which is issued pursuant to a court order in an action brought under section 516(b) of [the Tariff Act] before that date" is eligible for an injury determination.

Since the FRG is a "country under the Agreement," and the pending litigation was commenced prior to January 1, 1980, any order issued pursuant to the C.C.P.A. decision in this case would be eligible for an injury determination under section 104(b) of the TAA. However, the request for an injury review must be submitted to the ITC within three years after the effective date of title VII of the Tariff Act, which became effective on January 1, 1980.

Scope of the Proceeding

The merchandise covered by this proceeding is flat glass manufactured by the float process. Such glass may be either tinted or clear and is produced in a wide variety of sizes ranging from 0.125" to 1' in thickness. Such glass is currently classifiable under items 543.2100 through 543.6900 of the Tariff Schedules of the United States Annotated. Entries of float glass which has been substantially further manufactured or modified (e.g., into tempered glass or laminated glass) are not subject to this countervailing duty proceeding.

The programs which form the basis for the estimated deposit of countervailing duties identified below are:

Tax credits under the Coal Mining Adjustment Law

Grants from the Land Government of North Rhine-Westphalia

Loans under the European Recovery Program

Loans from the Federal Department of Labor

Countervailing Duty Order

The Department issues this countervailing duty order with respect to float glass form the FRG to remove any procedural impediments to a section 104(b) review which might exist if an order is not issued before January 1, 1983. Moreover, in issuing an order and requiring that estimated duties be collected on future entries, the revenues of the United States will be preserved pending the outcome of the present litigation. This order is based on the C.C.P.A.'s opinion in C.A.D. 1237, which held that a bounty or grant had been bestowed, directly or indirectly, upon the manufacture, production, or exportation of float glass from the FRG.

We are also instructing the Customs Service to collect a cash deposit of countervailing duties in the amount of 1.20 percent of the f.o.b. invoice price on shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. Customs officers shall continue the suspension of liquidation of entries of float glass from the FRG.

Order Subject to Modifications by the Court

We are mindful that the C.C.P.A. explicitly held that the C.I.T. must determine either the actural amount of the bounty or grant bestowed upon the subject merchandise or the methodology to be applied in calculating that amount. The C.C.P.A. also stated that while these matters were pending before the C.I.T., "we assume that no administrative action will be taken to determine the net bounty or grant." This notice does not determine the net amount to be assessed. The estimated duties set in this order are simply to be collected while the issues are pending before the C.I.T. The actual duties will not be determined until the Department conducts a section 751 review, and the Department will defer such a review until the litigation in the C.I.T. is concluded. Any rights of the domestic producers who originally petitioned for relief in this proceeding and who are the plaintiffs in the pending litigation will not be prejudiced in any way because no assessment of duties or liquidation of entries will occur until the referenced litigation ends. Rather, this order will only have the effect of allowing the government of the FRG and exporters of the subject merchandise an opportunity to exercise legal rights which might otherwise expire.

Dated: December 21, 1982.

Lawrence J. Brady,

Assistant Secretary for Trade Administration.

[FR Doc. 82-34974 Filed 12-23-82; 8:45 am]

BILLING CODE 3510-25-M

Float Glass From the United Kingdom; Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Countervailing Duty Order.

SUMMARY: The Department of Commerce is issuing a countervailing duty order regarding imports of float glass from the United Kingdom. A cash deposit of estimated duties will be required in the amount of 1.54 percent of the f.o.b. invoice price on future entries of float glass from the United Kingdom.

EFFECTIVE DATE: December 27, 1982.

FOR FURTHER INFORMATION CONTACT: Stephen Nyschot or Richard Moreland, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On December 22, 1975, the Treasury Department published a negative "Notice of Final Countervailing Duty Determination" with respect to float glass from the United Kingdom (40 FR 59227). The petitioners challenged that determination in court and on November 19, 1979, the Court of Customs and Patent Appeals ("the C.C.P.A.") ruled that bounties or grants within the meaning of section 303 of the Tariff Act of 1930 ("the Tariff Act") had been given on float glass from the United Kingdom, and remanded the case to the Customs Court, now the Court of International Trade ("the C.I.T."), for action not inconsistent with its decision (67 C.C.P.A. 31, C.A.D. 1238, 610 F.2d 785 (1979)). Liquidation of entries was suspended following the C.C.P.A.'s decision.

In a related decision of August 21, 1981 (68 C.C.P.A. ——, 657 F.2d 1226), regarding float glass from the Federal Republic of Germany, the C.C.P.A. clarified its opinion in C.A.D. 1237, which was a companion case of C.A.D. 1238, stating that the C.I.T. is the appropriate forum for determining "what the net bounty or grant is or, at least, the method by which it is to be determined." The case has been pending before the C.I.T. since that time.

The authority for administering the countervailing duty law was transferred from the Treasury Department to the Department of Commerce ("the Department") by Reorganization Plan No. 3 of 1979, effective January 2, 1980.

Section 104(b) of the Trade Agreements Act of 1979 ("the TAA") provides that the government of a "country under the Agreement," as defined by section 701(b) of the Tariff Act, or exporters of merchandise covered by certain countervailing duty orders, may request an injury determination by the International Trade Commission ("the ITC"). Section 104(b)(1)(C) of the TAA states that a countervailing duty order "which is in effect on January 1, 1980, or which is issued pursuant to a court order in an action brought under section 516(b) of [the Tariff Act] before that date" is eligible for an injury determination.

Since the United Kingdom is a "country under the Agreement," and the pending litigation was commenced prior to January 1, 1980, any order issued pursuant to the C.C.P.A. decision in this case would be eligible for an injury determination under section 104(b) of the TAA. However, the request for an injury review must be submitted to the ITC within three years after the effective date of title VII of the Tariff Act, which became effective on January 1, 1980.

Scope of the Proceeding

The merchandise covered by this proceeding is flat glass manufactured by the float process. Such glass may be either tinted or clear and is produced in a wide variety of sizes ranging from 0.125" to 1" in thickness. Such glass is currently classifiable under items 543.2100 through 543.6900 of the Tariff Schedules of the United States Annotated. Entries of float glass which has been substantially further manufactured or modified (e.g., into tempered glass or laminated glass) are not subject to this countervailing duty proceeding.

The programs which form the basis for the estimated deposit of countervailing duties identified below are:

Investment grants
Building grants
Regional development grants
Selective assistance grants (worker training and location)

Countervailing Duty Order

The Department issues this countervailing duty order with respect to float glass for the United Kingdom to remover any procedural impediments to a section 104(b) review which might exist if an order is not issued before January 1, 1983. Moreover, in issuing an order and requiring that estimated duties be collected on future entries, the revenues of the United States will be preserved pending the outcome of the present litigation. This order is based on the C.C.P.A.'s opinion in C.A.D. 1238, which held that a bounty or grant had been bestowed, directly or indirectly, upon the manufacture, production, or exportation of float glass from the United Kindom.

We are also instructing the Customs Service to collect a cash deposit of countervailing duties in the amount of 1.54 percent of the f.o.b. invoice price on shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. Customs officers shall continue the suspension of liquidation of entries of float glass from the United Kingdom.

Order Subject to Modification by the Court.

We are mindful that the C.C.P.A. explicity held at the C.I.T. must determine either the actual amount of the bounty or grant bestowed upon the subject merchandise or the methodology to be applied in calculating that amount. The C.C.P.A. also stated that while these matters were pending before the C.I.T., "we assume that no administrative action will be taken to determine that net bounty or grant." This notice does not determine the net amount to be assessed. The estimated duties set in this order are simply to be collected while the issues are pending before the C.I.T. The actual duties will not be determined until the Department conducts a section 751 review, and the Department will defer such a review until the litigation in the C.I.T. is concluded. Any rights of the domestic producers who originally petitioned for relief in this proceeding and who are the plaintiffs in the pending litigation will not be prejudiced in any way because no assessment of duties or liquidation of entries will occur until the referenced litigation ends. Rather, this order will only have the effect of allowing the government of the United Kingdom and exporters of the subject merchandise an opportunity to exercise legal rights which might otherwise expire.

Dated: December 21, 1982.

Lawrence J. Brady,

Assistant Secretary for Trade Administration.

[FR Doc. 82-34973 Filed 12-23-82; 8:45 am]

BILLING CODE 3510-25-M

Small Diameter Welded Carbon Steel Pipes and Tubes From Brazil; Suspension of Investigation

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Suspension of Investigation.

SUMMARY: The Department of Commerce has decided to suspend the countervailing duty investigation involving small diameter welded carbon steel pipes and tubes welded pipe and tube) from Brazil. The basis for the suspension is an agreement by the government of Brazil to offset with an export tax all benefits which we find to be subsidies on exports of the subject product to the United States.

EFFECTIVE DATE: December 27, 1982.

FOR FURTHER INFORMATION CONTACT: Francis R. Crowe, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, telephone: (202) 377-3003.

SUPPLEMENTARY INFORMATION:

Case History

On May 7, 1982, the Department of Commerce (the Department) received a petition from United States Steel Corporation (U.S. Steel) filed on behalf of the U.S. industry producing small diameter welded carbon steel pipes and tubes. The petition alleged that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided, directly or indirectly, to the manufacturers, producers, or exporters in Brazil of welded pipe and tube.

We found the petition to contain sufficient grounds upon which to initiate a countervailing duty investigation, and on May 27, 1982, we initiated a countervailing duty investigation (47 FR 24168). We stated that we expected to issue a preliminary determination by August 2, 1982. We subsequently determined that the investigation was "extraordinarily complicated," as defined in section 703(c) of the Act, and postponed our preliminary determination for 65 days until October 4, 1982 (47 FR 32758).

We presented a questionnaire concerning the allegations to the government of Brazil in Washington, D.C. On September 9, 1982, we received the response to the questionnaire. During November 10–12, 1982, we verified this information by a review of government documents and company

books and records of Persico Pizzamiglio S.A. (PERSICO) and Industria Brasileira de Tubos S.A. (IBT), which represented over 90 percent of exports of welded pipe and tube to the United States.

On October 4, 1982, we preliminarily determined that the government of Brazil was providing subsidies to manufacturers, producers, or exporters of welded pipe and tube under four programs. The programs preliminarily found to confer subsidies were the IPI export credit premium, preferential working capital financing for exports, an income tax exemption for export earnings, and long-term loans.

Notice of the preliminary affirmative countervailing duty determination was published in the **Federal Register** on October 12, 1982 (47 FR 44814). We directed the U.S. Customs Service to suspend liquidation of all entries of the subject merchandise, entered or withdrawn from warehouse, for consumption on or after October 12, 1982, and to require a cash deposit or bond in the amount of 12.95 percent of the f.o.b. value of the merchandise.

On November 19, 1982, the Department initiated a proposed agreement to suspend the countervailing duty investigation involving welded pipe and tube from Brazil. The basis for the proposed agreement to suspend was that the government of Brazil would offset by an export tax the entire amount of benefits we found to confer subsidies on exports of welded pipe and tube to the United States.

On the same date, in compliance with the procedural requirements of section 704(e) of the Act, we discussed with the petitioner and counsel for Bethlehem Steel the terms of the proposed agreement and provided a copy of the proposed agreement to them.

Scope of the Investigation

The product covered by this investigation is small diameter welded carbon steel pipes and tubes manufactured in Brazil and exported, directly or indirectly, from Brazil to the United States. The term *"small diameter welded carbon steel pipes and tubes"* covers welded carbon steel pipes and tubes with walls not thinner than 0.065 of an inch, of circular cross section and 0.375 of an inch or more in outside diameter but not more than 16 inches as currently provided for in items 610.3206, 610.3209, 610.3231, 610.3232, 610.3241, 610.3244, and 610.3247 of the *Tariff Schedules of the United States Annotated (TSUSA).* Pipes or tubes suitable for use in boilers, superheaters, heat exchangers, condensers, and feedwater heaters, or conforming to A.P.I. specifications for oil well tubing, with or without couplings, cold drawn pipes and tubes and cold-rolled pipes and tubes with wall thickness not exceeding 0.1 inch are *not included.*

The period for which we are measuring subsidization is calendar year 1981.

Changes Since the Preliminary Determination

A. *IPI export credit premium.* Our preliminary determination on this program was based on IPI credits recieved November 1981. The credits received in that month were traced to the appropriate shipment which may have taken place two to three months before. At the verification we sampled a second month, January 1982, in order to substantiate the calculation of the "adjusted" f.o.b. value of shipments which serves as the basis for determining the amount of IPI credits that can be received for those shipments. Because of the two to three month period between shipment and receipt of the credit, receipts for January 1982 represented shipments in the period of investigation. The value of the IPI credits received for November 1981 and January 1982 (based on a nominal rate of 15 percent) were 10.02 and 11.27 percent, respectively. Based upon this information we calculated a weighted-average subsidy value of 10.82 percent.

For purposes of the suspension agreement, we are calculating the appropriate export tax by prorating the IPI credit found on all welded pipe and tube shipments by the current rate for the IPI credit of 11.0 percent.

B. *Long-term loans.* We stated in our preliminary determination that the benefit of certain partially-indexed long-term loans was the amount of interest payments saved during the period of investigation because of the favorable terms of the loans. We have since discovered that recipients of these loans also benefit from forgiveness of some of the principal over the life of the loan. The subsidy amount for these partially-indexed long-term loans was calculated by comparing the principal and interest actually paid by the company in 1981 with the principal and interest that would have been paid if the loan had been fully indexed. The fact that the amounts of loan payments are adjusted on a quarterly basis, because of indexing, requires that they be valued on a year-by-year basis as opposed to taking the present value of the stream of benefits in the year the preferential loan was made. We determined the subsidy amount of a partially-indexed loan on a year-by-year basis, accounting for the indexation and the forgiveness of principal.

Petitioner's Comments

The Department has consulted with the petitioner, United States Steel Corporation, as well as counsel for Bethlehem Steel Corporation, an interested party, and received the following comments from U.S. Steel objecting to the proposed suspension agreement. Our responses are shown for each comment.

Procedural Issues

Comment 1

U.S. Steel contends that the Department does not have authority to suspend the investigation since we have not complied with the notice requirements of subsections 704 (e) (1) and (2) of the Act. The petitioner takes the view that the Department must give the required notice and explanation before the petitioner's right to consult arises. Further, U.S. Steel contends that actual consultation between petitioners and the Department must take place not less than 30 days before the investigation is suspended.

DOC Position

We have complied fully with the requirements of subsection 704(e) (1) and (2) of the Act. These provisions require that the Department notify the petitioner of, and consult with petitioner concerning, its intention to suspend the investigation not less than 30 days before the date of suspension, and provide a copy of the proposed agreement to the petitioner at the time of notification, together with the required explanation. The proposed suspension agreement was initialed on November 19, 1982, 31 days before the last day on which the Department could suspend the investigation. On November 19, the date of initialing, DOC staff telephoned the petitioner (and counsel for Bethlehem Steel) to discuss with them the proposed agreement, and to answer any questions about the proposed agreement (including questions on methodology). The petitioner and counsel for Bethlehem Steel were provided a copy of the proposed agreement on November 19.

By its terms, the suspension agreement will offset completely the net subsidy, and *a fortiori* eliminates any injury caused by the net subsidy, without the added expense to U.S. taxpayers, the petitioner, and respondent of completing the investigation. Effective monitoring is practicable under paragraph C of the agreement which requires the

government of Brazil to permit such verification and data collection as the Department requests to monitor the agreement. Paragraph C also imposes comprehensive reporting requirements on the government of Brazil which will help ensure effective monitoring. The Department's monitoring efforts for the most part will occur during yearly section 751 administrative reviews. These are conducted in the same manner as reviews of a countervailing duty order. The statutory requirements of notice, consultation and explanation were met in this case.

Comment 2

U.S. Steel asserts that the suspension agreement does not ban outright any new subsidies and that the prohibition of substitute subsidies serves only to deter the Brazilian government from returning to Brazilian welded pipe and tube producers the proceeds of the export tax.

DOC Position

The suspension agreement requires the government of Brazil to offset *completely*, by the imposition of an export tax, the amount of the net subsidy determined by the Department in this proceeding to exist with respect to welded pipe and tube exports to the United States.

Under paragraph C.5 of the agreement the government of Brazil is required to promptly notify the Department, with appropriate documentation, of any change in the amount of benefits to the subject product, of any change in the rate of the export tax, or if it decides to alter or terminate its obligations with respect to any of the terms of the agreement. Pursuant to paragraph B.1 the Department is required to officially notify the government of Brazil of any determination that affects the amount of the export tax.

Thus, the Department, through its quarterly monitoring and section 751 administrative reviews, will periodically redetermine whether particular programs constitute subsidies. If the Department determines that the agreement has been violated, the Department may terminate the agreement and resume the investigation, or issue an order.

Subsidy Issues.

Comment 1

U.S. Steel and counsel for Bethlehem Steel contend that the Department's elasticity analysis, correctly applied, demonstrates that subsidies to Brazilian welded pipe and tube producers' domestic suppliers of carbon steel coil are passed through to the pipe producers. Further, petitioner cites the case on *Tomato Products from Greece* where the Department imposed a countervailing duty on the products of tomato processors equal to the amount of aid received to compensate for the difference in price between the EC tomatoes purchased and the cheaper non-EC tomatoes.

DOC Position

Benefits bestowed upon the manufacture of an input do not necessarily flow down to the purchaser of that input if the sale is transacted at arm's length. When sales transactions are made at arm's length, economic considerations are also taken into account to determine if a benefit received by a seller would be passed on to the purchaser.

At verification we determined that the price charged for coil manufactured in Brazil is equal to or greater than the price for imported coil. It makes no economic sense for the Department to find that a subsidy exists simply because an exporter chose one source of supply over another where no price differential exists. Since alternate suppliers are availabe to producers of welded pipe and tube, and there is no evidence of a pricing pattern by Brazilian producers of coil which undercuts f.o.b. prices available from foreign suppliers, there is no reason to believe that any subsidies which may have been conferred upon producers of coil have been passed through to producers of welded pipe and tube. This situation is quite distinct from the facts in the case on *Tomato Products from Greece* where the Department imposed a countervailing duty on the products of tomato processors equal to the amount of aid received by such producers to compensate for the difference in price between the EC tomatoes purchased and the cheaper non-EC tomatoes. The Brazilian government does not compensate domestic producers of welded pipe and tube for the difference in purchase price between the Brazilian coil and the cheaper non-Brazilian coil.

Comment 2

U.S. Steel asserts that in calculating the net subsidy under Resolution 674 financing the Department used an incorrect benchmark. They state that when using the rate for discounting accounts receivable the Department must factor in a compensating balance (although illegal in Brazil) to determine an effective interest rate.

DOC Position

In determining a national benchmark, the Department chose the Banco do Brasil rate because prior case precedent and statements of the government of Brazil suggests that this is the appropriate standard. As the largest single banking entity in Brazil (representing 35–40 percent of all banking assets), the Banco do Brasil acts as a price leader from which the rates of other banks vary. Documents received at verfication support our preliminary determination in several respects. First, the annual Banco do Brasil discount rate is 59.6 percent, as claimed; numerous banks, both state-owned and private, discount receivables at rates near (both above and below) the rate set by the Banco do Brasil. During the period of investigation both companies discounted a significant percentage of their domestic accounts receivable with a wide variety of banks, and used this facility as the chief method of raising working capital. During verification, we found no evidence of compensating balances in company records; the amount received by the company after discounting a receivable was the value of the receivable minus the discount rate, the Tax on Financial Transactions (IOF) and small commission.

Comment 3

In its post-hearing brief, U.S. Steel made a claim that the Department's benchmark for long-term loans does not account for all of the costs to Brazilian companies of borrowing abroad. U.S. Steel cites two examples: the government of Brazil's periodic restrictions on the disbursement of foreign loans including compulsory deposits for several months and staggered release of funds, and the hedging engaged in by Brazilian companies against the risk of maxidevaluation.

DOC Position

In constructing our benchmark for long-term loans, we did not examine such additional costs as commitment fees, delayed disbursement, contracting and closing expenses, etc. Absent an allegation by the time of the verification that such costs would cause a distortion in our comparison between long-term cruzeiro loans and the benchmark, we did not investigate the impact of these costs. Should we determine that this issue requires further investigation, we will address it during our section 751 administrative review.

Comment 4

U.S. Steel and counsel for Bethlehem Steel argue that, without the availability of long-term cruzeiro loans from BNDE and FINAME, firms would have to borrow short-term. In particular, they claim that a short-term line of credit can be transformed into a longer-term arrangement because short-term financing is often rolled over, effectively turning it into long-term, variable-rate financing. Therefore, in the absence of a benchmark for long-term cruzeiro loans, the Department should use as a benchmark the interest rate on short-term cruzeiro loans, which serve as a measure of long-term interest rates.

DOC Position

We do not consider short-term interest rates and long-term interest rates comparable because they reflect different types of borrower needs and different degrees of risk on the part of the lender.

A short-term line of credit, even if constantly renewed over a long period of time, is still short-term financing. It provides working capital on an ongoing basis, and the borrower's need, the lender's risk and the rate of interest are subject to constant re-evaluation which may lead to readjustments. Such is not the case with a long-term loan. At the outset, need and risk must be determined. Generally, the funds from a long-term loan are disbursed early on to finance major expenditures, such as capital equipment with a long useful life, and a borrower cannot meet these needs through short-term credit lines.

Further, short-term interest rates may be very volatile, reflecting ongoing changes in the credit markets and government monetary policy. Long-term interest rates change more gradually and, as one would expect, the rise in interest rates for short-term borrowing in Brazil since early 1981 has also led to a notable, though less dramatic, rise in the real interest rate on long-term loans.

Comment 5

Counsel for Bethlehem Steel has noted that with the decline in imports of steel into Brazil in 1982, it is unlikely that the import content of exports of welded pipe and tube, in 1982, has exceeded the 25 percent level that would lead to a reduction in the value of the IPI export credit premium on these exports. Accordingly, counsel urged that we use the nominal rate of the IPI export credit premium, verified by the Department to be received by welded pipe and tube manufacturers in 1982, in determining the benefits bestowed under this program.

DOC Position

General statistics of imports of steel into Brazil are not a relevant indicator of the import content of welded pipe and tube exports. The average import content of total exports does not determine the amount of the IPI export credit premium received on exports of a product. The deduction for imported coil in the calculation of the amount of the IPI export credit premium received is done on a *shipment-by-shipment* basis. The amount of the benefit received under this program is the sum of the IPI credits earned on all shipments divided by the total value of those shipments.

Further, we cannot take into account conjecture about what may have occurred with respect to the import content of a company's welded pipe and tube exports in 1982. Whatever the situation, it will be addressed during a section 751 administrative review.

In sum, we believe that the criteria for suspension of an investigation pursuant to section 704 of the Act have been satisfied. If signed, this agreement will offset the subsidies completely with respect to the subject product exported directly or indirectly from Brazil to the United States. The agreement can also be monitored effectively, and is in the public interest.

Suspension of the Investigation

The Department consulted with the petitioner and has considered the comments submitted with respect to the proposed suspension agreement. We have determined that the agreement will offset the subsidies completely with respect to the subject merchandise exported directly or indirectly to the United States, that the agreement can be monitored effectively, and that the agreement is in the public interest. We find, therefore, that the criteria for suspension of an investigation pursuant to section 704 of the Act have been met. The terms and conditions of the agreement, signed December 20, 1982, are set forth in Annex 1 to this notice.

Pursuant to section 704(f)(2)(A) of the Act, the suspension of liquidation of all entries, entered or withdrawn from warehouse, for consumption of welded pipe and tube from Brazil effective October 12, 1982, as directed in our notice of "Preliminary Affirmative Countervailing Duty Determination, Small Diameter Welded Carbon Steel Pipes and Tubes from Brazil" is hereby terminated.

Any cash deposits on entries of welded pipe and tube from Brazil pursuant to that suspension of liquidation shall be refunded and any bonds shall be released.

The Department intends to conduct an administrative review within twelve months of the anniversary date of publication of this suspension as provided in section 751 of the Act.

Notwithstanding the suspension agreement, the Department will continue the investigation if we receive such a request in accordance with section 704(g) of the Act within 20 days after the date of publication of this notice.

This notice is published pursuant to section 704(f)(1)(A) of the Act.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

December 20, 1982.

Annex I.—Suspension Agreement

Small Diameter Welded Carbon Steel Pipes and Tubes From Brazil

Pursuant to section 704 of the Tariff Act of 1930, as amended (the Act), and §355.31 of the Commerce Regulations, the United States Department of Commerce (the Department) and the government of Brazil enter into the following suspension agreement (the agreement) on the basis of which the Department shall suspend its countervailing duty investigation initiated on May 27, 1982 (47 FR 24168) with respect to small diameter welded carbon steel pipes and tubes from Brazil. The agreement shall be in accordance with the terms and provisions set forth below.

A. Scope of the Agreement

The agreement applies to all small diameter welded carbon steel pipes and tubes manufactured in Brazil and exported, directly or indirectly, from Brazil to the United States (hereinafter referred to as the "subject product"). The term *"small diameter welded carbon steel pipes and tubes"* covers welded carbon steel pipes and tubes with walls not thinner than 0.065 of an inch, of circular cross section and 0.375 of an inch or more in outside diameter but not more than 16 inches as currently provided for in items 610.3208, 610.3209, 610.3231, 610.3232, 610.3241, 610.3244, and 610.3247, of the *Tariff Schedules of the United States Annotated.* Pipes or tubes suitable for use in boilers, superheaters, heat exchangers, condensers, and feedwater heaters, or conforming to A.P.I. specifications for oil well tubing, with or without couplings, cold drawn pipes and tubes and cold-rolled pipes and tubes with wall thickness not exceeding 0.1 inch are *not included.*

B. Basis of the Agreement

1. The government of Brazil hereby agrees to offset completely the amount of the net subsidy determined by the Department in this proceeding to exist with respect to the subject product. The offset shall be accomplished by an export tax applicable to the subject product exported on or after February 16, 1983. The export tax shall be utilized to offset completely any benefits found to exist with respect to the following programs:

(a) The IPI export credit premium,
(b) Resolution 674 financing,
(c) The income tax exemption for export earnings,
(d) Long-term loans, and
(e) Any other program subsequently determined by the Department to constitute a subsidy under the Act to the subject product.

The Department shall officially notify the government of Brazil of any determination made with respect to items (a) through (e) above.

2. The government of Brazil certifies that no new or equivalent benefits shall be granted on the subject product as a substitute for any benefits offset by the agreement.

3. The offset of these benefits does not constitute an admission by the government of Brazil that such benefits are subsidies within the meaning of the U.S. countervailing duty law.

4. The government of Brazil agrees that from the effective date of the suspension of the investigation and until the imposition of an export tax no later than February 10, 1983 that completely offsets the net subsidy determined by the Department to exist, the rate of exports of the subject product will not exceed the average monthly rate of exports to the United States in the period May 1981–April 1982. Exports in excess of this quantity will constitute a violation of the agreement pursuant to section 704(i) of the Act.

C. Monitoring of the Agreement

1. The government of Brazil agrees to supply to the Department such information as the Department deems necessary to demonstrate that it is in full compliance with the agreement.

2. The Government of Brazil shall notify the Department if any exporters of the subject product transship the subject product through third countries or apply for or receive, directly or indirectly, the benefits of the programs described in paragraph B.1 regarding the manufacture, production or export of the subject product:

3. The Government of Brazil shall certify to the Department within 15 days after the first day of each three-month period beginning on April 1, 1983 whether it continues to be in compliance with the agreement by offsetting the net subsidy referred to in paragraph B.1 and whether it has substituted any new or equivalent benefits for the benfits offset by the agreement. Failure to supply such information or certification in a timely fashion may result in the immediate resumption of the investigation or issuance of a countervailing duty order.

4. The Government of Brazil shall permit such verification and data collection as is requested by the Department in order to monitor the agreement. The Department will request such information and perform such verification periodically pursuant to administrative reviews conducted under section 751 of the Act.

5. The government of Brazil shall promptly notify the Department, with appropriate documentation, of any change in the amount of benefits to the subject product, of any change in the rate of the export tax, or if it decides to alter or terminate its obligations with respect to any of the terms of the agreement.

D. Violation of the Agreement

If the Department determines that the agreement is being or has been violated or no longer meets the requirements of section 704(b) or (d) of the Act, then section 704(i) shall apply.

E. Effective Date

The effective date of the agreement is the date of publication.

Signed on this 20th day of December 1982, for the Government of Brazil.

Luiz Felipe P. Lampreia,

Minister-Counselor, Brazilian Embassy.

I have determined that the provisions of paragraph B completely offset the subsidies that the government of Brazil is providing with respect to small diameter welded carbon steel pipes and tubes exported directly or indirectly from Brazil to the United States and that the provisions of paragraph C ensure that this agreement can be monitored effectively pursuant to section 704(d) of the Act. Furthermore, I have determined that the agreement meets the requirements of section 704(b) of the Act and suspension of the investigation is in the public interest.

U.S. Department of Commerce.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

[FR Doc. 82-34970 Filed 12-23-82; 8:45 am]

BILLING CODE 3510-25-M

Office of the Secretary

Office of Organization and Management Systems, Office of the Assistant Secretary for Administration; Notice of Organizational Changes

This notice provides information on major organizational changes implemented by the Department of Commerce, as of October 1, 1982 to date. This notice will be updated periodically to include all reorganizations occurring during the current fiscal year. Guidance is also given on how more information can be obtained for one or all reorganizations listed below.

The following major reorganizations have been implemented by the Department of Commerce since October 1, 1982:

(1) The Minority Business Development Agency—reorganized by Department Organization Order 25–4B of November 9, 1982.

(2) The National Oceanic and Atmospheric Administration—reorganized by Department Organization Order 25–5B of November 23, 1982.

(3) The Office of Procurement Services—reorganized by Department Organization Order 20–17 of November 23, 1982.

(4) The Bureau of Economic Analysis—reorganized by Department Organization Order 35–1B of December 6, 1982.

(5) The Bureau of Industrial Economics—reorganized by Department Organization Order 35–5B of December 6, 1982.

FOR FURTHER INFORMATION:

Copies of the Department Organization Orders cited above can be obtained by writing to the: Department of Commerce, Office of Information Services, Internal Distribution Branch (Room 1617A), 14th and Constitution Avenue, NW., Washington, D.C. 20230. Telephone requests should be directed to the Internal Distribution Branch at (202) 377–2533.

Hugh L. Brennan,

Director, Office of Organization and Management Systems.

[FRDoc.82-34979Filed12-23-82;8:45am]

BILLING CODE 3510-DK-M

[Transmittal 579; Dept. Organization Order 10–3; Effective February 15, 1982]

Organization Order; Under Secretary for International Trade

This Order effective February 15, 1982 supersedes the materials appearing at 45 FR 6141 of January 25, 1980 and 45 FR 69536 of October 21, 1980.

Section 1. Purpose

.01 This order prescribes the scope of authority and the functions of the Under Secretary for International Trade. The organizational structure and the assignment of functions are prescribed in Department Organization Order 40–1, "International Trade Administration".

.02 This revision: (1) abolishes the positions of Deputy Assistant Secretary for the U.S. Commercial Service, Deputy Assistant Secretary for East-West Trade, Deputy Assistant Secretary for Trade Agreements, Deputy Assistant Secretary for Finance, Investment and Services, Deputy Assistant Secretary for Policy, Planning and Analysis, and Director General of the Foreign Commercial Service; and (2) establishes the positions of Director General of the Commercial Services, Deputy Assistant Secretary for the Commercial Services, Deputy Assistant Secretary for Europe, Deputy Assistant Secretary for the Western Hemisphere, Deputy Assistant Secretary for East Asia and the Pacific, Deputy Assistant Secretary for Africa,

the Near East and South Asia, Deputy Assistant Secretary for Industry Projects, and Deputy Assistant Secretary for Trade Information and Analysis. Outstanding amendments to the Order are also incorporated.

.03 The International Trade Administration (ITA) is continued as a primary operating unit of the Department of Commerce.

Section 2. Administrative Designation

.01 The Under Secretary for International Trade, established by section 2(c) of Reorganization Plan No. 3 of 1979, shall be head of the International Trade Administration. The President made the provision of the Reorganization Plan effective by Executive Order 12188 of January 2, 1980. The Under Secretary is appointed by the President by and with the advice and consent of the Senate.

.02 The position of Assistant Secretary of Commerce, established by Public Law (P.L.) 80–191 (15 U.S.C. 1505) is designated the Assistant Secretary for Trade Administration. The two Assistant Secretaries of Commerce established by section 2(d) of Reorganization Plan No. 3 of 1979, which was made effective by Executive Order 12188 of January 2, 1980, are designated the Assistant Secretary for International Economic Policy and the Assistant Secretary for Trade Development, respectively. The Assistant Secretaries are appointed by the President by and with the advice and consent of the Senate.

Section 3. Structure and Scope of Authority

.01 The Under Secretary for International Trade shall be assisted in carrying out his/her responsibilities by:

a. The Deputy Under Secretary for International Trade;

b. The Assistant Secretary for Trade Administration;

c. The Assistant Secretary for International Economic Policy;

d. The Assistant Secretary for Trade Development; and

e. The Director General of the Commercial Services.

.02 The Assistant Secretary for Trade Administration shall be assisted in carrying out his/her responsibilities by:

a. The Deputy Assistant Secretary for Import Administration; and

b. The Deputy Assistant Secretary for Export Administration.

.03 The Assistant Secretary for International Economic Policy shall be assisted in carrying out his/her responsibilities by:

a. The Deputy Assistant Secretary for International Economic Policy;

b. The Deputy Assistant Secretary for Europe;

c. The Deputy Assistant Secretary for the Western Hemisphere;

d. The Deputy Assistant Secretary for East Asia and the Pacific; and

e. The Deputy Assistant Secretary for Africa, the Near East and South Asia.

.04 The Assistant Secretary for Trade Development shall be assisted in carrying out his/her responsibilities by:

a. The Deputy Assistant Secretary for Trade Development;

b. The Deputy Assistant Secretary for Export Development;

c. The Deputy Assistant Secretary for Industry Projects;

d. The Deputy Assistant Secretary for Trade Information and Analysis;

e. The Deputy Assistant Secretary for Textiles and Apparel; and

f. The Deputy Assistant Secretary for Trade Adjustment Assistance.

.05 The Director General of the Commercial Services shall be assisted in carrying out his/her responsibilities by the Deputy Assistant Secretary for the Commercial Services.

Section 4. Delegation of Authority

.01 Pursuant to the authority vested in the Secretary of Commerce, the Under Secretary for International Trade is hereby delegated the following authorities of the Secretary of Commerce; provided, however, that the Secretary reserves authority to provide policy guidance and direction to the Under Secretary (and delegates) and, at the Secretary's initiative or at the request of the Under Secretary, to consult with the Under Secretary (and delegates) to the extent permitted by law concerning the exercise of the authorities delegated by this section:

a. The Act of February 14, 1903, as amended (15 U.S.C. 1512 *et seq.*; 15 U.S.C. 171 *et seq.*) to foster, promote, and develop the foreign and domestic commerce of the United States, to the extent necessary for the performance of ITA's functions;

b. The Defense Production Act of 1950, as amended (50 U.S.C. app. 2061 *et seq.*) conferred on the Secretary under: (1) Executive Order 10480 of August 14, 1953, as amended, including authority to restrict surface transportation and discharge of commodities or to prohibit movement of American carriers to designated destinations, except the authority to create new agencies within the Department of Commerce; and (2) Executive Order 11912 of April 13, 1976;

c. Executive Order 11490 of October 28, 1969, as amended, as it relates to the development, as required for the programs of the Director, Federal Emergency Management Agency, of national emergency plans and preparedness programs covering production and distribution of materials, use of production facilities, control of construction materials, the furnishing of basic industries services, and regulation and control of exports and imports;

d. The National Security Act of 1947, as amended, (50 U.S.C. 401 *et seq.*) and Executive Order 11490 of October 28, 1969, as amended, relating to mobilization preparedness;

e. Executive Order 11179 of September 22, 1964, as amended, with respect to the establishment and training of the National Defense Executive Reserve;

f. Executive Order 10421 of December 31, 1952, providing for the physical security of facilities important to the national defense;

g. Section 1441 of the Public Health Service Act, as amended by the Safe Drinking Water Act (42 U.SC. 300j) conferred on the Secretary under Executive Order 11879 of September 17, 1975, involving materials allocation of chemicals or substances necessary for treatment of water;

h. The Export Administration Act of 1979 (50 U.S.C. app. 2401 *et seq.*) and the authority under that Act conferred on the Secretary under Executive Order 12214 of May 2, 1980, and Executive Order 12002 of July 7, 1977, except that the following power, authority, and discretion shall be reserved to the Secretary:

1. The determination required by Section 12(c) with respect to the publication or disclosure of confidential information obtained under the Act, and

2. The submission of reports to the Congress required by Section 14 of the Act;

i. Executive Order 11958 of January 18, 1977, as it relates to the carrying out, on behalf of the Department of State, of functions under Section 38(e) of the Arms Export Control Act (22 U.S.C. 2751 *et seq.*) as agreed to by the Departments of Commerce and State;

j. Executive Order 11322 of January 5, 1967, and Executive Order 11419 of July 29, 1968, relating to the Rhodesian sanctions with respect to transactions occurring prior to December 16, 1979 (Executive Order 12183 of December 16, 1979 revoked the provisions of Executive Order 11322 and 11419 with respect to transactions occurring after December 16, 1979);

k. The Nuclear Non-Proliferation Act of 1978 (22 U.S.C. 3201 *et seq.*) and the authority under that Act conferred on the Secretary under Executive Order

12058 of May 11, 1978, pertaining to nuclear exports and related matters;

l. Sections 103 and 251 of the Energy Policy and Conservation Act (42 U.S.C. 6201 *et seq.*) conferred on the Secretary under Executive Order 11912 of April 13, 1976, relating to: (1) export restrictions of coal, petroleum products, natural gas, or petrochemical feedstocks and supplies of material or equipment necessary to maintain or further exploration, production, refining, or transportation of energy supplies or for the construction or maintenance of energy supplies or for the construction or maintenance of energy facilities within the United States; and (2) rules to authorize the export of petroleum and petroleum products as may be necessary for implementation of the obligations of the United States under the International Energy Program;

m. Section 303 of Title VII (including Section 771(1)) of the Tariff Act of 1930 (19 U.S.C. 1303, 1671 *et seq.*) in accordance with Section 5(a)(1)(C) of Reorganization Plan No. 3 of 1979 (44 FR 69273, December 3, 1979), relating to antidumping and countervailing duties, except that the authority to make final determinations as "Secretary" or "administering authority" may not be redelegated beyond the Assistant Secretary for Trade Administration;

n. Sections 514, 515, and 516 of the Tariff Act of 1930 (19 U.S.C. 1514, 1515, and 1516) and section 5(a)(1)(D) of Reorganization Plan No. 3 of 1979, insofar as they relate to any protest, petition, or notice of desire to contest described in section 1002(b)(1) of the Trade Agreements Act of 1979;

o. Sections 318, 502(a) and (b), and 617 of the Tariff Act of 1930 (19 U.S.C. 1318, 1502 (a) and (b), and 1617) and sections 5(a)(1)(E), 5(a)(1)(F), and 5(a)(1)(G), respectively, of Reorganization Plan No. 3 of 1979, insofar as they relate to antidumping and countervailing duty investigations and the assessment of duties;

p. Section 2632(e) of Title 28 of the United States Code and section 5(a)(1)(H) of Reorganization Plan No. 3 of 1979, insofar as they relate to actions taken by the Secretary reviewable under section 516A of the Tariff Act of 1930 (19 U.S.C. 1516a);

q. Section 402 of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 512), relating to the importation of foreign excess property;

r. The Educational, Scientific and Cultural Materials Importation Act of 1966 (19 U.S.C. 1202);

s. Headnote 6(d) of Schedule 7, part 2, subpart E of the Tariff Schedules of the United States (19 U.S.C. 1202), added by P.L. 89–805, pertaining to the allocation of quotas for duty-free importation into the customs territory of the United States of watches and watch movements;

t. The Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81a *et seq.*), as it relates to the Secretary's authority to designate an alternate to chair the Committee of Alternates of the Foreign-Trade Zones Board and to appoint an Executive Secretary of the Board (see 15 CFR Part 400);

u. Section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862) and section 5(a)(1)(B) of Reorganization Plan No. 3 of 1979, relating to the conduct of national security investigations on imports;

v. Section 104 of the Trade Act of 1974 (19 U.S.C. 2114) and Section 135 of the Trade Act of 1974, as amended by Section 1103 of the Trade Agreements Act of 1979 (19 U.S.C. 2155) and Section 4(d) of Executive Order 11846 of March 27, 1975, relating to the industry consultations program;

w. Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, regarding Textile Trade Agreements;

x. Executive Order 11858, of May 7, 1975, relating to foreign investment in the United States;

y. Section 2(8) of the Small Business Act, as amended (15 U.S.C. 637(e)) relating to obtaining and publishing notices of U.S. government procurement;

z. Section 601(b)(1) of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2351(b)(1)) conferred on the Secretary under Executive Order 12163 of September 29, 1979, relating to drawing the attention of private enterprise to opportunities for investment and development in less developed friendly countries and areas;

aa. The delegation of authority, dated June 25, 1962, from the United States Information Agency under Section 5(e) of Executive Order 11034 of June 25, 1962, as amended by Executive Order 11380 of November 8, 1967, with respect to U.S. participation in trade missions abroad under the Mutual Educational and Cultural Exchange Act of 1961, as amended (22 U.S.C. 2451 *et seq.*);

bb. The Act of October 18, 1962, as amended (46 U.S.C. 1122b), which authorized mobile trade fairs;

cc. The China Trade Act of 1922, as amended (15 U.S.C. 141 *et seq.*);

dd. Executive Order 10978 of December 5, 1961 regarding the Presidential "E" Award, "E" Certificate of Service, and "E Star" Award, except final selection of recipients;

ee. The Act of May 27, 1970 (P.L. 91–269, 22 U.S.C. 2801 *et seq.*), relating to participation of the United States in international expositions;

ff. Section 4221 of the Internal Revenue Code of 1954 (26 U.S.C. 4221) and Section 309 of the Tariff Act of 1930, as amended (19 U.S.C. 1309), insofar as they relate to findings with respect to exemptions from taxes and import duties on supplies and equipment for aircraft;

gg. Sections 5(b) 5(c) of Executive Order 11846 of March 27, 1975, relating to quantitative import restrictions and monitoring of imports under orderly market agreements;

hh. Sections 3 and 4 of Executive Order 11961 of January 19, 1977, as amended by Executive Order 12013 of October 7, 1977, which delegates to the Secretary of Commerce the authority of the President under Sections 4(a), 4(b), and 5(c) of the International Investment Survey Act of 1976, (P.L. 94–472, 90 Stat. 2059, 22 U.S.C. 3103(a) and (b) and 3104(c)); and Section 4(e) of the International Investment Survey Act, as amended by P.L. 97–33 (95 Stat. 170, to be codified at 22 U.S.C. 3101(e)). The functions thereunder shall be carried out in coordination with the Bureau of Economic Analysis (Department Organization Order 35–1A), including, to the extent feasible, the division or assignment of responsibilities. All regulations established by ITA to carry out its functions under the Act shall be issued by the Under Secretary for International Trade in consultation with the Director, Bureau of Economic Analysis. All reports to be submitted to the Congress required to the undertaken pursuant to the Act, shall be issued by the Secretary;

ii. The trade promotion and commercial functions transferred to the Secretary from the Department of State or the Secretary of State by section 5(b)(1) of Reorganization Plan No. 3 of 1979 and by section 1–104 of Executive Order 12188 of January 2, 1980, as amended;

jj. The Foreign Service Act of 1980 (22 U.S.C. 3901 *et seq.*) and such laws the exercise of which are authorized to the Secrtary under section 5(b)(2) of Reorganization Plan No. 3 of 1979 and by section 1–104 of Executive Order 12188 of January 2, 1980, as amended. This delegation is in addition to, and not in lieu of, the general delegation of personnel management authority to the Assistant Secretary for Administration, and is to be exercised and redelegated in consonance with the Departmental policies issued by the Assistant Secretary for Administration;

kk. Title III of P.L. 96–481 (15 U.S.C. 649a–649d), relating to making grants

(including contracts and cooperative agreements) for small business international marketing programs;

ll. The Act of December 29, 1979 (P.L. 96–169, 93 Stat. 1281) regarding the participation of the United States in the International Energy Exposition to be held in Knoxville, Tennessee in 1982; and

mm. Chapters 3 and 4 of Title II of the Trade Act of 1974, as amended, (19 U.S.C. 2341 *et seq.*, 2371 *et seq.*), pertaining to trade adjustment assistance to firms, industries, and communities, except the provisions of 19 U.S.C. 2354 pertaining to studies and reports and information activities in response to investigations and findings of the International Trade Commission (see DOC 35-5A). The Assistant Secretary for Economic Development retains this authority through September 30, 1981, with respect to adjustment assitance projects in process prior to September 20, 1981, and thereafter such authority to perform all functions related to the furnishing of adjustment assistance (excluding additional assistance or increasing the Government's liability) with respect to those adjustment assistance projects approved prior to October 1, 1981 (see DOO 10–4).

.02 The Under Secretary may exercise other authorities of the Secretary as applicable to performing the functions assigned in this Order.

.03 Except as otherwise provided in this Order, the Under Secretary may redelegate his/her authority, subject to such conditions in the exercise of such authority as he/she may prescribe.

Section 5. Functions

The Under Secretary for International Trade, acting as such and as head of the International Trade Administration, shall be the principal officer of the Department for carrying out the policies and programs of the Department to promote world trade and to strength the international trade and investment position of the U.S. In this respect he/she shall carry out programs to:

.01 Promote U.S. exports and strengthen the international trade and investment position of the U.S.; develop, maintain and disseminate economic and commercial information and analyses; provide trade adjustment assistance to industries, communities and firms adversely affected by imports; and assist U.S. exporters through the facilities of the U.S. Commercial Service and the Foreign Commercial Service.

.02 Administer U.S. import and export laws relating to export licensing and enforcement, regulatory programs for antiboycott compliance, antidumping and countervailing duty investigation and enforcement, industrial mobilization, foreign-trade zones, national security import investigations, and other special import programs.

.03 Develop international economic, trade and investment policy strategies and objectives, including those of a bilateral, multilateral or regional nature, and maintain in-depth commercial and economic expertise on individual countries and regions throughout the world.

Arlene Triplett,

Assistant Secretary for Administration.

BILLING CODE 3510–OK–M

[Transmittal 647; Dept. Organization Order 10–3, Amdt. 3; Effective October 8, 1982]

Organization Order; Under Secretary for International Trade

Amendment 3

This order is effective October 8, 1982.

Department Organization Order 10–3, dated February 16, 1982 is hereby further amended as shown below. The purpose of this amendment is to broaden the authority of the Under Secretary to act in Foreign-Trade Zones Board matters and make it clear that the "administering authority" under Title VII of the Tariff Act of 1930 is authorized to determine subsidies on articles of quota cheese.

SECTION 5. DELEGATION OF AUTHORITY. Subparagraphs .01m. and .01t. are revised to read as follows:

"m. Section 303 and Title VII (including Section 771(1)) of the Tariff Act of 1930 (19 U.S.C. 1303, 1671 *et seq.*) in accordance with section 5(a)(1)(C) of Reorganization Plan No. 3 of 1979 (44 FR 69273, December 3, 1979), relating to: (1) antidumping and countervailing duties, except that the authority to make final determinations as 'Secretary' or 'administering authority' may not be redelegated beyond the Assistant Secretary for Trade Administration; and (2) determination, as 'administering authority', of subsidies on articles of quota cheese under Section 702 of the Trade Agreements Act of 1979 (93 Stat. 269);"

"t. The Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81a *et seq.*), and the implementing regulations in 15 CFR Part 400, including authority to act for the Secretary in all Foreign-Trade Zones Board matters except grants of authority to establish new zones;"

Arlene Triplett,

Assistant Secretary for Administration.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Exemption of Certain Man-Made Fiber Luggage and Related Products From Quota and Export Visa Requirements

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Exempting during 1983 and until further notice certain luggage, handbags, and flat goods of man-made fibers in Category 669 pt. (Only T.S.U.S.A. numbers 706.3400, 706.3900, 706.4140, and 706.4150), from the levels of restraint and export visa requirements currently in effect for certain cotton, wool, and man-made fiber textile products, regardless of the date of export.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709).

SUMMARY: Man-made fiber luggage, handbags, and flat goods in Category 669 pt. (only T.S.U.S.A. numbers 706.3400, 706,3900, 706.4140, and 706.4150) were not included in the U.S. bilateral textile and apparel agreements when those agreements were negotiated. Effective on January 1, 1983, these products will be included in a newly-established category, Category 670, and are not intended to be subject to the limits of any bilateral textile and apparel agreements or export visa requirements. To prevent denial of entry of these products, the Chairman of the Committee for the Implementation of Textile Agreements, in the letter published below, directs the Commissioner of Customs to exempt from levels of restraint and export visa requirements man-made fiber textile products in Category 670 (T.S.U.S.A. numbers 706.3400, 706.3900, 706.4140, and 706.4150) during the twelve-month period beginning on January 1, 1983 and until further notice.

EFFECTIVE DATES: January 1, 1983.

FOR FURTHER INFORMATION CONTACT: Claire McDermott, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377–4212).

Dated: December 21, 1982.

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

December 21, 1982.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: To facilitate implementation of the U.S. textile import restraint program, it would be appreciated if, effective on January 1, 1983 and until further notice, you would exempt from the levels of restraint and export visa requirements man-made fiber textile products in Category 670 [1] (formerly Category 669 pt.) from all countries, regardless of the date of export.

This letter will be published in the **Federal Register.**

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 82-35026 Filed 12-23-82; 8:45 am]

BILLING CODE 3510-25-M

Announcing an Import Restraint Level for Certain Wool Textile Products Exported From the Republic of the Maldives

On October 7, 1982, there was published in the **Federal Register** (47 FR 44365) a notice announcing that, on September 29, 1982, the United States Government, pursuant to the Section 204 of the Agricultural Act of 1956, as amended, (7 U.S.C. 1864), as requested that Government of the Republic of the Maldives to enter into consultations concerning exports to the United States of women's girls', and infants' wool sweaters in Category 446, produced or manufactures in the Republic of the Maldives.

During the period November 30–December 3, 1982, consultations were held between representatives of the two governments. No mutually satisfactory agreement was reached on a solution to this problem; however, the United States Government will continue to consult with the Government of the Republic of the Maldives. In the meantime, under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), the Government of the United States has informed the Government of the Republic of the Maldives, that, beginning on September

[1] T.S.U.S.A. Numbers 706.3400, 706.3900, 706.4140, and 706.4150.

29, 1982 and extending through September 28, 1983, imports of wool textile products in Category 446 will be limited to a level of 15,210 dozen.

Accordingly, in the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry in the United States for consumption, or withdrawal from warehouse for consumption, of wool textile products in Category 446 during the twelve-month period which began on September 29, 1982 in excess of the designated level of restraint.

EFFECTIVE DATE: December 28, 1982.

FOR FURTHER INFORMATION CONTACT: Ronald J. Sorini, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377–4212).

Dated: December 21, 1982.

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

December 21, 1982.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed, effective on December 28, 1982 and for the twelve-month period which began on September 29, 1982 and extends through September 28, 1983 to prohibit entry into the United States for consumption and withdrawal from warehouse for consumption of wool textile products in Category 446, produced or manufactured in the Republic of Maldives and exported during the twelve-month period which began on September 29, 1982, in excess of 15,210 dozen.[1]

Wool textile products in Category 446 which have been exported to the United States prior to September 29, 1982 shall not be subject to this directive.

Wool textile products in Category 446 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Republic of the Maldives and with respect to imports of wool textile products from the Maldives have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register.**

Sincerely,

Walter C. Lenahan,

Implementation of Textile Agreements.

BILLING CODE 6351-01-M

New York Mercantile Exchange; Proposed Amendments Relating to the Round White Potato Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed contract market rule changes.

SUMMARY: The New York Mercantile Exchange ("NYMEX" or "Exchange") has submitted a proposal to amend its round white potato futures contract. The Exchange has proposed to replace the current procedure for delivery of the underlying physical commodity with a cash settlement mechanism. The Commodity Futures Trading Commission ("Commission") has determined that the proposal is of major economic significance and that, accordingly, publication of the proposal is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before Jaunary 26, 1983.

ADDRESS: Interested persons should submit their views and Comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Reference should be made to the New York Mercantile Exchange round white potato futures contract.

FOR FURTHER INFORMATION CONTACT: Robert Clark, Division of Economics and Education, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581 (202) 254–7303.

SUPPLEMENTARY INFORMATION: The NYMEX has submitted a proposal to amend its round white potato futures contract. The Exchange has proposed to replace the current procedure for delivery of the underlying physical commodity with a cash settlement mechanism. Under the existing procedure, all positions remaining open on the last trading day for a delivery month are settled through delivery of U.S. No. 1, size A, round white potatoes grown in Maine, Connecticut or New York. At the buyer's option, delivery is made either: (1) F.O.B. origin point, inspection final, with seller allowing buyer a transportation allowance to Hunts Point Market, New York, New York, or, (2) delivered at the Hunts Point Market. Under the proposed cash settlement mechanism, each open position at the termination of trading in a contract month will be settled using a calculated final cash settlement price. The proposed settlement price is intended to reflect the value of 50-pound sacks of U.S. No. 1, size A, round white Maine potatotes delivered at Hunts Point Market, New York.

The exchange proposes to calculate the final cash settlement price using daily prices at five terminal markets and daily Maine F.O.B. prices reported by the U.S. Department of Agriculture.[1] As proposed by the exchange, the final cash settlement price would be calculated as the sum of two components: (1) A calculated Maine F.O.B. price and (2) an exchange published truck allowance to

[1] The level of restraint has not been adjusted to reflect any imports after September 28, 1982.

[1] The five terminal markets include: Baltimore, Maryland; Boston, Massachusetts; New York, New York; Philadelphia, Pennsylvania; and Pittsburgh, Pennsylvania.

reflect the cost of shipping potatoes from Maine to the Hunts Point Market. The calculated Maine F.O.B. price equals an estimated "Terminal Markets Price" less an estimated "Freight Differential and Wholesale Markup" factor. The "Terminal Markets Price" is the average price reported during the last five trading days of the maturing contract at the five terminal markets. The "Freight Differential and Wholesale Markup" factor equals the average difference between prices reported at the five terminal markets and the reported Maine F.O.B. price during the last ten trading days of the maturing contract. The truck allowance is the allowance from Aroostook County, Maine to the Hunts Point Market as is published by the exchange from time to time.

The Exchange has indicated that the proposal to replace the current delivery procedure with a cash settlement mechanism is expected to eliminate the transaction costs and potential problems associated with physical delivery. The NYMEX believes that the proposed cash settlement mechanism will ensure the convergence between cash and futures prices at the termination of trading, and will provide for continued use of the potato contract for hedging and price basing.

The proposed amendments to the round white potato contract would become effective immediately after Commission approval for all contract months subsequently listed by the Exchange for trading, but would not be applicable to currently listed months.

In accordance with Section 5a(12) of the Commodity Exchange Act, 7 U.S.C. 7a(12) (Supp. V 1981), the Commission has determined that the proposal submitted by the NYMEX concerning its round white potato futures contract is of major economic significance. Accordingly, the NYMEX's proposed amendments to Rules 60.06, 60.07 and 60.09 are printed below, using italics to indicate additions and bracketing to indicate deletions.

* * * * *

60.06 SETTLEMENT

Each round white potato futures contract remaining open at the close of business on the last day of trading in the current contract month shall be settled in cash by 4:30 p.m. of the next business day at the final settlement price calculated by the Exchange according to the formula set forth in Rule 60.07. Such settlement shall occur in accordance with the provisions of Exchange Rule 41.07.

60.07 FINAL SETTLEMENT PRICE

The final settlement price shall be that price which is the Terminal Markets Price less the Calculated Freight Differential and Wholesale Markup plus the NYMEX published truck allowance, based upon the definitions.

The five terminal markets referred to in this section are: Baltimore, Maryland; Boston, Massachusetts; New York, New York; Philadelphia, Pennsylvania: and Pittsburgh, Pennsylvania.

All terminal market prices and Maine Free on Board (F.O.B.) prices will be the daily quotes as reported by the Federal State Market News Service of the United States Department of Agriculture for 50 pound sacks of U.S. No. 1, Size A, round white Maine potatoes.

(A) Determination of Terminal Market Price

(1) Individual Terminal Market Averages

The Individual Terminal Market Averages shall be that price which is the mean of the prices within each terminal market for the last five trading days of that contract month (or, if price quotes are unavailable on any day, the mean of prices on those days for which prices are available) for each of the five terminal markets;

(2) Terminal Markets Price

The Terminal Markets Price shall be that price which is the mean of the Individual Terminal Market Averages (determined in 60.07(A)(1)) for the five terminal markets.

(B) Determination of Calculated Freight Differential and Wholesale Markup

(1) Individual Markets Calculated Freight Differential and Wholesale Markup

The Individual Markets Calculated Freight Differential and Wholesale Markup shall be that amount which is the mean of the difference between the terminal market price and the Maine F.O.B. price for the last ten trading days of that contract month (or, if price quotes are unavailable for either the terminal market price or Main F.O.B. price on any day, the mean of the difference between the terminal market price and the Maine F.O.B. price for those days on which both prices are available) for each of the five terminal markets;

(2) Calculated Freight Differential and Wholesale Markup

The Calculated Freight Differential and Wholesale Markup shall be that amount which is the mean of the Individual Markets Calculated Freight Differential and Wholesale Markup (determined in 60.07(B)(1)) for the five terminal markets.

(C) Exchange Published Truck Allowance

The truck allowance is the allowance from Aroostook County South of Van Buren and Guerette to Hunts Point Market, Bronx, New York as is published by the Exchange from time to time.

[60.09 DELIVERY PROCEDURE

(A) Open Longs

Clearing Members having open long positions shall give the Clearing House written notice of such positions by 5:00 p.m. on the last trading day established for the delivery month. The notice shall list the purchase price and the date of purchase for each open long position in the delivery month and shall indicate whether each contract is a House or a Customer Account.

(B) Intention to Deliver Notice

(1) An Intention to Deliver Notice shall be given by the seller to the Clearing House by 3:00 p.m. on any business day following the last trading day established for the delivery month, but not later that the 15th business day of the delivery month in the case of delivery months other than November or the last business day of November in the case of the November delivery month.

(2) The Intention to Deliver Notice shall be on the form prescribed by the Clearing House, which form shall be properly completed, signed and delivered to the Clearing House.

(3) Upon receipt of the Intention to Deliver Notice, the Clearing House shall promptly pass it to the oldest buyer.

(C) Delivery Instructions

(1) By 12:00 noon on the calendar day following receipt by the buyer of the Intention to Deliver Notice, either:

(a) The buyer shall notify the Clearing House and the seller in writing whether he elects to take delivery at point of origin or at a final inspection point. If he elects to take delivery at point of origin, he shall indicate the destination point. If he elects to take delivery at a final inspection point, he shall indicate the final inspection and the destination points; or

(b) The buyer and seller shall each notify the Clearing House in writing of an agreement pursuant to Rule 60.12.

(2) If no notice has been given to the Clearing House pursuant to section (1)(b) above and the buyer fails to give delivery instructions pursuant to section

(1)(a) above within the prescribed time period, he shall be charged $100.00 per contract. The Exchange shall bill the buyer for such charge and, when collected, shall remit it to the seller. If the buyer fails to give such delivery instructions by 12:00 noon on the second calendar day after receiving the Intention to Deliver Notice, he shall be delinquent in performance.

(3) The seller shall make himself available to receive the buyer's delivery instructions until 12:00 noon of each calendar day on which such instructions may be given by the buyer.

(D) Delivery Notice

(1) The seller shall give the Clearing House a Delivery Notice corresponding to the Intention to Deliver Notice by 3:00 p.m. on any business day not later than the second business day following his receipt of the buyer's delivery instructions, provided, however, that if the buyer gives his delivery instructions on the same day as he receives the Intention to Deliver Notice, the time of the seller to give the Delivery Notice to the Clearing House shall be computed under this section and section (3) below as if the buyer had given his delivery instructions on the following calendar day.

(2) The seller shall cause the truck or car to move no later than the business day after he gives the Delivery Notice to the Clearing House.

(3) If the seller fails to give a Delivery Notice or if the seller fails to cause the truck or the car to move within the prescribed time periods, he shall be charged $100.00 per contract for each subsequent business day that such failure continues, not to exceed two business days. The Exchange shall bill the seller for such charge, and, when collected, shall remit it to the buyer. If the seller fails to give a Delivery Notice by the fourth business day following his receipt of the buyer's delivery instructions, he shall be delinquent in performance. If the seller fails to cause the truck or car to move by the calendar day after the fifth business day following his receipt of the buyer's delivery instructions, he shall be delinquent in performance.

(4) The Delivery Notice shall be on the form prescribed by the Clearing House, which form shall be properly completed, signed and delivered to the Clearing House. The Delivery Notice shall set forth a valid ("live") original Federal-State inspection certificate number applicable to the potatoes to be delivered and the amount to be paid by the buyer.

(5) Upon receipt of the Delivery Notice, the Clearing House shall promptly pass it to the corresponding buyer.

(6) The day the buyer receives the Delivery Notice shall be referred to as the Notice Day.

(E) Shipment and Shipping Documents

(1) Truck Delivery Option

(a) The seller shall ensure that the shipping documents include (i) the final inspection and/or destination points as specified in the buyer's delivery instructions; (ii) a statement that ten extra bags have been included in the shipment; (iii) a statement that the shipment is a New York Mercantile Exchange tender; and (iv) instructions to the trucking company that the truck must arrive at the final inspection point on a business day by 2:00 p.m.; and (v) instructions to the trucking company that it is the buyer's responsibility to unload the truck.

(b) The seller shall be responsible for obtaining a truck for delivery to the final inspection point and notifying the trucking company of the destination point specified in the buyer's delivery instructions prior to the loading of the truck.

(c) The seller shall cause the truck to move to the final inspection point over a commercially acceptable route.

(d) The seller shall promptly notify the Clearing House and the buyer of the anticipated time and date of arrival of the truck at the final inspection point.

(e) the seller shall agree with the trucking company that after completion of a final inspection in New York the trucking company will move the truck to any point within the Hunts Point Market free of charge to the buyer, or, at the option of the buyer, to a point within a thirty mile radius of the final inspection point at a charge to the buyer of $25.00 to be paid by the seller and charged to the buyer.

(f) The buyer shall be responsible for unloading the truck at the destination point. The seller shall allow $50.00 for such unloading.

(2) Rail Delivery Option

(a) The seller shall ensure that the shipping documents include (i) the final inspection and/or destination points as specified in the buyer's delivery instructions; (ii) a statement that ten extra bags have been included in the shipment; and (iii) a statement that the shipment is a New York Mercantile Exchange tender.

(b) Every delivery shall carry storage-in-transit privileges as permitted by the railroad concerned.

(c) The seller shall take such action as is necessary to assure that any through freight rate allowed by the originating railroad upon reconsignment to destination point other than the final inspection point is made available to the buyer.

(d) Adjustment for any charges which are borne by the seller pursuant to these rules, including turn-over and protection charges (heating or icing) when applicable, shall be made promptly upon presentation by the buyer to the seller of an invoice for such charges.

(e) Protection charges (i.e, heating or icing) accruing after risk of loss is assumed by the buyer shall be borne by the buyer.

(F) Replacement Delivery

(1) In the event the truck or car fails to grade at the final inspection point the seller must within four business days after notification of failure to grade, but no later than the last business day of the delivery month in the case of delivery months other than November or the fifth business day of December in the case of the November delivery month, issue a replacement Delivery Notice and make delivery which meets the requirements of this contract provided, however, that the final inspection must be completed by the time specified in Rule 60.11(B)(4). Replacement Delivery Notices may be given to the Clearing House until 4:00 p.m. on any business day. The seller has the option of tendering a replacement delivery by truck, or by rail, as follows:

(a) Replacement Delivery by Truck

(i) The seller may tender a truck replacement, with a valid ("live") original inspection certificate, from any point of origin, routed to the final inspection point originally designated by the buyer, subject to a final inspection at such final inspection point; or (ii) the seller may tender a truck replacement, from any point of origin, at the final inspection point originally designated by the buyer, with a valid ("live") final inspection certificate issued at such final inspection point; or (iii) the seller may tender a truck replacement at any point of origin FOB inspection final at a 2½% discount from the last settling price with a valid ("live") original inspection certificate provided that: (aa) the original inspection is conducted on a continuous basis; (bb) the lot inspected grades U.S. No. 1, Size A, 2 inch minimum–4 inch maximum; and (cc) the lot inspection has no more than a total of 8 percent of the potatoes by weight which fail to meet the requirements for the grade, provided further (i) that included within such eight percent tolerance, the following maximums for specific defects shall apply—four

percent for external defects; four percent for internal defects; and three percent for potatoes which are affected by freezing, southern bacterial wilt, ring rot or late blight, with no more than double said percentages in any one sample; and (ii) that the potatoes are free of soft rot, wet breakdown and freezing.

(b) Replacement Delivery by Rail

(i) The Seller may tender a car replacement with a vaild ("live") original inspection certificate, from any point of origin, routed to the final inspection point originally designated by the buyer, subject to a final inspection at such final inspection point; or (ii) the seller may tender as car replacement, from any point of origin, at the final inspection point originally designated by the buyer, with a vaild ("live") final inspection certificate issued at such final inspection point; or (iii) the seller may tender a car replacement at any point of original FOB inspection final at a 2½% discount from the last settling price with a valid ("live") original inspection certificate provided that: (aa) the original inspection is conducted on a continous basis; (bb) the lot inspected grades U.S. No. 1, Size A, 2 inch mininum–4 inch maximum; and (cc) the lot inspected has no more than a total of 8 percent of the potatoes by weight which fail to meet the requirements for the grade, provided further (i) that included within such eight percent tolerance, the following maximums for specific defects shall apply—four percent for external defects; four percent for internal defects; and three percent for potatoes which are affected by freezing, southern bacterial wilt, ring rot, or late blight; with no more than double said percentages in any one sample; and (ii) that the potatoes are free of soft rot, wet breakdown and freezing.

(2) In lieu of replacement deliveries under section (F)(1) above, the seller may enter into an agreement with the corresponding buyer pursuant to Rule 60.12.

(G) Settling Price

The last settling price for the delivery month shall be the basis for delivery.

(H) Non-Transferable

The buyer who receives a Delivery Notice from the Clearing House shall be deemed to have agreed to accept delivery. Intention to Deliver Notices and Delivery Notices are not transferable.

(I) Delivery Day

The Delivery Day shall be the day on which delivery is completed. Delivery is completed at the following times:

(1) if the buyer has elected to take delivery at a final inspection point, when the truck or car has passed the final inspection;

(2) if the buyer has elected to take delivery at point of origin, thereby waiving final inspection, when the buyer receives the Delivery Notice;

(3) if the buyer has been given a replacement Delivery Notice which requires final inspection to be made at a final inspection point, when the truck or car has passed final inspection;

(4) if the buyer has been given a replacement Delivery Notice which has a valid ("live") final inspection certificate, when the buyer receives the replacement Delivery Notice.

(5) If the buyer has been given a replacement Delivery Notice which provides for delivery FOB point of origin, when the buyer receives the replacement Delivery Notice.

(j) Risk of Loss

The risk of loss for the potatoes delivered hereunder shall pass from seller to buyer when delivery is completed in accordance with section (I) above.

(K) Payment

The buyer shall pay the seller by certified check by 12:00 noon of the business day following the Delivery Day.

Payment shall be based on the total weight of the potatoes delivered as indicated on the Delivery Notice. Payment shall not be required for any quantity delivered in excess of 50,000 pounds.]

CONSUMER PRODUCT SAFETY COMMISSION

Consumer Product Safety Standard for Rotary Walk-Behind Power Lawn Mowers; Information Collection Request

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of information collection request.

SUMMARY: The Commission is seeking Office of Management and Budget clearance for information collection in a study mandated by Congress to assess the impact on consumers of a Congressionally prescribed amendment to the Commission's safety standard for rotary walk-behind power lawn mowers.

SUPPLEMENTARY INFORMATION: On February 15, 1979, the Commission published a final consumer product safety standard to reduce the estimated 77,000 injuries that occur each year from contact with the moving blades of walk-behind power lawn mowers (44 FR 9990) (16 CFR Part 1205). The effective date of the standard was originally to be December 31, 1981. However, in the 1980 appropriations bill (Pub. L. 96–526), the Congress delayed the effective date until June 30, 1982.

A detailed explanation of the background and rationale for the standard is given in the **Federal Register** notice that issued the standard. Briefly, the standard reduces the risk of injury from blade contact with rotary power lawn mowers by mandating two main performance requirements. First, in order to reduce injuries to the hand of the operator, § 1205.5(a)(1) of the standard requires that the mower have a blade control that will stop the blade within 3 seconds of the time that the operator releases the handle of the mower. This is intended to ensure that when the operator's hands leave the handle, the blade will stop before the operator can put his or her hands in the vicinity of the blade. This requirement will also reduce foot injuries that occur when the operator is working or moving around the mower and is not holding on to the handle.

In order to further reduce foot injuries, § 1205.4(a) of the standard requires that areas of the mower that can be reached

by the operator's foot when he or she is holding the handle (the rear 120° of the mower) shall be constructed so that a specified probe that approximates the human foot cannot be brought into contact with the blade from these areas.

The requirement that the blade stop within 3 seconds of the release of the handle can be accomplished in two ways. First, the blade can be disconnected from the mower's power source and brought to a stop while the power source continues to operate. This approach is usually expected to involve a brake-clutch unit to disconnect the blade and brake it to a stop within the allowable 3 seconds. The other way of accomplishing this requirement is to turn off the power source, thereby bringing the blade and the power source to a stop together.

If the blade is stopped the engine ("engine-kill"), § 1205(a)(1)(iv) of the standard originally required that the mower have a power restart mechanism. This requirement was included because it seemed likely that users inconvenienced by the need to manually restart a mower that stopped every time the handle was released would attempt to disable the blade-stop control.

Congress, however, in subsection 1212(a) of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35; 95 Stat. 724), required the Commission to amend its lawn mower standard so that rotary-type lawn mowers which stop the engine within three seconds of release of the handle by the operator and which have only a manual restart of the engine would be deemed in compliance with the standard, provided that the engine starting controls are within 24 inches of the top of the mower's handles or, alternatively, that the mower is equipped with a 360° protective foot shield. See 46 FR 54932; November 5, 1981.

Further, subsection 1212(b) of the Omnibus Budget Reconciliation Act of 1981 requires the Commission to conduct a study of the effect on consumers of the amendment prescribed by subsection 1212(a) and to report the results of such study by June 30, 1984. This information collection proposal is in response to that Congressional mandate. The information for the study will be collected by a private contractor that will screen 70,000 to 90,000 members of its national consumer panel through a short mail questionnaire to identify about 1,500 consumers who have purchased a new mower since July 1, 1982. The members of the panel who are selected for the follow-up telephone interview will be asked about the safety features on their new mowers and the manner in which they have utilized those features. This study will enable the Commission and Congress to evaluate and compare the degree to which consumers operate complying walk-behind power mowers in the manner intended.

DATE: Comments on this review/clearance application must be submitted on or before January 27, 1983.

ADDRESS: Send comments to Ms. Gwen Pla, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3001, Washington, D.C. 20503. Copies of the request for OMB review and clearance may be obtained from the Reading Room, Consumer Product Safety Commission, 1111 18th Street, NW., Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT: Charles R. Casper, Jr., Office of Budget and Program Implementation, Consumer Product Safety Commission, Washington, D.C. 20207, (301) 492–6529.

Dated: December 21, 1982.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

Command and General Staff College Advisory Committee; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463) announcement is made of the following committee meeting:

Name: Command and General Staff College (CGSC) Advisory Committee.

Date: January 11–13, 1983.

Place: College Conference Room, Bell Hall, Ft. Leavenworth, KS 66027, Phone 913–684–2741.

Time: 2000–2200, January 11, 1983; 0900–1630, January 12, 1983; 0900–1400, January 13, 1983.

Proposed Agenda: 2000–2200, January 11, 1983: Review of CGSC educational program; 0900–1630, January 12, 1983: Continuation of review; 0900–1000, January 13, 1983: Continuation of review; 1000–1130, January 13, 1983: Executive session; and 1300–1430, January 13, 1983: Report to the Commandant.

The purpose of the meeting is for the Advisory Committee to examine the entire range of College operations and, where appropriate, to provide advice and recommendations to the College Commandant and Faculty.

The meeting will be open to the public to the extent that space limitations of the meeting location permit. Because of these limitations, interested parties are requested to reserve space by contacting the Committee's Executive Secretary.

Philip J. Brookes,

Executive Secretary, CGSC Advisory Committee.

DEPARTMENT OF ENERGY

Energy Information Administration

Revision of Alternative Fuel Price Ceilings and Incremental Price Threshold for High Cost Natural Gas; Correction

The Energy Information Administration (EIA) published in the December 20, 1982 **Federal Register** (47 FR 56699) on behalf of the Federal Energy Regulatory Commission (FERC) the incremental pricing threshold for high cost natural gas, to be effective January 1, 1983. Subsequent to the publication the EIA discovered an error in column three of the notice for the volume-weighted average price for No. 2 distillate fuel oil landed in the greater New York City Metropolitan Area during October 1982. The correct volume-weighted average price is $42.04 per barrel. This error does not change the threshold price that was previously published.

Office of Energy Research

DOE/NSF Nuclear Science Advisory Committee; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: DOE/NSF Nuclear Science Advisory Committee.

Date and time: Wednesday, January 12, 1983—9:00 a.m.–6:00 p.m.

Place: The National Science Foundation, Room 338, 1800 G Street, NW., Washington, DC.

Contact: John R. Erskine, U.S. Department of Energy, Division of Nuclear Physics, ER–23 GTN, Washington, DC 20545. Telephone: 301–353–3613, FTS 233–3613.

Purpose of Committee: To provide advice to the Department of Energy and the National Science Foundation on the management of and long range planning for basic nuclear research programs.

Tentative agenda: Discussion of procedure for evaluating facility proposals; Planning for revision of Long Range Plan; Discussion of status of subcommittees; Discussion of DOE and NSF fuding; and Public Comment.

Public participation: The meeting is open to the public. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Member of the public who wish to make oral statements pertaining to agenda items should contact Gloria Decker at 202–252–8990. Requests must be received at least five days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda.

Transcripts: Available for public review and copying at the Public Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue, SW, Washington, D.C. between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C. on December 20, 1982.

Howard H. Raiken,

Deputy Advisory Committee Management Officer.

[Docket No. ER83–63–000]

Appalachian Power Co.; Order Accepting Rates for Filing, Noting Interventions and Terminating Docket

Issued: December 17, 1982.

On October 26, 1982, the American Electric Power Service Corporation, on behalf of Appalachian Power Company (APCO), tendered for filing Modification No. 18, Service Schedule I, to an existing Interconnection Agreement between APCO and Virginia Electric and Power Company (VEPCO).[1]

[1] *See* Attachment A for rate schedule designation.

APCO currently provides VEPCO with 600 MW of power and associated energy from its Tanners Creek Unit Nos. 1 through 3; its Gavin Unit Nos. 1 and 2; and its Amos Unit No. 3 under an Interconnection Agreement which expires on December 31, 1982. The instant filing establishes a replacement service for the expiring service. APCO states that the new service will give VEPCO greater flexibility in purchasing capacity and energy than was provided under the expiring Service Schedule H. The modified agreement will provide 600 MW of capacity and energy to VEPCO for a two-year period beginning January 1, 1983, the proposed effective date, and expiring on December 31, 1984.

The filing provides that APCO will charge VEPCO a fixed monthly demand charge of $2.8 million which will be effective for the entire two-year contract period. Energy will be provided in two parts: (1) Part I energy equal to 150 MWh per hour on a take-or-pay basis, and (2) Part II energy of up to 450 MWh per hour at VEPCO's discretion. Part I energy will be billed at 1 mill per kWh plus the average monthly fuel cost at the Tanners Creek Unit Nos. 1, 2, and 3 during the billing month, as adjusted for transmission losses. Part II energy will be billed at 1 mill per kWh plus the average monthly fuel cost at Amos Unit No. 3 and at Gavin Unit Nos. 1 and 2 during the billing period again adjusted for transmission losses. This proposed service is considered firm except for two contingencies associated with the sellers' coal supply. The purpose of the purchase by VEPCO is for the displacement of oil-fired power with cheaper coal-fired power

Notice of the filing was published in the **Federal Register** with comments due on or before November 22, 1982. A motion to intervene and request for a one day suspension was filed by the North Carolina Eastern Municipal Power Agency (Power Agency) and the ElectriCities of North Carolina (ElectriCities).

These entities seek a one day suspension and a hearing so that an investigation of the rates and charges may be conducted and the amounts collected will be subject to refund. The Power Agency is a partial requirements customer of VEPCO while ElectriCities' members are full requirements VEPCO customers. The customers contend that any purchased power contracts entered into by VEPCO will ultimately be reflected in their wholesale rates. Specifically, the intervenors contend that they must be assured that APCO is properly assigning the high-cost coal developed from subsidiary resources,

and that APCO is not assigning all such fuel costs to interchange transactions such as that contemplated by the instant filing.

Discussion

Under Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the motion to intervene filed by the Power Agency and ElectriCities serves to make them parties to this proceeding absent opposition within 15 days.

With respect to the intervenors' request for suspension and a hearing based on their desire to be assured that APCO is not assigning all of the high-cost coal from its subsidiaries as fuel costs in this purchased power transaction, we find that the intervenors have not raised an issue which warrants suspension or hearing. Our analysis indicates that in 1981, the six designated operating units supplying power to VEPCO were only partially fueled by subsidiary coal. In addition, the power purchased by VEPCO will be priced at the average monthly cost of fuel consumed at the supplying generating units. Consequently, we believe that the intervenors' concern that the subsidiary coal will be assigned exclusively to the VEPCO sale is unwarranted and does not serve as a basis for initiating a hearing.

We also note that the Power Agency and ElectriCities do not question the prudence of APCO's coal purchases from its subsidiary, but limit their concern strictly to the assignment of such purchases to the interchange transaction. Because the six generating units furnishing the power for this sale are among the highest fuel cost units on the American Electric Power System,[1] these units are precisely the ones which would be expected to provide the energy for any off-system sale to VEPCO or others, and these units form a proper basis for pricing the interchange service. We believe that it is both appropriate, and a common industry practice to assign the highest fuel cost to off-system sales, while lower fuel cost resources are reserved for the benefit of the APCO native load customers who, through their rates, provide for the construction and operation of the generating facilities.

Since the Power Agency and ElectriCities have raised no issues of law or fact which would warrant an evidentiary hearing, and furthermore, since our analysis indicates that the rates tendered for filing by APCO are not excessive, APCO's submittal will be accepted for filing to become effective on January 1, 1983, as requested.

The Commission orders:

(A) Appalachian Power Company's submittal in this docket is hereby accepted for filing to become effective on January 1, 1983, without suspension.

(B) The request by North Carolina Eastern Municipal Power Agency and ElectriCities of North Carolina to suspend APCO's filing for one day and initiate a hearing is hereby denied.

(C) Docket No. ER83-63-000 is hereby terminated.

(D) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb.

Secretary.

Central Power and Light Co.; Refund Report

December 20, 1982.

Take notice that on December 2, 1982, Central Power and Light Company filed a refund report pursuant to the Commission's letter order dated March 11, 1982.

Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before December 30, 1982. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. QF83-11-000]

Hotel Del Coronado; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

December 20, 1982.

On October 15, 1982, Hotel Del Coronado of 1500 Orange Avenue Coronado, California 92118, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's rules. The application was completed on December 9, 1982.

The topping-cycle cogeneration facility will be located in Coronado, California. The primary energy source will be natural gas. The electric power production capacity will be 800 kilowatts. The waste heat recovery boiler is capable of producing 6000 pounds of steam per hour at 100 PSI. The turbine is a dual fuel unit capable of operating in parallel with the power utility or separately as a stand-by system. Installation of the facility began April, 1982. No electric utility, electric holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-161-000]

Idaho Power Co.; Filing

December 21, 1982.

Take notice that on December 7, 1982, Idaho Power Company (Idaho) tendered for filing in compliance with the Federal Energy Regulatory Commission's Order of October 7, 1978, a summary of sales made under the Company's 1st Revised FERC Electric Tariff, Volume No. 1 (Supersedes Original Volume No. 1) during October 1982, along with cost justification for the rate charged. The filing included the following supplements:

Utah Power & Light Company—Supplement 12
Sierra Pacific Power Company—Supplement 10
Portland General Electric Company—Supplement 9

[1] APCO is an operating company within the AEP system.

Washington Water Power Company—Supplement 9
Puget Sound Power & Light Company—Supplement 3
San Diego Gas & Electric Company—Supplement 6
Los Angeles Water and Power Company—Supplement 8
Southern California Edison Company—Supplement 9
City of Burbank—Supplement 8
City of Pasadena—Supplement 8
City of Glendale—Supplement 8

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before January 5, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER83-186-000]

Kansas City Power & Light Co.; Filing

December 21, 1982

Take notice that Kansas City Power & Light Company (KCPL) on December 8, 1982, tendered for filing a new Municipal Wholesale Firm Power Contract between KCPL and the City of Slater, Missouri (City) dated October 12, 1982. This contract replaces a similar contract (Rate Schedule FPC No. 81 and supplements thereto) which was cancelled by the Commission effective May 31, 1982, in Docket No. ER82-439-000.

The purpose for this rate schedule filing is to provide for Wholesale Firm Power Service from KCPL to the City during the time in which the City is arranging to receive service from an alternate power source. The contract is for a term of one year through May 31, 1983.

KCPL requests an effective date of June 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing were served upon the City and the Missouri Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before January 5, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-183-000]

Montana Power Co.; Filing

December 21, 1982.

Take notice that Montana Power Company (Montana) on December 7, 1982, tendered for filing a letter agreement between PUD No. 1 of the Chelan County (Chelan) and Montana. Montana states that this letter agreement is for storage of energy in Montana's reservoirs with right of first refusal for Montana to acquire this energy if Chlelan elects not to have the storage energy returned.

Montana indicates that as of the date of filing no jurisdictional transactions under the proposed Letter Agreement had occurred; and, therefore, estimates of transactions and revenues that may occur would be conjecture.

Montana requests an effective date of September 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before January 5, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-763-000

Safe Harbor Water Power Corp.; Order Accepting for Filing and Suspending Rates, Noting Intervention, and Establishing Hearing Procedures

Issued: December 17, 1982.

On August 31, 1982, as completed on October 22, 1982,[1] Safe Harbor Water Power Corporation (Safe Harbor) tendered for filing a superseding contract with Baltimore Gas and Electric Company (BG&E) and Pennsylvania Power and Light Company (PP&L) which would raise the rate of return component of the formula rate under which Safe Harbor sells its Hydroelectric output to BG&E and PP&L.[2] The proposed increase in the rate of return would result in an increase in revenues of approximately $897,687 (9.98%) for the calendar year 1981 test period. Safe Harbor also proposes to modify the formula rate to provide for normalization accounting as required by section 35.25 of the commission's regulations and to qualify for the income tax deductions associated with the use of ACRS under the Economic Recovery Tax Act of 1981. Safe Harbor requests a November 1, 1982 effective date for the proposed changes.

Safe Harbor is a subsidiary of BG&E and PP&L.[3] Its only plant in service is a hydroelectric project on the Susquehanna River at Safe Harbor, Pennsylvania, that consists of seven main and two auxiliary generators having an aggregate capacity of 230 MW.[4] Under the terms of the agreement, BG&E purchases two-thirds and PP&L purchases one-third of the plant output. In return for this capacity and energy, Safe Harbor receives payments for all operation and maintenance expenses, general expenses, taxes, depreciation and a return on rate base. Payments are made in proportion to BG&E's and PP&L's respective shares of the output.

Notice of the instant filing was published in the **Federal Register**, with comments due on or before September 28, 1982. The Public Service Commission of Maryland filed a timely notice of intervention, but raised no specific substantive issues.

Discussion

The timely notice of intervention filed by the Maryland Commission is sufficient, pursuant to Rule 214(a)(2) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), to make it a part to this proceeding.

Our preliminary review of Safe Harbor's filing indicates that the proposed rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the changes to the formula rate for filing and suspend them as ordered below.

In *West Texas Utilities Company*, 18 CFR ¶ 61,189 (1982), we noted that rate filings would ordinarily be suspended for five months where preliminary review indicates that the proposed increase may be unjust or unreasonable and may generate substantially excessive revenues, as defined in *West Texas*. Because our preliminary review indicates that Safe Harbor's proposed increase may yield substantially excessive revenues, we shall suspend Safe Harbor's proposed formulary rate for five months from sixty days after filing, to become effective, subject to refund, on May 22, 1983.

As a final matter, the Commission observes that Safe Harbor has utilized full tax normalization with respect to Accelerated Cost Recovery System (ACRS) property. According to our review, the instant filing reflects a normalization method of accounting for all post-1980 property additions, Safe Harbor has correctly reflected the effects of normalization, and the submittal satisfies the requirements of the Economic Recovery Tax Act of 1981.

---

[1] Although Safe Harbor originally submitted its filing on August 31, 1982, the filing was completed upon receipt of additional information on October 22, 1982 concerning the company's proposed normalization accounting. The additional information was filed in response to a deficiency letter dated September 29, 1982.

[2] *See* Attachment A for rate schedule designations.

[3] PP&L owns one-third and BG&E owns two-thirds of Safe Harbor's common equity.

[4] Safe Harbor has began construction of five additional generating units with an aggregate capacity of 187.5 MW and expected in-service dates in 1985.

The Commission orders

(A) Safe Harbor's submittal is hereby accepted for filing and suspended for five months sixty days after filing, to become effective, subject to refund, on May 22, 1982.

(B) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of Safe Harbor's rates.

(C) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately thirty (30) days of the date of this order, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. Such conference shall be held for purposes of establishing a procedural schedule including the submittal of testimony and exhibits by Safe Harbor. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(D) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Office of Hearings and Appeals

Issuance of Proposed Decision and Order; Week of October 25 through October 29, 1982

During the week of October 25 through October 29, 1982, the proposed decision and order summarized below was issued by the Office of Hearings and Appeals of the Department of Energy with regard to an application for refund in a Subpart V proceeding.

Under the procedural regulations that apply to exception proceeding (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these proposed decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room 1111, New Post Office Building, 12th and Pennsylvania Ave., NW. Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays.

George B. Breznay,

Director, Office of Hearings and Appeals.

December 15, 1982.

Aluminum Company of America, Tenneco Oil Company, Houston, Texas; RF4–1, RF4–2.

Tenneco Oil Company filed an Application for Refund in connection with a consent order that the Aluminum Company of America entered into with the Economic Regulatory Administration. In its Application, Tenneco requests a refund equal to the total amount of monies that Alcoa paid pursuant to the consent order, on the grounds that Tenneco was the only first purchaser of the natural gas liquids that Alcoa sold during the consent order period, and that it maintained cost banks in excess of the consent order monies. The OHA found that the prices Alcoa charged Tenneco were higher than average market prices, and determined that Tenneco was injured by the alleged overcharges. The OHA therefore tentatively decided to approve Tenneco's refund request.

Objection To Proposed Remedial Orders Filed; Week of November 29 through December 3, 1982

During the week of November 29 through December 3, 1982, the notices of objection to proposed remedial orders listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who wished to participate in the proceeding the Department of Energy will conduct concerning the proposed remedial orders described in the Appendix to this Notice must file a request to participate pursuant to 10 CFR 205.194 within 20 days after publication of this Notice. The Office of Hearings and Appeals will then determine those persons who may participate on an active basis in the proceeding and will prepare an official service list, which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests to participate in these proceedings should be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

George B. Breznay,

Director, Office of Hearings and Appeals.

December 15, 1982.

Vantage Petroleum Corporation, Bohemia, New York; HRO–0100 Motor Gasoline.

On December 2, 1982, the New York State Energy Office, Rockefeller Plaza, Albany, New York 12223 filed a Notice of Objection to a Proposed Remedial Order issued to Vantage Petroleum Corp., 515 Johnson Avenue, Bohemia, NY 11716 by the Office of Special Counsel (OSC) of the Economic Regulatory Administration (ERA), Philadelphia Field Office, on November 5, 1982. In the PRO, the OSC found that during the period April 1, 1979 through August 31, 1979, Vantage committed pricing violations connected with the sale of regular and unleaded motor gasoline at its company operated retail stations and to its wholesale unbranded retail dealer customers.

According to the PRO, the Vantage violation resulted in $1,274,886.72 of overcharges.

Winston Refining Co., Fort Worth Texas; HRO–0099 Refined Petroleum Products.

On November 30, 1982, Winston Refining Co. of Fort Worth, Texas filed a Notice of Objection to a Proposed Remedial Order which the DOE Southwest District Office of Enforcement issued to the firm on October 19, 1982. In the PRO, the Southwest District found that during the period September 1973 to January 1976, Winston sold gasolines, distillates, and general refinery products at prices in excess of those allowed by 10 CFR Part 212, Subpart E.

According to the PRO, the Winston violation resulted in $1,651,046.00 of overcharges.

BILLING CODE 6450-01-M

Cases Filed, Week of December 3 Through December 10, 1982

During the Week of December 3 through December 10, 1982, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

[Week of Dec. 3 through Dec. 10, 1982]

Date	Name and location of applicant	Case No.	Type of submission
Dec. 3, 1982	Powerine Oil Co., Washington, D.C.	HRO-0094 and HRH-0094.	Motions for Discovery and Evidentiary Hearing. If granted: Discovery would be granted and an evidentiary hearing would be convened in connection with the Statement of Objections submitted by Powerine Oil Company in response to the July 22, 1982 Proposed Remedial Order issued to Powerine (Case No. HRO-0085).
Dec. 6, 1982	Huntway Refining Co., Los Angeles, Calif.	HCX-0059	Supplemental Order. If granted: The September 30, 1980, Decision and Order (Case No. BEE-0392) issued to Huntway Refining Company by the Office of Hearings and Appeals would be modified in connection with the November 15, 1982, Order of Remand issued by the U.S. District Court, Central District of California.
Dec. 8, 1982	Atlantic Richfield Co., Washington, D.C.	HRX-0060	Supplemental Order. If granted: The Office of Special Counsel would be ordered to release certain documents which it submitted to the Office of Hearings and Appeals for *in camera* review pursuant to the November 29, 1982, Decision and Order (Case No. HRZ-0071) issued to Atlantic Richfield Company.
Dec. 8, 1982	Gulf Oil Corp., Washington, D.C.	HRX-0061	Supplemental Order. If granted: The Office of Special Counsel would be ordered to release certain documents which it submitted to the Office of Hearings and Appeals for *in camera* review pursuant to the November 29, 1982, Decision and Order (Case No. HRZ-0071) issued to Atlantic Richfield Company.
Dec. 8, 1982	Marathon Oil Co., Washington, D.C.	HRX-0062	Supplemental Order. If granted: The Office of Special Counsel would be ordered to release certain documents which it submitted to the Office of Hearings and Appeals for *in camera* review pursuant to the November 29, 1982, Decision and Order (Case No. HRZ-0071) issued to Atlantic Richfield Company.
Dec. 8, 1982	Texaco, Inc., Washington, D.C.	HRX-0063	Supplemental Order. If granted: The Office of Special Counsel would be ordered to release certain documents which it submitted to the Office of Hearings and Appeals for *in camera* review pursuant to the November 29, 1982, Decision and Order (Case No. HRZ-0071) issued to Atlantic Richfield Company.
Dec. 8, 1982	Louisiana Land and Exploration Co., Washington, D.C.	HRX-0064	Supplemental Order. If granted: The Office of Special Counsel would be ordered to release certain documents which it submitted to the Office of Hearings and Appeals for *in camera* review pursuant to the November 29, 1982, Decision and Order (Case No. HRZ-0071) issued to Atlantic Richfield Company.
Dec. 9, 1982	Crown Central Petroleum Corp., Baltimore, Md.	HRD-0095 and HRH-0095.	Motions for Discovery and Evidentiary Hearing. If granted: Discovery would be granted and an evidentiary hearing would be convened in connection with the Statement of Objections submitted by Crown Central Petroleum Corporation in response to the Proposed Remedial Order issued to Crown Central (Case No. HRO-0072).
Dec. 9, 1982	Rogers Fuels, Inc., Middlebury, Vt.	HEE-0054	Exception to the Reporting Requirements. If granted: Rogers Fuels, Inc. would not be required to file Form EIA-9A, "No. 2 Distillate Price Monitoring Report."
Dec. 10, 1982	McGraw-Hill Publications Co., Washington, D.C.	HFA-0103	Appeal of an Information Request Denial. If granted: The November 9, 1982, Information Request Denial issued by the Office of Procurement Operations would be rescinded and McGraw-Hill Publications would receive access to information relating to the DOE's purchase of Mexican crude oil form PEMEX.
Dec. 10, 1982	Teledyne Laars and Raypak, Inc., San Dimas, Calif.	HXE-0055	Exception from the Energy Conservation Program for Consumer Products. If granted: Teledyne Laars & Raypak, Inc. would continue to receive an exception from the provisions of 10 CFR Part 430 which would permit the firm to modify the energy efficiency test procedures applicable to finned copper tube boilers.

Office of the Secretary

Compliance With the National Environmental Policy Act; Finding of No Significant Impact; Selection of Borosilicate Glass as the Defense Waste Processing Facility Waste Form for High-Level Radioactive Wastes, Savannah River Plant, Aiken, South Carolina

SUMMARY: The Department of Energy (DOE) has prepared an environmental assessment (DOE/EA-0179) on the proposed selection of borosilicate glass as the Defense Waste Processing Facility (DWPF) waste form for the immobilization of the high-level radioactive wastes generated and stored at the DOE Savannah River Plant (SRP), Aiken, South Carolina. Based upon the analyses in the environmental assessment and in the environmental impact statement for the DWPF (DOE/EIS-0082), and after consideration of comments received during the public review period on a proposed finding of no significant impact, the Department has determined that the proposed action will not have a significant impact on the environment and that the preparation of an environmental impact statement is not required.

Background

The proposed action is to select borosilicate glass as the DWPF waste form for immobilizing SRP high-level radioactive wastes. High-level radioactive wastes have been generated at the SRP since 1954 as a byproduct of U.S. defense material production activities. These wastes result from the chemical processing of reactor fuel and target elements and typically consist of reactor fission products, unrecovered uranium and plutonium, activation products, aluminum compounds, and most of the processing chemicals. About 110,000 cubic meters (28 million gallons) of high-level radioactive wastes are temporarily stored in large underground tanks at the SRP.

The environmental impacts of immobilizing the SRP high-level wastes in the borosilicate glass waste form, temporarily storing the immobilized wastes on site until a geologic repository becomes available, and transporting the immobilized wastes to a geologic repository are assessed in the DWPF EIS. Borosilicate glass was selected as the reference waste form for the DWPF EIS analyses based on an evaluation program which began in 1973.

A notice of availability of the environmental assessment and a proposed finding of no significant impact on the selection of borosilicate glass as the DWPF waste form published in the **Federal Register** on July 29, 1982. The proposed finding and copies of the environmental assessment were distributed to interested individuals and organizations. Seven letters (including 4 no comments) were received. The comments received support the Department's preliminary finding that the selection of borosilicate glass as the waste form for SRP wastes will not result in any significant impacts. Repository site selection, construction, and operation will require the development of further technical information and further environmental review.

FOR FURTHER INFORMATION CONTACT: Raymond Pelletier, Office of Environmental Compliance, Office of the Assistant Secretary for Environmental Protection, Safety, and Emergency Preparedness, U.S. Department of Energy, Room 4G–047, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–4610.

Finding

The selection of borosilicate glass as the DWPF waste form is not a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act. Therefore, an environmental impact statement for the action is not required. This finding is based on the following, which are supported by the analyses in the waste form EA and DWPF EIS:

1. Givern the decision to immobilize the SRP wastes at the DWPF and to dispose of them in a Federal geologic repository, the selection of the specific waste form, i.e., borosilicate glass, will not result in significant environmental impacts.

2. Differences in environmental effects and risks between borosilicate glass and available alternative waste forms such as crystalline ceramic SYNROC–D are not significant.

3. Borosilicate glass is capable of meeting draft and proposed Environmental Protection Agency and Nuclear Regulatory Commission repository performance specifications as a part of the repository waste form package.

4. The environmental effects and risks of immobilizing the SRP wastes with borosilicate glass, transporting these immobilized wastes to a geologic repository, and emplacing the immobilized wastes in a geologic repository are addressed in the DWPF EIS. Completion of the waste form EA has identified no new information which would affect the DWPF EIS analyses.

Date issued: December 21, 1982.

William A. Vaughan,

Assistant Secretary, Environmental Protection, Safety, and Emergency Preparedness

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Marshall & Ilsley Corporation*, Milwaukee, Wisconsin; to acquire 90 percent of the voting shares or assets of Central Bank & Trust, Marshfield, Wisconsin. Comments on this application must be received not later than January 19, 1983.

2. *Old Second Bancorp, Inc.*, Aurora, Illinois; to acquire 100 percent of the voting shares or assets of Bank of North Aurora, North Aurora, Illinois. Comments on this application must be received not later than January 19, 1983.

Board of Governors of the Federal Reserve System, December 20, 1982.

James McAfee

Associate Secretary of the Board.

BILLING CODE 6210–01–M

Formation of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, indentifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *First Fidelity Bancorp, Inc.*, Fairmont, West Virginia; to become a bank holding company by acquiring 100 percent of the voting shares of First National Bank in Fairmont, Fairmont, West Virginia. Comments on this

application must be received not later than January 11, 1983.

B. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *FNB Banking Company,* Griffin, Georgia; to become a bank holding company by acquiring 100 percent of the voting shares of First National Bank of Griffin, Griffin, Georgia. Comments on this application must be received not later than January 19, 1983.

C. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Tanco, Ltd.,* Guttenberg, Iowa; to become a bank holding company by acquiring 80 percent or more of the voting shares of Security State Bank, Guttenberg, Iowa. Comments on this application must be received not later than January 19, 1983.

D. **Federal Reserve Bank of St. Louis** (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *United Bancorp of Princeton, Inc.,* Princeton, Kentucky; to become a bank holding company by acquiring 100 percent of the voting shares of the successor by merger to Farmers Bank and Trust Company, Princeton, Kentucky. Comments on this application must be received not later than January 19, 1983.

E. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Evco, Inc.,* Caster, Wyoming; to become a bank holding company by acquiring 100 percent of the voting shares of First National Bank in Evanston, Evanston, Wyoming. Comments on this application must be received not later than January 17, 1983.

F. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *DeAnza Bancorp,* Sunnyvale, California; to become a bank holding company by acquiring 100 percent of the voting shares of DeAnza Bank, Sunnyvale, California. Comments on this application must be received not later than January 19, 1983.

2. *Mid City Bancorp,* Los Angeles, California; to become a bank holding company by acquiring 100 percent of the voting shares of Mid City Bank, N.A., Los Angeles, California. Comments on this application must be received not later than January 19, 1983.

Board of Governors of the Federal Reserve System, December 20, 1982.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

Transaction	Waiting period terminated effective
(1) The Manufacturers Life Insurance Company's proposed acquisition of all voting securities of Maine Fidelity Life Insurance Company.	Dec. 10, 1982.
(2) Medtronic, Inc.'s proposed acquisition of all voting securities of International Medical Corporation.	Dec. 9, 1982.
(3) Conrac Corporation's proposed acquisition of all assets of Ford Industries, Inc..	Dec. 9, 1982
(4) Sirius Systems Technology, Inc.'s proposed acquisition of all voting securities of Victor United, Inc..	Dec. 9, 1982.
(5) Star International Company, Inc.'s proposed acquisition of certain voting securities of American International Group.	Dec. 9, 1982.
(6) McDonnell Douglas Corporation's proposed acquisition of substantially all the assets of The Brind Corporation.	Dec. 9, 1982.
(7) J. P. Stevens & Company, Incorporated's proposed acquisition of all voting securities of Stevcoknit, Inc..	Dec. 9, 1982.
(8) The Securities Group's proposed acquisition of all voting securities of Southern California Savings and Loan Association.	Dec. 8, 1982
(9) Petro Lewis Corporation's proposed acquisition of certain assets of E.I. DuPont de Nemours and Company.	Dec. 9, 1982
(10) Charter Consolidated PLC's proposed acquisition of all voting securities of B&LS Contracting Inc. and Tri-Angle Construction, Company, Inc..	Dec. 9, 1982.
(11) A. Johnson & Company's proposed acquisition of all voting securities and certain assets of ITT Holding Company.	Dec. 10, 1982.
(12) Great Western Coca-Cola Bottling Company's proposed acquisition of all voting securities of Florida Coca-Cola Bottling Company.	Dec. 10, 1982.
(13) Bristol-Myers Company's proposed acquisition of all voting securities of Medical Engineering Corporation.	Dec. 14, 1982.
(14) DWG Corporation's proposed acquisition of all voting securities of Wilson Brothers.	Dec. 14, 1982.
(15) TKR Cable Company's proposed acquisition of substantially all assets of Cablevision, Inc. and Good-Vue CATV.	Dec. 14, 1982.
(16) NVF Company's proposed acquisition of certain voting securities of City Investment Company.	Dec. 2, 1982
(17) Fuqua Industries, Inc.'s proposed acquisition of all voting securities of American Seating Company.	Dec. 2, 1982.
(18) Time Incorporated's proposed acquisition of all voting securities of Great American Reserve Insurance Company.	Dec. 3, 1982.
(19) Spencer Hays' proposed acquisition of certain assets of The Times Mirror Company.	Dec. 2, 1982.
(20) Warner Communications, Inc.'s proposed acquisition of all voting securities of Madison Fund, Inc..	Dec. 1, 1982
(21) Roxboro Investments (1976) Ltd.'s proposed acquisition of certain voting securities of Suburban Propane Gas Corporation.	Dec. 1, 1982.

GENERAL SERVICES ADMINISTRATION

Statement of Witness (Standard Form 94)

AGENCY: General Services Administration.

ACTION: Notice of information collection; reinstatement.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the General Services Administration (GSA) plans to request Office of Management and Budget review and approval for the reinstatement of an information collection request for the collection of data.

DATE: Comments on the information collection must be submitted on or before January 14, 1983.

ADDRESSES: Send comments to Franklin S. Reeder, GSA Desk Officer, OMB, Room 3235, NEOB, Washington, DC

20503, and to Anthony Artigliere, GSA Clearance Officer, GSA (ORAI), Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Sigrid Staton, GSA (703–557–1288).

SUPPLEMENTARY INFORMATION: The Standard Form 94 provides the Federal Government data on motor vehicle accidents. The information is furnished by persons who have witnessed an accident. The estimated reporting burden is 416 hours annually. A copy of the information collection proposal may be obtained from the Directives and Reports Management Branch (ORAI), Room 3011, GS Building, Washington, DC 20405, telephone 202–566–1164.

Dated: December 15, 1982.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Advisory Committees; Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory bodies scheduled to meet during the month of January 1983:

Name: Joint Meeting of the National Advisory Council on Health Professions Education and the National Advisory Council on Nurse Training

Date and Time: Monday, January 17, 1983, 9:00 a.m.

Place: Conference Room 10, Building 31, C-Wing, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20205

Meeting is open to the public.

Purpose: The Councils advise the Secretary concerning general regulations and policy matters arising in the administration of Title VII and VIII of the Public Health Service Act. The Councils also perform final reviews of grant applications for Federal assistance and make recommendations to the Secretary.

Agenda: Agenda items will cover announcements, report of the Administrator, HRSA, report of the Director, BHPr, financial management update, report from the Deputy Assistant Secretary for Health and the Director, Office Disease Prevention and Health Promotion, discussion of Health Promotion/Disease Prevention, and exploration of issures in the training and practice of health professionals.

* * * * *

Name: National Advisory Council on Health Professions Education

Date and Time: January 18–19, 1983, 9:00 a.m.

Place: Conference Room 10, Building 31, C-Wing, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20205

Open on January 18, 9:00 a.m.–11:30 a.m.

Closed for the remainder of meeting.

Purpose: The Council advises the Secretary with respect to the administration of programs of financial assistance for the health professions and makes recommendations based on its review of applications requesting such assistance. This also involves advice in the preparation of regulations with respect to policy matters.

Agenda: The open portion of the meeting will cover: welcome and opening remarks; presentation on Humanistic Health Care, update on Report to Congress on Physician Exchange Visitor Program, and future agenda items. The meeting will be closed to the public on January 18, 1983, 11:30 a.m. for the remainder of the meeting for the review of grant applications for the Graduate Training in Family Medicine. The closing is in accordance with the provisions set forth in section 552(b)(6), Title 5, U.S. Code, and the Determination by the Administrator, Health Resources and Services Administration pursuant to Public Law 92–463.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should write to or contract MR. ROBERT L. BELSLEY, Executive Secretary, National Advisory Council on Health Professions Education, Bureau of Health Professions, Health Resources and Services Administration, Room 4–27, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782. Telephone (301) 436–6564.

* * * * *

Name: National Advisory Council on Nurse Training

Date and Time: January 18–19, 1983, 9:00 a.m.

Place: Conference Room G–20, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782

Open January 18, 1983, 9:00 a.m. to 10:00 a.m.

Closed for remainder of meeting

Purpose: The Council advises the Secretary and Administrator, Health Resources and Services Administration, concerning general regulations and policy matters arising in the administration of Title XXVII, National Health Service Corps, Health Professions Education, Nurse Training Omnibus Budget Reconciliation Act of 1981 (P.L. 97–35). The Council also performs final review of grant applications for Federal assistance, and makes recommendations to the Administrator, HRSA.

Agenda: Agenda items for open portion of meeting will cover announcements; consideration of minutes of previous meeting; reports by the Administrator, the Director, Bureau of Health Professions (BHPr), the Financial Management Officer, BHPr, the Director, Division of Nursing, and staff reports. The meeting will be closed to the public on January 18, 1983, at 10:00 a.m., for the remainder of the meeting for the review of grant applications for advanced nurse training grants, nurse practitioner grants, special project grants, and research project grants. The closing is in accordance with the provision set forth in section 552b(c)(6), Title 5, U.S. Code, and the Determination by the Administrator, Health Resources and Services Administration, pursuant to section 10(d) of Public Law 92–463.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should write to or contact DR. MARY S. HILL, Bureau of Health Professions, Health Resources and Services Administration, Room 3–50, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782, Telephone (301) 436–6681.

Agenda items are subject to change as priorities dictate.

Dated: December 21, 1982.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

[FR Doc. 82–34989 Filed 12–23–82; 8:45 am]

BILLING CODE 4160–15–M

Office of Human Development Services

Advisory Board on Child Abuse and Neglect; Meeting

Notice is hereby given, pursuant to Pub. L. 92–463, of the meeting of the Advisory Board on Child Abuse and Neglect on January 20, 1983, from 9:30 a.m. to 3:30 p.m., Hubert H. Humphrey Building, Room 503–529A, 200 Independence Avenue, SW., Washington, D.C.

The Advisory Board on Child Abuse and Neglect was established by the Department of Health and Human Services to assist the Secretary in coordinating programs and activities related to child abuse and neglect planned, administered, or assisted by the Federal agencies whose representatives are members of the Advisory Board. The Advisory Board shall also assist the Secretary in the development of Federal standards for child abuse and neglect prevention and treatment programs and projects.

At this meeting, the Advisory Board will discuss Interagency Child Abuse and Neglect Initiatives; Status of Child Abuse and Neglect Legislation; Plans for the Sixth National Conference on Child Abuse and Neglect; and Federal Coordination Issues and Plans.

Further information on the Advisory Board meeting may be obtained from Ms. Arlene Taylor, National Center on Child Abuse and Neglect, Room 2008E, Donohoe Building, P.O. Box 1182,

Washington, D.C. 20013 or call on (202) 245–2840.

Advisory Board meetings are open for public observation.

Dated: December 20, 1982.

Mamie J. Welborne,

Committee Management Officer.

BILLING CODE 4130–01–M

Office of the Secretary

Medicare Program; Premium Rate for the Uninsured Aged

AGENCY: Office of the Secretary, HHS.

ACTION: General notice.

SUMMARY: This notice announces Medicare's monthly hospital insurance premium for the uninsured aged for the 12 months beginning July 1, 1983.

EFFECTIVE DATE: July 1, 1983.

FOR FURTHER INFORMATION CONTACT: Sol Mussey, Supervisory Actuary, Office of Financial and Actuarial Analysis, 1–C–11 Oak Meadows Building, Baltimore, Maryland 21207, Telephone: (301) 594–1024.

SUPPLEMENTARY INFORMATION: Under the authority in section 1818(d)(2) of the Social Security Act (42 U.S.C. 1395i–2(d)(2)), I have determined that the monthly Medicare hospital insurance premium for the uninsured aged for the 12 months beginning July 1, 1983, is $132.

Section 1818 of the Social Security Act provides for voluntary enrollment in the hospital insurance program (Part A of Medicare), subject to payment of a monthly premium, of certain persons age 65 and older who are uninsured for social security or railroad retirement benefits and do not otherwise meet the requirements for entitlement to hospital insurance. (Persons insured under the Social Security or Railroad Retirement Acts need not pay premiums for hospital insurance.)

Section 1818(d)(2) of the Act requires the Secretary to determine and publish, during the last quarter of each calendar year, the amount of the monthly Part A premium for voluntary enrollment for the 12-month period beginning with the following July 1. The formula specified in this section also requires that, for the period beginning July 1, 1983, the 1973 base year premium ($33) be multiplied by the ratio of (1) the 1983 inpatient hospital deductible to (2) the 1973 inpatient hospital deductible, rounded to the nearer multiple of $1 or, if midway between multiples of $1, to the next higher multiple of $1.

Under section 1813(b)(2) of the Act, the 1983 inpatient hospital deductible was determined to be $304. (See 47 FR 43631, October 1, 1982.) The 1973 deductible was actuarially determined to be $76, although the 1973 deductible was actually promulgated to be only $72, to comply with a ruling of the Cost of Living Council. (See 37 FR 21452, October 11, 1972.) The monthly premium for the 12-month period beginning July 1, 1983 has been calculated using the $76 deductible for 1973, since this more closely satisfies the intent of the law. Thus the monthly hospital insurance premium is $33×(304/76)=$132.

Impact Analyses

The monthly hospital insurance premium for the uninsured aged for the 12-month period beginning July 1, 1983 will increase to $132. That amount is 17 percent higher than the $113 monthly premium amount for the previous 12-month period.

The estimated cost of this increase to the approximately 24 thousand enrollees who do not otherwise meet the requirements for entitlement to hospital insurance will be about $5 million.

Because this notice merely announces an amount required by the formula specified in section 1818(d)(2) of the Act, and does not alter any regulation or policy, no analyses under Executive Order 12291 or the Regulatory Flexibility Act, Pub. L. 96–354, are required.

(Sec. 1818(d)(2) of the Social Security Act (42 U.S.C. 1395i–2(d)(2))

(Catalog of Federal Domestic Assistance Program No. 13.773, Medicare—Hospital Insurance)

Dated: December 17, 1982.

Richard S. Schweiker,

Secretary.

BILLING CODE 4120–03–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Colorado and Wyoming; Intent To Hold Public Scoping Meetings and To Prepare a Regional Environmental Impact Statement for the Second Round of Proposed Leasing of Federal Coal in the Green River/Hams Fork Region

AGENCY: Bureau of Land Management, Interior.

ACTION: Public scoping meetings and notice to prepare an EIS.

SUMMARY: This notice advises the public that the Bureau of Land Management intends to hold meetings to gather information and seek assistance in defining the range of issues and concerns for preparation of a regional Environmental Impact Statement (EIS) for the second round of proposed leading of Federal coal within the Green River/Hams Fork coal production region. This notice is made in accordance with the National Environmental Policy Act (NEPA) and the Council on Environmental Quality regulations (40 CFR 1501.7 and CFR 1508.22) to obtain suggestions and information from other agencies and the public on the scope of issues to be addressed in the EIS. Comments and participation in this scoping process are solicited.

Public meetings will be held in Denver and Craig, Colorado, and Rawlins and Rock Springs, Wyoming. An information packet and tract location map will be available upon request from the Little Snake Resource Area Office at the address given below after January 10, 1983, and at the public meetings. Meeting dates and places are listed below under **SUPPLEMENTARY INFORMATION.**

Oral testimony and submission of written comments will be received at the meetings or can be mailed to the Little Snake Resource Area Office.

DATES: Public hearings will be held on January 24, 25, 26, and 27, 1983. Written comments will be accepted through February 11, 1983.

ADDRESS: Comments should be addressed to David Bray, Regional Coal EIS Acting Team Leader, Bureau of Land Management, Little Snake Resource Area, P.O. Box 1136, Craig, Colorado, 81626.

SUPPLEMENTARY INFORMATION. The tracts proposed for leasing are within Routt, Moffat, and Rio Blanco counties in Colorado, and Sweetwater, Lincoln, Uinta, and Carbon counties in Wyoming. The Regional Coal Team will rank, select, and define leasing alternatives for the coal tracts identified in accordance with the provisions of 43 CFR 3420.3–4 of the Federal coal management regulations. Alternatives that have been tentatively identified include the following: (1) The No Action Alternative or not leasing additional coal, and (2) Leasing various combinations of tracts to achieve different leasing levels.

The purpose of the public meetings is to encourage participation from interested persons in defining the significant environmental issues and concerns that relate to the leasing of coal to meet the Federal coal leasing target for the Green River/Hams Fork region.

Public scoping meetings will be held as follows:

Place	Date	Address
Denver, Colo	Jan. 24, 1983 [1]	Marriott Hotel (Lower Level 2), 1701 Calif. St., Denver, Colorado.
Rawlins, Wyo	Jan. 25, 1983 [1]	BLM District Office, 1300 3rd Street, Rawlins, Wyoming.
Rock Springs, Wyo	Jan. 26, 1983 [1]	Holiday Inn, 1675 Sunset Drive, Rock Springs, Wyoming.
Craig, Colo	Jan. 27, 1983 [1]	Craig-Moffat County Library, 570 Green Street, Craig, Colorado.

[1] Meetings will start at 7:00 p.m.

Each witness will be limited to a maximum of 10 minutes of oral presentation. Oral presentations can be made in lieu of or in addition to any written comments submitted. The text of any prepared presentation materials may be given to the EIS Team Leader at the meetings.

The agenda for the scoping meeting will be as follows:

1. Introduction

a. Purpose and intent of meeting.
b. Location and description of tracts.
c. Description of previously defined issues identified during pre-analysis to be considered in the EIS.
d. Discussion of possible alternatives to be considered in the EIS.
e. Information available from the BLM for public use in commenting on the EIS process.

2. Solicitation of public comment, recommendations, and issues of major concern to be considered and addressed in the EIS. Protential issues include: social and economic concerns, air quality, water, and wildlife.

Preparation of the EIS will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, Council on Environmental Quality regulations, other required Federal laws and regulations, and Department of the Interior policies and procedures.

Dated: December 17, 1982.

George C. Francis,

State Director, Colorado, Bureau of Land Management.

BILLING CODE 4310-84-M

District Grazing Advisory Board, Susanville, California; Meeting

Notice is hereby given in accordance with Pub. L. 94-579 (FLPMA) that a meeting of the Susanville District Grazing Advisory Board will be held on February 1, 1982.

The meeting will begin at 10:00 a.m. at Cal Pines, Alturas, California.

The Agenda will include:

1. Ranking projects in accordance with the Final Rangeland Improvement Policy.
2. How the Grazing Fee Credit works.
3. 1983 Projects.
4. Priority for FY 84 projects.
5. Allocation of 84 project dollars.
6. Report on Project Maintenance Agreements.
7. Report on maintenance liability.
8. Discussion of on the shelf projects.
9. Report on the wild horse and burro program.
10. Other items as appropriate.

The meeting is open to the public. Interested persons may make oral statements to the Board between 4:30 p.m. and 4:00 p.m. or file a written statement for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, P.O. Box 1090, Susanville, California 96130 by January 25, 1983. Depending upon the number of persons wishing to make oral statements, a per person list limit may be established.

Summary minutes of the Board Meeting will be maintained in the District Office and will be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Dated: December 17, 1982.

C. Rex Cleary,

District Manager.

BILLING CODE 4310-84-M

Minerals Management Service

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development and production plan.

SUMMARY: Notice is hereby given that Texaco U.S.A. has submitted a Development and Production Plan describing the activities it proposes to conduct on Lease OCS-G 4437, Block 236, South Timbalier Area, offshore Louisiana.

The purpose of this Notice is to inform the Public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the Plan and that it is available for public review at the Office of the Regional Manager, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: Minerals Management Service, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m., 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837-4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in Development and Production Plans available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in a revised § 250.34 of Title 30 of the Code of Federal Regulations.

Dated: December 14, 1982.

John L. Rankin,

Acting Regional Manager, Gulf of Mexico OCS Region.

BILLING CODE 4310-31-M

Office of the Secretary

Harry S Truman National Historic Site

December 15, 1982.

Notice is hereby given that the Secretary of the Interior has issued Order Number 3088 dated December 8, 1982 designating the Harry S Truman National Historic Site. The order is published in its entirety below.

Additional information regarding the order may be obtained from Mr. Phil Million, Office of Public Affairs, U.S. Department of the Interior, Washington, D.C. 20240, telephone 202-343-3171.

G. Ray Arnett,

Assistant Secretary of the Interior.

[Order No. 3088]

Subject: Designation of Harry S Truman National Historic Site.

Sec. 1. *Purpose.* The Congress has declared it to be a national policy to preserve for the public use historic sites, buildings, and objects of national significance for the inspiration and benefit of the people of the United States. The former home of Harry S Truman, thirty-third President of the United States, in Independence, Missouri, was on November 11, 1971, designated a national landmark, in furtherance of that policy, and is listed on the National Register of Historic Places as being nationally significant. The home is left to the United States of America under the will of Bess Wallace Truman. It is, therefore, the purpose of this Order to

establish the former home of Harry S Truman as a national historic site, to be administered by the National Park Service.

Sec. 2. *Authority.* This Order is issued under the authority of section 2 of the Act of August 21, 1935 (49 Stat. 666).

Sec. 3. *Designation.* The real property known as 219 North Delaware Street, in the city of Independence, Missouri, including such of the personal property therein as passed to the United States under the will of Bess Wallace Truman, is hereby designated as the Harry S Truman National Historic Site.

Sec. 4. *Administration.* For so long as this national historic site shall remain in private ownership, it shall be administered and protected by the Secretary of the Interior in accordance with the terms of a cooperative agreement to be entered into between the United States of America and the legal representative of the Estate of Bess Wallace Truman under authority of the Act of August 21, 1935 (49 Stat. 666), as amended and supplemented. Upon conveyance of this national historic site to Federal ownership, it shall be administered and protected by the National Park Service in accordance with the Act of August 21, 1939 (49 Stat. 666), as amended and supplemented, and other applicable law, subject to necessary jurisdictional actions under the terms of the conveyance.

Sec. 5. *Expenditure of Funds for Development.* No funds appropriated to the Department of the Interior may be expended for the development of this national historic site, unless and until such funds are authorized by Act of Congress. All Federal expeditures under the terms of the cooperative agreement decribed in section 4 of this Order are subject to the availability of appropriated funds.

Sec. 6. *Effective Date.* This Order is effective immediately and will remain in effect until it is amended, superceded, or revoked, whichever occurs first.

Dated: December 8, 1982.

James G. Watt,

Secretary of the Interior.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Finance Applications; Decision-Notice

Decided: December 17, 1982.

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find: Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered: The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board No. 3, Member Krock, Joyce, Dowell.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team Four at (202) 275-7669.

Volume No. OP4-FC-079

MC-FC-81039, filed November 12, 1982. By decision of December 15, 1982, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1181, Review Board Number 3 approved the transfer to American Van Lines, Inc., Elk Grove Village, IL, of Certificate Nos. MC-52196, issued July 7, 1963, MC-52196 (Sub-No. 2), issued August 3, 1981, and MC-52196 (Sub-No. 3), issued April 8, 1982, to Nelson-Westerberg, Inc., Elk Grove Village, IL, authorizing the transportation of household goods, over irregular routes, (1) between points in Cook County, IL, on the one hand, and, on the other, points in WI, IA, IN, OH, and MI, (2) between Hackensack, NJ, and points in NJ within 60 miles thereof, on the one hand, and, on the other, points in CT, ME, MA, NY, PA, and RI, and (3) between points in NJ, CT, ME, MA, PA, and RI, on the one hand, and, on the other, points in IL, WI, IA, IN, OH, and MI. Representative: Robert J. Gallagher, 1000 Connecticut Ave., N.W., Washington, DC 20036.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

In the matter of Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods).

The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86 Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon

payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service in for a named shipper "under contract."

Please direct status inquiries to Team Five at 202–275–7289.

Volume No. OP5–291

Decided: December 14, 1982.

MC 144979 (Sub-2), filed December 2, 1982. Applicant: ATLANTIC LIMOUSINE, INC., 11 East Decatur Ave., Pleasantville, NJ 08232. Representative: L. C. Major, Jr., Suite 304, Overlook Bldg., 6121 Lincolnia Rd., P.O. Box 11278, Alexandria, VA 22312, 703–750–1112. Transporting *passengers*, in charter and special operations, between points in the U.S. (except HI).

Note.—Applicant seeks to provide privately-funded charter and special transportation.

MC 150058 (Sub-3(B)), filed December 2, 1982. Applicant: PHILPOTT CARTAGE CO., 6658 West 99th St., Chicago, IL 60415. BILLING CODE 7535–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

In the matter of Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers.

The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part, 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271,. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property-that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier-that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker-that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from the date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.–All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 2, (202) 275–7030.

Volume No. OP2–326

Decided: December 17, 1982.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier. (Member Parker not participating.)

MC 112713 (Sub-334), filed November 24, 1982. Applocant: YELLOW FREIGHT SYSTEM, INC., 10990 Roe Ave. P.O. Box 7270, Overland Park, KS 66207. Representative: William F. Martin, Jr., (same address as applicant), 913–383–3000. BILLING CODE 7035–01–M

Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the Federal Register publication no later than the 15th calendar day after the date of the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestants shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F–224

The following applications were filed in region I: Send protests to: Interstate Commerce Commission; Regional Authority Center, 150 Causeway Street, Room 501, Boston, MA 02114.

[Ex Parte No. 387]

Exemptions for Contract Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Provisional Exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice. These exemptions may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESSES: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:
Douglas Galloway, (202) 275–7278
or
Tom Smerdon, (202) 275–7277.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions:

These grants neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) not that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

Secretary.

[FR Doc. 82–34780 Filed 12–23–82; 8:45 am]
BILLING CODE 7035–01–M

Motor Carriers; Finance Applications; Decision-Notice

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by 49 CFR 1182.1 of the Commission's Rules of Practice. See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register**. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1182.2. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1182.2(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board No. 3 Members Krock, Joyce and Dowell.

Agatha L. Mergenovich,
Secretary.

Note: Please direct status inquires to Team 1, (202) 275–7992.

Volume No. OP1–237

MC–F–15016, filed November 30, 1982. GLEN FREIGHT SYSTEMS, INC. (Transferee), 124 South 123rd East Place, Tulsa, OK 74128—PURCHASE—TOM INMAN TRUCKING, INC. (LONNIE D. ECK, TRUSTEE-IN-BANKRUPTCY) (Transferor), 4143 East 31st St., Tulsa, OK 74135. Representatives: Ralph W. Pulley, Jr., 102 Metropolitan Savings Tower, 5944 Luther Lane, Dallas, TX 75225; and Fred Rahal, Jr., 305 Reunion Center, 9 East 4th St., Tulsa, OK 74103. Transferee, a non-carrier, seeks authority to purchase all of the interstate operating rights of Transferor, through the Trustee of the bankruptcy estate. Robert E. King, sole stockholder of Transferee, seeks authority to acquire control of said operating rights through the transaction. Robert E. King also controls Glen Bros. Trucking, Inc., which is both a contract and common carrier pursuant to permit No. MC–142954 and Certificate No. MC–144622 and sub-numbers thereunder. Transferee is purchasing all of the authority contained in Transferor's Permit No. MC–146220F, and in Certificates No. MC–129032 (Sub-Nos 100F, 106F, 132, and including the restriction removal authority in 133X, which supersedes former Sub-Nos. 3, 4, 8, 11, 12, 14, 18, 19, 23, 26, 28, 29, 30, 32, 34, 35, 36, 39, 41, 44F, 45F, 48F, 49F, 50F, 51F, 53F, 55F, 56F, 62F, 63F, 65F, 66F, 67F, 68F, 70F, 75F, 76F, 77F, 78F, 81F, 83F, 84F, 87F, 89F, 94F, 95F, 96F, 99F, 103F, 104F, 105F, 116F, 117F, 118F, 120F, 121F, 123F, 124F, 125F, 126F, 127F, 128F, 129, 130, and 131). The permit authorize *such commodities as are dealt in by grocery and food business houses,* except in bulk, and equipment, materials, and supplies, in vehicles equipped with mechanical refrigeration, from Los Angeles and Ontario, CA, to AZ, CO, ID, MT, NV, NM, OR, UT, WA, and WY, under contract with a named shipper. The certificates authorize the following: Sub 100F, *such commodities as are dealt*

in by grocery and food business houses and agricultural feed business houses, soy products, paste, flour products, and *dairy based products,* except in bulk, between all points in the U.S., restricted to traffic originating at or destined to the facilities of a named company. 106F, *kitchen and storage cabinets* and *new furniture,* knocked down, and *parts and accessories,* from the facilities of a named company at or near Portland, OR, to all points in the U.S. (except AK and HI), restricted to traffic originating at the named facility and destined to the named destination points. 132, *building materials,* between Tulsa County, OK, on the one hand, and, on the other, ID, MT, OR, WA, and WY. 133X, *food and related products, such merchandise as is dealt in by grocery and food business houses, rubber and plastic products, pulp, paper and related products, clay, concrete, glass or stone products, petroleum, natural gas and their products, lumber and wood products, metal products, machinery, transportation equipment, miscellaneous products of manufacture,* and *miscellaneous mixed shipments,* which commodity authorizations are set forth in separate authorizing paragraphs. Collectively, the involved territories show radial movement between multifarious points, on the one hand, and, on the other, designated cities, counties and States scattered throughout the U.S., as well as non-radial movement between all points in the U.S., with traffic, in a few instances, limited to that originating at and destined to the facilities of a named company.

Note.—(1) The transferee holds no authority from the Commission; (2) an application for temporary authority has been filed; and (3) any duplication in the authority which may be transferred does not confer more than one operating right.

For the following, please direct status to Team 5 at 202–275–7289.

Volume No. OP5–MCF–282

Dated: December 16, 1982.

MC–F–15014, filed November 24, 1982. RYDER INTERSTATE CARRIER, INC. (RICI) (3600 NW 82nd Avenue, Miami, FL 33152)—CONTROL—INTERSTATE CONTRACT CARRIER CORPORATION, (ICCC), ET AL. (2156 W. 220 South, P.O. Box 30303, Salt Lake City, UT 84125). Representative: Harry J. Jordan, Suite 502, Solar Building, 1000 16th Street, N.W. Washington, DC 20036. RICI, a non-carrier, wholly-owned subsidiary of Ryder System, Inc. (Ryder), seeks authority to acquire control of the interstate operating rights and property of ICCC through the purchase by RICI of all the issued and outstanding capital stock of ICCC's non-carrier parent, Transport Service, Inc., and R&J Investment Company, as well as assets of John C. Williams and Roger J. Furness, who own all the capital stock of Transport and as partners control Carrier, Power Trail, and R&J. Ryder seeks authority to acquire indirect control of ICCC through the transaction and to commonly control ICCC and the following carriers in its system: Commercial Carriers, Inc.; Complete Auto Transit, Inc., Janesville Auto Transport, Inc., M&G Convoy, Inc., Customized Parts Distribution, Inc., DPD, Inc., Jack Rabbit Express, RDR, Inc., RPD, Inc., F. J. Boutell Driveaway Co., Inc., holding authority in Nos. MC–43038, 49368, 119642, 20722, 136291, 140902, 125674, 149011, 136051, and 3468, respectively. Collectively, the Ryder motor carrier subsidiaries provide common and contract carrier service, or both, transporting general commodities, with exceptions, motor vehicles, auto parts and accessories, limited weight shipments, and a variety of specified commodities throughout the US, (except AK and HI). ICCC holds permits in MC–134599 for named shippers and certificates in MC–139906 to transport general specified commodities throughout the United States, except Alaska and Hawaii. Condition: Ryder shall continue to be required, as previously subjected in MC–F–12809, served November 23, 1976, from time to time to file such special accounting and other reports as may be required so that its relationship with carriers under its control may be observed and jurisdiction will be reserved in this respect for the imposition of such further requirements as may be necessary.

BILLING CODE 4510–35–M

Employment and Training Administration

Federal-State Unemployment Compensation Program; New Extended Benefit Period in State of Kentucky

This notice announces the beginning of a new Extended Benefit Period in the State of Kentucky, effective on December 5, 1982.

Background

The Federal-State Extended Unemployment Compensation Act of 1970 (26 U.S.C. 3304 note) established the Extended Benefit Program as a part of the Federal-State Unemployment Compensation Program. The Extended Benefit Program takes effect during periods of high unemployment in a State, to furnish up to 13 weeks of extended unemployment benefits to eligible individuals who have exhausted their rights to regular unemployment benefits under permanent State and Federal unemployment compensation laws. The Act is implemented by State unemployment compensation laws and by Part 615 of Title 20 of the Code of Federal Regulations (20 CFR Part 615).

In accordance with section 203(d) of the Act, each State unemployment compensation law provides that there is a State "on" indicator in the State for a week if the head of the State employment security agency determines that, for the period consisting of that week and the immediately preceding 12 weeks, the rate of insured employment under the State unemployment compensation law equalled or exceeded the State trigger rate. The Extended Benefit Period actually begins with the third week following the week for which there is an "on" indicator. A benefit period will be in effect for a minimum of 13 consecutive weeks, and will end the third week after there is an "off" indicator.

Determination of "on" Indicator

The head of the employment security agency of the State named above has determined that the rate of insured unemployment in the State, for the period consisting of the week ending on November 20, 1982, and the immediately preceding 12 weeks, rose to a point that equals or exceeds the State trigger rate, so that for that week there was an "on" indicator in the State.

Therefore, a new Extended Benefit Period commenced in the State with the week beginning on December 5, 1982.

Information for Claimants

The duration of extended benefits payable in the new Extended Benefit Period, and the terms and conditions on which they are payable, are governed by the Act and the State unemployment compensation law. The State employment security agency will furnish a written notice of potential entitlement to extended benefits to each individual who has established a benefit year in the State that will expire after the new Extended Benefit Period begins, and who has exhausted all rights under the State unemployment compensation law to regular benefits before the beginning of the new Extended Benefit Period. 20 CFR 615.13(d)(1). The State employment security agency also will provide such notice promptly to each individual who exhausts all rights under the State unemployment compensation law to regular benefits during the Extended Benefit Period, including exhaustion by reason of the expiration of the individual's benefit year. 20 CFR 615.13(d)(2).

Persons who believe they may be entitled to extended benefits in the State named above, or who wish to inquire about their rights under the Extended Benefit Program, should contact the nearest State employment office or unemployment compensation claims office in their locality.

Signed at Washington, D.C., on December 16, 1982.

Albert Angrisani,

Assistant Secretary of Labor.

[FR Doc. 82–35023 Filed 12–23–82; 8:45 am]

BILLING CODE 4510–30–M

Federal-State Unemployment Compensation Program; Ending of Extended Benefit Period in State of Wisconsin

This notice announces the ending of the Extended Benefit Period in the State of Wisconsin, effective on December 11, 1982.

Background

The Federal-State Extended Unemployment Compensation Act of 1970 (26 U.S.C. 3304 note) established the Extended Benefit Program as a part of the Federal-State Unemployment Compensation Program. The Extended Benefit Program takes effect during periods of high unemployment in a State, to furnish up to 13 weeks of extended unemployment benefits to eligible individuals who have exhausted their rights to regular unemployment benefits under permanent State and Federal unemployment compensation laws. The Act is implemented by State unemployment compensation laws and by Part 615 of Title 20 of the Code of Federal Regulations (20 CFR Part 615).

Extended Benefits are payable in a State during an Extended Benefit Period, which is triggered "on" when the rate of insured unemployment in the State reaches the State trigger rate set in the Act and the State law. During an Extended Benefit Period individuals are eligible for a maximum of up to 13 weeks of benefits, but the total of Extended Benefits and regular benefits together may not exceed 39 weeks.

The Act and the State unemployment compensation laws also provide that an Extended Benefit Period in a State will trigger "off" when the rate of insured unemployment in the State is no longer at the trigger rate set in the law. A benefit period actually terminates at the end of the third week after the week for which there is an off indicator, but not less than 13 weeks after the benefit period began.

An Extended Benefit Period commenced in the State of Wisconsin on January 3, 1982 and has now triggered off.

Determination of "Off" Indicator

The head of the employment security agency of the State named above has determined that the rate of insured unemployment in the State for the period consisting of the week ending on November 20, 1982, and the immediately preceding twelve weeks, fell below the State trigger rate, so that for the week there was an "off" indicator in the State.

Therefore, the Extended Benefit Period in the State terminated with the week ending on December 11, 1982.

Information for Claimants

The State employment security agency will furnish a written notice to each individual who is filing claims for Extended Benefits at the end of the Extended Benefit Period and its effect on the individual's right to Extended Benefits. 20 CFR 615.13(d)(3).

Persons who wish information about their rights to Extended Benefits in the State named above should contact the nearest State employment service office, or unemployment compensation claims office in their locality.

Signed at Washington, D.C. on December 17, 1982.

Albert Angrisani,

Assistant Secretary of Labor.

BILLING CODE 4510-30-M

Occupational Safety and Health Administration

[V-82-7]

Zurn Industries, Inc./Tileman & Co., Ltd. (A partnership)

AGENCY: Occupational Safety and Health Administration, Labor.

ACTION: Notice of application for variance and interim order and grant of interim order.

SUMMARY: This notice announces the application of Zurn Industries, Inc./Tileman & Co., Ltd (A Partnership) for a variance and an interim order pending a decision on the application for a variance from the standards prescribed in 29 CFR 1926.552(c)(1),(2),(3), and (14)(i) concerning personnel hoist and 29 CFR 1926.451(l)(5) concerning boatswain's chairs. This notice also announces the granting of an interim order until a decision is rendered on the application for variance.

DATES: The effective date of the interim order is December 27, 1982. The last date for interested persons to submit comments is January 26, 1983. The last date for affected employers and employees to request a hearing on the application is January 26, 1983.

ADDRESS: Send comments or request for a hearing to: Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, Third Street and Constitution Avenue, NW., Room N-3651, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT: James J. Concannon, Director, Office of Variance Determination, at the above address, telephone (202) 523-7183; or the following Regional and Area Offices:

U.S. Department of Labor, OSHA, 1375 Peachtree Street, N.E., Suite 587, Atlanta, GA 30367;

U.S. Department of Labor, OSHA, 700 Twiggs Street, Room 624, Tampa, FL 33602.

Notice of Application

Notice is hereby given that Zurn Industries, Inc./Tileman & Co., Ltd. (A Partnership), 405 North Reo Street, Tampa, Fla. 33609, has made application pursuant to Section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1526; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance from 29 CFR 1926.552 (c)(1),(2),(3), and (14)(i) concerning personnel hoists and 29 CFR 1926.451(l)(5) concerning boatswain's chairs.

Although the applicant's principal office for construction is located at 405 Reo Street, Tampa, Fla., the places of employment affected by the application are all of the applicant's future construction projects (chimneys, towers, and similar tall structures) in States under Federal jurisdiction.

The applicant certified that employees who would be affected by the variance will be notified of the application by providing copies to their authorized employees' representative, and by posting copies at all places where notices to employees are normally posted. Employees will also be informed of their right to petition the Assistant Secretary for a hearing.

Regarding the merits of the application, the applicant contends that it is providing safety equivalent to that provided by §§ 1926.552 (c)(1), (2), (3), (14)(i) and 1926.451(l)(5) which contain regulations for personnel hoisting.

The applicant is engaged in the construction of chimneys, towers, and similar tall structures (hereinafter called structures or composite structures), which necessitates the continuous hoisting of men and materials to and from an elevated work platform. The applicant explains that in constructing a composite structure the elevated work platform is moved upward with the construction. In order for the employees to reach such a platform, an access ladder or an equivalent safe means must be provided as required by 29 CFR 1926.451(a)(13). However, as the height of the construction increases to 400 feet or more, it becomes impractical to use an access ladder and another safe means of access must be provided.

Section 1926.552(c) sets forth the requirements for personnel hoisting from one elevation to another. The purpose of the standard is to provide requirements to safely transport employees to and from the elevated work platform by mechanical means during the construction, alteration, repair, maintenance, or demolition of a structure, building, or other work. However, this standard does not include specific safety requirements for hoisting personnel to and from elevated work platforms of a composite structure which has constantly changing diameters throughout the height of the structure. As a result, the applicant contends that it is unable to comply with the requirements for constructing a hoist tower outside or inside of a structure, anchoring the hoist tower to the structure, and using a minimum of two wire ropes for drum-type hoists, § 1926.552 (c)(1), (2), (3), and (14)(i) respectively.

A hoist tower located outside of a composite structure is impractical and hazardous. According to the applicant, it is difficult to provide safe access from an outside hoist tower to the composite structure because of the tapering of the structure at the top. An outside tower also prevents access to the movable or jack scaffolds used in constructing a brick liner. In addition, the frequent extension of the outside tower would interfere with guying a tower over 600 feet, and with erecting, bracing, and maintaining rigidity of the tower. Moreover, extending the outside tower above the structure exposes the employees to high wind loads.

Because the diameter of a composite structure decreases, there is insufficient room to accommodate a hoist tower inside of the structure which is enclosed on all four sides throughout the full height of the structure as required by the standard.

Accordingly, in lieu of constructing a hoist tower as specified in 29 CFR 1926.552 (c)(1) or (c)(2), the applicant proposes to install a hoist tower inside the composite structure in the portion of the structure under construction and at the bottom landing which meets the requirements of § 1926.552(c)(2), and has designed and developed a rope guided hydraulic personnel hoist system to transport employees to and from the elevated work platform.

The rope guided hoist system consists of a hoist drum hauling a rope suspended cage between ground level and one or more elevated platforms. The cage also runs on a pair of taut guide ropes which permits smooth motion at all stages of loading and running speed. The hydraulic hoist system has a dual purpose rating to carry materials or personnel.

Control of the hoist is affected remotely, either from within the cage or from the platforms, depending upon the mode of operation selected. Various safety features are incorporated in the controls to ensure that the maximum level of worker protection is maintained under all conditions. For instance, the safety clamps grip the safety cable in the event of any failure of the hoisting cable, limit switches prevent overtravel of the cage at both the top and bottom landings, and two independently operated fail-safe braking systems ensure that occurrence of a failure will leave the system unaffected or correct it to a state in which no injury or damage can result.

The applicant also contends that because the cage operates on the inside of the composite structure it is not practical to use it to transport employees to and from the elevated scaffolds when constructing a composite structure of small diameter, or to transport employees to the bracket scaffold on the outside of the structure. When it is not feasible to use the cage, the applicant raises and lowers employees, one at a time, on a boatswain's chair. Because the height of the composite structure makes block and falls difficult to manage, the applicant proposes to substitute a patented descent device for the block and falls required by § 1926.451(1)(5) to provide employees with a safe means of controlling their descent while being transported in the boatswain's chair. The patented descent device will be evaluated by OSHA during a variance inspection to take place in the initial construction stage of this project prior to the use of the device. A determination as to acceptability of the patented descent device will be made at that time.

The boatswain's chair is securely fixed to the engineered support frame assembly or liner of the composite structure. To further ensure the safety of the employee in the boatswain's chair, the employee's safety belt is attached to a suitable lifeline securely attached to the rigging at the top and to a weight at the bottom.

The applicant bases its variance application on many years of past experience using safe practices in erecting composite structures. According to the applicant, its rope guided hoist system has been used since 1915 to construct over 3000 composite structures, many over 1000 feet in height. Moreover, although this system has not been used in the United States, it has been approved and accepted worldwide in such countries as Canada, Australia, and the United Kingdom. The applicant also submitted detailed specifications and drawings, in further support of its application, which describe the function of various components and safety devices provided on the system to protect employees being transported in the cage.

Copies of the application for variance will be made available for inspection and copying upon request at the OSHA offices listed above. All interested persons, including employers and employees, who believe they would be affected by the grant or denial of the application for variance are invited to submit written data, views and arguments relating to the application not later than January 26, 1983. In addition, employers and employees who believe they would be affected by a grant or denial of the variance may request a hearing on the application nor later than January 26, 1983, in conformance with the requirements of 29 CFR 1905.15

Submission of written comments and requests for a hearing should be in quadruplicate, and must be addressed to the Office of Variance Determination at the above address.

Grant of Inrterim Order

It appears from the application and supporting data that an interim order is necessary to prevent undue hardship on the applicant and the employees pending a decision on the application for variance. Therefore, it is ordered, pursuant to the authority in 6(d) of the Occupational Safety and Health Act of 1970, in the Secretary of Labor's Order No. 8–76 (41 FR 25059), and in 29 CFR Part 1905, that Zurn Industries, Inc./ Tileman & Co., Ltd. (A Partnership) are hereby authorized to comply with the requirements of the interim order set forth below in lieu of complying with the personnel hoisting requirements in §§ 1926.552(c)(1),(2), (3), and (14)(i) and 1926.451(1)(5). All other applicable provisions of § 1926.552(c) and ANSI A10.4–1963, are unaffected by this order and must be complied with in conjunction with the terms of this order.

The terms of the interim order are as follows:

A. *Qualified Person.*

(1) A qualified person shall be responsible for the design and maintenance and inspection of the personnel hoisting system.

(2) A qualified person shall remain at ground level at all times whenever employees are being transported to and from elevated work platforms to assist in the event of an emergency.

B. *Hoist Machine.*

(1) The hoist machine shall be a type designed as a portable man hoist.

(2) The hoist machine shall be a base mounted hoist designed such that linespeed is controlled.

(3) Power up/power down requirements are described as follows:

(i) Lowering by disengagement of the driving components shall not be allowed;

(ii) The drive system for the hoist shall be such that the system is continuously interconnected; and

(iii) Belt drives shall not be permitted.

(4) The hoist machine may be powered by any air, electric, hydraulic or internal combustion drive mechanism, but shall be equipped with the following:

(i) A constant pressure control switch (deadman control switch) shall be provided with appropriate covers to prevent it from activating in the event it is struck by falling or moving objects;

(ii) A winding drum not less than 28 times the diameter of the rope used, and flange diameter approximately 1½ times the drum diameter; and

(iii) A line speed control system shall be working in the up and down modes and shall not permit the cage to operate if speeds greater than 250 ft./min/ (+10%) are exceeded when hoisting personnel. If the drive mechanism is disengaged, it shall be reset manually.

(5) The hoist shall be provided with two independently operated, automatically activated, fail safe braking systems, each capable of stopping and holding 150 percent of the maximum line-load for personnel hoisting.

(6) The hoist machine frame shall be a self-supporting, rigid, welded steel structure with skid base. Holding brackets for anchor lines shall be located at corners as well as legs for anchor bolts.

(7) The hoist machine shall be located far enough from the footblock to obtain correct fleet angle or proper spooling of the drum.

(8) The rope shall not be spooled closer than 2 inches from the edge of the hoist drum flange radius.

(9) All electric equipment shall be weatherpooof.

(10) The hoisting system shall be equipped with limit switches to automatically control overtravel at the top supporting structure and at the base of the structure.

C. *Methods of Operation.*

(1) The hoist may be controlled:

(i) At the hoist panel;

(ii) From inside of the passenger cage; or

(iii) At the lower and upper landings.

(2) The mode of operating the controls shall be selected at the hoist control

panel with directional contractors remotely operated by trained personnel by means of a key switch.

(3) The various audio frequencies amplified from the cage to ground level, which enables hoist control from within the cage, shall be kept free from all external interference.

(4) All keys shall be kept where thay are readily accessible only to authorized personnel.

D. *Operating Controls and Devices.*

(1) Only trained employees knowledgeable in the operation of the hoist system shall control the hoist machine.

(2) The hoist shall not be operated in excess of 250 ft./min. when carrying personnel, and in excess of 500 ft./min. when carrying material.

(3)(i) Communication between all working platforms shall be maintained by an intercommunication system; and

(ii) communication between the working platform and the moving cage shall be conducted by two-way radio.

E. *Hoist Rope.*

(1) The hoisting rope shall be extra improved plow steel or equivalent grade of nonrotating type or regular lay rope with proper swivel and shall be less than one-half inch diameter, and free of damage at all times.

(2) The rope shall be attached to the cage by a shackle or position locking connecting link.

(3) Where wire-rope fastenings are used:

(i) There shall be at least three clips used at each fastening;

(ii) Clips shall be installed with "U" of clips on deadend of rope; and

(iii) Spacing clip-to-clip shall be six times the diameter of the rope.

F. *Footblock.*

(1) Footblocks shall be:

(i) Construction-type blicks of solid single piece bail or equivalent;

(ii) Ground for the size of rope being used;

(iii) Designed with a guard to guarantee containment of the rope within the sheave groove;

(iv) Equipped with a slack rope switch to prevent further rotation of the hoist in slack rope condition;

(v) Rigidly bolted down; and

(vi) serve to turn the incoming horizontal rope vertically upward.

(2) The change from the horizontal direction of the hoist rope at the footblock to the vertical direction shall be approximately 90°.

(3) The line diameter of the footblock shall be not less than 24 times the rope diameter.

G. *Hoist Tower.*

(1) The hoist tower shall be located in the position of the structure under construction and at the bottom landing.

(2) The tower shall be designed and installed to support the load and forces specified.

(3) The hoist enclosure shall be screened off by a surrounding wire mesh with one or two landing gates.

(4) Landing gates, either hinged type or vertical slide type, shall be electrically interlocked when hoisting employees to prevent the gate from opening in the absence of the cage and to prevent the hoist from operating if the gates remain open.

(5) The hoist tower shall conform to the requirements of ANSI A–10.4–1963.

H. *Cathead.*

(1) A qualified person shall be responsible for the design and maintenance of the cathead (overhead structure).

(2) The cathead shall consist of two steel channel sections securely bolted back-to-back to prevent spreading.

(3) The channel sections shall straddle the top of the hoist tower.

(4) There shall be two sheaves revolving on shafts attached to the cathead. Only sealed bearings shall be used.

(5) Sheaves shall be provided with timber blocks to prevent the hoist rope from leaving the sheave grooves in case of abnormal vibration or swing of the hoist rope.

(6) The cathead sheaves shall have a minimum diameter equal to 24 times the diameter of the rope when travel of rope on the sheave is approximately 90°.

I. *Guide Ropes.*

(1) Two guide ropes (steel safety cables) shall be fixed by swivels to the cathead and free of damage at all times.

(2) One end of each cable shall be securely and properly fastened to the overhead support with appropriate tension applied at the foundation.

(3) Safety clamps shall be a minimum 3/4 inch diameter.

(4) Clamping device used for tension shall be of a type that will not damage the ropes.

(5) The guide ropes shall run the height of the structure.

(6) Flares shall be fixed at the top and bottom of the guide ropes for easy entry of the cage into the landing positions.

(7) A spacebar shall be provided to align the guide ropes and to allow the approaching cage to enter the flares squarely.

J. *Cage.*

(1) The cage shall be constructed with a steel frame.

(2) Where a hoisting-rope sheave is mounted on the cage frame the construction shall conform to the following:

(i) Where the sheave shaft extends through the web of the cage frame member, the reduction in area of the member shall not reduce the strength of the member below that required. Where necessary, reinforcing plates shall be welded or riveted to the member to provide the required strength. The bearing pressure shall in no case be more than that permitted in ANSI A10.4–1963, Table 1; and

(ii) Where the sheave is attached to the cage crosshead by means of a single threaded rod or specially designed members or members in tension, the single rod member or members shall have a factor of safety 50 percent higher than the factor of safety required for the suspension wire ropes, but in no case less than a factor of safety of 15.

(3) The floor shall be securely fastened in place with a loading factor of 4.

(4) The walls shall be sheeted out in expanded metal and steel panels.

(5) The roof shall be constructed of ⅛ inch plated steel.

(6) The cage shall be permanently enclosed on the tip and all sides except the entrance and exit, and emergency exit.

(7) There shall be two entrances provided on opposite sides of the cage.

(8) Each entrance shall have vertical sliding gates electrically interlocked with the hoist panel to prevent the cage gates from opening unless it is at a landing and to prevent the hoist from operating if the cage gates remain open.

(9) The gates shall guard the full height of the entrance openings.

(10) Procedures for operating the cage shall be consipicuously displayed in the cage near the cage push button switch control and at the key switch control located at the hoist panel.

(11) All cage push button switches shall be of the constant pressure type (deadman control type) to stop the cage immediately upon release of the button.

(12) The cage shall be equipped with a hand hold to accommodate each occupant.

(13) A lever shall be located inside of the cage to manually activate the safety clamps.

(14)(i) The maximum load for personnel hoisting for the five-man cage shall be 5 men or 1250 pounds, and for the eight-man cage 8 men or 2000 pounds,

(ii) The maximum load for material hoisting for the five-man cage shall be 4200 pounds, and for the eight-man 5600 pounds;

(iii) The weight of the cage and all auxiliary equipment attached to the cage shall be included in the maximum rated load for material hoisting; and

(iv) A sign stating the capacity shall be posted in the cage.

K. *Safety Clamps.*

(1) Safety clamps shall be attached to the cage for gripping the guide ropes and shall operate on the broken rope principle.

(2) The safety clamps shall be capable of stopping and holding the cage at the maximum allowable speed and load.

(3) The clamping force required for each individual hoisting system shall be pre-determined and pre-set.

(4) The safety clamp assemblies shall be kept clean and in functional condition at all times.

L. *Emergency Escape Exit and Device.*

(1) An emergency exit, with a cover, shall be provided in the top of the cage and shall conform to the following:

(i) The exit opening shall have an area of not less than 400 square inches and shall measure not less than 16 inches on any one side;

(ii) The exit opening shall be so located as to provide a clear passageway unobstructed by fixed hoist equipment located in or on top of the cage; and

(iii) The exit cover shall open outward.

(2) An emergency escape device shall be provided in the cage or at the bottom landing. The device shall conform to the following requirements:

(i) If the emergency escape device is stored in the cage it shall be long enough to reach the bottom landing from the highest escape point;

(ii) If the emergency escape device is stored at the bottom landing it shall have a means provided in the cage for raising the device to the highest escape point; and

(iii) Operating instructions shall be attached to the emergency escape device.

(3) All employees to be transported in the cage shall be instructed in the use of the emergency escape system prior to being transported in the cage. All employees shall be given periodic instructions on the hoisting and emergency escape systems.

M. *Welding.* All field welding shall be done by qualified welders in accordance with § 1926.556(b)(5).

N. *Safeties.* The hoisting system shall be provided with the following additional safeties:

(1) Top and Bottom Ultimate Limit Switches;

(2) Changeover Limit Switch;

(3) Lower and Upper Slowing Limit Switches;

(4) Lower and Upper Timed Stops; and

(5) Overspeed Governor.

Zurn Industries, Inc./Tileman & Co., Ltd. (A Partnership) shall give notice of this grant of interim order to all affected employees by the same means required to inform them of the application for variance.

The Assistant Secretary may revoke this order at any time if the applicant does not comply with any requirements of the order or the relevant standards, or if other information indicates that revocation of the interim order is warranted. Unless revoked, the interim order will remain in effect until a decision is rendered on the application for variance.

Signed at Washington, D.C., on this 17th day of December 1982.

Thorne G. Auchter,

Assistant Secretary of Labor.

BILLING CODE 4510-26-M

Office of the Secretary

Agency Forms Under Review by the Office of Management and Budget (OMB)

Background: The Department of Labor, in carrying out its responsibility under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the proposed forms and recordkeeping requirements that will affect the public.

List of Forms Under Review: On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency forms under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of any particular revision they are interested in. Each entry will contain the following information:

The Agency of the Department issuing this form.

The title of the form.

The Agency form number, if applicable.

How often the form must be filled out.

Who will be required to or asked to report.

Whether small business or organizations are affected.

The standard industrial classification (SIC) codes, referring to specific respondent groups that are affected.

An estimate of the number of responses.

An estimate of the total number of hours needed to fill out the form.

The number of forms in the request for approval.

An abstract describing the need for and uses of the information collection.

Comments and Questions: Copies of the proposed forms and supporting documents may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone 202-523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, N.W., Room S-5526, Washington, D.C. 20210. Comments should also be sent to the OMB reviewer, Norman Frumkin, Telephone 202-395-6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, NEOB, Washington, D.C. 20503.

Any member of the public who wants to comment on a form which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Labor Management Services Administration

Proposed Class Exemption Relating to the Recapture of Brokerage Commissions on Behalf of Insurance Company Pooled Separate Accounts

Quarterly

Businesses or other institutions

SIC: 635

38,500 responses; 5,600 hours

This is a proposed class exemption from certain restrictions of ERISA. The proposed class exemption would permit an insurance company to utilize its affiliates to effect or execute securities transactions in order to recapture brokerage commissions for the benefit of employee benefit plans whose assets are maintained in pooled separate accounts managed by the insurance company.

Signed at Washington, D.C. this 21st day of December 1982.

Paul E. Larson,

Departmental Clearance Officer.

BILLING CODE 4510-29-M

Steering Subcommittee, Labor Advisory Committee for Trade Negotiations and Trade Policy; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463 as amended), notice is hereby given of a meeting of the Steering Subcommittee of the Labor Advisory

Committee for Trade Negotiations and Trade Policy.

Date, time and place: January 11, 1983, 9:30 a.m., Rm. N3437 A&B Frances Perkins Department of Labor Building, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Purpose: To discuss trade negotiations and trade policy of the United States.

This meeting will be closed under the authority of Section 10(d) of the Federal Advisory Committee Act. The Committee will hear and discuss sensitive and confidential matters concerning U.S. trade negotiations and trade policy.

FOR FURTHER INFORMATION CONTACT: Joseph S. Papovich, Executive Secretary, Labor Advisory Committee, Phone: (202) 523–6171, December 20, 1982.

Signed at Washington, D.C. this 20th day of December 1982.

Robert W. Searby,

Deputy Under Secretary, International Affairs.

NATIONAL FOUNDATION ON ARTS AND THE HUMANITIES

National Council on the Humanities Advisory Committee; Meeting

December 20, 1982.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended), notice is hereby given that a meeting of the Jefferson Lecture Committee of the National Council on the Humanities will be held on Monday, January 17, 1983 at 10:00 a.m. to 5:00 p.m. in Room 1023 in the Shoreham Building, 806 15th Street, NW., Washington, D.C. 20506.

The purpose of the meeting is to advise the Chairman of the National Endownment for the Humanities with respect to the purpose, nature and function of the Jefferson Lecture. The meeting will be open to the public.

The agenda will be: (1) Review of solicited comments from Council members and others; (2) Discussion of the future of the Lecture; (3) Discussion of recommendations to the full Council; and (4) Preparation of the Committee report to the full Council to be presented in February.

Further information about this meeting can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, Washington, D.C. 20506, or call area code 202–724–0367.

Stephen J. McCleary,

Advisory Committee, Management Officer.

BILLING CODE 7536–01–M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–325 and 50–324]

Carolina Power & Light Co.; Issuance of Amendments to Facility Operating Licenses

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 52 and 77 to Facility Operating License Nos. DPR–71 and DPR–62 issued to Carolina Power & Light Company (the licensee) which revised the Operating License and Technical Specifications for operation of the Brunswick Steam Electric Plant, Units Nos. 1 and 2 (the facility), located in Brunswick County, North Carolina. The amendments are effective as of the date of issuance

The amendments revise the Technical Specifications to institute reporting requirements for challenges to safety valves and relief valves per NUREG–0737, Item II.K.3.3., and introduce specific, standardized terminology for the reactor vessel water level reference point. The amendments also change the license conditions formerly titled "Guard Training and Qualification Plan" to "Security Personnel Training and Qualification Plan" and change the tile of the plan specified in those license conditions in order to maintain consistent terminology.

The applications for the amendments comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter, I, which are set forth in the license amendments. Prior public notice of the amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of the amentiments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see (1) the applications for amendments dated September 25, 1981 (supplemented April 7, 1982 and October 22, 1982) and November 18, 1981, (2) Amendment Nos. 52 and 77 to License Nos. DPR–71 and DPR–62, and (3) the Commission's related Safety Evaluation. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N. W., Washington, D. C. and at the Southport-brunswick County Library, 109 West Moore Street, Southport, North Carolina 28461. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D. C. 20555, Attention: Director, Division of Licensing

Dated at Bethesda, Maryland this 16th day of December, 1982.

For the Nuclear Regulatory Commission.

Domenic B. Vassallo,

*Chief, Operating Reactors Branch *2, Division of licensing.*

[FR Doc. 82–35006 Filed 12–23–82; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–373]

Commonwealth Edison Co.; Issuance of Amendment of Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 11 to Facility Operating License No. NPF–11, issued to Commonwealth Edison Company, which adds License Condition 2.C.(34) for operation of the La Salle County Station, Unit No. 1 (the facility) located in Brookfield Township, La Salle County, Illinois.

The Amendment authorizes the operation of La Salle County Station, Unit 1 with one recirculation loop out of service for the first fuel cycle only. Also, the Amendment adds a license condition limiting a power level of 50 percent of full power or less during the operation with one recirculation loop out of service.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this Amendment was not required since the Amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this Amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this Amendment.

For further details with respect to this action, see (1) The application for Amendment dated December 6, 1982; (2) Amendment No.11 to License No. NPF–11 dated December 16, 1982; (3) the Commission's related safety evaluation. All of these items are available for public inspection at the Commission's Public Document Room located at 1717 H Street, NW, Washington, DC 20555, and the Public Library of Illinois Valley Community College, Rural Route No. 1, Ogelsby, Illinois 61348. A copy of items (1), (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 16th day of December 1982.

For The Nuclear Regulatory Commission.

A. Schwencer,

Chief, Licensing Branch No. 2, Division of Licensing

[FR Doc. 82–35007 Filed 12–23–82; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–373]

Commonwealth Edison Co.; Issuance of Amendment of Facility Operating License and Notice of Exemption

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 12 to Facility Operating License No. NPF–11, issued to Commonwealth Edison Company, and a related exemption from 10 CFR 50.44 for operation of the La Salle County Station, Unit No. 1 (the facility) located in Brookfield Township, La Salle County, Illinois.

The regulation 10 CFR 50.44 requires that all reactors with Mark I or II containment must be inerted 6 months after initial criticality. La Salle Unit I has a Mark II containment and its initial critically was performed on June 21, 1982. It is presently completing its startup program and Commonwealth Edison requested an exemption from this regulation to avoid any potential negative impact on the startup program. The exemption is authorized until either the required 100 percent rated thermal power trip test has been performed or the reactor has operated for 120 effective full power days, whichever is first. The Amendment and exemption are effective as of the date of issuance.

The application for amendment and exemption comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment and in the safety evalution in support of the Amendment and exemption. Prior public notice of the license amendment was not required since the Amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this Amendment and the exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this Amendment and exemption.

For further details with respect to this action, see (1) The application for amendment and exemption dated November 18, 1982 and December 7, 1982; (2) Amendment No. 12 to License No. NPF–11 dated December 20, 1982; and (3) the related safety evaluation in support of the Amendment and exemption. All of these items are available for public inspection at the Commission's Public document Room, 1717 H Street, NW, Washington, DC 20555, and the Public Library of Illinois Valley Community College, Rural Route No. 1, Ogelsby, Illinois 61348. A copy of items (1), (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 20th day of December 1982.

For the Nuclear Regulatory Commission.

A. Schwencer,

Chief Licensing Branch No. 2, Division of Licensing.

BILLING CODE 7590–01–M

[Docket No. 50–335]

Florida Power & Light Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 55 to Facility Operating License No. DPR–67, issued to Florida Power & Light Company (the licensee), which revised Technical Specifications for operation of the St. Lucie Plant, Unit No. 1 (the facility), located in St. Lucie County, Florida. The amendment is effective as of the date of issuance.

This amendment updates the offsite and facility organization figures and the membership of the Company Nuclear Review Board in the Administrative Conrtols section of the Technical Specifications.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter 1, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not invlove a significant hazards consideration.

The Commission has determined that issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative delcaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) The application for amendment dated Auguest 11, 1982, (2) Amendment No. 55 to License No. DPR–67 and (3) the Commission's letter dated December 14, 1982. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and the Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Florida. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 14th day of December, 1982.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch #3 Division of Licensing.

[FR Doc. 82–35010 Filed 12–23–82; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–344]

Portland General Electric Co. et al.; Exemption

In the matter of; PORTLAND GENERAL ELECTRIC CO., CITY OF EUGENE, ORE.; PACIFIC POWER &

LIGHT CO.; (Trojan Nuclear Plant); exemption.

I

Portland General Electric Company, the City of Eugene, Oregon and Pacific Power & Light Company (the licensee) are the holders of Facility Operating License No. NPF–1 which authorizes the operation of the Trojan Nuclear Plant (the facility) at reactor power levels not in excess of 3411 megawatts thermal. The facility consists of a Westinghouse Electric Corporation designed pressurized water reactor located at the licensee's site in Columbia County, Oregon.

The license is subject to all rules and regulations of the Commission.

II

10 CFR 50.48, "Fire protection", and Appendix R to 10 CFR Part 50, "Fire Protection Program for Nuclear Power Facilities Operating Prior to January 1, 1979" set forth certain specific fire protection features required to satisfy the General Design Criterion related to fire protection (Criterion 3, Appendix A to 10 CFR 50).

Section III.G of Appendix R requires fire protection for equipment important to safe shutdown. Such fire protection is achieved by various combinations of fire barriers, fire suppression systems, fire detectors, and separation of safety trains (III.G2) or alternative safe shutdown equipment free of the fire area (III.G.3). The objective of this protection is to assure that one train of equipment needed for hot shutdown would be undamaged by fire, and that systems needed for cold shutdown could be repaired within 72 hours (III.G.1). The criterion for alternative shutdown capability is contained in Section III.L

Section III.J of Appendix R, "Emergency lighting", requires emergency lighting units with at least an 8-hour battery power supply to be provided in all areas needed for operation of safe shutdown equipment and in routes thereto.

III

By letters dated March 19, 1981, as supplemented and amended by letters dated May 5 and August 21, 1981, March 29, July 13 and September 21, 1982 the licensee requested nine specific exemptions from the requirements of Appendix R, involving III.G, III. J and III.L, as follows:

III.G.2 Fuel Building, elevation 45', Auxiliary Building, elevation 45', Cable penetration area outside Containment

III.G.3 Intake Structure, Control Room, Manholes NM–3 and NM–4

III.J Emergency lighting

III.L Alternative shutdown for Intake Structure and Manholes NM–3 and NM–4.

The acceptability of these requests is addressed below. More details are contained in the NRC staff's related Safety Evaluation (SE) dated December 14, 1982, which is included herein by reference.

IV

Axiliary and Fuel Buildings, el. 45-feet

The licensee requested exemptions from Section III.G.2 to the extent it requires one-hour fire rated barriers, an automatic fire suppression system and total area automaitc fire detection. This area contains the redundant component cooling water pumps and the redundant service water booster pumps. Ionization smoke detectors have been installed only near each component cooling water and service water booster pump to provide localized early warning detection in these two areas.

The in-situ combustibles in the Auxiliary and Fuel Building consist of lubrication oil and cable insulation. The objective for the fire protection of safe shutdown cabling and equipment is to ensure that at least one means of achieving and maintaining safe shutdown conditions will remain available during and after any postulated fire. Because it is not possible to predict the specific condition under which fire may occur and propagate, Section III.G of Appendix R requires specific fire protective features for this area, e.g., an area fire detection system, an automatic fire suppression system and a one-hour fire barrier.

Based, in part, on an on-site survey of the area, we find that a postulated exposure fire could result in the loss of the ability to achieve safe shutdown conditions due to the lack of separation and fire protection provided for safe shutdown systems. Localized smoke detection and manual fire fighting do not provide adequate assurance that one means of achieving and maintaining safe shutdown conditions would be free of damage in the event of a fire.

Based on our evaluation we conclude that modification to meet Section III.G of Appendix R would enhance fire protection safety above that provided by the existing systems. Therefore the licensee's request for exemption is denied.

However, as to the schedule for meeting these requirements, some relief in the form of an exemption from the implementation schedules of § 50.48 is appropriate, since fire protection at Trojan has been substantially upgraded generally and, except for this item, is essentially complete. Further, manual fire suppression capability is provided by standpipe hose stations and portable fire extinguishers, and localized ionization smoke detectors are installed. In view of this, the licensee is granted additional time to make fire protection improvements to meet Section III.G for these areas. The licensee shall complete such modifications by not later than startup of Fuel Cycle 6 (approximately July 1983).

Cable Penetration Area Outside Containment

The licensee requested an exemption from Section III.G.2 to the extent it requires 1-hour fire rated barriers to enclose one train of safe shutdown cabling.

The cable penetration area outside containment includes the area between the Auxiliary and Containment Buildings from elevation 45-feet through elevation 93-feet. The area is triangular in shape with approximately a 5000 square feet floor area and a 50 foot high ceiling. The area is open on two sides to the yard area.

Nonsafety-related cable trays run between the redundant shutdown cable trays. No conduit crossovers exist involving the redundant shutdown cables. A fire in the nonsafety-related cable trays would have to propagate a horizontal distance of 43 ft. to affect redundant safe-shutdown cables. To assure that redundant safe shutdown cables are not affected by a fire in a non-safety related cable tray, fire stops have been installed in the non-safety related cable trays.

An automatic deluge water spray system has been installed to protect the cable trays in the area. Ionization and photoelectric smoke detectors have been installed to provide early warning detection and to actuate the water spray system.

The in-situ fuel load in the form of cable insulation is located in horizontal cable trays 28 to 42 feet above the floor level. There are no vertical cable trays in the area. Because the combustibles at the floor level are small and the redundant cables are located considerably above the floor level, any postulated exposure fire would not result in the loss of the ability to safely shut down the plant.

Based on our evaluation, we conclude that the installation of 1-hour fire rated barriers will not significantly increase the level of fire safety. Therefore the licensee's request for exemption is granted.

Intake Structure (23-foot level)

The licensee requested an exemption from Section III.G.3 to the extent it requires a fixed fire suppression system in this fire area.

The fire area contains the three redundant service water pumps and the cabling essential for their operation.

Ionization smoke detectors have been provided above each service water pump to provide early warning detection and alarm in the control room. Manual fire suppression capability is provided by portable fire extinguishers and a fire hydrant with hose house approximately 30 feet from the Intake Structure.

In the event all three of the service water pumps were destroyed by a fire, the circulating water system could supply water to the service water system. Therefore the circulating water system provides alternative shutdown capability for this area.

The requirement for a fixed fire suppression system applies for fire areas which have a large concentration of combustibles. In this instance the in-situ fire load is low (8000 BTU/sq. ft.). The fire load is due to the lubricating oil contained in the service water pumps and the cable insulation located in horizontal cable trays 20 feet above the floor. There are no vertical cable trays in this area. In a site visit, it was determined that, based on the configuration and limited amount of combustibles in the fire area, redundant systems are not vulnerable to single exposure fires.

We conclude that the installation of a fixed suppression system in the intake structure would not significantly increase the level of fire safety. Therefore, the licensee's request for exemption is acceptable and is granted.

Control Room

The licensee requested an exemption from Section III.G.3 to the extent it requires a fixed suppression system in this fire area.

The objective for the protection of safe shutdown capability is to ensure that at least one means of achieving and maintaining safe shutdown conditions will remain available during and after any postulated fire in any area in the plant. The licensee's alternate shutdown panel provides this objective in case of a fire in the control room. In addition, the control room is continually manned by the operators, and thus, a fire would be immediately identified. A fire detection system, portable fire extinguishers, and hose stations have been provided.

Therefore, we find that the licensee's request to be exempted from the requirement to provide a fixed fire suppression system in the control room is acceptable, and is granted.

Manholes NM–3 and NM–4

The licensee requested an exemption from Section III.G.3 to the extent it requires a fixed suppression system and automatic fire detection in these areas.

Manholes NM–3 and NM–4 provide access to the duct bank which runs between the Fuel Building and the Intake Structure. The duct bank routes the redundant power cables for the service water pumps.

In fire areas for which alternative shutdown capability is provided, Section III.G.3 requires the installation of a fire detection and a fixed fire suppression system. The requirement for these systems applies for fire areas which have large concentration of combustibles and require early warning detection to suppress fires quickly, so as to limit damage to other areas of the plant. In this instance, a fire in either manhole will not pose a threat to other safe shutdown systems or affect the ability to safely shut down the plant. Alternative shutdown capability has been provided, radiant energy shields are installed between redundant cables, and the cables are wrapped with asbestos tape.

Based on our evaluation, we conclude that the installation of fire detection and fixed fire suppression systems in Manholes NM–3 and NM–4 would not significantly increase the level of fire safety. Therefore, the licensee's request for exemption is granted.

Emergency Lighting

Section III.J of Appendix R to 10 CFR states, "Emergency lighting units with at least an 8-hour battery power supply shall be provided in all areas needed for operation of safe shutdown equipment and in access and egress routes thereto."

The licensee requested an exemption from the Section III.J requirement for battery-power emergency lighting for the Trojan Nuclear Plant.

The plant lighting system consists of normal lighting, essential lighting, and emergency lighting. All areas of the plant requiring manual safe shutdown operation are supplied with either essential lighting or emergency lighting. In most areas both lighting systems are available. The essential lighting is powered by the emergency diesel generators and the emergency lighting is powered from the station batteries. The emergency lighting is automatically energized upon failure of the AC supply. Additionally, fixed sealed-beam units with an 8-hour battery power supply provide lighting for access and egress in the Turbine, Control, Auxiliary, and Fuel Buildings which house the safe shutdown equipment.

In its review of emergency lighting circuits, the licensee indicated that a fire in the main control room or cable spreading room could affect lighting in the hallway and stairway outside the main control room. Therefore, by letter dated July 13, 1982, the licensee committed to either reroute cables or install emergency lighting units in the area outside of the main control room so that lighting would be available along the entire pathway between the main control room, emergency diesel generators rooms and the safe shutdown panel, in the event of a fire in the main control room or cable spreading room.

Lighting powered from either 8-hour battery-power sources or the diesel generators will be available for safe shutdown operations and if plant lighting is disabled by fire, lighting for safe shutdown operations will be available. We therefore conclude that the licensee has provided an acceptable alternative to the III.J requirement. Therefore, exemption from the battery-powered emergency lighting requirement of Section III.J of Appendix R to 10 CFR 50 is acceptable and is granted. This exemption is conditioned on the licensee completing the cable rerouting or installation of emergency lighting units discussed above as soon as practicable but by no later than plant startup for Fuel Cycle 6 (approximately July 1983).

Alternative Shutdown for the Intake Structure and Manholes NM–3 and NM–4

The licensee provided additional information based on the criteria of Section III.L to the extent that the alternative shutdown system for these areas is not capable of achieving cold shutdown of the reactor coolant system within 72 hours.

The licensee indicated that should a fire in the intake structure or manholes NM–3 and NM–4 result in loss of all service water pumps, an alternate shutdown capability is available utilizing gravity flow through the service water system from the circulating water system cooling tower basin. This arrangement is sufficient to provide cooling to safe shutdown equipment assuming loss of offsite power for 21 hours when spent fuel pool cooling is maintained or 40 hours if the spent fuel pool is isolated. Once the cooling tower basin water capacity is depleted, the station fire pumps can be connected to the service water system header by means of hoses to existing connections and can provide cooling water from the

Columbia River indefinitely assuming loss of offsite power. A cooldown to the residual heat removal system initiation temperature (350°F) can be accomplished within 72 hours, however, the residual heat removal system cannot be initiated prior to 80 hours after shutdown because of the limited flow to the service water system provided by the alternate system. Cold shutdown cannot be achieved for approximately 150 hours when the above alternate is employed.

Additional alternative capability is provided by utilizing the cooling tower makeup pumps which can be powered from the emergency diesel generators. These pumps recirculate a portion of the circulating water system flow discussed above, thus further extending the time the circulating water system can be used as an alternative to service water cooling. As with the previously discussed arrangement, this alternative method also cannot be used to accomplish cold shutdown within 72 hours.

Based on our review, we conclude that although the above alternatives do not provide the capability to achieve cold shutdown within 72 hours as identified in the criteria of Section III.L, we believe they represent an acceptable means for assuring safe plant cooldown assuming loss of offsite power in the event of fires in the intake structure or manholes NM–3 and NM–4 which result in loss of all service water pumps. We therefore conclude that an exemption from the requirements of Section III.L should be granted.

V

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, the exemptions requested by licensee's letters as referenced and discussed in III. and IV. above are authorized by law, will not endanger life or property or the common defense and security, are otherwise in the public interest, and are hereby granted.

The Commission has determined that the granting of these exemptions will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

A copy of the Safety Evaluation dated December 14, 1982 related to this action is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the local public document room located at the Multnomah County Library, Social Science and Science Department, 801 S.W. 10th Avenue, Portland, Oregon 97205. A copy may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

This Exemption is effective upon issuance.

Dated at Bethesda, Maryland this 14th day of December, 1982.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing.

BILLING CODE 7590–01–M

[Docket No. 50–29]

Yankee Atomic Electric Co., Yankee Nuclear Power Station; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 78 to Facility Operating License No. DPR–3, issued to Yankee Atomic Electric Company (the licensee), which revised the Technical Specifications for operation of the Yankee Nuclear Power Station (Yankee) (the facility) located in Franklin County, Massachusetts. The amendment is effective as of its date of issuance.

The amendment incorporates changes to the Technical Specifications revising the maximum allowable peak rod linear heat generation rate limits as determined by the Core XVI LOCA analysis.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) The application for amendment dated November 26, 1982, (2) Amendment No. 78 to License No. DPR–3, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC. and at the Greenfield Community College, 1 College Drive, Greenfield, Massachusetts 01301. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC. 20555, Attention: Director, Division of Licensing.

Dated in Bethesda, Maryland, this 17th day of December 1982.

For the Nuclear Regulatory Commission.

Thomas V. Wambach,

Acting Chief, Operating Reactors Branch #5, Division of Licensing.

Reporting or Recordkeeping Requirements Document; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision or extension: Extension.

2. The title of the information collection: Department Duplication Request; Microform Duplication Request; Microform Blowback Request.

3 The form number if applicable: 171; 171A; 171B.

4. How often the collection is required: On occasion.

5. Who will be required or asked to report: Individuals.

6. An estimate of the number of responses: 8,000; 1,000; 2.000.

7. An estimate of the total number of hours needed to complete the requirement or request: 553; 66; 133.

8. Section 3504(h), Pub. L. 96–511 not applicable.

9. Abstract: These forms are used by the public in requesting reproduction of documents through the Public Document Room in Washington, D.C. NRC has a private contractor providing reproduction services and these forms provide the necessary controls.

ADDRESSES: Copies of the submittal will be made available for inspection or copying for a fee at the NRC Public Document Room, 1717 H Street, NW., Washington, D.C. 20555.

FOR FURTHER INFORMATION CONTACT: Comments and questions should be

directed to the OMB reviewer, Jeff Hill, (202) 395–7340.

NRC Clearance Officers R. Stephen Scott, (301) 492–8585. Dated at Bethesda, Maryland, this 20th day of December 1982.

For the Nuclear Regulatory Commission.

BILLING CODE 7590–01–M

Prioritization of Generic Safety Issues; Availability of Draft Prioritization of Generic Safety Issues

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Availability of Draft NUREG–0933; A Prioritization of Generic Safety Issues; Request for Comments.

SUMMARY: The Office of Nuclear Reactor Regulation has prepared a draft report, NUREG–0933, *"A Prioritization of Generic Safety Issues."* The report contains estimates of the potential safety benefits and impacts that would result if the listed generic safety issues were resolved and new requirements approved and implemented. Although the report does conceptually identify a possible resolution for each issue, this is only for the purpose of analyzing the associated benefits and impacts and is not meant to imply any proposed new requirement. The purpose of the report is to aid the Office of Nuclear Reactor Regulation in allocating its resources to resolving those generic safety issues that might have significant safety benefit or could be cost effective. Comments on the technical accuracy and completeness of the descriptions of the issues, their safety significance and the costs, and other impacts associated with the issues may be submitted and will be considered.

DATES: Comments may be submitted at any time. Although the report is scheduled to be published in February 1983, revision will be made, if and when warranted.

ADDRESSES: Interested persons may submit written comments and suggestions to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch. Copies of the draft report and the comments may be examined in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: W. Minners, Office of Nuclear Reactor Regulations, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Telephone 301–492–7827.

SUPPLEMENTARY INFORMATION: The Office of Nuclear Reactor Regulation is instituting a method of determining the safety priority ranking of generic safety issues based on the safety benefits and costs and other impacts associated with the issues. The method is described in the draft report, NUREG–0933, *A Prioritization of Generic Safety Issues.* Individual assessments of the issues are also provided in the report, along with the recommended safety priority ranking. Issues determined to have a high or medium safety priority ranking will be resolved on a schedule commensurate with their priority ranking. Issues determined to have low priority ranking or determined to warrant being dropped will not be scheduled for resolution. As other issues are identified, they will be prioritized and scheduled commensurate with their priority ranking. Supplements to NUREG–0933 will be issued to incorporate assessments of additional generic issues and revisions of assessments as necessary.

Any requirements that may be proposed based on the resolution of any of these generic issues will be subject to the NRC review and approval process prior to being issued. This will generally include a more complete and thorough assessment of the safety benefits, other values and impacts (including costs associated with implementing the requirement), a review by the Committee for Review of Generic Requirement, and public comment.

Dated at Bethesda MD, this 17th day of December 1982.

For the Nuclear Regulatory Commission.

Warren Minners,

Acting Chief, Safety Program Evaluation Branch, Division of Safety Technology, NRR.

[FR Doc. 82–35013 Filed 12–23–82; 8:45 am]

BILLING CODE 1590–01–M

OFFICE OF MANAGEMENT AND BUDGET

Identification of Included Federal Loan Programs for the Purposes of Public Law 97–365, the Debt Collection Act of 1982

AGENCY: Office of Management and Budget.

ACTION: Notice.

SUMMARY: Section 7 of the Debt Collection Act of 1982, Pub. L. 97–365, requires the Office of Management and Budget (OMB) to determine those direct, insured and guaranteed Federal loan programs to which Section 4 and Section 7 of the Act apply. The Act refers to these programs as "included Federal loan programs."

Under Section 4 of the Act, agencies which administer included Federal loan programs will have to require applicants to furnish their taxpayer identifying number on their loan applications. The taxpayer identifying number is the number an individual or business is required to furnish on a return filed with the Internal Revenue Service (IRS). In the case of individuals, the number is the social security number. Under the Act, agencies will use the number to verify the identity of loan applicants and to locate individuals and businesses should the loans become delinquent.

The application of Section 4 to all currently authorized loan programs will prevent and reduce future delinquencies substantially. Based on past experience, the broad application of Section 4 will not result in undue administrative costs or burdens being placed on credit applicants or the agencies administering the loan programs.

Section 7 of the Debt Collection Act of 1982 permits the Internal Revenue Service (IRS) to disclose to the head of a Federal agency administering an included Federal loan program whether or not a loan applicant has a tax delinquent account. A tax delinquent account for an individual generally arises after a taxpayer has received four notices that tax is due. A similar but not identical procedure is followed in the case of business taxpayers. Under the Act, disclosure of this information can only be made for the purpose of determining the credit worthiness of a loan applicant. Redisclosure of this information by the receiving agency is not authorized.

The extent to which agenices will utilize the screening authority contained in Section 7 will vary from agency to agency. For example, while it is unlikely that recent high school graduates applying for educational loans would have outstanding tax liabilities, it may be necessary in certain circumstances to screen applicants for educational loans against IRS records of tax delinquencies. On the other hand, applicants for Federal housing and business loans are more likely to have outstanding tax liabilities, and it is expected that these programs will use the screening authority more frequently than educational loan programs. The degree to which progams use the screening authority will also be influenced by other factors, such as the amount of credit involved, other credit information available on the applicant, and the

administrative costs associated with screening IRS records.

While a substantial number of Federal loan programs are included on the following list, it is important to remember that the Act permits but does not require agencies to utilize the screening authority. Depending on such factors as the amount of credit involved and the availability of other credit information on the applicant, an agency may elect not to utilize the screening authority.

The application of the screening authority will enhance the Government's debt collection efforts and will substantially prevent and reduce future delinquencies in these programs in two ways. Initially, the knowledge that a loan applicant has an outstanding tax liabililty will allow agenices to exercise sounder judgment in determining the potential abililty of a loan applicant to repay the debt. This will in turn lead to more informed decisions concerning the extension of Federal credit assistance and will reduce the possibility that a loan is inadvertently granted to an individual or business who is a poor credit risk. In addition, the screening authority will provide an incentive for Federal loan applicants to clear any outstanding tax debts prior to seeking Federal credit assistance. In 1982, over $27 billion in delinquent taxes was owed to the IRS. The diligent use of the screening authority will be of great assistance to the IRS in its efforts to collect delinquent taxes.

The direct, insured and guaranteed loan program authorized by the following statutes are included Federal loan programs for the purposes of Section 7 of the Debt Collection Act of 1982:

Department of Agriculture

—Commodity Credit Corporation Charter Act, as amended
—Agriculture Act of 1949, as amended
—Agriculture Adjustment Act of 1938, as amended
—Rural Electrification Act of 1936, as amended
—Consolidated Farm and Rural Development Act, as amended
—Housing Act of 1949, as amended
—Emergency Agriculture Credit Adjustment Act of 1978, as amended
—Bankhead-Jones Farm Tenant Act (Title III), as amended
—25 U.S.C. 488–492, as amended

Department of Commerce

—Trade Act of 1974, as amended
—Public Works and Economic Development Act of 1965 as amended
—Costal Zone Management Act of 1972, as amended
—Merchant Marine Act of 1936, as amended
—Fish and Wildlife Act of 1956, as amended

Department of Education

—Higher Education Act of 1965, as amended
—Housing Act of 1950 (Title IV), as amended

Department of Energy

—Electric and Hybrid Vehicle Research, Development and Demonstration Act of 1976, as amended
—Energy Policy and Conservation Act of 1975, as amended
—Geothermal Energy Research, Development and Demonstration Act of 1974, as amended
—Energy Security Act of 1980, as amended
—Federal Nonnuclear Energy Research and Development Act of 1974, as amended
—Energy Conservation and Production Act, as amended
—National Energy Conservation Policy Act of 1978, as amended
—Power Plant and Industrial Fuel Use Act of 1978, as amended
—Public Utility Regulatory Policies Act of 1978, as amended
—Pacific Northwest Electric Power Planning and Conservation Act, as amended

Department of Health and Human Services

—Public Health Service Act, as amended

Department of Housing and Urban Development

—National Housing Act, as amended
—United States Housing Act of 1937, as amended
—Housing Act of 1959, as amended
—Independent Offices Appropriation Act of 1955, as amended
—Solar Energy and Energy Conservation Bank Act of 1980, as amended
—Housing and Urban Development Act of 1968, as amended
—Housing Act of 1964, as amended

Department of Interior

—Indian Financing Act of 1974, as amended
—Indian Reorganization Act of 1934, as amended

Department of Labor

—Employee Retirement Income Security Act of 1974 (29 U.S.C. 1431), as amended

Department of Transportation

—Emergency Rail Services Act of 1970, as amended
—Regional Rail Reorganization Act of 1973, as amended
—Rail Passenger Service Act, as amended
—Railroad Revitalization and Regulatory Reform Act of 1976, as amended

BILLING CODE 3110–9–M

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

Columbia River Basin Fish and Wildlife Program; Distribution and Availability Environmental Document

AGENCY: Pacific Northwest Electric Power and Conservation Planning

Council (Northwest Power Planning Council).

ACTION: Notice of distribution of environmental document on Columbia River Basin Fish and Wildlife Program.

SUMMARY: On November 15, 1982, the Pacific Northwest Electric Power and Conservation Planning Council ("the Council") adopted a Columbia River Basin Fish and Wildlife Program. The Council has prepared an environmental document summarizing its consideration of environmental factors throughout development of that program. The document will be forwarded to the Bonneville Power Administration and the Federal Energy Regulatory Commission in the U.S. Department of Energy; the Corps of Engineers, U.S. Department of the Army; and the Bureau of Reclamation, U.S. Department of the Interior. Copies of the document also will be provided, upon request, to any interested organization or individual.

ADDRESSES: Those organizations or individuals wishing to receive a copy of the document should contact Janie Pearcy by writing her at the Council's central office, Suite 200, 700 S.W. Taylor Street, Portland, Oregon, 97205, or by calling her at (toll free) 1–800–547–0134 in Montana, Idaho, Washington and California or (toll free) 1–800–452–2323 in Oregon. From all other states, call (503) 222–5161.

The environmental document is available for inspection and copying in the Public Reading Room of the Council's central office, Suite 200, 700 SW. Taylor Street, Portland, Oregon, 97205, on weekdays between 8:30 a.m. and 4:30 p.m.

FOR FURTHER INFORMATION CONTACT: Curt Marshall, Fish and Wildlife Program Manager (toll free) 1–800–547–0134 in Montana, Idaho, Washington and California or (toll free) 1–800–452–2324 in Oregon. From all other states, call (503) 222–5161.

SUPPLEMENTARY INFORMATION: The Council adopted its Columbia River Basin Fish and Wildlife Program on November 15, 1982, and published a Federal Register notice of adoption on November 30, 1982 (47 FR 53976–7). Because the Council is not a federal agency, it is not subject to the National Environmental Policy Act (NEPA), 42 U.S.C. 4321, *et seq.* However, the process the Council followed in developing its program paralleled the requirements of NEPA. The document demonstrates how the Council considered environmental factors as it drafted its program. The federal agencies that are to implement the Council's program must comply with NEPA. This document provides those agencies with a foundation for their environmental review to help them expedite the process and implement the program as soon as possible.

Edward Sheets,

Executive Director.

BILLING CODE 0000-00-M

PENSION BENEFIT GUARANTY CORPORATION

Pendency of Request for Exemption From Bond/Escrow Requirement Relating to Sale of Assets by an Employer That Contributes to a Multiemployer Plan; Johanna Farms, Inc. et al.

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of pendency of request.

SUMMARY: This notice advises interested persons that the Pension Benefit Guaranty Corporation has received a request from Johanna Farms, Inc., and its wholly owned subsidiary, Dairy Center, Inc. for an exemption from the bond/escrow requirement of section 4204(a)(1)(B) of the Employee Retirement Income Security Act of 1974, as amended. Section 4204(a)(1) provides that the sale of assets by an employer that contributes to a multiemployer pension plan will not constitute a complete or partial withdrawal from the plan if certain conditions are met. One of these conditions is that the purchaser post a bond or deposit money in escrow for five plan years, beginning after the sale. The PBGC is authorized to grant exemptions from this requirement. Prior to granting an exemption, the PBGC is required to give interested persons an opportunity to comment on the exemption request. The effect of this notice is to advise interested persons of this exemption request and to solicit their views on it.

DATE: Comments must be submitted on or before February 10, 1983.

ADDRESSES: All written comments (at least three copies) should be addressed to: Assistant Executive Director for Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, D.C. 20006. The request for exemption and the comments received will be available for public inspection at the PBGC Public Affairs Office, Suite 7100, at the above address, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: James M. Graham, Office of the Executive Director, Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, D.C. 20006; (202) 254–4862. [This is not a toll-free number.]

SUPPLEMENTARY INFORMATION:

Background

Section 4204(a)(1) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), 29 U.S.C. 1384, provides that a bona fide arm's-length sale of assets of a contributing employer to an unrelated party will not be considered a withdrawal if three conditions are met. These conditions, enumerated in section 4204(a)(1)(A)–(C), are that—

(A) The purchaser has an obligation to contribute to the plan for substantially the same number of contribuition base units for which the seller was obligated to contribute;

(B) The purchaser obtains a bond or places an amount in escrow, for a period of five plan years after the sale, in an amount equal to the greater of the seller's average required annual contribution to the plan for the three plan years preceding the year in which the sale occurred or the seller's required annual contribution for the plan year preceding the year in which the sale occurred; and

(C) The contract of sale provides that if the purchaser withdraws from the plan within the first five years beginning after the sale and fails to pay any of its liability to the plan, the seller shall be secondarily liable for the liability it (the seller) would have had but for section 4204.

The bond or escrow described above would be paid to the plan if the purchaser withdraws from the plan or fails to make any required contributions to the plan within the first five plan years beginning after the sale.

Section 4204(c) of ERISA authorizes the Pension Benefit Guaranty Corporation ("PBGC") to grant individual or class variances or exemptions from the purchaser's bond/escrow requirement of section 4204(a)(1)(B) and the contract-provision requirement of section 4204(a)(1)(C). The legislative history of section 4204 indicates a Congressional intent that the sales rules be administered in a manner that assures protection of the plan with the least practicable intrusion into normal business transactions. The granting of an exemption of variance from the requirements of section 4204(a)(1)(B) or (C) does not constitute a

finding by PBGC that the transaction satisfies the other requirements of section 4204(a)(1).

Under § 2643.3(a) of the PBGC's regulation on procedures for variances for sales of assets (46 FR 46127, September 17, 1981), the PBGC shall approve a request for a variance or exemption if it determines that approval of the request is warranted, in that it—

(1) Would more effectively or equitably carry out the purposes of Title IV of the Act; and

(2) Would not significantly increase the risk of financial loss to the plan.

Section 4204(c) of ERISA and § 2643.3(b) of the regulation require the PBGC to publish a notice of the pendency of a request for a variance of exemption in the **Federal Register**, and to provide interested parties with an opportunity to comment on the proposed variance or exemption.

The Request

The PBGC has received a request from Johanna Farms, Inc. ("Johanna") and its wholly owned subsidiary, Dairy Center, Inc. ("Diary") to waive the bond/escrow requirement of section 4204(a)(1)(B) of ERISA. In the request, the applicants represent among other things, that:

1. On May 27, 1982, Dairy purchased certain operating assets of the Great Atlantic and Pacific Tea Company, Inc. ("A&P"). Johanna was a guarantor to the sales contract.

2. Dairy has assumed A&P's responsiblities under a collective bargaining agreement with Food Drivers, Salesmen, Dairy and Ice Cream Workers Union Local 463, which obligated A&P to contribute to the Dairy Industry-Union Pension Plan for Philadelphia and Vicinity (the "Plan"). Prior to the sale, A&P's potential withdrawal liability had been estimated by the Plan to be $1,402,457.

3. The amount of the bond or escrow required under section 4204(a)(1)(B) is $269,105 (the estimated annual amount of A&P's required annual contribution for the Plan year preceding the year in which the sale occurred.)

4. According to its consolidated financial statements, Johanna and its subsidiaries had total net assets for its fiscal year ended May 31, 1981 of approximately $13 million, and an average net income for its fiscal years 1979–1981 of about $1.6 million. Johanna has asserted that all other financial information submitted as part of this request is exempt from disclosure under the Freedom of Information Act, 5 U.S.C. 522(b)(4).

5. The applicants have sent a copy of this request (excluding thefinancial information) to the Fund and the collective bargaining representative of A&P's former employees by certified mail, return receipt requested.

Comments

All interested persons are invited to submit written comments on the pending exemption the above address, by February 10, 1983. All comments will be made a part of the record. Comments received, as well as the application for exemption, will be available for public inspection at the address set forth above.

Issued at Washington, D.C. on this 17th day of December, 1982.

Edwin M. Jones,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[FRA Waiver Petition Docket HS-82-24]

Great Western Railroad Co.; Petition for Exemption From the Hours of Service Act

In accordance with 49 CFR 211.41 and Section 211.9, notice is hereby given that the Great Western Railroad Company(GW) has petitioned the Federal Railroad Administration (FRA) for an exemption from the Hours of Service Act (83 Stat. 464, Pub. L. 91–169, 45 U.S.C. 64-A(e)). That petition requests that the GW be granted authority to permit certain employees to continuously remain on duty for in excess of twelve hours.

The Hours of Service Act currently makes it unlawful for a railroad to require or permit specified employees to continuously remian on duty for a period in excess of twelve hours. However, the Hours of Service Act contains a provision that permits a railroad, which employs no more than fifteen employees who are subject to the statute, to seek an exemption from this twelve hour limitation.

The GW seeks this exemption so that it can permit certain employees to remain continuously on duty for period not to exceed sixteen hours. The petitioner indicates that granting this exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs no more than fifteen employees and has demonstrated good cause for granting this exemption.

Interested persons are invited to participate in this proceeding by submitting written views or comments. FRA has not scheduled an opportunity for oral comment since the facts do not appear to warrant it. Communications concerning this proceeding should identify the Docket Number, Docket Number HS–82–24, and must be submitted in triplicate to the Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590. Communications received before January 14,1 1983, will be considered by the FREA before final action is taken. Comments received after that date will be considered as far as practicable. All comments received will be available for examination both before and after the closing date for comments, during regular business hours in Room 7321A, Nassif Building 400 Seventh Street, S.W., Washington, D.C. 20590.

(Section 5 of the Hours of Service Act of 1969 (45 U.S.C. 64a), 1.49(d) of the regulations of the Office of the Secretary, 49 CFR 1.49 (d).

Issued in Washington, D.C., on December 21, 1982.

Joseph W. Walsh,

Chairman, Railroad Safety Board.

BILLING CODE 4910-06-M

[FRA Waiver Petition Docket HS–82–25]

Little Rock and Western Railroad Co.; Petition for Exemption From the Hours of Service Act

In accordance with 49 CFR 211.41 and Section 211.9, notice is hereby given that the Little Rock and Western Railroad Company (LR & W) has petitioned the Federal Railroad Administration (FRA) for an exemption from the Hours of Service Act (83 Stat. 464, Pub. L. 91–169, 45 U.S.C. 64A(e)). That petition requests that the LR & W be granted authority to permit certain employees to continuously remain on duty for in excess of twelve hours.

The Hours of Service Act currently makes it unlawful for a railroad to require or permit specified employees to continuously remain on duty for a period in excess of twelve hours. However, the Hours of Service Act contains a provision that permits a railroad, which employs no more than fifteen employees who are subject to the statute, to seek an exemption from this twelve hour limitation.

The LR & W seeks this exemption so that it can permit certain employees to remain continuously on duty for period not to exceed sixteen hours. The petitioner indicates that granting this exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs no more than fifteen

employees and has demonstrated good cause for granting this exemption.

Interested persons are invited to participate in this proceeding by submitting written views or comments. FRA has not scheduled an opportunity for oral comment since the facts do not appear to warrant it. Communications concerning this proceeding should identify the Docket Number, Docket Number HS–82–25, and must be submitted in triplicate to the Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590.
Communications received before January 31, 1983, will be considered by the FRA before final action is taken. Comments received after that date will be considered as far as practicable. [FRA Waiver Petition Docket HS–82–26]

Ontario Midland Railroad Co.; Petition for Exemption From the Hours of Service Act

In accordance with 49 CFR 211.41 and Section 211.9, notice is hereby given that the Ontario Midland Railroad Company (OMR) has petitioned the Federal Railroad Administration (FRA) for an exemption from the Hours of Service Act (83 Stat. 464, Pub. L. 91–169, 45 U.S.C. 64A(e)). That petition requests that the OMR be granted authority to permit certain employees to continuously remain on duty for in excess of twelve hours.

The Hours of Service Act currently makes it unlawful for a railroad to require or permit specified employees to continuously remain on duty for a period in excess of twelve hours. However, the Hours of Service Act contains a provision that permits a railroad, which employs no more than fifteen employees who are subject to the statute, to seek an exemption from this twelve hour limitation.

The OMR seeks this exemption so that it can permit certain employees to remain continuously on duty for a period not to exceed sixteen hours. The petitioner indicates that granting this exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs no more than fifteen employees and has demonstrated good cause for granting this exemption.

Interested persons are invited to participate in this proceeding by submitting written views or comments. FRA has not scheduled an opportunity for oral comment since the facts do not appear to warrant it. Communications concerning this proceeding should identify the Docket Number, Docket Number HS–82–26, and must be submitted in triplicate to the Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.
Communications received before January 31, 1983 will be considered by the FRA before final action is taken. Comments received after that date will be considered as far as practicable. DEPARTMENT OF THE TREASURY

Customs Service

[T.D. 83–4]

Vessels in Foreign and Domestic Trades; Fee Schedule for Vessel Services

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: General notice.

SUMMARY: The "Customs Procedural Reform and Simplification Act of 1978" repealed several statutes under which

Customs charged and collected fees for specific services provided to vessels by Customs officers. That Act authorized the Secretary of the Treasury to establish a new schedule of fees to return to the Government the approximate costs of the service provided. This document sets forth the revised schedule of fees to be charged and collected for 1983 for the specified services.

EFFECTIVE DATE: January 1, 1983.

FOR FURTHER INFORMATION CONTACT: Jerry Laderberg, Carriers, Drawback and Bonds Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202–566–5706).

SUPPLEMENTARY INFORMATION:

Background

Public Law 95–410, the "Customs Procedural Reform and Simplification Act of 1978," approved October 3, 1978 (the "Act"), repealed sections 2654, 4381, 4382, and 4383 of the Revised Statutes of the United States (19 U.S.C. 58; 46 U.S.C. 329, 330, and 333), the statutory authority under which customs had been charging and collecting fees for specific services provided to vessels by Customs officers.

Because these "Navigation Fees," which are set forth in section 4.98(a), Customs Regulations (19 CFR 4.93(a)), did not cover the costs of providing the services, section 214 of the Act authorized the Secretary of the Treasury to establish a new schedule of fees to be charged and collected for furnishing these services. The fees are to be consistent with 31 U.S.C. 9701, which provides that the costs of specific services for private interests shall be reimbursed to the Government.

By Treasury Decision 80–25, published in the **Federal Register** on January 16, 1980 (45 FR 3570), Customs established a fee schedule to be used for 1980, and amended § 4.98(a), Customs Regulations, to provide that a revised fee schedule will be published in the **Federal Register** and Customs Bulletin in December of each year setting forth a revised schedule of navigation fees for the specified vessel services to be performed during the following year. The revised fee schedule is to reflect changes in the rate of compensation paid to the Customs officer performing the service. The fees are to be calculated in accordance with § 24.17(d), Customs Regulations (19 CFR 24.17(d)), and based upon the amount of time the average service requires of a Customs officer in the fifth step of GS–9.

Fee No. 6 of § 4.98(a)(1) was removed and reserved by T.D. 82–224, published in the **Federal Register** on November 29, 1982 (47 FR 53725).

Because of the recent Federal pay increase, it is necessary for Customs to revise the schedule of fees for 1983 to take into account this increased cost in accordance with § 4.98(a), Customs Regulations. The hourly rate utilized is $15.12, thereby reflecting the change in the rate of compensation paid to a Customs officer in the fifth step of GS–9 performing the service. The fees have been rounded off to the nearest tenth of a dollar.

Action

The following revised schedule of navigation fees shall be effective during 1983:

Fee No. and description of services	Fee
1 Entry of vessel, including American, from foreign port:	
(a) Less than 100 net tons	57.80
(b) 100 net tons and over	15.10
2 Clearance of vessel, including American to foreign port:	
(a) Less than 100 net tons	7.60
(b) 100 net tons and over	15.10
3 Issuing permit to foreign vessel to proceed from district to district, and receiving manifest	15.10
4 Receiving manifest of foreign vessel on arrival from another district, and granting a permit to unlade	15.10
5 Receiving post entry	7.60
6 Reserved	
7 Certifying payment of tonnage tax for foreign vessel only	8.80
8 Furnished copy of official document, including certified outward foreign manifest, and others not elsewhere enumerated	15.10

Authority

R.S. 251, as amended, 96 Stat. 1051, 92 Stat. 888 (19 U.S.C. 66, 31 U.S.C. 9701, Pub. L. 95–410).

Drafting Information

The principal author of this document was Charles D. Ressin, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

George C. Corcoran, Jr.,

Acting Commissioner of Customs.

Approved: December 9, 1982

John M. Walker, Jr.,

Assistant Secretary of the Treasury.

VETERANS ADMINISTRATION

Agency Forms Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

SUMMARY: The Veterans Administration has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document lists new, revised, and extended forms. Each entry contains the following information: (1) The department or staff office issuing the form; (2) The title of the form; (3) The agency form number, if applicable; (4) How often the form must be filled out; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to fill out the form; and (8) An indication of whether section 3504(H) of Pub. L. 96–511 applies.

ADDRESSES: Copies of the proposed forms and supporting documents may be obtained from Patricia Viers, Agency Clearance Officer (004A2), Veterans Administration, 810 Vermont Avenue, NW., Washington DC, 20420 (202) 389–2146. Comments and questions about the items on this list should be directed to the VA's OMB Desk Officer, Andy Usher, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395–7316.

DATES: Comments on the forms should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: December 16, 1982.

By direction of the Administrator.

Dominick Onorato,

Associate Deputy Administrator for Information Resources Management.

Advisory Committee on Former Prisoners of War; Meeting

The Veterans' Administration gives notice under 38 U.S.C. 211 that a meeting of the Advisory Committee on Former Prisoners of War will be held in the Omar N. Bradley Conference Room at the Veterans' Administration Central Office, 810 Vermont Avenue, NW, Washington, DC 20420, February 1 through 3, 1983. The purpose of the Committee is to consult with and advise the Administration of Veterans' Affairs on the administration of benefits under title 38, United States Code, for veterans who are former prisoners of war and on the needs of such veterans with respect to compensation, health care, and rehabilitation.

The sessions will convene at 9 a.m. each day. These sessions will be open to the public up to the seating capacity of the room. Because this capacity is limited, it will be necessary for those wishing to attend to contact Miss Linda Gardner, Administrative Assistant to the Chief Benefits Director, Veterans' Administration Central Office (phone 202/389–2455) prior to January 21, 1983.

Members of the public may direct questions or submit prepared statements for review by the Committee in advance of the meeting, in writing only, to Mr. H. B. Mars, Deputy Director, Compensation and Pension Service, Department of Veterans Benefits, Room 400, Veterans' Administration Central Office. Submitted material must be received at least five days prior to the meeting. Such members of the public may be asked to clarify submitted material prior to consideration by the Committee.

Summary minutes of the meeting and rosters of the Committee members may be obtained from Miss Linda Gardner at the aforementioned address.

Dated: December 10, 1982.

Rosa Maria Fontanez,

Committee Management Officer.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:30 a.m. on Thursday, December 23, 1982, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, and is expected to consider the following matters:

Application for consent to purchase assets and assume liabilities and to establish two branches:

Goldome Bank for Savings, Buffalo, New York, an insured mutual savings bank, for consent to purchase certain assets of and assume the liability to pay certain deposits made in the Dunkirk branch and the Gowanda Branch of The Permanent Savings Bank, Niagara Falls, New York, and to establish those two branches as branches of Goldome Bank for savings.

Application for consent to convert to membership in the Federal Savings and Loan Insurance Corporation:

The Long Island Savings Bank, Syosset, New York, an insured mutual savings bank.

Recommendation regarding the Corporation's assistance agreement with an insured bank pursuant to section 13(e) of the Federal Deposit Insurance Act.

Application for assistance pursuant to section 13(i) of the Federal Deposit Insurance Act and the FDIC's Capital Assistance Plan:

Name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(60, (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii).

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,548–L—Metropolitan Bank & Trust Company, Tampa, Florida

Memorandum and Resolution re: Farmers and Mechanics Savings Bank, Minneapolis, Minnesota

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Requests for information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation at (202) 389–4425.

Dated: December 21, 1982.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 3:00 p.m. on Tuesday, December 21, 1982, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider the application submitted by Heritage Bank-Mayfair, Wauwatosa, Wisconsin, an insured State nonmember bank, for consent to consolidate, under its charter and title, with Jacobus National Bank, Brookfield, Wisconsin, a new national bank, in organization, chartered to acquire the assets of and assume the liability to pay deposits made in Regency National Exchange Bank, Brookfield, Wisconsin, and to establish the sole office of Regency National Exchange Bank as a branch of the resultant bank.

In calling the meeting, the Board determined, on motion of Chairman

William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required its consideration of the matter on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and that the matter could be considered in a closed meeting pursuant to subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Dated: December 22, 1982.

Federal Deposit Insurance Corporation.

Alan J. Kaplan,

Deputy Executive Secretary.

POSTAL SERVICE

Notice of Meeting

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 CFR 7.5) and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice that it intends to hold a meeting at 8:30 a.m. on Thursday, January 6, 1983, in the Benjamin Franklin Room, 11th Floor, Postal Service Headquarters, 475 L'Enfant Plaza, S.W., Washington, D.C. As indicated in the following paragraphs, a portion of the meeting is closed to public observation. The Board expects to discuss the matters stated in the agenda which is set forth below. Requests for information about the meeting should be addressed to the Secretary of the Board, Louis A. Cox, at (202) 245-4632.

At its meetings on December 7 and December 20, 1982, the Board voted to close to public observation two portions of its meeting scheduling for January 6, 1983.

One portion of the meeting to be closed will consist of a discussion of Postal Service strategic planning. The other will consist of a discussion of the recommended decision of the Postal Rate Commission on third-class bulk rates in Docket No. R80-1, which is expected to be used by the Commission by December 23, 1982.

Agenda

1. Minutes of the Previous Meetings.
2. Remarks of the Postmaster General.
   (In keeping with its consistent practice, the Board's agenda provides this opportunities for the Postmaster General to inform the members of miscellaneous current developments concerning the Postal Service. Nothing that requires a decision by the Board is brought up under this item.)
3. Election of Chairman and Vice Chairman.
   (Under the Board's Bylaws, the first regular meeting of each calendar year is designated as the Annual Meeting. The terms of the Chairman and Vice Chairman of the Board expire at the end of the first Annual Meeting following the meeting at which they were elected. Accordingly, the Board will consider the election of a Chairman and Vice Chairman.)
4. Appointment of Committee Members by Chairman.
   (The Bylaws also provide that the terms of the Chairmen and members of the several Committees of the Board expire at the end of this meeting.)
5. Annual Report on Open Meetings Compliance.
   (Mr. Cox will present for approval of the Board the Annual Report to Congress that is required by the Government in the Sunshine Act regarding the Board's compliance with the Act.)
6. Possible Officer Compensation Adjustments.
   (The Board will consider approval of a recommendation by the Postmaster General regarding adjustments in compensation for officers.)
7. Review of Audited Financial Statements.
   (The Board will continue its review of the audited financial statements which were discussed at the December 7, 1982, meeting.)
8. Annual Report of the Postmaster General.
   (The Board will continue its consideration of the Annual Report of the Postmaster General to the Board concerning the operations of the Postal Service, as required by 39 U.S.C. 2402. Upon approval thereof, or after making such changes as it consider appropriate, the Board is to transmit this report to the President and the Congress.)
9. Capital Investment Project—Southern Maryland General Mail Facility.
   (Mr. Biglin, Senior Assistant Postmaster General, Administration Group, will present a proposal for Board approval of a capital investment for a proposed new General Mail Facility for Southern Maryland.)
10. Consideration of January 31/February 1 Meeting Agenda.
11. Discussion of Strategic Planning.
    (As stated above, this portion of the meeting will be closed to public observation.)
12. Discussion of Postal Rate Commission Decision on Third-Class Bulk Rates (Docket No. R80-1).
    (As stated above, this portion of the meeting will be closed to public observation.)

Louis A. Cox,

Secretary.

BILLING CODE 7710-12-M

7

POSTAL SERVICE

Vote to Close Meeting

At its meeting on December 20, 1982, the Board of Governors of the United States Postal Service voted to close to public observation a portion of its meeting scheduled for January 6, 1983. All of the members except Mr. Babcock, who did not attend the meeting, voted in favor of this action. The portion of the meeting to be closed will consist of a discussion of the recommended decision of the Postal Rate Commission on third-class bulk rates in Docket No. R80-1, which is expected to be issued by December 23, 1982.

The Board is of the opinion that public access to this discussion would be likely to disclose information that will become

involved in current and future rate litigation.

Accordingly, the Board of Governors has determined that, pursuant to section 552b(c)(3) of title 5, United States Code, and section 7.3(c) of title 39, Code of Federal Regulations, this portion of the meeting is exempt from the open meeting requirement of the Government in the Sunshine Act (5 U.S.C. 552b(b)), because it is likely to disclose information in connection with proceedings under chapter 36 of title 39 (having to do with postal ratemaking, mail classification, and changes in postal services), which is specifically exempted from disclosure by section 410(c)(4) of title 39, United States Code. The Board determined further that, pursuant to section 552b(c)(10) of title 5 and section 7.3(j) of title 39, Code of Federal Regulations, the discussion is exempt because it is likely to specifically concern the participation of the Postal Service in a civil action or proceeding or the litigation of a particular case involving a determination on the record after opportunity for a hearing. The Board further determined that the public interest does not require the Board's discussion of this matter to be open to the Public.

In accordance with section 552b(f)(1) of title 5, United States Code, and section 7.6(a) of title 39, Code of Federal Regulations, the General Counsel of the United States Postal Service has certified that in his opinion the portion of the meeting to be closed may properly be closed to public observation, pursuant to sections 552b(c) (3) and (10) of title 5 and section 410(c)(4) of title 39, United States Code, and sections 7.3(c) and (j) of title 39, Code of Federal Regulations.

Louis A. Cox,

Secretary

[S-1880-82 Filed 12-22-82; 2:28 pm]

BILLING CODE 7710-12-M

Federal Register

Monday
December 27, 1982

Part II

Department of Labor

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Government Contract Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

Group 6	12.40	1.90

LABORERS CLASSIFICATIONS (Site Preparation, Excavation, & Incidental Paving):
CLASS 1: Unskilled; Bituminous Batcherman (stationary plant); Blacksmith Tenders; Cement Coverman Batch Truck; Cement Handler - Bulk, Bag; Carpenter Tender; Concrete Batcherman; Concrete Handler, Caisson, Footings, Columns, Piling, Slabs, etc.; Concrete Shoveler, Tamper & Puddler (paving); Concrete Longitudinal Finisher Man (manual bullfloat on paving); Damp Proofer below grade; Drill Runner Tender; Dumpman (dozer, paver, dumping batchtrucks, etc.); Hydrant & Valve Setter; Joint Filler (concrete pavement); Kettleman (bituminous or lead); Labor Wrecking Demolition; Landscape Gardener, sod, etc.; Pipe Derrickman (tripod, manual); Pipe Handler; Power Buggy Operator; Powder Monkey; Reinforced Steel Laborer; Reinforced Steel Setter (paving); Service Connection Maker (water, gas); Squeegeeman; Stabilizing Batcherman (stationary plant); Temporary Heater & Blower Tender; Tool Crib Checker; Top Man (sewer, water or gas trench); Winch Handler (manual)
CLASS 2: Bituminous Worker - Shoveler, Raker, Floater, Squeegee, Utility; Brick Tender; Compaction Equipment (hand operated); Conduit Layer; Curb Setter; Mortar Mixer; Sand Cushion Bedmaker; Torchman - gas, electric, thermal or similar device
CLASS 3: Chain Saw; Concrete Drilling; Concrete Mixer Operator; Concrete Saver; Concrete Vibrator; Ditch & other work more than 8 ft. below starting level of manual work; Formsetter; Joint Sawer, Mortar; Pneumatic Tools, Jackhammer, Paving Buster, Chipping Hammer, etc.; Stone Tender; & Mason Tender
CLASS 4: Bottom Man (sewer, water or gas trench) (more than 8 ft. below starting level of manual work); Brick or Block Paving Setter; Caisson Work; Coffordam Work; Tunnel Laborer; Underground Laborer; & Underpinning
CLASS 5: Cement Gun Operator (1½" or over); Driller - Air Track or similar; Nozzleman (gunite, sandblasting, cement); & Pipelayer, Laser Beam (sewer, water, gas)
CLASS 6: Blaster Powder Man (dynamite or substitute products); Tunnel Miner (atmospheric); & Tunnel Miner Tender

POWER EQUIPMENT OPERATORS CLASSIFICATIONS (Building Construction):
CLASS 1 - Helicopter Operator; Truck & Crawler Cranes with 300' of Boom and over, including jib; Tower Crane 300' & over
CLASS 2 - Truck & Crawler Crane w/200' of Boom, up to and not including 300' of Boom, including jib; Tower Crane 250' & over
CLASS 3 - Truck & Crawler Cranes with 150' of Boom, up to and not including 200' of Boom, including jib; Tower Crane 200' & over
CLASS 4 - Traveling Tower Crane; Master Mechanic; Pile Driving Operator; Tower Crane 150' & over
CLASS 5 - Truck & Crawler Cranes up to & not including 150' of Boom, including jib; Derrick (Guy & Stiffleg); Hoist Engineer (3 drums or more); Locomotive Operator; Overhead Crane Operator (Inside Building Perimeter); Tower Cranes - Stationary 100' & over; Tractor Operator with Boom; All Terrain Vehicle Cranes; Fireman, Chief License.
CLASS 6 - Air Compressor Operator, 450 CFM or over, Pump Operator and/or Conveyor Operator (2 or more machines); Hoist Engineer (2 drum); Mechanic or Welder; Pumperete or Complaco-type Machine Operator; Forklift; Boom Truck Operator; Concrete Mixer Op.; Drill Rigs - Heavy Rotary or Churn when used for caisson drilling for Elevator Cylinder or Building Construction; Front End Loader Operator; Hoist Engineer (one drum); Straddle Carrier Operator; Power Plant Engineer (100 KW and over on multiples equal to 100 KW and over); Tractor Operator over D2; Well Point Pump Operator

POWER EQUIPMENT OPERATORS CLASSIFICATIONS (Building Construction) CONT'D:

CLASS 7 - Concrete Batch Plant Operator; Fireman, First Class License; Gunite Operator; Tractor Operator D-2 or similar size; Front End Loader Operator, up to 1 cu. yd.
CLASS 8 - Air Compressor Operator, 450 CFM or over, Pump and/or Conveyor Operator; Fireman, Temporary Heat; Brakeman; Pick-up Sweeper (1 cu. yd. and over hopper capacity); Truck Crane Oiler; Welding Machine Operator
CLASS 9 - Mechanical Space Heater (temporary heat); Oiler or Greaser; Elevator Operator

POWER EQUIPMENT OPERATORS CLASSIFICATIONS (Site Preparation, Excavation, & Incidental Paving):

CLASS 1: Helicopter Pilot; Crane with over 155' Boom, excluding jib; Dragline and/or other similar equipment with Shovel-type controls 3 cu. yds. & over Mfg. rated cap.; Pile Driving when 3 Drums are in use
CLASS 2: Cableway; Concrete Mixer, Stationary Plant over 34E; Derrick (Guy or Stiffleg) (Power) (Skids or stationary); Dragline and/or similar equipment with Shovel-type controls, up to 3 cu. yds. Mfg. rated cap.; Dredge or Engineers, Dredge (power) & Engineer; Front End Loader, 5 cu. yds. & over; Grader or Motor Patrol, Finishing Earthwork & Bituminous; Locomotive Crane; Master Mechanic; Mixer (Paving) Concrete Paving, Road; Mole, inclu. Power Supply; Mucking Machine, inclu. Mucking Operations, Conway or similar type; Piledriving; Refrigeration Plant Engineer; Tandem Scraper; Tractor - Boom type; Truck Crane - Crawler Crane; & Tugboat - 100 HP & over
CLASS 3: Dual Tractor; Elevating Grader; Pumpcrete; Scraper - Struck Cap. 32 cu. yds. & over; Self-propelled Traveling Soil Stabilizer
CLASS 4: Air Track Rock Drill; Asphalt Bituminous Stabilizer Plant; Automatic Road Machine (CMI or similar); Backfiller; Batch Plant (Concrete); Bituminous Spreader & Finishing (Power); Boom Truck (Power operated Boom); Cat Tractors with Rock Wagons or similar types; Chip Harvester & Tree Cutter over 150 HP; Concrete Mixer on jobsite over 14S; Concrete Mobile; Crushing Plant (gravel & stone) or Gravel Washing, Crushing & Screening Plant; Curb Machine; Dope Machine (Pipeline); Drill Rigs, Heavy Rotary or Churn or Cable Drill; Fork Lift or Straddle Carrier; Fork Lift or Lumber Stacker; Front End Loader, over 1 cu. yd.; Hoist Engineer (power); Launcherman (Tankerman or Pilot License); Lead Greaser; Locomotive; Mechanic or Welder; Multiple Machines, such as Air Compressors, Welding Machines, Generators, Pumps; Paving Breaker or Tamping Machine (Power Driven) Mighty Mite or similar type; Paving Milling Machine; Pickup Sweeper, 1 cu. yd. & over Hopper cap.; Pipeline Wrapping, Cleaning or Bending Machine; Power Plant Engineer, 100 K.W.H. & over; Power Actuated Horizontal Boring Machine, over 6"; Pugmill; Roller, 8 tons & over; Rubber-tired Farm Tractor, Backhoe Attach.; Sheep Foot Rollers; Slip Form (Power Driven) (paving); Tie Tamper & Ballast Machine; Tractor, over D2, TD6 or similar HP with Power Take-off; Tractor, over 50 HP without Power Take-off; Trenching Machine (sewer, water, gas); Turnapull (or similar type); Well Point Installation, Dismantling or Repair Mechanic; Hydraulic Tree Planter
CLASS 5: Air Compressor, 450 CFM or over; Bituminous Spreader & Bituminous Finishing Machine (Tender) (Power); Concrete Distributor & Spreader Finishing Machine; Longitudinal Float, Joint Machine, & Spray; Concrete Mixer on jobsite 14S & under; Concrete Saw (multiple blade) (power operated); Form Trench Digger (power); Front End Loader, up to & inclu. 1 cu. yd.; Grader (motor patrol); Gunite Gunall; Hydraulic Log Splitter; Loader (Barber Greene or similar type); Payhauler or similar type; Power Actuated Augers & Boring Machine; Power Actuated Jacks; Pump; Roller; Self-propelled Chip Spreader (Flaherty or similar); Shouldering Machine (Power) Apsco or similar type inclu. self-propelled Sand & Chip Spreader; Stump Chipper; Tractor, D2, TD6 or similar HP without power take-off; & Tree Farmer
CLASS 6: Conveyor; Dredge Deck Hand; Fireman or Tank Car Heater; Gravel Screening Plant (portable not crushing or washing); Greaser (Truck or Tractor); Leverman; Mechanic Tender; Mechanic, Space Heater (Temporary Heat); Oiler (Power Shovel, Crane, Dragline); Self-Propelled Vibrating Packer (Pad type) (35 HP & over); Tractor, 50 HP or less w/o Power take-off; & Truck Crane Oiler

TRUCK DRIVERS CLASSIFICATIONS (Site Preparation, Excavation, & Incidental Paving):

GROUP 1: Truck Driver (Operation of Hand & Power Operated winches); Truck Trains; Mechanic-Welder; Tractor Trailer; & Off Road
GROUP 2: Tri Axle (Inclu. 4 Axles)
GROUP 3: Bituminous Distributor; & Tandem Axle
GROUP 4: Bituminous Distributor Spray Operator (Rear End Oiler); Dumpman; Tank Truck Tender (gas, oil, road oil & water); Teamster & Stableman; Tractor Operator (Wheel type used for any purpose); Pilot Car; Self-propelled Packer; Slurry Operator; Single Axle; Dump; Dry Batch Haulers; Boom & "A" Frame; & Ready-Mix Concrete

FOOTNOTES:
a. One Paid Holiday: Labor Day
b. 2 Weeks' Paid Vacation

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a) (1) (ii)).

SUPERSEDEAS DECISION

STATE: Missouri
DECISION NUMBER: MO82-4066
Supersedes Decision No. MO81-4061 dated July 24, 1981, in 46 FR 38273
DESCRIPTION OF WORK: Building Projects (excluding single family homes and apartments up to and including 4 stories)

COUNTIES: Boone, Cooper, and Howard
DATE: Date of Publication

	Basic Hourly Rates	Fringe Benefits
ASBESTOS WORKERS	$16.49	$2.60
BOILERMAKERS	16.12	2.825

b. After 1 year a weeks vacation, also 7 Paid Holidays

AREA DESCRIPTIONS

ELECTRICIANS:
Area 1: Boone and Howard Counties
Area 2: Cooper County

ELEVATOR CONSTRUCTORS:
Area 1: Cooper and Howard Counties
Area 2: Boone County

GLAZIERS:
Area 1: Cooper and Howard Counties

PAINTERS:
Area 1: Boone and Howard Counties
Area 2: Cooper County

SHEET METAL WORKERS:
Area 1: Boone and Cooper Counties
Area 2: Howard County

LABORERS CLASSIFICATIONS

Group 1: General Laborer; Heaters; Material Plant Man; Carpenter Tender; Landscaper; Signalman; Wrecker (old/new structures); Form Handler; Post Hole Diggers; Cleaning and clearing of all debris for all crafts; Loading and unloading, conveying, distributing, collecting and hoisting of construction material and debris; Backfilling, Grading and Landscaping; Covering of tanks, structures and material piles with Tarpaulins or other materials; Handling and cleaning of Concrete Chutes; Cleaning of Concrete Spills and Chipping where hand tools are required; Cleaning of masonry and other type walls and windows; Signal and Hoisting Concrete Buckets; Rodman; All tools run by gas, electricity, or air except Vibrator, Jackhammer and Paving Breaker; Air Compressors; Motor Buggies; Pumps, except Set-up Men and Nozzle Men; Unloading and handling steel; Chipping Tool Operator; Concrete Mixer Operator

Group 2: First Semi-skill - Brickmason, Plasterer and Cement Finishers' Tenders; Mortarmen; Scaffold Builders for brick; Plasterer and Cement Masons; Forklift (walk-behind or other similar types)

LABORERS CLASSIFICATIONS (Cont'd)

Group 3: Second Semi-skill - Concrete Pumps Set-up Men and Nozzle Men; Tile Layers, Bottom Men, Sewers and Drains; Cutting Torch; Burning Bar; Trench or Pier Holes 12' or over; Wagon Drill; Air Track or any mechanical Drill; Powder Man; Tamper, 100 lbs. or over; Paving Breaker; Jackhammer and Vibrator; Laser Beam Man for Sewer; Grade Checker for roads and railroads

POWER EQUIPMENT OPERATORS CLASSIFICATIONS
Cooper and Howard Counties

Group 1: Asphalt Paver and Spreader; Asphalt Plant Mixer Operator; Asphalt Plant Operator; Back Fillers; Backhoe; Barber-Greene Loader; Blade, power; Boats, power; Boilers (2); Boring Machines; Cableways; Cherry Pickers; Chip Spreader; Concrete Ready-mix Plant, portable (job site); Concrete Mixer Paver; Crane, Overhead; Crusher, rock; Derricks and Derricks Cars (power operated); Ditching Machines; Dozers; Dredges, any type power; Grade-all, similar type; Hoist; Endless Chain, power operated with power travel; Loaders; Mechanic and Welder; Mucking Machine; Orange Peels; Pumps, material; Push Cats; Scoops; Self-propelled Rotary Drill; Shovel, power; Side Boom; Skimmer Scoop; Testhole Machine; Throttle Man

Group 2: Boilers (1); Brooms, power operated; Chip Spreader (Front Man; Clef Plane Operator; Compressors (1) 125' or over; Concrete Saws, self-propelled; Crab, power operated; Curb Finishing Machine; Fireman on Rigs; Flex Plane; Floating Machine; Form Grader; Greaser; Hoist, Endless Chain, power operated; Hopper, power operated; Hydra Hammer; Lad-a-vator, similar type; Rollers; Siphons, Jets, and Jennies, Sub-grader; Tractors over 50 H.P.; Compressors (2) 125' or over not more than 20' apart, Compressors, Tandem; Compressors, single, truck mounted; Elevator; Finishing Machine

Group 3:
(a) Oilers
(b) Fork Lift, masonry
(c) Oiler Driver
(d) A-frame Trucks; Fork Lift, all types (except masonry); Mixers (with Side Loaders); Pumps (with Well Points) Dewatering Systems, Test or Pressure Pumps; Tractors (except when hauling material) less than 50 H.P.

Group 4: Clamshells, 80 feet of boom or over (including jib); Crane or Rigs, 80 feet of boom or over (including jib); Draglines, 80 feet of boom or over (including jib); Pile Drivers, 80 feet of boom or over (including jib)

Group 5: Hoists, each additional drum over 1 drum

Group 6: Crane or Rigs over 200 feet of b[illegible]

POWER EQUIPMENT OPERATORS CLASSIFICATIONS (Cont'd)
Cooper and Howard Counties (Cont'd)

Group 7: Ready Mixed Concrete Plants:
(a) Crane Operator
(b) Loader Operator and Plant Man
(c) Conveyor Operator

Group 8: Master Mechanic

Group 9: Crane, Tower or Climbing

Boone County

Group 1: Backhoe, Cableway; Crane, Crawler or Truck; Crane, Hydraulic Truck or Cruiser mounted 16 tons and over; Crane, Locomotive, Derrick, Steam; Derrick Car and Derrick Boat; Dragline; Dredge; Gradall, Crawler or tire mounted; Locomotive, gas, steam and other power; Piledriver, Land or Floating; Scoop Skimmer; Shovel, power (steam, gas, electric or other powers); Switch Boats; Whirley

Group 2: Air Tugger, with Air Compressor; Anchor Placing Barge; Asphalt Spreader; Atley Force Feeder Loader (self-propelled); Backfilling Machine; Boat Operator; Push Boat or Tow Boat (job site); Boiler, high pressure breaking in period; Boom Truck, placing or erecting; Boring Machine; Footing Foundation; Bullfloat; Cherry Picker; Combination Concrete Hoist and Mixer such as Mixer-mobile; Compressor (when operator runs throttle); Compressors, two not more than 50' apart; Compressor Generator Combination; Compressor Pump Combination; Compressor Welder Combination; Concrete Breaker (truck or tractor mounted); Concrete Pump, such as Pumpcrete Machine; Concrete Spreader; Conveyor, large (not self-propelled) Hoisting or moving brick and concrete into, or into and on floor level, one or both; Crane, Hydraulic Rough Terrain, self-propelled; Crane; Hydraulic Truck or Cruiser mounted under 16 tons; Drilling Machines, self-powered, used for earth or rock drilling or boring (Wagon Drills and any Hand Drills obtaining power from other sources including Concrete Breakers, Jackhammers and Barco Equipment no engineer required); Elevating Grader, Engine Man, Dredge; Excavator or Powerbelt Machine; Finishing Machine, self-propelled Oscillating Screed; Fork Lift; Grader, road with power blade; Highlift; Hoist, concrete and brick (Brick Cages or Concrete Skips operating in or on tower, Towermobile, or similar equipment; Hoist, Stack; Hydro-hammer; Lad-a-vator, hoisting brick or concrete; Loading Machine (such as Barber-Greene); Mechanic, on job site; Mixer, paving; Mixer-mobile; Mucking Machine; Pipe Wrapping Machine; Plant, asphalt; Plant, concrete producing or Ready-mix job site; Plant, heating job site; Plant, mixing job site; Plant, power generating job site; Pumps, two self-power over 2" through 6"; Pumps, electric submersible, one through three, over 4"; Quad-Track; Roller, Asphalt, Top or Subgrader; Scoop, tractor drawn; Spreader Box; Subgrader; Tie Tamper; Tractor, Crawler, or wheel type with or without power unit, power take offs and attachments regardless of size; Trenching Machine, Tunnel Boring Machine, Vibrating Machine, automatic, propelled; Welding Machines (gasoline or diesel) more than one but not over four (regardless of size); Well Drilling Machine

POWER EQUIPMENT OPERATORS (Cont'd)
Boone County (Cont'd)

Group 3: Air Tugger with plant air; Boiler for power or heating shell of buildings or temporary enclosures in connection with construction work; Boiler, temporary; Compressor, air one; Compressor, air (mounted on truck); Concrete Saw (self-propelled); Conveyor, large (not self-propelled); Conveyor, large (not self-propelled moving brick and concrete distributing) on floor level; Curb Finishing Machine, Ditch Paving Machine; Elevator (building construction or alteration); Endless Chain Hoist; Fireman; Form Grader; Generator, one over 30 KW or any number developing over 30 KW; Greaser; Hoist, one drum regardless of size (except brick or concrete); Lad-a-vator; Manlift; Mixer, Asphalt, over 8 cubic feet capacity; Mixer, if two or more mixers of one bag capacity or less are used by one Employer on job, an Operator is required; Mixer, without Side Loader, 2 bag capacity or more; Mixers, with Side Loader, 2 bag capacity of more; Mixer, with Side Loader, regardless of size, not Paver; Oiler on Dredge; Oiler on Truck Crane; Pug Mill Operator; Pump, Sump-self powered, automatic controlled over 2" during use in connection with construction work; Scissor Lift (used for hoisting); Sweeper, street; Tractor small wheel type 50 HP and under with Grade-blade and similar equipment; Welding Machine, one over 400 amp.; Winch operating from Truck; Mechanic in shop

Group 4: Boat Operator Outboard Motor (job site); Conveyors, (such as Con-vay-it) regardless of how used; Oiler; Sweeper, floor

Group 5:
(a) Air-pressure; Oiler Engineer operating under 10 lbs.
(b) Air-pressure; Oiler Engineer operating over 10 lbs.
(c) Air-pressure Engineer operating under 10 lbs.
(d) Air-pressure Oiler Engineer operating over 10 lbs.
(e) Crane, climbing (such as Linden); Crane, Pile driving and Extracting; Crane, using Rock Socket Tool; Derrick, diesel, gas or electric, hoisting material erecting steel (150' or more above ground); Dragline, 7 cu. yds. and over; Hoist, three or more drums in use; Scoop, Tandem; Shovel, power, 7 cu. yds. and over; Tractor, Tandem Crawler Tunnel Man assigned to work in tunnel or tunnel shaft; Wrecking, when machine is working on second or higher; Crane, Booms (including jib) 100 feet to 150 feet
(f) Crane, Boom (including jib) 150 feet to 200 feet
(g) Crane, Boom (including jib) 200 feet to 250 feet
(h) Crane, Boom (including jib) 250 feet to 300 feet

TRUCK DRIVERS
Boone County

Group 1: Warehouseman; Dump Truck; Flat Bed; Pick-up; Farm Tractor; Single-axle Water Truck; Fuel Truck, single axle

Group 2: Tandem; Tractor-trailer; Winch Truck; Forklift; Tandem Water Truck; Tandem Fuel Truck

Group 3: Pitman; Hydro Boom Truck; Tandem-slip bed operation; Transit Mixer; Euclid; Belly Dump; Cat Wagon; Mechanic; Oil Distributor; Water Pull; Ross Carrier; Dumpster; Halftruck

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a)(1)(ii))

LABORERS CLASSIFICATIONS

Group 1: General Laborer; Heaters; Material Plant Man; Carpenter Tender; Landscaper; Signalman; Wrecker (old/new structures); Form Handler; Post Hole Digger; Cleaning and Clearing of all debris for all crafts; Loading and unloading, conveying, distributing, collecting and hoisting of construction material and debris; Backfilling, Grading and Landscaping; Covering of tanks, structures and material piles with Tarpaulins or other materials; Handling and cleaning of concrete chutes; Cleaning of concrete spills and chipping where hand tools are required; Cleaning of masonry and other type walls and windows; Signal and Hoisting Concrete Buckets; Rodman; All tools run by gas, electricity, or air except Vibrator, Jackhammer and Paving Breaker; Air Compressors; Motor Buggies; Pumps, except Set-up Men and Nozzle Men; Unloading and handling steel; Chipping Tool Operator; Concrete Mixer Operator

Group 2: First Semi-Skill - Brick Mason, Plasterer and Cement Finishers Tenders; Mortarmen; Scaffold Builders for Brick, Plasterer and Cement Masons; Forklifts (walk-behind or other similar types)

Group 3: Second Semi-Skiller - Concrete Pumps Set-up Men and Nozzle Men; Tile Layers, Bottom Men, Sewers and Drains; Cutting Torch; Burning Bar; Trench or Pier Holes 12' or over; Wagon Drill; Air Track or any Mechanical Drill; Power Man; Tamper 100 lbs. or over; Paving Breaker; Jackhammer and Vibrator; Laser Beam Man for Sewer; Grade checker

POWER EQUIPMENT OPERATORS CLASSIFICATIONS

Group 1: Backhoe, Cableway; Crane, Crawler or Truck; Crane, Hydraulic Truck or Cruiser mounted 16 tons and over; Crane, Locomotive, Derrick, Steam; Derrick Car and Derrick Boat; Dragline; Dredge; Gradall; Crawler or tire mounted; Locomotive, gas, steam and other powers; Piledriver, land or floating; Scoop, Skimmer; Shovel, power (steam, gas, electric or other powers); Switch Boat; Whirley

POWER EQUIPMENT OPERATORS: (Cont'd)

Group 2: Air Tugger with Air Compressor; Anchor placing Barge; Asphalt Spreader; Athey Force Feeder Loader (self-propelled); Backfilling Machine; Boat Operator Push Boat or Tow Boat (job site); Boiler, High Pressure Breaking in period; Boom Truck, placing or erecting; Boring Machine, Footing Foundation; Bullfloat; Cherry Picker; Combination Concrete Hoist and Mixer such as Mixermobile; Compressor (when operator runs throttle); Compressors, two not more than 50' apart; Compressor, Generator Combination; Compressor Pump Combination; Compressor Welder Combination; Concrete Breaker (truck or tractor mounted); Concrete Pump, such as Pumpcrete Machine; Concrete Spreader; Conveyor, large (not self-propelled) Hoisting or moving brick and concrete into, or into and on floor level, one or both; Crane, Hydraulic Rough Terrain, self-propelled; Crane, Hydraulic Truck or Cruiser mounted under 16 tons; Drilling Machines, self-powered, used for earth or rock drilling or Boring (Wagon Drills and any Hand-drills obtaining power from other sources including Concrete Breakers, Jackhammers and Barco equipment on engineer required); Elevating Grader, Engine Man, Dredge; Excavator or Powerbelt Machine; Finishing Machine, self-propelled Oscillating Screed; Fork Lift; Grader Road with power blade; Highlift; Hoist, concrete and brick (Brick Cages or Concrete Skips operating in or on Tower, Tower-mobile, or similar equipment); Hoist, stack; Hydrohammer; Lad-a-vator, hoisting brick or concrete; Loading Machine (such as Barber-Greene); Mechanic, on job site; Mixer, paving; Mixer-mobile; Mucking Machine; Pipe Wrapping Machine; Plant, asphalt; Plant Concrete producing or Ready-mix job site; Plant, Mixing job site; Plant, power, generating job site; Pumps, two self-power over 2" through 6"; Pumps, electric submersible, one through three, over 4" Quad-Track; Roller, Asphalt, Top or Subgrade; Scoop, tractor drawn; Spreader Box; Subgrader; Tie Tamper; Tractor-Crawler, or wheel type with or without power unit, power Take Off, and attachments regardless of size; Trenching Machine, Tunnel Boring Machine; Vibrating Machine, Automatic propelled; Welding Machines (gasoline or diesel) more than one but not over four (regardless of size); Well Drilling Machines; plant heating job site.

Group 3: Air Tugger with plant air; Boiler, for power or heating shell of buildings or temporary enclosures in connection with construction work; Boiler, temporary; Compressor, air one; Compressor, air (mounted on truck); Concrete Saw, (self-propelled); Conveyor, large (not self-propelled); Conveyor, large (not self-propelled) moving brick and concrete (distributing) on floor level; Curb Finishing Machine, Ditch Paving Machine; Elevator (building construction or alteration); Endless Chain Hoist; Fireman; Form Grader; Generator, one over 30 KW or any number developing over 30 KW; Greaser; Hoist, one drum regardless of size (except brick or concrete); Lad-a-vator; Manlift; Mixer, aspahlt, over 8 cu. ft. capacity; Mixer, if two or more of one bag capacity or less are used by one Employer on job, an Operator is required; Mixer, without Side Loader 2 bag capacity or more; Mixers, with Side Loader, 2 bag capacity or more; Mixers, with Side Loader, regardless of size, not Paver; Oiler on Dredge; Oiler on Truck Crane; Pug Mill Operator; Pump; Pump-self powered, automatic controlled over 2" during use in connection with construction work; Scissor Lift (used for hoisting); Sweeper, street; Tractor small wheel type 50 HP and under with Grader Blade and similar equipment; Welding Machine, one over 400 amp.; Winch Operating from truck; Mechanic in shop

POWER EQUIPMENT OPERATORS (Cont'd)

Group 4: Boat Operator Outboard Motor (job site); Conveyors (such as Con-Vay-it) regardless of how used; Oiler; Sweeper, floor

Group 5:
(a) Air-pressure; Oiler Engineer operating under 10 lbs.
(b) Air-pressure; Oiler Engineer operating over 10 lbs.
(c) Air-pressure Engineer operating under 10 lbs.
(d) Air-pressure Oiler Engineer operating over 10 lbs.
(e) Crane, Climbing (such as Linden); Crane, Pile Driving and extracting; Crane, using Rock Socket Tool; Derrick; Diesel, gas or electric, hositing material erecting steel (150' or more above ground); Dragline, 7 cu. yds. and over; Hoist, 3 or more drums in use; Scoop, Tandem; Shovel, power 7 cu. yds. and over; Tractor, Tandem, Crawler, Tunnel Man assigned to work in tunnel or tunnel shaft; Wrecking, when machine is working on second or higher; Crane - Booms (including jib) 100 ft. to 150 ft.
(f) Crane, Boom (including jib) 150 ft. to 200 ft.
(g) Crane, Boom (including jib) 200 ft. to 250 ft.
(h) Crane, Boom (including jib) 250 ft. to 300 ft

TRUCK DRIVERS CLASSIFICATIONS

Group 1: Warehousemen; Dumper; Flat Bed and Pick-up; Farm Tractor; Water Truck, single-axle; Fuel Truck, single axle

Group 2: Tandem; Tractor Trailer; Winch; Fork Lift; Tandem Water Truck; Tandem Fuel Truck

Group 3: Tandem-slip-bed operation Pitman; Hydro Broom Truck; Transit Mixer; Euclid, Belly Dump; Cat Wagon; Oil Distributor; Ross Carrier; Dumpster; Half Track; Water Pull; Mechanic

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a)(1)(ii))

Part III

Environmental Protection Agency

Enforcement of the Federal Insecticide, Fungicide and Rodenticide Act; Conditional Registration and Compensation for Use of Data; Proposed Regulations

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 162

[OPP-30067; FRL 2225-3a; PH-FRL 2225-3a]

Regulations for the Enforcement of the Federal Insecticide, Fungicide and Rodenticide Act; Conditional Registration

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This proposed regulation would govern the conditional registration of pesticide products which are identical or substantially similar to those currently registered, and the conditional registration of new uses of existing pesticides, by the Environmental Protection Agency (EPA or Agency). This proposed rule sets forth the applicable definitions, the data requirements for obtaining conditional registration, the conditions under which such applications would be approved or denied, and the mechanism for cancellation of conditional registrations. The Agency also proposes revisions to 40 CFR 162.7 and 162.8 of its regulations as they existed prior to 1978. These regulations are proposed for comment at this time because a United States Court of Appeals has ruled that the promulgation of these regulations as interim final regulations on May 11, 1979, was invalid because of the Agency's failure to fully comply with the procedural requirements of the Administrative Procedure Act.

DATE: Written comments must be submitted by February 25, 1983.

ADDRESSES: Submit written comments to: Document Control Officer (TS-793), Office of Pesticides and Toxic Substances, Rm. E-409, 401 M St., SW., Washington, D.C. 20460. Comments should bear the identifying notation OPP-30067.

FOR FURTHER INFORMATION CONTACT: Jean M. Frane, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 1114, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22201, (703-557-0592).

SUPPLEMENTARY INFORMATION: This regulation proposes to implement sections 3(c)(7)(A) and 3(c)(7)(B) of the Federal Insecticide, Fungicide, and Rodenticide Act ("FIFRA"or "the Act"), 7 U.S.C. 136 et seq., as amended by the Federal Pesticide Act of 1978 (Pub. L. 95-396, 92 Stat. 819), as well as related provisions of FIFRA sections 3(c)(5) and 6(e). Final regulations(40 CFR Part 162) for the registration, reregistration, and classification of pecticides were issued in the **Federal Register** of July 3, 1975 (40 FR 28242). This regulaton would amend Part 162 by adding new sections designated §§ 162.160, 162.163, 162.165, 162,167, and 162.177 and by revising §§ 162.7 and 162.8. Regulations proposed under FIFRA section 3(c)(1)(D)(ii) appear elsewhere in this issue of the **Federal Register**.

This regulation was originally issued as §§ 162.18-1 through 162.18-5 of Subpart A of Part 162. In issuing this proposal, the Agency is grouping and redesignating these sections as Subpart E of Part 162. The following table correlates the new section numbers with the original sections.

Old section	New section
162.18-1	162.160
162.18-2	162.163
162.18-3	162.165
162.18-4	162.167
162.18-5	162.177

Hereafter, this proposal will reference only the new sections.

I. Development of Conditional Registration

On May 11, 1979, EPA promulgated this conditional registration regulation as an interim final rule which was made immediately effective. The Administrator had determined that there were compelling public interest reasons for this regulation to be published as an interim final regulation in 1979. Because the conditional registration regulation permitted the Agency to eliminate an existing double standard for registration and to resume a full registration program, the Administrator believed that the public interest was best served by making the regulation effective upon publication.

Even though this regulation was not published as a proposed rule, the Agency did provide considerable opportunity for public comment prior to issuing it as an interim final regulation. An Advance Notice of Interim Final Rulemaking, published in the **Federal Register** on July 25, 1978 (43 FR 32154), invited comments from interested persons on the general aspects of conditional registration, compensation, efficacy data waiver, and other issues associated with the 1978 amendments to FIFRA, then pending before Congress. A working draft of the regulation was circulated (October 6, 1978) to over 2500 interested industry, environmental and consumer groups State and local agencies, agricultural organizations and individuals. Specific comments on the issues involved were solicited. A three-day public meeting was held in Washington, D.C., on November 6-8, 1978, to receive comments on the major issues identified in the draft regulation.

As a result of the several opportunities accorded to interested persons for commenting on this regulation prior to May of 1979, a number of valuable comments were received and considered in developing the regulation. The major comments received during that period are addressed in portions of this document.

After promulgation of this regulation, Mobay Chemical Company filed challenges to the regulations on substantive and procedural grounds. The *Mobay* case, which was brough in the United States District Court for the Western District of Pennsylvania, resulted in an evidentiary trial and a decision by the district court that the conditional registration regulation was a valid implementation of the 1978 amendments to FIFRA permitting conditional registration and that the Agency had properly invoked the "good cause" exception of the Administrative Procedure Act to justify making this regulation immediately effective when it was first published in May of 1979. *Mobay Chemical Company* v. *Gorsuch*, 517 F. Supp. 254 (W.D. Pa. 1981). On appeal, the Court of Appeals for the Third Circuit held that the regulation was promulgated in violation of the notice-and-comment and effective date requirements of the Administrative Procedure Act. *Mobay* v. *Gorsuch*, C.A. No. 81-2190 (Third Circuit, June 22, 1982). In so ruling, the court of appeals did not address or decide the issue of whether the conditional registration regulation is a reasonable interpretation of FIFRA. The court also delayed for a period of six months the issuance of its mandate which would invalidate the regulation.

As a result of these developments, EPA is faced with determining what regulation should now be proposed to implement the conditional registration under FIFRA sections 3(c)(7)(A) and 3)(c)(7)(B). During the period between May of 1979 and the present, the Agency has amassed considerable experience working with the regulation proposed here and has preceived no significant problems in registering large numbers of pesticide products under the 1979 regulation. If fact, the only substantive objection to this regulation of which EPA is aware is the objection pressed by Mobay in its lawsuit. Mobay charged that this regulations abridges its rights under sections 3(c)(3) and 3(c)(5) of FIFRA to have an application for a

pesticide product fully reviewed to determine "as expeditiously as possible" whether the supporting data demonstrate that it does not cause unreasonable adverse effects on the environment. Apparently Mobay felt that a conditional registration under this regulation (i.e., under FIFRA section 3(c)(7)) is somehow less valuable to them than a registration granted under FIFRA section 3(c)(5). In fact, however, there are no differences between the two types of registration in the marketplace. Indeed, nothing in the labeling of the pesticide product indicates what type of registration a product has. The district court in *Mobay* described Mobay's objections and evaluated them by stating.

> Mobay apparently views conditional registration as tenuous privileges, having less permanence than an unconditional registration. It fears that it will forever be required to supply EPA with additional data, upon pain of cancellation for non-compliance with a condition. But this ignores the existence of section 3(c)(2)(B), which subjects even unconditional registrants to requests for additional data.

Indeed, EPA's experience has borne out that data requirements imposed upon pesticide registrants are virtually always imposed on a generic or active-ingredient basis and fall alike on conditional and unconditional registrants.

In light of the absence of persuasive reasons to alter EPA's basic approach of granting conditional registrations so that it can fully evalute pesticide products by an orderly priority rather than in the order in which applications are presented, EPA has decided to propose this conditional registration regulation in the form it has been used for registration of pesticides since May of 1979. To assure clarity and assist those who wish to comment on this proposed regulation, EPA has substantially repeated here much of the material contained in the preamble to the regulations published on May 11, 1979, at 44 FR 27932 et seq.

II. Purposes of Conditional Registration

Prior to enactment of the Federal Pesticide Act of 1978, FIFRA sec. 3(c)(5) set forth the only test for registrability of a pesticide. It states, in part:

> "(5) *Approval of registration.*—The Administrator shall register a pesticide if he determines that, when considered with any restrictions imposed under subsection (d)—
>
> "(A) its composition is such as to warrant the proposed claims for it;
>
> "(B) its labeling and other material required to be submitted comply with the requirements of this Act;
>
> "(C) it will perform its intended fuction without unreasonable adverse effects on the environment; and
>
> "(D) when used in accordance with widespread and commonly recognized practice it will not generally cause unreasonable adverse effects on the environment.

Before the Agency registers a product or amends an existing registration under FIFRA section 3(c)(5), the Agency must conclude, based on a review of sufficient data, that neither the product itself nor any of its uses would cause an unreasonable adverse effect on the environment. Data requirements designed to allow the Agency to make section 3(c)(5) determinations have increased over the years. Moreover, the Agency has concluded that data submitted in support of earlier pesticide registrations should be subject to validation under modern standards. In most cases, therefore, the Agency can grant a registration under FIFRA section 3(c)(5) only after it has determined that all required data have been submitted, and only after a comprehensive review of that data has been completed.

Congress has directed the Agency to conduct reevaluations of all previously registered pesticides (a process called reregistration). See FIFRA section 3(g). The Agency intends to conduct these evaluations systematically and to issue "registration standards" setting forth the Agency's regulatory position on each pesticide. Since 1979, the Agency has put into effect the Registration Standards program, and has issued in the **Federal Register** of April 18, 1980 (45 FR 2370) a document requesting information on the first 55 chemicals proposed for standards, and, in the **Federal Register** of January 18, 1982 (47 FR 3770), a notice of availability of a final scheme for grouping chemicals in clusters for systematic review. Forty registration standards have been issued since May 1979.

Under the pre-1978 FIFRA, the Agency had concluded that it was required to deny registration of new products, even those containing only "old" ingredients, until all required testing of the pesticide had been done and the results reviewed. This created major problems for firms seeking to enter the market with products essentially like those already being sold legally, and also made it very difficult to obtain approval for new uses of already registered products. This class of problems was referred to as a "double standard," and was of great concern to EPA, the Congress, and the industry.

In addition, the Agency believes that even where most or all of the data required for a "no unreasonable adverse effects" determination are available, it is imperative that the Agency's limited resources for data review be used in the most productive manner. This requires that the scheduling of chemicals for comprehensive review be based on factors such as the type, use pattern, and volume of use of the various chemicals. The Agency does not intend immediately to conduct a comprehensive data review merely because an application for registration has been submitted. But a system which would indefinitely deny registration to products containing chemicals low on the review priority list would be unacceptable. A mechanism to overcome these various problems was needed. The Agency thus requested, and Congress in 1978 enacted, legislation "authorizing the Administrator to conditionally register * * * products in certain situations, even though certain of the data that were required for complete registration [under section 3(c)(5)] * * * had not yet been generated, or, if on file with the Agency, had not yet been reviewed for validity or sufficiency." [Report of the Senate Committee on Agriculture, Nutrition, and Forestry. S. Rep. No. 95-334, 95th Cong., 1st Sess. (July 6, 1977), at page 20.]

Conditional registration is a discretionary authority with a twofold purpose: (1) To eliminate barriers to registration and market entry resulting from the previously mentioned double standard; and (2) to provide a needed transition phase between the case-by-case approach under which the Agency has operated in the past and the new registration standards process. The Agency's objective is that all currently registered products, which are subject to reregistration, and similar products for which new registrations are sought, should be allowed to progress in an orderly fashion into a systematic and all-encompassing standards-setting program.

These goals must, however, be pursued in a manner consistent with the Agency's fundamental mission of protecting human health and the environment from unreasonable adverse effects of pesticides. The Agency is authorized to issue conditional registrations, but is not obligated to do so, and will not do so where a conditional registration would significantly increase the risk of unreasonable adverse environmental effects.

Conditional registration will be used to register new products and to amend existing registrations of products containing a particular active ingredient until a registration standard for that active ingredient is published. If a registration standard states that additional data are needed on an active ingredient, the products containing that active ingredient will be subject to a data submission requirement under

FIFRA section 3(c)(2)(B) as part of their reregistration.

Under the conditional registration authority granted to the Agency in 1978, a product may be registered, or its registration amended, if the Agency concludes that the action would not significantly increase the risk of unreasonable adverse effects on the environment, provided certain conditions are met. The regulations proposed here describe how EPA would exercise its conditional reregistration authority under FIFRA sections 3(c)(7)(A) and 3(c)(7)(B). FIFRA section 3(c)(7)(C) deals with conditional registration of products containing new active ingredients. The regulations proposed here do not concern section 3(c)(7)(C); applications for registration under that authority will be handled on a case-by-case basis.

Proposed §§ 162.160 through 162.177 set forth the Agency's standards and procedures for conditional registration under FIFRA sections 3(c)(7)(A) and 3(c)(7)(B). Section 162.160 addresses the scope of the regulations, and contains necessary definitions. Section 162.163 establishes data requirements for the various types of products. Section 162.165 sets forth the requirements for applications for conditional registration. Section 162.167 describes the disposition of applications for conditional registration and the criteria for approval of such applications. Section 162.177 describes Agency procedures for cancellations of conditional reregistrations as specified in FIFRA section 6(e).

Portions of 40 CFR 162.7 and 162.8 (as they existed prior to May 11, 1979, would also be revised to conform previous regulations to the conditional registration authority, to delete obsolete provisions, and to acknowledge that the registration standards process will be used for reregistration.

III. Submission and Review of Data

As noted earlier, a conditional registration may be granted despite the fact that not all data required for a section 3(c)(5) registration have been submitted to EPA, or despite the fact that EPA has not yet reviewed all the data that have been submitted concerning the pesticide. If data required for an unconditional registration have not been submitted to the Agency, a conditional registrant must agree to submit the data when other registrants of similar pesticides must submit data—either at the time the product is reregistered or when the Administrator requires data submission. However, the Agency will not grant even a conditional registration unless data sufficient to make the findings required by FIFRA section 3(c)(7) are available for review by the Agency.

In general the Agency intends to review data for one or more of the following purposes in connection with the application for conditional registration:

1. To demonstrate that the product is identical to a currently registered product (refer to the preamble unit entitled Incremental Risk Assessment, Part A, Indentical Products and Uses).

2. To evaluate the incremental risk posed by the product or its uses (refer to the preamble unit entitled Incremental Risk Assessment).

3. To establish that the product is efficacious, in certain instances (refer to the preamble unit entitled Waiver of Efficacy Data Requirement).

4. To determine whether a new use should be classified for Restricted use (refer to the preamble unit entitled Classification).

For these purposes, the Agency must have data available prior to issuance of conditional registration; such data may not be deferred under the conditional registration.

It is readily apparent, and stated in § 162.163(d), that the formulator of an end-use product might be required to provide chemistry, efficacy, or acute toxicity data to satisfy requirements for obtaining conditional registration.

The responsibilities of an end-use formulator for data concerning his product's active ingredient are covered by FIFRA section 3(c)(2)(D). An applicant who purchases a registered manufacturing use product from another person in order to use it to formulate an end-use product is not responsible for the submission or citation of data pertaining to the safety of the purchased product. He should not assume, however, that the Agency is obligated to register his end-use product, or any product, when chronic toxicity data required to make an incremental risk assessment are lacking. The Agency must have sufficient information to make a finding of no incremental risk before conditional registration can be issued. The end-use formulator seeking conditional registration may find that unless he chooses to produce the data himself, he will be unable to obtain conditional registration.

In connection with the conditional registration of indentical products and identical or substantially similar uses, the Agency generally does not intend to review any data currently in its files beyond that needed to establish identicality. For other applications, the Agency may review data currently in its files to the extent necessary to evaluate the incremental risk associated with a new use or new product. The Agency would, however, review at the time of conditional registration all data which are required to be submitted by the applicant in accordance with § 162.163.

IV. Incremental Risk Assessment

Incremental risk assessment is central to the conditional registration program. The purposes of this section are to describe the risk assessment process and the underlying assumptions and rationales on which it is based, and to give some insight into the factors the Agency will weigh in evaluating whether the FIFRA section 3(c)(7) requirement of "no significant increase in the risk of unreasonable adverse effects" has been met. The Agency's conditional registration program addresses the incremental risks of a proposed product or use. In contrast, the risks associated with current uses of a pesticide are addressed through the registration standards program and, if necessary, the Rebuttable Presumption Against Registration (RPAR) program.

Conditional registration of products and uses is premised on an acknowledgment that certain risks, both known and unknown, are posed by pesticide products and uses already registered and in the marketplace. The Agency recognizes the potential for these risks, but generally has no basis upon which to quantify them or to believe that they outweigh the benefits of continued use. Until these risks can be identified and addressed systematically through the registration standards process and, if necessary, the RPAR procedure (see 40 CFR 162.11), little or no environmental protection is achieved by discriminating between products registered prior to 1975 and other prospective pesticide products. At the time a pesticide is reviewed for registration standards development, all registered products and uses will be included in the overall assessment of adverse effects. Risks and benefits will be weighed against the unreasonable adverse effects standard of FIFRA section 3(c)(5).

Sections 3(c)(7) (A) and (B) of the FIFRA direct the Agency to focus its attention only on the increase in risks (incremental risks) posed by the registration of new products containing, or new uses of, "old" pesticides. Specifically, conditional registration of both identical/substantially similar products and uses [section 3(c)(7)(A)] and new uses [section 3(c)(7)(B)] is authorized only if the new product or use "would not significantly increase the risk of unreasonable adverse effects on

the environment." Properly administered, this test of approval will assure adequate protection of the public and the environment from adverse effects attributable to any increased exposure that might result from the conditional registration of a pesticide.

The Agency has carefully considered how best to assess the incremental risks associated with additional pesticide use. Incremental risk becomes significant only when conditional registration would involve either exposure to non-target populations not previously exposed, or increased exposure to the populations that are at risk from current pesticide usage. As previously stated, it is clear that the Agency is required to assess the incremental risk of each product and each use as a part of the review of all applications for conditional registration. As the potential for risk from the added product or use grow, the need for new data and Agency review of such data will increase. The risk assessment program set forth below is structured to incorporate this concept.

A. Identical Products and Uses

The Agency has concluded that conditional registration of products identical to already registered products in composition and uses, or amendments to existing registrations to add uses already registered for other identical products, poses no risks beyond those which may be present as a result of existing pesticide usage. The market for a pesticide is essentially finite, governed largely by the acreages and available sites to which end-use products can be applied, and by the demands of users for those products.

As stated in testimony before Congress,[1] the Agency expects that the entry into the market of additional identical products for any already registered use will divide the existing market among a larger number of pesticide products and registrants, but will not significantly increase overall pesticide usage. No increase in risks will result if existing exposure remains constant. Consequently, no further incremental risk assessment is necessary. The Agency is prepared to conditionally approve applications of this type for new and amended registrations without individual risk assessments, provided that other requirements of these conditional registration regulations are met.

The Agency recognizes that, in reality, there are few products that are "identical" to others. Moreover, applicants for new registration will not generally be able independently to ascertain identicality. The definition of identical product in § 162.160 is restrictive with respect to inert ingredients and many products will not meet the criteria. Products that are repackaged from other registered products are obvious exmaples of identical products. There also will be instances when a registrant authorizes a second applicant to manufacture an identical product, according to precise specifications. The Agency will determine identicality by a comparison of active ingredients, inert ingredients, impurities, and uses appearing on the label.

General chemistry data are required to be submitted for all new products to enable the Agency to determine whether a product is identical to a currently registered product. For end-use products the chemistry data needed for this purpose are minimal and routine; a Confidential Statement of Formula, completely and accurately filled out, will normally suffice to meet the requirement.

Based on comments on the October 6, 1978, public draft, the Agency deleted several items of chemistry data originally required for end-use products, since those data were unnecessary to a determination of identicality of products. Section 162.163(d)(1)(i) now reflects this reduced data requirement. With respect to technical and manufacturing use products, the Agency is concerned about the presence of harmful impurities in such products, and thus requires information related to identity of, and analysis for, impurities. When the type and/or level of impurities differs from that found in the currently registered product, a risk assessment is required to evaluate the significance of the variation.

B. New Products and Uses That Are Not Identical

Products that are not identical may result from any of a number of variations:

1. Variation in percentages of active and inert ingredients.
2. Variation in inert ingredients, including impuities in technical and manufacturing-use products.
3. Variation in formulation type.
4. Different uses (excluding "new uses" which are discussed in the next unit).

For some products in these categories, risks associated with the new product will not be significantly different from those associated with the currently registered similar product. An example is a product that, although not an identical product as defined in this regulation, has a composition and uses that fall within the range of currently registered products. Products with similar risks, together with identical products, are commonly considered "me-too" products and no data are required to be submitted for risk assessment purposes.

However, there will be a number of products that will raise questions of risk that cannot be resolved solely by comparison with currently registered products. The applicant may be required to submit acute toxicity data to determine the appropriate precautionary labeling. Products listed in items 1 through 3 above may fall into this category.

A variation in the use pattern of a product may be characterized in one of two ways: either it is a "new use" which may generate a requirement of toxic effects data which are essential to the incremental risk assessment, or it is a "substantially similar use," as listed in item 4 above. This latter category of use does not generate the same requirement for toxic effects data, since it does not invlove exposure to new organisms, or exposure by different routes than currently exist.

However, when a specific "substantially similar use" (new site or pest) has never been registered in conjunction with the active ingredient contained in the new product, incremental risk assessment entails an evaluation of the additional exposure to the product, corresponding to that encountered with some new uses. Addition of a new pest on the same site or expansion of the site may significantly increase exposure to applicators, to other people, or to fish and wildlife. This aspect of risk assessment is more fully addressed STEP 5 of the discussion of new uses below. The factors enumerated in STEP 5 of new use risk assessment will be applied to such substantially similar uses. Consequently, it is possible that the applicant may be required to submit the data described in STEP 5 on the potential for increased exposure related to the added use.

C. New Uses

New uses pose incremental risks, the significance of which must be assessed to determine whether the use is acceptable for conditional registration. The Agency will proceed through the following steps to evaluate incremental risk of new uses.

Step 1: Determine whether the new use is a food or feed use requiring the establishment of a tolerance.

[1] Statement of Douglas M. Costle, Administrator, EPA, before the House Committee on Agriculture, April 27, 1977.

If a proposed new use is a food or feed use, the Agency must determine whether the use would require establishment of a new tolerance or an increase in an already established tolerance, in which case the evaluation proceeds to Step 2.

If the new use is not a food or feed use, the Agency will determine whether the use is a "changed use pattern" as defined in § 162.3(k) of the regulations. A changed use pattern involves significant new exposures to human or fish and wildlife populations not previously exposed or exposures by different routes than result from current use patterns. Determination that a use is a "changed use pattern" moves the risk assessment to Step 4.

A use which is neither a new food or feed use nor a changed use pattern is by definition a similar or "me-too" use and may be conditionally registered with the less exhaustive level of risk assessment discussed in B above.

Step 2: Exclude new uses presenting a significant incremental risk: apply the statutory prohibitions against conditional registration.

The FIFRA specifically prohibits conditional registration of new uses that meet certain criteria. If the new use is a major food or feed crop use, dietary exposure may be significantly increased. If RPAR evaluation has revealed that toxic effects may be expected to occur at existing levels of dietary exposure to a chemical, then increasing dietary exposure by conditionally registering a new major food use for the chemical is prohibited by the statute.

Minor food and feed uses under RPAR raise similar concerns, but of lesser degree since the increases in dietary exposure from a minor use compared to the existing level of exposure is likely to be insignificant. Moreover, there are offsetting benefits that accrue in making a pesticide available for a minor use. Alternative pesticides may not be available to cope with a particular pest problem on minor crops or, if available, they may not be effective. The law thus provides that where dietary exposure is low, and alternatives are either not available or not effective, conditional registration of a minor use is not automatically precluded by the existence of an RPAR for dietary effects. The law does not, however, provide that conditional registration necessarily be granted in these circumstances. The Agency will grant such registrations only if persuaded that benefits of a proposed use exceed its risks.

The statutory prohibitions apply to issued RPAR's, that is, where the agency has concluded publicly that available evidence demonstrates that risk criteria have been exceeded. The statutory prohibition does not apply to pesticides which are in the RPAR review process (candidate RPAR's), where no finding has yet been made that risk criteria have been met or exceeded.

Step 3: Assess the incremental dietary exposure from food uses: can a tolerance be established?

Tolerance-setting procedures and principles under the Federal Food, Drug and Cosmetic Act have been well established over the last two decades. Some tolerances have been established in the past without the complete set of data that are currently desirable in the Registration Guidelines. The Agency will continue this practice for conditional registration. However, no additional tolerance is now granted (or would be granted) when a significant data gap exists unless the incremental residue contribution from the new use is calculated to be insignificant or unless it can be demonstrated that there are no detectable residues from application to a new crop. The Agency generally considers as insignificant an increase in the Theoretical Maximal Residue Contribution (TMRC) of 1 percent or less for the new crop. The TMRC is a "worst case estimate" of the exposure of the United States population to residues of a pesticide in food. This additional criterion of acceptability has been applied to tolerances established in the absence of a complete toxicity data base. By limiting the permissible incremental residues in this manner, the Agency can assure that significant increases in dietary exposure will not occur for a chemical whose toxicity is incompletely characterized. In some cases, the Agency will continue to require evidence that missing studies will be initiated (or are under way) before establishing a tolerance.

The need for establishment of a tolerance in conjunction with conditional registration of a new use would impose certain additional data requirements on the applicant. Generally, only residue chemistry data and certain rotational crop data to assess the potential for residue uptake by subsequent crops would be required. In most cases, the toxicity data on which previous tolerances were based would suffice to meet the requirements. Evaluation of incremental risk for chemicals that proceed through this step will be carried forward to Step 4.

Step 4: Assess the risks associated with "new" toxic effects solely attributable to the new use: are RPAR criteria exceeded?

The Agency must assess the toxic effects to new organisms or populations from exposures to the pesticide that would be introduced into the environment by conditional registration of a new use. The applicant must submit satisfactory data pertaining to the new use to enable the Agency to evaluate any "new" toxic effects.

A general rule of thumb for determining which data would be required to be submitted for a particular new use is to compare proposed data requirements for all uses of the active ingredient, including the new use, with data requirements for all existing uses. The differences between the two are those requirements that pertain solely to the new use. These studies must be submitted by the applicant so the Agency can determine whether the new use will pose adverse effects.

If the new use proposes the first change from indoor to outdoor use for the active ingredient(s), new data requirements would include fish and wildlife data and environmental chemistry data. A change from terrestrial use to aquatic use would necessitate data on toxic effects to fish and aquatic life. A change from non-domestic to domestic use would create a need for inhalation studies and long-term chronic studies because of the potential for repeated and prolonged exposure to people. A change from non-food uses to food crops would trigger a requirement for data necessary to establish tolerances, including the full range of toxicity data as well as data to characterize applicator exposure. It is impossible to specify here all situations that could arise. In general, if a new use can be expected to expose human sub-populations not previously exposed (such as women of child-bearing age, children, applicators, food consumers, or field workers), or non-target organisms (such as fish, birds, or other wildlife), data to evaluate the toxic effects of that exposure would be required.

The Agency will review the submitted data to see if the results meet or exceed any of the criteria for RPAR referral. If so, the Agency will proceed with a complete evaluation of the pesticide through the RPAR process. Referral to the RPAR process, however, does not necessarily preclude conditional registration of the new use in question or of other new uses which may be proposed. If the new use offers benefits which outweigh the new risks, the new use may proceed through the remaining steps of the risk assessment. Benefit considerations may lead to conditional registration of a minor use for which no alternatives are available, or of a pesticide product relatively less hazardous than the alternative it would displace.

If the new use is ultimately conditionally registered, its RPAR status notwithstanding, its continued registrability will be subject to the outcome of the RPAR review of the total risks and benefits of the pesticide.

Step 5: Assess the increase in "old" (existing) toxic effects resulting from increased exposure to the pesticide.

This last step of risk assessment involves a consideration of the known toxic effects of the pesticide to populations and organisms which have been previously exposed, and the risks associated with extending these effects by the introduction of more pesticide into the environment. The Agency anticipates that the bulk of the new uses proposed for conditional registration will be new crop uses. Thus the major portion of the additional exposure will be dietary exposure from pesticide application to new food crops. Establishment of tolerances, discussed earlier, will adequately cover this aspect of incremental risk assessment.

The known toxic effects of a pesticide have been identified and evaluated in conjunction with the registration of the product for previously accepted uses. Some of the effects data have been further reviewed through the RPAR process, providing greater certainty about the risks that pesticide presents.

Incremental risk assessment of "old" toxic effects may be viewed as an evaluation solely of the increased exposure to "old" non-target organisms attributable to the new use of the pesticide. Insofar as the Agency's stated intent is not to review previously submitted toxic effects data at the time of conditional registration, the toxic effects are factors that are constant in the risk equation. Incremental exposure is therefore a measure of incremental risk. Where effects data have been reviewed according to current standards, as in the RPAR process, the Agency will have greater assurance that incremental risk has been accurately characterized. Where an RPAR has been issued on the basis of a toxic effect that may be expected to result from the new use, any increased exposure takes on added significance and may preclude conditional registration.

Exposure analysis includes the use of judgmental factors. Because there is such a wide variety of types and routes of exposure, each individual new use offers a distinct exposure pattern which must be separately evaluated. In addition, most forms of exposure cannot be easily quantified or judged against a single standard of acceptability, such as exists for dietary exposure in the tolerance-setting process. The Agency will assess the anticipated pattern of exposure and the relative significance of the various routes of exposure on a case-by-case basis.

In addition to the dietary exposure for food uses discussed earlier, the following types of exposure will be evaluated for each new use:

1. *Applicator exposure.* Registration of a new major crop may result in the exposure of a significant number of applicators not previously exposed to the pesticide. Moreover, some use patterns may require a higher concentration or more frequent application of the pesticide, resulting in individual applicators being exposed to higher levels of pesticides that did not exist for previously registered uses. The Agency may require that applicants submit information on which to base an evaluation of such increased hazards.

2. *Field worker exposure.* For crops which are hand-picked or hand-cultivated routinely, determining whether they is an increase exposure to field workers may involve consideration of the preharvest interval for application to the crop. The method of application must also be considered—some application techniques may expose field workers more than others.

3. *Incidental human exposure other than applicator or field worker exposure.* To some extent, incidental exposure to humans accompanies almost every use situation. Moreover, large numbers of people may be exposed to pesticides without being aware that they have been exposed or without being able to avoid such exposure: the aged or infirm in hospital environments, persons in homes and schools areas, outdoor recreational areas, lakes and streams, and urban areas. Each situation offers some potential for exposure to unprotected humans. The Agency will consider such exposures in risk assessment of specific uses.

4. *Fish, wildlife and other non-target species exposure.* Fish and wildlife exposure is of concern for all applications to new crops and other outdoor areas such as forest and aquatic sites. Certain croplands are important wildlife habitats. Possible harm to fish and aquatic invertebrates is of concern when a new aquatic use is proposed. The drift potential of air application, and the time of the application (spring, summer, fall) may be of great significance in determining the extent of exposure. A further consideration is the status of endangered species within the application area.

The Agency will use whatever information sources are necessary to determine the extent of incremental exposure, We anticipate that much information will be available from published sources, such as Department of Agriculture statistics for agricultural uses, or from knowledgeable experts. In the absence of complete data on incremental exposure, the scientific reviewer's knowledge and experience may on occasions be sufficient to judge the extent and significance of additional pesticide exposure from a new use.

However, the Agency could require that the applicant submit data on the extent of the proposed use to fully evaluate exposure from smaller or less easily defined uses. Market analyses or projections are the primary types of information that might be requested in this context. Such data will be eligible for trade secret protection to the extent provided by FIFRA sec. 10. The Agency will make every effort to obtain sufficient information from sources which are more readily accessible and available to the public, but applicants are ofter the only source of exposure information essential to the incremental risk assessment.

Step 6: Issuance or denial of conditional registration: reduction of exposure potential.

When all of the above steps have been completed, the Agency will make a decision whether to issue or deny the conditional registration of the new use. If the decision is to issue the conditional registration, the Agency may review the labeling of the product, seeking ways to further reduce exposure. Proper labeling of the product with precautionary statements for protection of humans and fish and wildlife, use restrictions such as geographical or timing restrictions, requirements for protective clothing and respirators, reentry intervals for field workers, storage and disposal requirements and packaging can be effective means of reducing the exposure potential of the product from intended application, misuse or accident.

In addition, if the product has previously been classified restricted by regulation (a systematic review of all uses of the product—primarily involving acute human and fish and wildlife data), the new use must be classified in accordance with § 162.11.

D. Documentation of the Incremental Risk and Conditional Registration Decision Process

The Agency is required by FIFRA section 3(c)(2) to make available to the public all data and other scientific information used in support of a registration, including conditional registration, consistent with the trade secrecy provisions of FIFRA sec. 10.

The establishment of tolerances under the Federal Food, Drug and Cosmetic Act is accomplished by publication of a regulation in the **Federal Register**. Such publication includes a discussion of the safety of the dietary exposure resulting from a new food use. Notice of receipt of applications for changed use patterns must also be published in the **Federal Register**. These provisions ensure that the public will be fully informed about the conditional registration of new uses and the factors used in evaluating the incremental risks associated with their use.

V. Waiver of Efficacy Data Requirement

Section 3(c)(5) of the Act provides that the Administrator may waive data requirements pertaining to efficacy of a product under consideration for registration, and that if he waives the requirement for data, he may also waive the finding of efficacy required by FIFRA section 3(c)(5)(A).

The decision to pursue efficacy waiver as an Agency policy stemmed from a need to reduce the resources devoted to reviewing product performance so that additional effort could be devoted to the evaluation of health and safety data, and from a desire to reduce regulatory burdens in pesticide registration. Data review obligations placed on the Agency by the requirements for registration were an important factor influencing the decision. Maintenance of a rigorous efficacy data submission and review posture for registration and reregistration would require the reevaluation of much of the 1.5 million items of product performance data that have been amassed by the EPA. Because many of these studies are quite old, their value as tools for assessing current levels of product performance is questionable in many cases. Therefore, commitment of the resources needed to fully evaluate these data for purposes of reregistration was determined to be less than an ideal use of limited resources for pesticide regulation.

The Agency's viewpoint concerning waiver of efficacy data requirements is in line with a general belief among persons in the pesticide industry, the U.S. Department of Agriculture and others that the efficacy of pesticides can be effectively regulated by the marketplace (in conjunction with extension services, university research personnel, user groups and public health authorities). As originally proposed in the draft Conditional Registration regulation of October 6, 1978, the efficacy waiver was to apply to all product uses except for those deemed "public health uses". These public health uses were restricted to certain disinfectant uses and a limited number of vertebrate and invertebrate control agents aimed at potential disease vectors such as bats, rats, and mosquitoes. In the interim final rule published May 11, 1979, the Agency expanded public health uses to include additional disinfectant, rodenticide and insecticide uses, and one fungicide use.

At the time the Administrator made effective the efficacy data waiver provisions, he stated:

> Since efficacy data waiver is a major deregulation action, the Agency will consider the waiver policy enunciated in these regulations as an experiment in public policy. If there is sufficient evidence to clearly establish that this deregulation is being abused (such as a significant increase in complaints from the agricultural community, other user groups, or the general public about ineffective products), the Administrator may take any steps necessary to correct the abuses, including withdrawal of any or all waivers of efficacy data requirements.

In the period following promulgation of the efficacy data waiver regulation, the Agency has encountered no serious problems of widespread abuses and has found that its authority to enforce the statutory prohibitions against misbranded pesticide products has provided a sufficient regulatory response for the occasional abuses which have occurred. No substantive challenges to this regulation have been brought in the federal courts and no petitions or other formal complaints have been brought to the Agency. Indeed, since 1979, the Agency has proposed to expand its efficacy data waiver. Refer to the **Federal Register** of September 15, 1982 (47 FR 40659), for this proposal. In its expanded form, the waiver would include all uses except those where effectiveness or control cannot be adequately determined by the user. The extended waiver has been included in this reproposal simply to avoid inconsistency. The Agency is not soliciting comment on the expanded efficacy waiver at this time because it expects that comments will be submitted in response to the proposal of September 15, 1982.

The Agency expects that all registrants will perform the tasks necessary to assure themselves that the products they market will perform their intended functions when applied in accordance with label directions and commonly accepted pest control practices. The Agency must rely upon the integrity of the industry, the soundness of extension service recommendations and the good judgment of pesticide users to insure that abuses seldom occur. The Administrator reserves the right to request submission of efficacy data in support of label claims for any product if a pattern of inadequate performance has been reported, for evaluation of product benefits when risks are substantial, or when other factors exist that make submisssion of efficacy data necessary or desirable. Products which are not effective do not meet the standard set by FIFRA section 3(c)(5)(A). Applications to register such products will be denied; existing registrations of products shown to be ineffective may be cancelled or the products may be deemed misbranded under FIFRA section 2(q)(1)(A).

Some comments received prior to the promulgation of this regulation expressed fears that efficacy data waivers would lead to a lack of sound information on the "benefits" side of the risk/benefit analyses performed as part of the RPAR or cancellation processes. Benefits analysis in the RPAR process entails substantially more than reconsideration of efficacy data supporting the original registration. Concern in the benefits analysis is not with historical but with current product performance. In addition, economic factors pertaining to the current use of the pesticide and efficacy of alternative chemicals or non-chemical control practices must be considered. Front-end efficacy review does not provide useful information on the suitability of alternatives. However, when a substantial risk of unreasonable adverse effects has been identified via the RPAR or cancellation/suspension processes for old use patterns of a pesticide, it is incumbent upon the Agency to more carefully scrutinize new or added uses of the pesticide, weighing those risks with the benefits they offer. Thus, the waiver policy contains a requirement for efficacy data for new or added uses of products which have been RPAR'd, cancelled or suspended for adverse effects of other uses, if the identified adverse would also be expected to occur with the new use.

The Agency is limiting its direct concern to, and requiring efficacy data for, human health-related use patterns where control cannot be observed by the user, and new and added uses of chemicals which have been identified as posing a risk of unreasonable adverse effects. Specifically, the Agency will require product performance data in support of registration for the following uses:

1. Disinfectant uses. Performance data will be required for all products intended to control microorganisms

infectious to man in any area of the inanimate environment.

2. Fungicide uses. Performance data will be required for products intended for control of organisms that produce mycotoxins.

3. New uses of pesticides containing active ingredients, some uses of which have been:

a. Suspended or cancelled by the Agency for reasons of human or environmental safety (if the risks identified in the suspension/cancellation action also apply to the new or added use).

b. The subject of a Notice of Rebuttable Presumption Against Registration (if the risks identified in the RPAR notice also apply to the new or added use).

If efficacy data are required, the applicant may in all cases satisfy the requirement by submitting data developed in accordance with Subdivision G of the Registration Guidelins. In some cases, the applicant may choose instead to cite all applicable data in Agency files, in accordance with Subpart F.

For disinfectant products, efficacy data, when required, must be developed and submitted for the individual formulation proposed by the applicant. The applicant generally may not rely on, and need not offer to pay compensation for, data already in our files pertaining to similar formulations. It has been the Agency's experience, borne out by data submitted in the past, that factors such as variations in manufacturing process, and additions, deletions, or substitutions of inert ingredients, can substantially affect the efficacy of the product.

However, as it has done in the past, on a case-by-case basis the Agency will assess the probable impact of changes or differences in product chemistry on the antimicrobial effectiveness of formulations. If the potential imapct is believed to be negligible, the Agency may rely on previously submitted efficacy data and/or require a reduced subset of efficacy data for the new formulation in order to determine that the presumption of biological equivalency was correct. This subset of confirmatory data represents the bridging link which will allow the Agency to determine that the performance of two or more formulations is supported by the same data base. Efficacy data used in support of other formulations would then be subject to the data compensation provisions of the Act. The use of confirmatory data in support of an antimicrobial product will be acceptable only if the Agency has in its files previouly submitted data which fully support all claims and uses of the already registered product using the most recent, scientifically acceptable standards of performance.

Efficacy data will generally not be required for products of the following types:

1. Nearly all agricultural pesticide products (including forest and crop uses). Exceptions include products falling into category 3 above.

2. Disinfectant products used to control bacteria-producing odor or deterioration and spoilage of products such as paint, industrial fluids, or leather, where product failure does not have human health consequences.

3. Algaecides and slimicides, insecticides, herbicides, fungicides, nematicides, and rodenticides, except as mentioned earlier.

Notwithstanding the waiver of efficacy data, the Agency must have sufficient information about the use patterns proposed to permit evaluation of the hazards of the product to humans and fish and wildlife. In the past, efficacy data have served the purpose of providing supplementary information to the labeling use directions, enabling the Agency to assess accurately the hazards of the proposed use, and to label and classify the product to protect the public and the environment.

If labeling submitted with an application for conditional registration is not sufficiently detailed as to the use pattern proposed, the Agency will request more detailed information on the use pattern. Any such information may be required to be placed on the label in the form of use directions, precautionary statements, or use restrictions if it is deemed essential to the proper use of the pesticide or if lack of such information could potentially result in adverse effects from use of the pesticide.

VI. Classification

Most products and uses will not be classified until reregistration under a registration standard or by regulation under § 162.31. Under conditional registration, the Agency would classify individual products only to maintain consistency with current registrations and to avoid a double standard.

New products which are identical to products currently classified for restricted use would also be classified for restricted use. Other products would be classified for restricted use if all products containing the same active ingredient(s) have been so classified under § 162.30.

New uses would be classified for restricted use if the data submitted for the incremental risk assessment indicate that such a classification is needed. Other uses would generally not be classified separately from the uses of the product being amended.

VII. Other Revisions

For convenience to the reader, the Agency is reprinting all of 40 CFR 162.7. However, the Agency would like to draw commenters attention to the fact that comment is being solicited at this time only on § 162.7 (d)(1), and (d)(2), and (e), which were the sections revised in 1979. Section 162.8 was revised in its entirety and comments are requested on the entire section.

VIII. Statutory Review

Copies of this proposal have been provided to the U.S. Department of Agriculture for comment in accordance with FIFRA section 25(a) and to the appropriate committees of the U.S. Congress.

The U.S. Department of Agriculture, in a letter of November 3, 1982, had the following comments on this proposal:

The conditional registration regulation does not adequately describe data requirements for submission of an application. The conditional registration regulation does not show clearly the stepwise relationship to full registration. It is not apparent that the conditional registration regulations, as written will result in lower costs for registration.
EPA response: The minimum data that must actually be submitted by the application at the time of application are product chemistry data, acute toxicity tests, and efficacy data in some cases, all being conducted with, and specific to, the product being proposed for registration. The remaining required data, specified either in 40 CFR Part 158 or an applicable Registration Standard, are made available to the Agency by referring to, and offering to pay for, the data in the Agency's files, augmented if desired by the applicant's own data. (An exemption for end-use producers who purchase a registered product to formulate their own limits the data that they are responsible for.)

If the Agency does not have available all the data necessary to make a determination of "no unreasonable adverse effects," i.e., data identified in a Standard or in Part 158, then an unconditional registration cannot be granted. If some of the data specified by the Standard or part 158 are not available, the Agency will evaluate the application against the "incremental risk" standard of FIFRA Section 3(c)(7), and, if the "no incremental risk" finding can be made, will grant a conditional registration. If the data are insufficient

even to determine whether there are incremental risks, no registration can be granted until the necessary data are submitted to the Agency.

There is no stepwise relationship between conditional registration and full registration. Conditional registration is a registration in the circumstance when some of the required data have not been developed, or when the Agency has not completely reviewed the available data. In the marketplace there is no distinction between products for which the Agency's finding has been "no unreasonable adverse effects," and one for which the determination has been "no significant increase in unreasonable adverse effects."

The question of cost was addressed when the regulations were originally issued in 1979. The Agency's conclusions have not changed.

Congressional Committees had no comment specific to this proposal.

IX. Regulatory Impact Analysis

Under Executive Order 12291, EPA must judge whether regulations are major and conduct an appropriate Regulatory Impact Analysis. The conditional registration regulation is not major in terms of the annual cost impacts on the economy or terms of cost or price increases for consumers or farmers. This regulations is significant in that it will have a positive impact on competition among producers of pesticide products and will increase the availability of pest control products to pesticide users.

Conditional registration has significantly increased the number of pesticide product registration per year. In 1977, which was characteristic of the slowdown in registration activity highlighting the need for the 1978 amendments to FIFRA, the number of approved new products containing previously registered active ingredients was about 250. In fiscal year 1981, the number of registrations has increased almost ten-fold to 2,350. Most of these newly registered products are either identical or substantially similar to existing products. The bulk of the current registration activity for new products and amendments consists of conditional registrations.

The effect of conditional registration is to increase competition and to provide better selection of pest control alternatives. These forces should tend to lower prices for pesticide products and decrease costs of pest protection for pesticide users. Conditional registration is designed to not result in an incremental risk to consumers and pesticide users because the data base on conditionally registered products (upon which Agency decisions are made) is equivalent to the data base on the existing registrations. When conditionally registered products are safer than the products currently registered, risks may actually be reduced. Further, the statutory restrictions on conditional registration of high-risk pesticides (those under RPAR) means that additional conditionally registered products will on the whole pose fewer risks than current products as a whole.

This proposed rule has been reviewed under Section 3(a) of the Regulatory Flexibility Act of 1980 (Public Law 96-354; 94 Stat. 1165, 5 U.S.C. 60 et seq.), and it has been determined that it will not have a significant economic impact on a substantial number of small businesses, small governments, or small organizations. This conclusion is based on the Agency's preliminary analysis as required under Executive Order 12291. The conditional registration regulation would have a positive impact on the small formulator's ability to register products and would provide easier access to the pesticide market for small formulators. Accordingly, I certify that this regulation does not require a separate regulatory flexibility analysis under the Regulatory Flexibility Act.

This regulation was submitted to the office of management and budget for review as required by Executive Order 12291.

Under the Paperwork Reduction Act, EPA must identify any information collection burdens which would be imposed by this proposed regulation and must obtain clearance from the Office of Management and Budget for any such data collection activities. The conditional registration regulation does not impose any new information collection burdens.

List of Subjects in 40 CFR Part 162

Intergovermental relations, Labeling, Packaging and containers, Pesticides and pests, Administrative practices and procedures.

Dated: December 17, 1982.

Anne M. Gorsuch,

Administrator.

PART 162—[AMENDED]

Therefore, it is proposed that 40 CFR Part 162 be amended as follows:

1. By revising § 162.7 to read as follows:

§ 162.7 Disposition of applications.

(a) *General.* All applications for new registration, reregistration, amended registration, or supplemental registration, and all resubmission of such applications will be processed as described below.

(b) *Notice of receipt of application for registration.* The Agency will acknowledge receipt of each application for registration by returning to the applicant a notification of the date of receipt by the Agency.

(c) *Time for action with respect to application.* As expeditiously as possible, the Agency shall approve or deny all applications for registration. Where practicable the Agency shall make its determination within 90 days after the receipt of the application. Registration application which require consultation with other Federal agencies may take longer.

(d) *Unconditional approval of applications under FIFRA section. 3(c)(5).* (1) The Agency will conduct complete data evaluations required for issuance of unconditional registration under FIFRA section 3(c)(5) only:

(i) As part of the process of reregistering currently registered products; or

(ii) When acting on applications for registration of products containing new chemicals; or

(iii) When the Agency determines that it would otherwise serve the public interest.

(2) The Agency will approve a request for the unconditional registration, reregistration, or amendment of a registration, under FIFRA section 3(c)(5):

(i) Only after a comprehensive review of all available, pertinent data; and

(ii) Only after it has determined that sufficient data are available to satisfy the minimum requirements set forth in 40 CFR Part 158; and

(iii) Only after it has determined that the product meets the criteria in paragraph (d)(3) of this section.

(3) The Administrator will register a pesticide product or approve amended and supplemental registration if he determines that, when considered with any restrictions imposed:

(i) The composition is such as to be effective for all uses set forth on the label;

(ii) The product is not misbranded as defined in section 2(q) of the Act, and its labeling complies with the applicable requirements of the Act, and § 162.10;

(iii) The test data and other material required to be submitted with the registration application comply with the requirements of the Act, § 162.8, and the data requirements of 40 CFR Part 158;

(iv) The pesticide will perform its intended function without unreasonable adverse effects on the environment and when used in accordance with widespread and commonly recognized

practice will not generally cause unreasonable adverse effects on the environment. The criteria for determining unreasonable adverse effects on the environment are set forth in § 162.11.

(v) A tolerance or exemption from the tolerance requirements has been obtained, as provided in sections 406, 408, or 409 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346, 346a, and 348) if the proposed labeling bears directions for use on food or if the intended use of the pesticide results or may reasonably be expected to result, directly or indirectly, in residues of the pesticide becoming a component of food; and

(vi) EPA has been notified by FDA that the product complies with the requirements of the Food and Drug Administration if the product, in addition to be a pesticide, is a "drug" within the meaning of section 201(g) of that Act, but is not a "new drug" or "new animal drug" under sections 201(p) and 201(w) respectively of the Federal Food, Drug, and Cosmetic Act.

(4) *Notice of approval.* The Administrator will promptly issue in the **Federal Register** a notice of approval of the registration for any pesticide product for which notice of application was issued under § 162.6(b)(6).

(e) *Conditional registration.* Any application for which a review of scientific data is needed, other than an application which may be considered for unconditional registration under paragraph (d) of this section, will be considered as an application for conditional registration under FIFRA sec. 3(c)(7) and will be reviewed and acted upon as set forth in Subpart F.

(f) *Denial of registration.*—(1) *Notification.* The Administrator shall deny registration if the pesticide product fails to meet any of the requirements of paragraph (d) of this section or if there is insufficient data to make the required determination. Promptly after making such a determination, he shall notify the applicant by certified letter of the denial of registration and shall set forth the reasons and factual basis for the determination and the conditions, if any, which must be satisfied in order for the registration to be approved.

(2) *Opportunity for remedy by applicant.* (i) The applicant will have 30 days from the date of receipt of the certified letter to take the specified corrective action.

(ii) The applicant may petition the Administrator to withdraw his application. The Administrator may, in his discretion, deny any petition for withdrawal and proceed to issue notice of denial in accordance with paragraph (f)(3) of this section.

(3) *Federal Register publication.* If the applicant fails to remedy the deficiency of his registration application, the Administrator shall promptly issue in the **Federal Register** a notice of denial of registration. Such notice shall set forth the reasons and factual basis for the denial and shall contain the name and address of the applicant, the product name, the name and percentage by weight of each active ingredient in the product, the proposed patterns of use, and the proposed classification.

(4) *Hearing rights.* Within 30 days following publication of the denial in the **Federal Register**, the applicant or any interested party with the written authorization of the applicant may request a hearing pursuant to section 6(b) of the Act and Part 164 of these regulations. If no hearing is requested, the denial shall become effective at the end of the 30 days.

(g) *Disposition of material submitted in support of registration.* The test data and other information submitted in support of the registration application shall become a part of the official file of the Agency for that application or registration. Except as provided by section 10 of the Act, within 30 days after the registration of a pesticide, the data called for in the registration statement together with such other scientific information as the Administrator deems relevant to his decision shall be made available for public inspection.

2. By revising § 162.8 to read as follows:

§ 162.8 Data in support of registration and classification.

(a) An applicant for registration, reregistration, or amendment of an existing registration shall, in his application and as a prerequisite to approval of this application:

(1) Furnish or refer to data adequate to demonstrate that his application may be approved under this Part; and

(2) Comply with paragraph (b) of this section; and

(3) Furnish additional information as requested by the Agency under paragraph (c) of this section.

(b) An applicant shall submit with his application any factual information regarding adverse effects of the pesticide on the environment or man that:

(1) Has been obtained by him or has come to his attention; and

(2) Insofar as he is aware, has not previously been submitted to the Agency.

Such information shall include, but shall not be limited to, published or unpublished laboratory stuties and accident experience.

(c) An applicant shall submit any additional data, other than those required by this Part and other Agency documents which the Agency has requested as necessary to support the registration application.

§§ 162.18–1, 162.18–2, 162.18–3, 162.18–4, 162.18–5, [Removed]

3. By removing §§ 162.18–1, 162.18–2, 162.18–3, 162.18–4, and 162.18–5.

4. By adding a new Subpart E to read as follows:

Subpart E—Conditional Registration Procedures

Sec.

162.160 Conditional registration overview.
162.163 Data required to be made available for agency review in support of conditional registration.
162.165 Application for conditional registration.
162.167 Disposition of applications.
162.177 Cancellation of conditional registration.

Authority: Secs. 3(c)(7) and 25, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975 and 1978 (92 Stat. 819; 7 U.S.C. 136 et seq.).

Subpart E—Conditional Registration Procedures

§ 162.160 Conditional registration overview.

(a) *General.* FIFRA sec. 3(c)(7) authorizes the Agency to conditionally register a pesticide product despite the fact that certain of the data required by the Act or other Agency documents may not have been submitted or evaluated comprehensively by EPA. A conditional registration is a registration for which the submission (or Agency review) of some supporting data has been deferred to a future date. These sections describe the requirements for submission of an application for conditional registration, the disposition of applications, the conditions under which applications will be approved or denied, and the cancellation of conditional registrations.

(b) *Scope.* This Subpart E applies to all applications for registration and amended registration except for:

(1) Any application for registration of a product containing a new chemical;

(2) Any application for amendment of a registration of a type listed in § 162.180(b) (which addresses applications that may be approved without review of data); and

(3) Any application for registration or amended registration of a product that

may be unconditionally registered under § 162.7(d).

(c) *Definitions.* All words and terms shall have the same meanings as given in the Act and § 162.3. In addition, the following terms are defined for the purposes of Subpart E:

(1) The term "new chemical" means an active ingredient that is not listed in the ingredients statement of any currently registered pesticide product.

(2) The term "new use" means a use pattern, not included on labeling of any currently registered pesticide product containing the same active ingredient(s), that:

(i) Is a "changed use pattern" within the meaning of § 162.3(k); or

(ii) To be approved, requires the establishment of, or an increase in the level of, a tolerance or food additive regulation under the provisions of the Federal Food, Drug and Cosmetic Act, as amended, for the active ingredient(s) involved, or requires the establishment of an exemption from the requirement of such a tolerance.

(3) The term "identical product" means a product that, when compared to a currently registered product:

(i) Contains the same active and intentionally added inert ingredients, and, in the case of a manufacturing use product, the same impurities, each ingredient being in the same percentage; and

(ii) Bears identical or substantially similar uses.

§162.163 Data required to be made available for agency review in support of conditional registration.

(a) *Data available for review.* An item of data is available to the Agency for use in connection with an application if:

(1) It is submitted by the applicant in support of the application, or is already in the Agency's files; and

(2) The applicant has submitted any written authorization from the original data submitter required by FIFRA section 3(c)(1)(D)(i).

(b) *Manufacturing use products.* Application for conditional registration or amendment of a manufacturing use product may not be approved unless the following data are available to the Agency.

(1) *Chemistry data specific to the product.* (i) Product identity and disclosuure of ingredients, including impurities;

(ii) A description of the manufacturing process, including composition and purity of starting and intermediate materials;

(iii) Analytical methods and sample assays for the impurities;

(iv) Physical and chemical properties; and

(v) If requested by the Agency, a sample of the technical product.

(2) *Hazard data.* Data sufficient to allow the Agency to determine that approval of the application would not cause a significant increase in the risk of any unreasonable adverse effect on the environment.

(i) If the Agency determines that the product is an identical product, or that it contains impurities and inert ingredients that differ from those of a registered product only in ways that would not significantly increase the risk of unreasonable adverse effects on the environment, the Agency will not require any additional hazard data other than those data currently in the Agency files.

(ii) For any other manufacturing use product, the Agency may require additional data concerning the toxicity of the product, its ingredients and impurities, and the extent of exposure of populations and organisms to the toxic effects of the product, its ingredients and impurities.

(c) *End-use products.* Application for conditional registration or amendment of an end-use product may not be approved unless the following data are available to the Agency:

(1) *Chemistry data specific to the product.* (i) Product identity and disclosure of ingredients; and

(ii) If requested by the Agency, a sample of the product proposed for registration; and

(iii) If any active ingredient of the formulated product is derived from any substance other than a registered product, data required by paragraph (b) of this section

(2) *Efficacy data.* (i) Efficacy data for each product that bears a claim to control pest microorganisms that pose a threat to human health and whose presence cannot be observed by the user, including, but not limited to, micoorganisms infectious to man in any area of the inanimate environment; and

(ii) Efficacy data for each product for which a new or added use is proposed, if the product contains an active ingredient, some uses of which have been suspended, cancelled, or are the subject of a Notice issued under § 162.11(a)(3)(ii) and the risks identified in the Notice or suspension/cancellation action may reasonably be anticipated as a result of the new use.

(iii) Efficacy data otherwise specifically requested by the Agency for any product.

(3) *Hazard data.* Data sufficient to allow the Agency to determine that approval of the application would not cause a significant increase in the risk of unreasonable adverse effects on the environment.

(i) If the Agency determines that a product is identical to a currently registered product, the new product will be regarded as one which would not cause a significant increase in the risk of any unreasonable adverse effect on the environment, and the agency will not require any additional hazard data other than those data currently in Agency files.

(ii) For any other product, the Agency may require data concerning the product and the toxicity of the product or its ingredients to organisms that would be newly exposed to the product, or that would be exposed by routes of exposure different from those associated with already registered products or uses, and the extent of additional exposure to the product that likely would result from use of the product as proposed. Applicants are encouraged to consult with the Agency to determine the data requirements applicable to a risk assessment of specific products and uses.

§ 162.165 Application for conditional registration.

(a) *General.* All provisions of §§ 162.1 through 162.17 apply to all applications submitted for conditional registration under FIFRA sections 3(c)(7) (A) and (B) except the following:

(1) Section 162.6(b)(5), Completeness of Applications;

(2) Section 162.6(b) (1), (2), and (5) Applications for Registration [under FIFRA section 3(c)(5)];

(3) Section 162.6(c), Five-Year Cancellation;

(4) Section 162.7(c), Time for Action with Respect to Application;

(5) Section 162.7(d), Approval of Registration [under FIFRA section 3(c)(5)];

(6) Section 162.7(f), Denial of Registration;

(7) Section 162.11 (a) and (b), Rebuttable Presumption Against Registration, except as provided in § 162.163(b); and

(8) Section 162.11 (c) and (d), Use Classification, except to the extent provided by § 162.162(b)(5).

(b) *Submission of applications.* (1) A separate application for conditional registration must be submitted (on forms provided by the Agency) for each conditional registration desired. Applications shall include the supporting information prescribed in paragraphs (b) (2) through (5) of this section.

(2) Each application must be accompanied by proposed labeling in accordance with § 162.6(b)(2)(i)(A) and § 162.10.

(3) Each application must be supported by the data prescribed in § 162.163 as applicable.

(4) Each application must comply with Subpart F.

(5) Classification requirements for end-use products (manufacturing use products are excluded):

(i) An end-use product must be labeled for Restricted use:

(A) If an identical product is labeled for Restricted use; or

(B) If Restricted use labeling is required by § 162.31.

(ii) The applicant shall request that a use not previously accepted on a registered product containing the same active ingredients be classified in accordance with § 162.11.

(iii) Applicants not required to label their products for Restricted use under paragraph (b)(5)(i) of this section and not seeking to add a use as described in paragraph (b)(5)(ii) of this section shall request that the product be classified at reregistration or when uses of other similar products are classified, whichever occurs sooner, and shall propose a classification for the product or added use(s).

§ 162.167 Disposition of applications.

(a) *Criteria for approval of conditional registration.* The Agency will approve a request for conditional registration under FIFRA sec. 3(c)(7) (A) or (B) if it determines that, when considered with any restrictions or conditions imposed:

(1) The product is not misbranded, as defined in FIFRA section 2(q), and its labeling complies with § 162.10; and

(2) The test data and other materials required to be submitted comply with the requirements of the Act, § 162.163, § 162.165, and Subpart F; and

(3) The use of the product will not cause a significant increase in the risk of unreasonable adverse effects on the environment; and

(4) Any tolerance, food additive regulation, exemption or other clearance required by the Federal, Food, Drug & Cosmetic Act (including clearance for pesticide uses which are also drug uses), has been obtained.

(b) *Conditional registration prohibition.* Notwithstanding the provisions of paragraph (a) of this section, the Agency will not approve the conditional amended registration of any new use if:

(1) A notice of Rebuttable Presumption Against Registration under § 162.11(a)(3)(ii) has been issued; and

(2) The proposed new use involves a major food or feed crop, or involves a minor food or feed crop for which there is an available and effective alternative pesticide registered which does not meet the criteria of § 162.11(a)(3)(ii). The determination of available and effective alternatives shall be made with the concurrence of the Secretary of Agriculture.

(c) *Conditions of conditional registration.* (1) Data not available at the time of application for conditional registration must be submitted or cited when all products containing the same active ingredients are reregistered, or at such other time as the Agency may specify.

(2) The Agency may establish other terms and conditions as necessary.

(3) If the terms or conditions of conditional registration are not satisfied, the Agency will cancel the conditional registration in accordance with § 162.177.

(d) *Notices regarding changed use pattern.* The Agency shall promptly issue in the **Federal Register** a Notice of receipt of each application that involves a changed use pattern, as required by FIFRA section 3(c)(4).

(e) *Denial of conditional registration.* The Agency will deny conditional registration if the application for conditional registration fails to meet any of the requirements of § 162.167(a) or if there are insufficient data to make the required determination. Denial of conditional registration will be in accordance with the provisions set forth in § 162.7(f).

§ 162.177 Cancelation of conditional registration.

(a) *General.* FIFRA section 6(e) pertains to the cancellation of conditional registrations for failure to satisfy the conditions imposed by the Agency at the time of registration. The Agency will issue a notice of intent to cancel the conditional registration of a product if the registrant fails to meet the conditions imposed under § 162.167(c). Cancellation under FIFRA sec. 6(e) may be accomplished by means of an expedited hearing.

(b) *Notice of intent to cancel.* The Agency will notify the registrant by certified mail, and subsequently notify the public by **Federal Register** notice, of his intent to cancel a conditional registration. The notice will provide that the registrant or any person adversely affected by the cancellation may, within 30 days from receipt by the registrant of the notice, request that a hearing be held.

(c) *Effective date of cancellation.* If no hearing request if received, the cancellation will become effective at the end of the 30-day period. The Agency will notify the registrant by certified mail of the final cancellation.

(d) *Continued sale and use of existing stocks.* The Agency may permit the continued sale and use of existing stocks of a pesticide whose conditional registration has been cancelled under such conditions and for such uses as it may specify. The Agency may permit such sale and use only if it determines that:

(1) Such sale and use is not inconsistent with the purposes of the Act and the regulations promulgated thereunder; and

(2) Such sale and use will not result in unreasonable adverse effects on man or the environment.

(e) *Hearing.* (1) If a request for hearing is received, the hearing will be conducted according to FIFRA section 6(d), and 40 CFR Part 164.

(2) Such hearing will be limited to the issue of whether the registrant complied with the conditions referred to in § 162.167(c), and whether the Agency's determination regarding sale and use of existing stocks of the product is correct.

(3) A hearing shall be conducted and a decision made within 75 days from request for such hearing.

(4) The Administrator's decision upon completion of the hearing shall be final.

40 CFR Part 162

[OPP-30066; PH FRL 2225-3b]

Regulations for the Enforcement of the Federal Insecticide, Fungicide and Rodenticide Act; Compensation for Use of Data

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This proposed rule would implement the data compensation provisions of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (FIFRA), 7 U.S.C. 136a(c)(1)(D). The rule proposes a system under which applicants for pesticide registration who wish to rely on data submitted by other applicants would be required to offer to pay for use of the data. This regulation is proposed for comment at this time because a United States Court of Appeals has ruled that the promulgation of this regulation as an interim final regulation on May 11, 1979, was invalid because of the Agency's failure to comply fully with

the procedural requirements of the Administrative Procedure Act.

DATE: Written comments must be submitted on or before February 25, 1983.

ADDRESS: Submit written comments to: Document Control Officer (TS–793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–409, 401 M St., SW., Washington, D.C. 20460.

Comments should bear the identifying notation OPP–30066. The administrative record supporting this action is available for public inspection in Rm. E–107 at the address noted above from 8 a.m. to 4 p.m. Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Edward C. Gray, Office of General Counsel (A–132), Environmental Protection Agency, Rm. W–535C, 401 M St., SW., Washington, D.C. 20460 (202–755–0638).

SUPPLEMENTARY INFORMATION:

I. Introduction and Development of Regulation

FIFRA section 3(c)(1)(D) was originally enacted in 1972 and has since been amended twice. It imposes restrictions on the use of the data in Agency files which have been submitted under FIFRA by one person, when the Agency is deciding whether to approve another person's application for registration, reregistration, or amended registration of a pesticide product. The Agency spent considerable time analyzing the manner in which the 1978 amendments to FIFRA could be most rapidly and smoothly implemented and analyzing what the Agency's capabilities and resources would and would not allow in such areas as scientific review of data retrieval, and data cataloging. A regulation, ultimately codified as 40 CFR 162.9–1 through 162.9–8, governing the data compensation aspects of registration actions taken after the effective date of the Federal Pesticide Act, September 30, 1978, was developed to reflect these considerations.

The Environmental Protection Agency issued in the **Federal Register** of June 20, 1977 (42 FR 31284) proposed rules to implement section 3(c)(1)(D) of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (FIFRA), 7 U.S.C. 136 et seq. This proposal required substantial modifications because of the significant changes to section 3(c)(1)(D) enacted in 1978.

Working drafts of the regulation designed to implement the 1978 compensation amendments were circulated to more than 2500 interested persons, agencies, and organizations, and open public meetings were conducted on November 6–8, 1978, to solicit comments on this regulation. The EPA Administrator issued the data compensation regulation proposed here as a final regulation in the **Federal Register** of May 11, 1979 (44 FR 27932). He concluded that there was good cause to dispense with the notice and comment procedures required by the Administrative Procedure Act.

After promulgation of this regulation, Mobay Chemical Company filed challenges to the regulation on substantive and procedural grounds. The *Mobay* case, which was brought in the U.S. District Court for the Western District of Pennsylvania, resulted in an evidentiary trial and a decision by the District court that the compensation regulation was a valid implementation of the 1978 amendments to FIFRA, and that the Agency had properly invoked the "good cause" exception of the Administrative Procedure Act to justify making this regulation immediately effective when it was first published in May of 1979. *Mobay* v. *Gorsuch*, 517 F. Sup. 254 (W.D. Pa. 1981). On appeal, the U.S. Court of Appeals for the Third Circuit held that the regulation was promulgated in violation of the notice-and-comment and effective date requirements of the Administrative Procedure Act. *Mobay* v. *Gorsuch*, C.A. No. 81–2190 (Third Circuit, June 22, 1982). In so ruling, the court did not decide the issue of whether the compensation regulation is a reasonable interpretation of FIFRA. The court also delayed for a period of six months the issuance of its mandate which would invalidate the regulation.

In issuing this proposal, the Agency is redesignating these sections as Subpart F of Part 162. The following table correlates the new sections with the original sections:

Old Section	*New Section*
162.9–1	162.180
162.9–2	162.182
162.9–3	162.185
162.9–4	162.187
162.9–5	162.190
162.9–6	162.192
162.9–7	162.195
162.9–8	162.197

Hereafter, this proposal will refer only to the new sections.

Under the 1978 amendments to section 3(c)(1)(D), the Agency's principal duty is to ensure that no application for a registration action is approved unless the applicant has taken certain steps to initiate the process of compensation. As amended, section 3(c)(1)(D) provides that an applicant for registration shall file with the Administrator an application which includes:

> a full description of the tests made and the results thereof upon which the claims are based, or alternatively a citation to data that appears in the public literature or that previously had been submitted to the Administrator and that the Administrator may consider in accordance with the following provisions:
>
> "(i) with respect to pesticides containing active ingredients that are initially registered under this Act after September 30, 1978, data submitted to support the application for the original registration of the pesticide, or an application for an amendment adding any new use to the registration and that pertains solely to such new use, shall not, without the written permission of the original data submitter, be considered by the Administrator to support an application by another person during a period of ten years following the date the Administrator first registers the pesticide: Provided, That such permission shall not be required in the case of defensive data;
>
> "(ii) except as otherwise provided in subparagraph (D)(i) of this paragraph, with respect to data submitted after December 31, 1969, by an applicant or registrant to support an application for registration, experimental use permit, or amendment adding a new use to an existing registration, to support or maintain in effect an existing registration, or for reregistration, the Administrator may, without the permission of the original data submitter, consider any such item of data in support of an application by any other person (hereinafter in this subparagraph referred to as the 'applicant') within the fifteen-year period following the date the data were originally submitted only if the applicant has made an offer to compensate the original data submitter and submitted such offer to the Administrator accompanied by evidence of delivery to the original data submitter of the offer.

In order to carry out these obligations, and to assist applicants in filing approvable applications, the Agency must:

(1) State which kinds of applications are subject to the requirements of FIFRA section 3(c)(1)(D);

(2) Describe the data set for which applicants for various kinds of registration actions must offer to pay compensation;

(3) Describe the required wording for the offer to pay compensation;

(4) Provide that applicants furnish the compensation offer to the Agency, and to the original data submitters (to the extent they can be identified) as well;

(5) Identify the original data submitters so that the applicant will know to whom the offers to pay compensation must be furnished; and

(6) Provide some workable mechanism to ensure that if an applicant inadvertently or deliberately fails to furnish notice to an original data submitter who should have been notified, the latter will nonetheless be able to avail himself of the compensation mechanism or other rights he has under section 3(c)(1)(D).

After carefully weighing alternative options to implement these requirements, the Agency in 1978 developed the mechanism and procedures contained in this proposed regulation as the best means to balance all of the considerations relevant to implementation of the statutory requirements. Although significant opposition has been evident from certain portions of the affected industry, the rationale which prompted the choice of regulation at that time remains persuasive today. Accordingly, the Agency is proposing at this time to readopt the rule which was initially

adopted by the Agency to implement the 1978 compensation amendments. In order to assist those who may wish to comment on this proposal, much of the material contained in the preamble accompanying the May 11, 1979, publication is repeated here. The primary arguments advanced in opposition to the rule are also identified and addressed.

II. Registration Actions to Which the Regulations Apply

The duty to comply with the provisions of section 3(c)(1)(D) applies to any applicant who seeks to register a new product, to reregister a product, or (with certain exceptions) to amend the registration of an already registered product, as stated in § 162.180.

By their very nature, some kinds of proposed amendments of existing registrations normally involve neither consideration of data by the Agency nor reliance by the Agency on the fact that data were considered earlier. These types of amendments are listed in § 162.180(b)(1) through (16). Applicants who seek to amend an existing registration for the sole purpose of making such a change need not comply with section 3(c)(1)(D)(ii) or with Subpart F of Part 162.

In some cases the Agency requires registrants to submit proposed amendments to their registered label as an alternative to the Agency's initiation of cancellation proceedings against the registered product. The Agency has concluded that "involuntary" amendments of this type are not subject to the requirement to pay compensation under section 3(c)(1)(D). Accordingly, under 40 CFR 162.180(b)(17), applicants who seek to amend an existing registration for the sole purpose of complying with an Agency announcement that failure to request the amendment will result in initiation of a cancellation proceeding under FIFRA sec. 6(b), or a suspension proceeding under FIFRA sec. 6(c), need not comply with 40 CFR 162.180 through 162.197.

III. Data Upon Which Various Kinds of Registration Decisions Are Based

Prior to 1978 the Agency had, for the most part, required an applicant to comply with the data requirements either by submitting data he generated or by citing specific items of data already in Agency files. The Agency's position was that it would "consider" an item of data only if the applicant requested that the Agency consider that specific item. If several studies concerning the same subject were in the Agency's files, the applicant theoretically could choose which ones he desired the Agency to "consider."

When the Agency initially promulgated the data compensation rule, it decided to no longer allow this "pick-and-choose" approach. Instead, the Agency adopted an approach which assumes that the Agency normally will consider, and the applicant thus must rely on, all available data which are pertinent to the registrability of a particular product. Use of this approach is required for some kinds of applications under this proposed regulation. For others, applicants have the option of either using the "cite-all" method or relying on data they have submitted themselves. A discussion of the manner in which this regulation has worked and of the principal opposition to the regulation is set forth below.

A. Unconditional Registration Under FIFRA Section 3(c)(5)

The Agency grants unconditional registrations under FIFRA section 3(c)(5) only when it is satisfied that no unreasonable adverse effects will be caused by the product's intended uses. This involves Agency determinations that all required data have been submitted, that all available data have been reviewed, and that the benefits of registration outweigh the risks.

Such in-depth data reviews will normally be done by the Agency as part of:

1. Preparation of registration standards, each covering some or all types of products containing a particular active ingredient.
2. RPAR reviews under § 162.11.
3. Reviews of applications for registration of products containing active ingredients not contained in any currently registered product.

By themselves these three kinds of review processes could usefully occupy more scientific resources than the Agency now has available in the pesticides program. It is important that the Agency be able to use its resources in an efficient manner and to be able to plan their use in advance so it can devote the earliest attention to pesticides which most urgently need review. It is also important, therefore, to avoid using resources for unschedulable, ad hoc reviews of portions of the data base concerning any one chemical.

The Agency has also concluded that it would be improper as a matter of scientific logic to operate a registration process geared to making unconditional section 3(c)(5) findings on risks and benefits while deliberately ignoring pertinent data which the applicant did not choose to have the Agency review. In comments on a draft version of this regulation, some persons argued that language in section 3(c)(1)(D)'s introductory phrase suggests that the statute does not allow the Agency to require applicants for unconditional registration to acknowledge reliance on all pertinent data in Agency files. The introductory phrase states that each applicant for registration shall file with the Administrator an application which includes:

> * * *[I]f requested by the Administrator, a full description of the tests made and the results thereof upon which the claims are based, or alternatively a citation to data that appears in the public literature or that previously had been submitted to the Administrator and that the Administrator may consider in accordance with [section 3(c)(1)(D) (i) and (ii)]* * *

The commenters argued that this language means that an applicant has the option of submitting all required data himself or, instead, relying on previously submitted data.

At the time of first promulgation of this rule in 1979, the Agency stated:

> These comments appear to be premised on the idea that if the Agency has specified (in data guidelines or elsewhere) the minimum number of tests for various toxic effects that must be conducted, and the applicant has furnished test reports complying with those minimums, and showing no unreasonable adverse effect, then the Agency should unconditionally register the product based solely on the data submitted, even though other pertinent data are available. What this premise overlooks is that the Agency, for good reason, is unwilling to confine its section 3(c)(5) review to what the applicant presents if, in fact, a broader range of data exist[s]. In toxicity testing, for instance, the issue often is not merely whether a pesticide causes a particular toxic effect or how toxic the pesticide is but also how certain we are of the validity of a set of findings. If a second test of a pesticide for some toxic effect produces results which corroborate the findings of an earlier test, each set of test results gains credibility from the other. On the other hand, if the second test results are significantly different (as is not uncommon in some kinds of toxicity testing), careful review is required to attempt to explain the differences and to decide what the Agency's position should be. Thus, the more data of a given type there are for comparison, the more confident the Agency can be that its regulatory decision is sound.
>
> Moreover, the quoted portion of section 3(c)(1)(D) does not direct the Agency to grant a section 3(c)(5) registration based on consideration of less than all the available pertinent data, nor do we believe Congress would desire this. We read the language in question, rather as a Congressional recognition that in some cases (e.g., application for registration of products containing newly discovered active ingredients) the only available data are those which the discoverer submits with his

application, and that in such a case the applicant must submit a full description of the tests made and the results thereof upon which the claims are based. This phrase appeared in the 1947 FIFRA, and was retained in the 1972 FIFRA amendments. A 1972 Report of the Senate Committee on Agriculture and Forestry said, in rejecting a proposed amendment to this language: "The major purpose of the act is to protect the public from pesticides which are not efficacious or which endanger health or the environment. The Administrator should be able to request and obtain a full description of the tests upon which claims for the pesticide are based. He should not be restricted to such tests as the applicant may choose to offer. There should be no question about this. The Administrator must make a decision, which is subject to judicial review, on the basis of the information available to him. For the protection of the public and as a simple matter of reasonable administration, all relevant information should be available to him."

(S. Rep. No. 92–838, 92d, Cong., 2d Sess., Supplement p. 34 (October 3, 1972))

It would be ironic indeed if this same "full description" language were to be transformed into a justification for obtaining unconditional registration on the basis of some portion of the available data chosen by the applicant.

What is newly added [by the 1978 amendments] to the introductory portion of section 3(c)(1)(D) is the language concerning support of applications by citation of data. EPA does not believe this new language was added because Congress wished to affect the scope of the scientific review EPA should conduct in connection with section 3(c)(5) registrations. EPA believes instead that Congress intended it as a way of acknowledging that most applications do in fact rely on previously submitted data, and indicating clearly that such reliance is subject to the immediately following provision on "exclusive use" [section 3(c)(1)(D)(i)] and data compensation [section 3(c)(1)(D)(ii)].

There remains for resolution the issue of just which data are scientifically pertinent to a given application for registration. With respect to manufacturing-use products, it is clear that any data from tests concerning the safety, properties, or behavior of the active ingredient of one such product generally would be scientifically pertinent to EPA's consideration of the registrability of any other such product having the same active ingredient. The only exception to this statement would arise if the Agency were to allow a product to be registered under FIFRA section 3(c)(5) for use in manufacturing end-use products, with restrictions as to the use patterns that could appear on the label of any end-use product made from that particular manufacturing-use product. EPA is considering, but has not yet adopted, such an option.

In the case of end-use products, however, the issue of scientific pertinence of particular items of data is a good deal more complex. Some types of tests must be performed using the particular formulated product as the test substance, because the product's toxicity, efficacy, or environmental behavior may depend not only on the product's active ingredient, but also on the nature and relative amounts of the various deliberately-added inert ingredients that the particular product contains. Accordingly, data from tests of end-use product A may not be pertinent to the registrability of end-use product B, even though both products are intended to be used in the same way and contain the same amounts of the same active ingredients. Of course, if products A and B are sufficiently similar in composition, the product A data may be pertinent to product B's registrability.

Further complicating the matter is the fact that the formula of an end-use product on file with the Agency normally would be entitled to confidential treatment (with certain exceptions). Thus, EPA normally could not disclose the identities or percentages of product A's deliberately-added inert ingredients to the person seeking to register product B. There thus would be no simple method for an applicant to unilaterally determine which if any end-use product data submitted by other firms may be scientifically pertinent to his application.

The elimination of the opportunity for most applicants to attempt to meet minimum data requirements sufficient for FIFRA section 3(c)(5) registration without reliance on some or all of the relevant data previously submitted to the Agency on the same active ingredient has been vigorously opposed by certain pesticide producers or their representatives. Mobay Chemical Company expressed its opposition through a challenge to the compensation provisions brought in the district court for the Western District of Pennsylvania, in which Mobay claimed that the regulation is arbitrary and capricious and fails to comport with the language of the statute. That court upheld the "cite-all" requirement of the regulation, stating:

> Under [section 3(c)(1)(D)], an applicant must, if requested by the Administrator, either submit its own data or cite other data. Section 3(c)(1)(D) gives EPA a selection of three methods for supporting applications, and EPA, by its "cite-all" regulations, can be said to have "requested" that applicants use all three * * *. We also believe that the "cite all" method is consistent with the philosophy of the developing generic standards program * * * [and] Mobay's compensation rights are protected under "cite-all".

Mobay v. *Gorsuch*, 517 F. Supp. 254 (W.D. Pa. 1981). On appeal, the Court of Appeals for the Third Circuit did not reach the issue of whether the district court had ruled correctly on Mobay's substantive challenges to the "cite-all" regulation because it invalidated the regulation on procedural grounds. Similar substantive challenges to the "cite-all" regulation are pending [*NACA et al. v. the EPA*, C.A. No. 79–2063 (D.D.C.) and *American Cyanamid v. Gorsuch*, C.A. No. 77–226 (D.N.J.)].

The Agency fully understands the objection to its current requirement that even companies who develop and submit extensive data to support applications for registration must offer to compensate any others who may have submitted data which would be acceptable to the Agency to support the application. However, the development of an alternative method for determining what previously submitted data are subject to compensation in those circumstances would be exceedingly difficult and fraught with potential error if the Agency attempted it under the present statutory scheme. The statute does not contain any express authority allowing the Agency to distinguish between data required for registration (i.e., minimum sufficient data) and data considered and evaluated by the Agency because it is relevant to the registration decision which the Agency must make. Moreover, the deceptively simple-sounding task of determining the minimal, legally sufficient data required to support each application is likely to lead to frequent disputes. Some applicants can be expected to disagree with an Agency determination that certain previously submitted data are necessary to support the application and therefore are compensable; some previous data submitters likely will disagree with a determination that the data submitters likely will disagree with a determination that the data submitted with an application are sufficient. The Agency cannot by regulation adopt procedural mechanisms (such as administrative hearings or binding arbitration) to resolve finally such disputes. After any administrative resolution of such disputes, the Agency could be required to participate in *de novo* court trials regarding each such dispute.

These and other problems stemming from the present statutory uncertainties and from concerns about competing interests of data submitters and registration applicants have prompted the Agency to work extensively with industry representatives to present legislative initiatives to the Congress which would provide the statutory framework for approval of registration applications supported by data which can be judged sufficient for regislation without any duty on the part of the applicant to compensate for relevant additional data which the Agency may consider in evaluating the application. The House of Representatives has passed a bill containing amendments to FIFRA which, if it were to become law, would implement a complete statutory scheme for this kind of handling of data

review and data compensation. (H.R. 5203, passed by the House on August 11, 1982.) The full Senate has not yet acted on any comparable bill.

Illustrative of the kind of statutory provisions which the Agency feels would be required to implement this kind of system are (1) the provision in H.R. 5203 which distinguishes for compensation purposes between data required for registration and data considered by the Agency in evaluating the registration application, and (2) the provision which establishes a statutory mechanism to identify potentially compensable data previously submitted in a manner suited to use by applicants of a "pick and choose" approach. Particularly instructive of the sort of statutory changes necessary to implement this kind of compensation scheme is the provision of H.R. 5203 for resolution of disputes about whether an applicant has submitted or cited specific data sufficient to satisfy minimum data requirements:

BILLING CODE 6560-50-M

"(K) Each application for registration of a new product for reregistration, for an experimental use permit, or for amendment of an existing registration to add a use shall include a list of the applicable data requirements, a list of the data the applicant is submitting or citing to satisfy each such requirement, and a certification that the applicant is not precluded by subparagraph (A), (B), (C), or (D) of this paragraph from relying on any of the data listed with the application. After the Administrator has approved an application, the lists and certification shall be available to the public. Any person who claims that such an applicant has incorrectly listed the applicable data requirements, has not submitted or cited data sufficient to satisfy those requirements, has not submitted a required authorization from a data submitter or otherwise has failed to comply with subsection (c)(1)(D) or (h) of this section, and who claims, in that person's capacity as the original submitter of data included on an index described by subsection (h)(2)(I) of this section, to have been adversely affected by the approval of the application may petition the Administrator to hold a hearing to determine whether the registration should be canceled. Such petition shall be in writing and shall contain a detailed statement of reasons why the registration should be canceled. Upon receipt of the petition, the Administrator shall afford the registrant a reasonable period of time, not to exceed 60 days, to respond to the petitioner's allegations. The Administrator shall then decide in writing within 30 days what action to take on the petition.

"(i) If the Administrator finds that the petition and any response show that there is no reasonable possibility that a hearing would lead to cancellation of the registration for the reasons set forth in the petition, the Administrator shall deny the petition. Any such denial shall be a final

Agency action for purposes of judicial review under section 16(a) of the Act. The reviewing court shall not allow discovery proceedings nor receive testimony or evidence, and shall base its review solely on the petition, the registrant's response, the Administrator's decision, and the pleadings and briefs filed with the court. If the court finds that the Administrator's decision was arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law, the court shall remand the matter to the Administrator for purposes of holding a hearing under this subparagraph. If the court does not so find, the case shall be dismissed.

"(ii) If the Administrator finds that the petition and any response indicate that there is a reasonable possibility that a hearing may lead to cancellation of the registration for the reasons set forth in the petition, or if the Administrator is ordered by a court to hold a hearing, the Administrator shall issue a notice of intent to hold a hearing to determine whether the product's registration should be canceled, which notice shall be furnished by certified mail to the registrant and the petitioner. The hearing shall be held in the manner provided by section 6(d) of the Act: *Provided*, That the provisions of that section regarding referral of matters to a Committee of the National Academy of Sciences shall not apply to such a hearing: *And provided further*, That the petitioner shall have the burden of proving that the registration should be canceled. The Administrator's order following such a hearing shall be issued within 90 days from the date of the notice of intent to hold a hearing. An order following such a hearing that cancels the registration of a product shall take effect immediately upon issuance. Review of the Administrator's order following such a hearing shall be governed by section 16(b) of the Act. The provisions of this subparagraph and of subparagraph (L) of this paragraph shall constitute the sole and exclusive means of review, at the behest of any person other than the Administrator, of the extent to which an application for registration complies with subsection (c)(1)(D) or (h) of this section, notwithstanding the other provisions of this Act, chapters 5 and 7 of title 5 of the United States Code, or any other statute.

BILLING CODE 6560-50-C

A careful evaluation of this proposed statutory language contained in the bill passed by the House of Representatives should inform possible commenters of the potential problems facing the Agency if the "cite-all" approach were abandoned without new legislation. The Agency strongly encourages commenters to address the question of what mechanisms would be available to the Agency to resolve all the problems associated with data submitters' rights if commenters feel that the "cite-all" approach should be modified by regulation alone.

B. Conditional Registration Under FIFRA Section 3(c)(7)

The other type of registration the Agency is authorized to issue is conditional registration under FIFRA section 3(c)(7). Issuance of conditional registration is not required by the statute, but is within the Administrator's discretion subject to the restrictions in section 3(c)(7). Conditional registrations will be issued on the following basis:

1. *Registration under section 3(c)(7)(A) for products whose composition and proposed uses are identical or substantially similar to already registered products, or which differ only in ways which would not significantly increase the risk of unreasonable adverse effects on the environment.* In considering applications of this type, the Agency will actually review only those data necessary to establish that the product's composition and proposed uses would not significantly increase the risk of unreasonable adverse effects on the environment. (Under FIFRA sec. 3(c)(7)(A), the risk posed by already registered uses are considered as "givens." Other procedures are available for evaluating whether those risks are acceptable, e.g., reregistration, "RPAR" proceedings under 40 CFR 162.11, suspension, cancellation, and classification.) This incremental risk review will involve examination of the identity and amount of the product's active ingredients and the type of formulation (e.g., granular) in comparison to other products, evaluation of the risks that the product's active ingredients may pose, and evaluation of the incremental risks posed by the proposed uses. If no significant increase in risk if found, the product will be deemed registrable under section 3(c)(7)(A).

Section 3(c)(7)(A) requires an applicant to submit or cite "such data as would be required to obtain registration of a similar pesticide under [section3(c)(5)]." The legislative history [1] makes it clear that this requirement was incorporated to protect the economic rights of original data submitters under section 3(c)(1)(D).

As discussed above, an applicant for a section 3(c)(5) registration of a technical-grade or manufacturing-use product would be required to acknowledge reliance on all scientifically pertinent data. Accordingly, an applicant for a section 3(c)(7)(A) conditional registration must do the same. Any regulatory approach which varied this requirement for conditional registration would encounter all of the problems identified above in the discussion of unconditional registrations.

Applicants seeking to register (or amend the registration of) an end-use product under section 3(c)(7)(A) can also satisfy their section 3(c)(1)(D)(ii) obligation by acknowledging their reliance on all scientifically pertinent data. The Agency recognizes, however, that there are considerations favoring an alternative method of complying with section 3(c)(1)(D) for persons seeking to register or amend registration of end-use products. The problem of establishing just which data are pertinent to end-use product registrations has already been mentioned. In addition, the Agency has considered the transaction costs of using the cite-all approach (costs of identifying data submitters, making required compensation offers, and negotiating or arbitrating disputed matters). These costs generally would be proportionate to the number of data submitters an applicant would have to deal with. Because relatively large numbers of persons have submitted data to support end-use product registrations, transaction costs for registration of these products under the cite-all method could be high. In contrast, only a few persons will have submitted data concerning the safety of any particular active ingredient, and transaction costs would be correspondingly low for manufacturing-use products registrations.

Because of these problems, which are peculiar to applicants for registration of end-use products, EPA is providing in § 162.197 an alternate method which many of these applicants may choose to use. An applicant using the alternate method of supporting an application will not be required to acknowledge reliance on all the data in EPA's files which ultimately might prove to be relevant to the merits of his application. Instead, the applicant may provide a copy of all data necessary to satisfy the minimum requirements for data pertaining to the safety, efficacy, and other properties of his own product (as these requirements are specified in proposed 40 CFR Part 158 or by instructions to the applicant), including both old and new uses, and may direct EPA not to consider other data in support of the application (except data which, under FIFRA section 3(c)(2)(D), may be considered without regard to section 3(c)(1)(D)). If EPA concludes that the application cannot be approved on that basis, the application will be denied, unless the applicant chooses to withdraw the application or to amend it to acknowledge reliance on all information in the Agency's files.

To qualify for the alternate method of support, the data the applicant submits must be derived from tests performed on the applicant's own product (in the precise formulation for which approval is sought) or on another product of identical composition. Results from tests on similar but unidentical formulations will not be acceptable, because to accept such results would require further and complicated evaluations of scientific pertinence. The test data that will be required will vary according to the type of product and its use pattern, but generally will cover acute mammalian toxicity, some aspects of environmental chemistry and fish and wildlife toxicity, and product chemistry.

This alternate method of supporting an application can be used by all persons who desire to register (or amend the registration of) an end-use product. It can be used only, however, to satisfy those data requirements pertaining to the properties, safety, or efficacy of the formulated product itself. To the extent that an applicant is not exempted by FIFRA section 3(c)(2)(D) from submitting or citing data pertaining to the safety of one or more of the product's active ingredients, the applicant must acknowledge his reliance on all available data concerning the safety of each such active ingredient, by the means set out in 40 CFR 162.187 and 162.190.

Many end-use products, however, derive their active ingredients solely from other registered products purchased by the formulator from other producers. Applicants seeking registration of such products could comply with section 3(c)(1)(D) merely by use of the alternate procedure set out in § 162.197.

[1] See Report to Accompany S. 1678, Report No 95-334, Senate Committee on Agriculture, Nutrition & Forestry, 95th cong., 1st Sess., July 6, 1977 at 20-21; Report to Accompany H. R. 6881, Report No. 95-663, House Committee on Agriculture, 95th Cong., 1st Sess. October 5, 1977, at 28

2. *Amending registrations under section 3(c)(7)(B) to add previously unregistered uses.* The Agency will actually review only those data which are necessary to determine whether the proposed new use would significantly increase the risk of unreasonable adverse effects. Normally, we will not review previously submitted data which pertain to the risk posed by already registered uses. For purposes of determining the significance of the incremental risk posed by the new use, the risk posed by "old" uses again will be regarded as a "given."

FIFRA section 3(c)(7)(B), like section 3(c)(7)(A), indicates that for data compensation purposes, an applicant must submit or cite all data required to obtain registration of a similar pesticide under section 3(c)(5), and states that this includes data "other than data pertaining to the proposed additional use." The Agency interprets this as meaning that the data upon which the applicant must rely for 3(c)(1)(D) purposes are the data required to obtain a section 3(c)(5) registration of a new product with uses identical to all uses (old and new) that the applicant's product will have if the request for the amendment is approved.

Applicants for registration under section 3(c)(7)(B) will satisfy their section 3(c)(1)(D) obligations in the same manner as applicants for section 3(c)(7)(A) registration. Any applicant may acknowledge reliance on all pertinent data. Applicants seeking to add new uses to registered end-use products may instead use only the alternate method described in 40 CFR 162.197. Applicants for amendments of other end-use product registrations may use the alternate method with respect to data requirements applicable to the properties, safety and efficacy of the end-use product itself, but must acknowledge reliance on all data pertinent to safety of active ingredients to the extent that FIFRA section 3(c)(2)(D) does not exempt the applicant from this requirement.

IV. Method of Acknowledging Reliance on Data

Under the regulation proposed here, the method of acknowledging reliance on data to be used depends on whether the product's active ingredients have or have not been covered by a published registration standard. If such a standard has been issued for an active ingredient, all the data which form the basis for the standard will be listed in a bibliography that is part of the standard itself; applicants will merely have to indicate that they rely on all data listed in that bibliography (or on those portions of the bibliography pertinent to the uses for which the product will be labeled).

In other cases (except to the extent that the alternate method described in § 162.197 is used) the applicant is required to state that his application is based on (and that any resulting registration or amended registration should be regarded as if it were based on the Administrator's actual review of) the following categories of data:

1. All data actually submitted or specifically cited by the applicant in support of the application.

2. All other data in the Agency's files which would be pertinent to the registrability of the applicant's product (with the uses appearing on the labeling for which applicant seeks approval) if EPA were to conduct a full scientific review of the registrability of that product and its uses under FIFRA sec. 3(c)(5) (whether or not such a review actually is conducted in connection with the particular application).

The lack of a listing, in such an application, of all the individual studies of data upon which the registration "relies" should be of no concern to the original submitters of the data relevant to the registration action. Original data submitters know (or should know) which data they have submitted. Once they know what active ingredients a product contains and what its uses are, they can by reference to the Agency's data requirements, determine whether any of their data are relevant to the Agency's decision to register the product.

Some persons have commented that applicants would be required to offer to pay for a set of data, the scope and value of which are not known to the applicant at the time registration is granted and the obligation to pay compensation becomes fixed. This, they say, makes it impossible for them to know whether the compensation payable will be too large to justify their entry into the market. There are several ways by which the applicant may reduce or eliminate this uncertainty. First, he may consult the Agency's data catalogs. Although the listings are not complete, a considerable body of information is available and the applicant can learn much about what data the Agency has on file. Second, instead of first obtaining a registration and later negotiating, he can first contact the firms that have submitted data to EPA concerning his product's active ingredients, and negotiate compensation matters prior to actually seeking registration.

The Agency believes that many firms in the pesticide business will find it advantageous to enter into broad, long-term negotiated agreements concerning the use of data, thereby eliminating or reducing the need for application-specific negotiations.

A third way that an applicant can reduce or eliminate uncertainty concerning the compensation payable is by obtaining a decision under the arbitration provisions of section 3(c)(1)(D)(ii) before the registration issues. This could be accomplished by furnishing the listed data submitters a notification of intent to rely on data and an offer to pay compensation, either well before the application to the Agency is made or after application is made but before the registration issues. If, within the 90-day period after the data submitter receives such a notice, the parties are unable to reach agreement, either party may request a decision by an arbitrator. The statute does not state or imply that this 90-day period may commence only upon the Agency's receipt of an application for registration. The statute and its legislative history contemplate that in some cases the arbitration decision will precede the issuance of a registration, and that the duty to pay compensation fixed by arbitration awards will be contingent upon the issuance of the registration in question.

Of course, if an applicant seeks to fix the amount and terms of compensation prior to registration, in some cases he may have to disclose to the original data submitter(s) the proposed uses of the product in question well before registration, in order that the parties can determine which data are pertinent to the application. Some applicants may wish to avoid disclosing such information at that stage.

It should be noted that an applicant may have no duty actually to pay compensation for much of the data upon which an application is based. The statute places in the non-compensable category all data submitted to the Agency or its predecessors prior to January 1, 1970 (and all data submitted more than 15 years before the approval of the application in question, although this provision will be meaningful only after January 1, 1985). Moreover, the only data for which compensation is due are those which were submitted by an applicant or registrant, to support an application for registration, reregistration, or amendment of a registration to add new uses, to support an application for an experimental use permit, or to satisfy a requirement

imposed by the Administrator. See also the discussion in the following unit on FIFRA section 3(c)(2)(D). Finally, the Agency assumes that arbitration decisions will not award compensation in cases where the data submitter incurred no expenses in developing (or acquiring rights to) the data (see Conference Report on the FPA, S. Rep. No. 95–1188, 95th Cong., 2d Sess., September 12, 1978, at 29).

An applicant who chooses to use solely the alternate method of supporting his application set forth in § 162.197 will submit copies of data sufficient to satisfy the minimum requirements for unconditional registration of his product, and will direct the Agency to consider as supporting his application only those data, plus the data pertaining to the safety of the active ingredients which are exempt from compensation under FIFRA section 3(c)(2)(D).

V. Nature of the Offer To Pay Compensation

Once there is an identification of the data which are relevant to the Agency's decision to approve a registration, the statute itself is quite clear regarding the persons who may be eligible to receive compensation and regarding the data which, despite their relevance, are not compensable. Accordingly, the Agency's responsibility simply is to ensure that the offer to pay compensation which accompanies the application for registration is as broad as the law requires. The regulation would require each application to include the following statement:

> (Name of applicant) hereby offers and agrees to pay compensation to other persons, with regard to the approval of this application, to the extent required by section 3(c)(1)(D) of the Federal Insecticide, Fungicide and Rodenticide Act as amended, 7 U.S.C. sec. 136a(c)(1)(D).

The inclusion of a generalized offer to pay compensation in the application itself will ensure that even if, for whatever reason, the applicant fails to furnish a data submitter with an offer to pay compensation that should have been furnished, the obligation contemplated by the statute will still exist.

An applicant who uses the § 162.197 alternate method of support still must submit the generalized offer to pay compensation with his application, in order to protect any rights that other data submitters may have with respect to data the applicant has relied on.

VI. Notification of Data Submitters by Applicant

A. Applications Concerning Products With Active Ingredients for All of Which a Registration Standard Has Been Issued

The registration standard will list the data upon which the standard is based, and the identity of the original data submitters. A registration or reregistration will be issued only if the applicant states he has furnished a compensation offer to each such submitter of any item of data (except for data submitted before 1970, and data with respect to which the applicant and the original submitter have reached written agreement permitting the applicant's use of the data to support the application).

B. Applications Concerning Products With Active Ingredients for Which a Registration Standard Has Not Been Issued

1. *Applicants who have acknowledged reliance on all pertinent data.*

The Agency will prepare and publish a listing called "Pesticide Data Submitters by Chemical," which will consist of a computer scan of the Agency's so-called "Level 2" data catalog, by active ingredient, for names of companies which, according to the computerized data base, have submitted any item of data pertaining to each particular active ingredient. This publication will be available for use by applicants, and will be updated periodically.

A registration will be issued only if the applicant has furnished to the Agency a certification that he has examined this listing, and that he has furnished a compensation offer to all persons listed as the original submitters of the data pertaining to each of the active ingredients this product contains. (Compensation offers need not be sent, of course, to any person with whom the applicant already has reached written agreement concerning the amount and terms of payment of compensation payable with regard to approval of the application.)

The compensation offer the applicant is to furnish the original data submitter(s) prior to registration must include the name of the applicant's product, identification of each of its active ingredients, its intended uses, the applicant's name, address, and telephone number, a statement that the applicant offers to pay compensation as required by FIFRA, and an offer to commence negotiations with the data submitter.

The applicant's certification concerning the compensation offers he has made to original data submitters may accompany the application when it is first sent to EPA, or the applicant may instead furnish it later. However, no application to which the requirement applies will be approved until the applicant's certification has been received.

The Congress modified FIFRA section 3(c)(2) by adding a new paragraph (D), which states:

> "(D) *Exemption.*—No applicant for registration of a pesticide who proposes to purchase a registered pesticide from another producer in order to reformulate such purchased pesticide into an end-use product shall be required to—
>
> "(i) submit or cite data pertaining to the safety of such purchased product; or
>
> "(ii) offer to pay reasonable compensation otherwise required by paragraph (1)(D) of this subsection for the use of any such data."

This provision clearly relieves certain applicants of the duty to offer to pay, or pay, for certain data for which compensation might otherwise be owed. At the present time, however, EPA's data catalogs are not complete enough to allow an applicant to ascertain whether or not a particular original data submitter has submitted only data which pertain solely to "the safety of (a particular) purchased product." Whether or not this provision exempts an applicant from a duty actually to pay compensation to a particular data submitter can best be determined by asking the submitter what kinds of data he submitted. EPA advises applicants not to rely on FIFRA section 3(c)(2)(D) as an exemption from the requirement that offers to pay compensation must be furnished to each person who is listed in the pertinent portion of the Listing of Pesticide Data Submitters.

2. *Applications using the alternate method of support described in § 162.197.* We expect that few applicants using solely this method of satisfying FIFRA section 3(c)(1)(D) will have any duty to offer to pay compensation to other data submitters, because in most cases the data upon which the applicant relies will have been generated by the applicant himself or by someone who has already consented to the applicant's use of the data to support the application. (We expect this because the data must be derived from tests using the applicant's own product, or a product of identical composition as the substance tested.)

However, it is conceivable that an applicant using this method may rely on "compensable" data originally submitted by a firm which has not consented to its use by the applicant. To the extent the applicant knows of this, FIFRA section 3(c)(1)(D) requires him to

offer to compensate the original data submitter. If the applicant does not know the data are "compensable" or does not know who originally submitted them to EPA, he need not offer to compensate for their use unless the original data submitter contacts him.

An applicant who uses the § 162.197 method of support but whose product contains any active ingredient other than ones derived from purchased, registered pesticide products must comply with §§ 162.187 and 162.190 insofar as each such active ingredient is concerned. Thus if a formulator/applicant intends to buy from another person a registered technical grade product containing active ingredient A, and to combine it with another active ingredient B which the formulator himself produces, the formulator/applicant must send an offer to pay compensation to each person the listing of "Pesticide Data Submitters by Chemical" shows as having submitted data concerning ingredient B, but he need not send offers to persons listed as having submitted data concerning ingredient A. Under FIFRA section 3(c)(2)(D), he will have an actual duty to pay compensation only for data concerning the safety of ingredient B, not for data pertinent only to the safety of efficacy of end-use products containing ingredient B.

VII. Statutory Review

Copies of this proposal were provided to the Secretary of Agriculture and appropriate committees of Congress, in accordance with FIFRA sec. 25(a). The Secretary of Agriculture submitted the following comments pertaining to this proposal:

Comment 1

"With regard to the data compensation provisions under Section 3(c)(1)(D), we have comments on exclusive use of publicly produced data, and compensation to other data submitters when an applicant has submitted all the data required. We strongly believe that it is neither appropriate nor proper for a private company to be granted, pursuant to FIFRA regulation, exclusive use of data produced by public agencies or institutions unless the data have been sold or exclusive rights have been assigned to that company in order to generate interest in a new pesticide or a new use for a currently registered pesticide. The legislative history of Section 3(c)(1)(D) does not support any argument that Congress intended to automatically grant exclusive rights on publicly funded data to one competitor at the taxpayers' expense. Therefore, we propose that the following italic language be added to proposed 40 CFR 162.2(g)(1) at page 41, line 12:

"* * * are entitled to a 10-year period of protection, commencing on the data the product is first registered *unless the data have been produced by a public agency or institution. Such publicly produced data are not entitled to this period of protection unless exclusive rights have been granted to the applicant by the public agency or institution producing the data* * * *"

Comment 2

We are convinced that it is inappropriate to require an applicant to automatically acknowledge reliance on data in EPA files for compounds with identical or similar composition (§§ 162.173 and 162.174). We do not agree that FIFRA mandated such reliance. Submissions should be required to be complete either by providing all necessary data with the application or by citing data in EPA files. If a company wants to cite data in EPA files to augment their registration application, then requiring compensation is logical. We also agree that EPA may consider all relevant data in making a registration decision. However, compensation should not be required if an applicant's data meet the requirements for registration. If in a comparative review of file versus submitted data, EPA identifies differences in results, the agency can then approach the applicant to resolve the differences. In such cases, the applicant may then wish to cite file data and pay compensation or may provide another new set on data.

Comment 3

We believe that it is illogical to have two different sets of standards for conditional and unconditional registration. The preamble states at page 25 that, "The applicant may provide a copy of all data necessary to satisfy the minimum requirements for data pertaining to the safety, efficacy, and other properties of his own product * * * including both old and new uses, and may direct EPA not to consider other data in support of the application * * *" While the quote appears only to apply to conditional registration we believe it should apply across the board."

EPA response to comments 1 and 2

The Agency acknowledges the problem pointed out by USDA and believes that possible solutions may be developed in the course of this rulemaking. EPA welcomes any comments on USDA's proposed language, but would note that such language would be more appropriately located in another section of the regulation than in 162.2(g). That section simply describes the requirements and provisions of FIFRA, and cannot be used to modify those provisions. EPA does not interpret the exclusive use provisions as applying to publicly generated data, but admits that a clear statement to that effect may be in order.

EPA response to comment 3

EPA agrees and has revised the language of the section to eliminate reference to conditional registration.

The House Subcommittee on Department Operations, Research, and Foreign Agriculture of the Committee on Agriculture, submitted the following letter to Dr. John A. Todhunter, the Assistant Administrator for Pesticides and Toxic Substances:

November 5, 1982.

Dear Dr. Todhunter: I am writing in response to your letter of October 6, 1982, to the House Committee on Agriculture soliciting comments on the Agency's proposed Section 3 regulations. I commend the Agency for moving forward expeditiously to rectify the procedural issues raised by the Third Circuit District Court' order in the Mobay case. In light of the deadlines imposed by the Court and the statutory procedures which the Agency must follow in promulgating rules under the Federal Insecticide, Fungicide, and Rodenticide Act, your decision to initiate the rule-making by proposing your existing Section 3 regulations is well advised. I would urge the Agency, however, to proceed in a very deliberate fashion, especially with respect to the procedures followed by the Agency during the course of the rule-making.

The regulations adopted pursuant to Section 3 of FIFRA exert an tremendous influence on the type of pesticide registration program your Agency administers, and on the business practices and investment strategies pursued by the regulated industry. I also believe, although I recognize it is difficult to prove in a quantitative sense, that the Agency's Section 3 regulations play a major role in determining the overall efficency and environmental sophistication of pest control technologies as practiced throughout U.S. Agriculture, in homes and businesses, and almost every other niche of the natural environment where man and pests of all sorts interact. accordingly, I think it is important that the Agency realistically appraise, based upon the best information available at this time, how the Section 3 regulations should be modified to encourage more rapid commercial development and adoption of chemically sophisticated, information intensive pest control technologies.

I know that the Agency has helped support the research and development work underlying several well-documented and proven integrated pest management strategies which have greatly benefited this Nation. The key benefits achieved thus far have been lower cash production costs for farmers and enhanced environmental quality brought about by a redution in the volume of persistent, broad spectrum pesticides needed to attain an adequate level of control. I believes that the Section 3 regulations can, and should be modified in several ways in order to remove existing barriers and inequities within the regulatory framework which are acting as unnecessary and unintended deterrents to technological progress. As the rulemaking proceeds, I request that you keep me informed of your progress in the regard. Also, I will be offering at a later date additional recommendations in this regard for the Agency's consideration.

While I appreciate the practical necessity of proposing the existing Section 3 regulations, I hope that the Agency seizes upon the opportunity afforded by the rule-

making to adopt several long-overdue changes in the regulations governing the registration process. The most critical change, I believe, is eliminating cite-all. During the course of deliberations on H.R. 5203, the Agency and regulated community reached what I felt to be a realistic and workable solution to the cite-all problem. I am convinced that the essence of the legislative language addressing cite-all can be adopted by the Agency during the rule-making, and I respectfully urge you to do so.

Certain modest changes can, and should be made to the Section 3 regulations during the rule-making. Two procedural issues, though, are of great concern to me. First, the Agency should avoid becoming engaged in a protracted series of complex negotiations in an effort to render major reforms to the registration process. Your Agency, and the Office of Pesticide Programs, has already incurred substantial budget and personnel cuts which are straining considerably the ability of OPP to carry out its legislative mandates. I am deeply concerned by what I, and many others, perceive to be a slackening in the thoroughness of the Agency's scientific reviews of pesticide data and environmental hazards. This is, I recognize, and inevitable result of budget cuts and the new emphasis on completing registration actions on time and in great numbers. Hence, I think it would be ill-advised for the Agency to devote its limited resources to the typically endless, and often futile, task of reaching consensus among all interested parties on a major, far-reaching set of Section 3 regulations.

Last, I urge the Agency to carefully avoid proposing and adopting changes in the Section 3 regulations that would complicate or jeopardize early resolution of pending lawsuits involving the constitutionality of Section 3. I think it is vitally important that the registration process proceed even if flawed in certain respects, without major interruptions from any quarter, including the Congress and Courts. I an confident that the Agency's legal position will ultimately prevail in pending litigation, and urge you to carefully consider the possible legal consequences of procedural and substantive actions taken by the Agency during the course of the rule-making.

Sincerely,

George E. Brown, Jr.,

Chairman.

EPA response: EPA solicits any comments from interested parties on the points in the Subcommittee's letter that are pertinent to this proposal. In particular, the Agency is interested in comments on the interaction of the cite-all and exclusive use provisions as it affects subsequent applicants for registration of new chemicals.

In addition, the Agency has received a pre-publication submission from Rhone-Poulenc, Inc., offering for our consideration an alternate approach to cite-all. The "Description of Proposal" submitted by Rhone-Poulenc reads, in part,

We urge that EPA amend its current cite-all regulation to assure that an applicant who submits a request for a registration, reregistration, amended registration, conditional registration, (hereinafter "a registration") and experimental use permit (hereinafter "a permit"), and who chooses to rely entirely upon data developed and submitted by the applicant itself, may obtain a registration or permit provided the data submitted meet all of the necessary EPA criteria. In addition, however, prior to reaching a final decision on the application, EPA would be authorized, consistent with its historic practice, to review all other data in its files to corroborate its findings and assure that the registration or permit would not cause, or significantly increase the risk of, unreasonable adverse effects on the environment. If it would, the application could then be denied if appropriate.

The principal difference between our proposal and the current cite-all regulation is that under our proposal a subsequent applicant relying entirely upon its own data would no longer be blocked by the combined effect of the FIFRA exclusive use provision and the cite-all regulation from obtaining a registration or permit, and would no longer be required to offer to pay compensation to other registrants with similar data on file. However, under our proposal, as at present, no applicant could obtain the benefit of another registrant's data, rely on them, or cite them without full compliance with any applicable exclusive use and data compensation provisions.

We propose that the effective date of our changes largely conform to the legislation passed by the House of Representatives and the Senate Agriculture Committee. In short, since our proposal in its entirety addresses only those situations involving applicants who choose to rely solely on their own data, we urge that cite-all in these circumstances be abolished immediately. This is particularly important in the context of the combined effect of the exclusive use provision and cite-all. While we would urge that EPA similarly effectuate immediately the abolition of the current requirement that applicants who rely solely on their own data offer to pay compensation to others, we would acknowledge that EPA may feel it needs more time to make appropriate changes in this latter circumstance.

Finally, we understand EPA's concern that in the absence of a clear dispute resolution mechanism, new litigation may occur over any changes in data review procedures implemented administratively by EPA. However, we believe EPA has the authority to adopt in substantial part the data dispute resolution provisions set forth in H.R. 5203, Section 3(K). While the Agency obviously lacks authority to limit judicial review, it can require the development of an administrative record on data submissions in support of registration applications in such a manner that final Agency decisions on data review will be extremely difficult to overturn. Moreover, if EPA is correct that litigation will occur no matter how data review is handled, we would urge that the Agency abolish cite-all in the manner suggested in this proposal in order to be consistent with recent congressional and EPA efforts to amend Section 3. The Agency would then be in the position of defending data review procedures which do not sacrifice public safety but do facilitate entry into the marketplace for companies who can independently satisfy all the necessary data requirements for registration.

A copy of the full submission may be obtained from Jean M. Frane, Registration Division (TS–767–C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 1114, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22201, (703–557–0592). Comments are welcomed on Rhone-Poulenc's submission.

VIII. Regulatory Impact Analysis

Under Executive Order 12291, EPA must judge whether regulations are major and therefore ned a full Regulatory Impact Analysis. The compensation regulations are not major in terms of the annual cost impacts on the economy or in terms of cost of price increases for consumers or farmers. This regulation is significant in that it permits a registrant to cite other available data and thereby eliminate duplicative testing.

The transactional costs of data compensation to EPA and registrants have been small. EPA's role is mainly limited to explaining the options available to registrants regarding data compensation and ensuring that applicants comply with one option. The cost of administration to the Agency is minimal, e.g., about one person-year of effort per year. The transactional costs to registrants, consisting primarily of correspondence offering to pay compensation, usually are low because few letters are involved for a typical registrant and these can be handled by clerical staff due to their routine nature. Binding arbitration under the Act could result in higher expenses to applicants, but the Agency is aware of few instances where binding arbitration has been sought.

In general, registrants have not been involved in many actual data compensation payments. Much of the existing data are not compensable, because they were developed before 1970, or they are efficacy data that are no longer reviewed by the Agency. Most offer to pay statements involve data compensation for end-use products. Because the costs of these data are low, it is frequently not worth a great deal of effort to litigate in order to collect a payment. Moreover, the conditional registrant has access to the market prior to an agreement on data compensation being worked out. Thus, it is difficult for the owner of data on a formulated product to force negotiation of amounts

due. Apparently, the majority of end-use data owners do not seek compensation for their data because of the expense of exacting what would normally be a relatively small amount of money.

The compensation regulation effects transfers of funds among firms, not an out-of-pocket expenditure to the industry as a whole. Aside from transaction costs, such payments should not directly increase aggregate prices or affect aggregate production.

This rule has been reviewed under section 3(a) of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354; 94 Stat. 1165, 5 U.S.C. 60 et seq.), and it has been determined that it will not have a significant economic impact on a substantial number of small businesses, small governments, or small organizations. This conclusion is based on the Agency's preliminary analysis as required under Executive Order 12291.

This regulation was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

Provided in the data compensation regulation is an alternate method to cite-all for the formulator of an end-use product. This special provision has been made for small businesses to minimize the potential adverse impacts of the large number of offer to pay letters that could be required under the cite-all option. Accordingly, I certify that this regulation does not require a separate regulatory flexibility analysis under the Regulatory Flexibility Act.

Under the Paperwork Reduction Act, EPA must identify any information collection burdens which would be imposed by this proposed regulation and must obtain clearance from the Office of Management and Budget for any such data collection activities. Because these regulations are currently in effect, EPA has already obtained OMB clearance for the various forms involved in compensation.

List of Subjects in 40 CFR Part 162

Intergovernmental relations, Labeling, Packaging and containers, Pesticides and pests, Administrative practices and procedures.

Dated: December 17, 1982.

Anne M. Gorsuch,

Administrator.

PART 162—[AMENDED]

Therefore, it is proposed that 40 CFR Part 162 be amended as follows:

1. In § 162.2, by revising paragraph (g) to read as follows:

§ 162.2 Principal statutory provisions.

* * * * *

(g) *Exclusive use of data; data compensation.*—(1) *Exclusive use.* FIFRA section 3(c)(1)(D)(i) provides that data submitted in support of an application for registration of a product containing an active ingredient not contained in any currently registered or formerly registered product, and pertaining to that ingredient (or to a new combination of active ingredients) are entitled to a 10-year period of protection, commencing on the date the product is first registered. Data supporting applications which resulted in registrations of or before September 30, 1978, are not entitled to this period of protection. During the 10-year period the Administrator may not grant any application for registration which relies on the protected date unless the original submitter of the data has consented in writing. Data submitted during the 10-year period to support an application for an amendment adding a new use of such a product are entitled to the same kind of protection, for the balance of the 10-year period. However, "defensive" data, i.e., data which the Administrator has required the applicant to submit to maintain registration, and data pertaining solely to individual ingredients which were contained in products registered on or before September 30, 1978, are not entitled to such protection.

(2) *Data compensation.* FIFRA section 3(c)(1)(D)(ii) requires that applicants whose applications rely on certain data submitted by others after December 31, 1969, in support of requests for registration, reregistration, amended registration, or experimental use permits, or to maintain in effect an existing registration, must offer to pay compensation to the original data submitter. The statute further provides a mechanism for determining the amount and terms of any such compensation. FIFRA section 3(c)(2)(D) exempts certain data from this compensation requirement when the applicant seeks a registration action concerning an end-use product produced from a purchased, registered product. The requirements for compliance with FIFRA section 3(c)(1)(D)(ii) and section 3(c)(2)(D) are set forth in §§ 162.180 through 162.197.

* * * * *

§§ 162.9–1, 162.9–2, 162.9–3, 162.9–4, 162.9–5, 162.9–6, 162.9–7, 162.9–8 [Removed].

2. By removing §§ 162.9–1, 162.9–2, 162.9–3, 162.9–4, 162.9–5, 162.9–6, 162.9–7, and 162.9–8.

3. By adding a new Subpart F. to read as follows:

Subpart F—Compensation Procedures

Sec.
162.180 Registration actions to which compensation requirements apply.
162.182 Generalized offer to pay compensation.
162.185 Data compensation in cases where a registration standard exists for an active ingredient.
162.187 Acknowledgment of reliance on data for products with active ingredients for which no registration standard exists.
162.190 Offer to pay when relying on data for products with active ingredients for which no registration standard exists.
162.192 When required statements must be furnished.
162.195 Exemption.
162.197 Alternate procedure for certain applicants for registration of end-use products.

Authority: Sec. 3, 6 and 25 of FIFRA, as amended, 7 U.S.C. section 136 et seq.

Subpart F—Compensation Procedures

§ 162.180 Registration actions to which compensation requirements apply.

(a) Unless the Administrator first finds that the applicant has complied with Subpart F, the Administrator will deny any application for reregistration, for registration of a new product, or for an amendment to an existing registration, except as provided by paragraph (b) of this section.

(b) Sections 162.182 through 162.197 do not apply to applications to make only one or more of the following types of amendments to existing registrations, unless the Administrator or his designee finds that Agency consideration of scientific data would be necessary in order to approve the amendment under FIFRA section 3(c)(5):

(1) An increase or decrease in the percentage in the product of one or more of its active ingredients or deliberately added inert ingredients;

(2) A revision of the identity or amount of impurities present in the product;

(3) The addition or deletion of one or more deliberately added inert ingredients;

(4) The deletion of one or more active ingredients;

(5) A change in the source of supply of one or more of the active ingredients used in the product, if the new source of the active ingredient is a product which is registered under FIFRA section 3;

(6) Deletion of approved uses of claims;

(7) Redesign of the label format involving no substantive changes, express or implied, in the directions for use, claims, representations, or precautionary statements;

(8) Change in the product name or addition of an additional brand name, if no additional claims, representations, or uses are expressed or implied by the changes;

(9) Clarification of directions for use;

(10) Correction of typographical errors;

(11) Changes in the registrant's name or address;

(12) Adding or deleting supplemental registrants under § 162.6(b)(4);

(13) Changes in the package or container size;

(14) Changes in warranty, warranty disclaimer, or liability limitation statements, or addition to or deletion of such statements;

(15) "Splitting" a label for the sole purpose of facilitating the marketing of a product in different geographic regions with appropriate labels, where each amended label will contain previously approved use instructions (and related label statements) appropriate to a particular geographic region;

(16) Any other type of amendment, if the Administrator or his designee determines, by written finding, that Agency consideration of scientific data would not be necessary in order to approve the amendment under FIFRA section 3(c)(5); and

(17) Compliance with Agency regulations, adjudicatory hearing decisions, notices, or other Agency announcements that unless the registration is amended in the manner the Agency proposes, the product's registration will be suspended or cancelled, or that a hearing will be held under FIFRA section 6. (However, this paragraph does not apply to amendments designed to avoid cancellation or suspension threatened under FIFRA section 3(c)(2)(B) or because of failure to submit data.)

§ 162.182 Generalized offer to pay compensation.

Except as provided in § 162.180(b), each application for any registration action shall include the following statement:

(Name of applicant) hereby offers and agrees to pay compensation to other persons, with regard to the approval of this application, to the extent required by section 3(c)(1)(D) and 3(c)(2)(D) of the Federal Insecticide, Fungicide and Rodenticide Act, as amended, 7 U.S.C. sections 126a(c) (1)(D) and (2)(D).

§ 162.185 Data compensation in cases where a registration standard exists for an active ingredient.

Except as provided in § 162.180(b), each application for any registration action concerning a product containing any active ingredient for which the Agency has published a registration standard shall include:

(a) A citation of each such standard;

(b) The registrable uses listed in the standard(s) (or additional registrable uses, in the case of amendments) for which approval is sought;

(c) An acknowledgment that the application relies on all data which, according to the standards(s), support the registrability of each such use;

(d) A statement that the applicant has furnished to each person who, according to the cited standard(s), is an original submitter of an item of data submitted on or after January 1, 1970, which supports the registrability of the applicant's product (other than persons with whom the applicant has agreed in writing on the amount and terms of payment of any compensation that may be payable under FIFRA section 3 with regard to approval of the application);

(1) A notification of the applicant's intent to apply for registration, including the proposed product name, a listing of the product's active ingredients, and the product's intended uses (or proposed additional uses, in the case of amendments);

(2) An offer to pay the person compensation, with regard to the approval of the application, to the extent required by FIFRA sections 3(c)(1)(D) and (2)(D);

(3) An offer to commence negotiations to ascertain the amount and terms of compensation to be paid; and

(4) The applicant's name, address, and telephone number.

§ 162.187 Acknowledgement of reliance on data for products with active ingredients for which no registration standard exists.

Except as provided in §§ 162.180(b) and 162.197, each application for any registration action concerning a product containing any active ingredient for which EPA has not published a registration standard shall include an acknowledgement that for purposes of FIFRA section 3(c)(1)(D) the application relies on (and any resulting registration should be regarded as if it were based on the Administrator's consideration of) the following data:

(a) All data submitted or specifically cited by the applicant in support of the registration; and

(b) Each other item of data in the Agency's files which:

(1) Concerns the properties or effects of:

(i) Applicant's product;

(ii) A product which is identical or substantially similar in composition to applicant's product; or

(iii) One or more of the active ingredients of applicant's product for which EPA has not yet published a final registration standard; and

(2) Is one of the types of data that EPA would require to be submitted for scientific review by EPA if the application sought the initial registration under FIFRA section 3(c)(5) of a product with composition and intended uses identical or substantially similar to those of the applicant's product, under the data requirements in effect on the data EPA approves the applicant's present application.

§ 162.190 Offer to pay when relying on data for products with active ingredients for which no registration standard exists.

Each application to which § 162.187 applies shall also include a statement that the applicant has carefully examined the most recently published version of the EPA publication entitled "Pesticide Data Submitters by Chemical," and has furnished the following to each person listed as the original submitter of any data concerning any active ingredient of applicant's product for which EPA has not yet published a final registration standard (other than persons with whom the applicant has agreed in writing on the amount and terms of payment of any compensation that may be payable under FIFRA section 3 with regard to approval of the application):

(a) A notification of the applicant's intent to apply for registration, including the proposed product name, a listing of the product's active ingredients, and the uses (or a summary of those uses) which will appear on the product's labeling if the application is approved (including previously approved uses and proposed added uses);

(b) An offer to pay the person compensation, with regard to the approval of the application, to the extent required by FIFRA section 3(c)(1)(D) and (2)(D);

(c) An offer to commence negotiations to ascertain which data is subject to the compensation requirement of FIFRA section 3(c)(1)(D) and the amount and terms of compensation, if any, to be paid; and

(d) The applicant's name, address, and telephone number.

§ 162.192 When required statements must be furnished.

The materials required under §§ 162.185(d), 162.190, and 162.197(e) may be furnished to EPA with the original application or at any later time prior to EPA's approval of the application.

§ 162.195 Exemption.

(a) Under FIFRA section 3(c)(2)(D), an applicant who seeks registration, reregistration, or amended registration of an end-use product (as defined in paragraph (c) of this section) is exempt from the compensation requirement imposed by FIFRA section 3(c)(1)(D) with respect to data which pertain to the safety of any other registered pesticide product which the applicant purchases from another producer and uses in formulating his product.

(b) Data pertain to the safety of a purchased product if they would be scientifically pertinent to an Agency evaluation of the safety of the purchased product or one or more of its ingredients, rather than pertinent merely to an evaluation of the safety of an end-use product. To be pertinent to the purchased product's safety, the data need not have come from a test using the particular producer's product. For instance, any toxicity data from a test in which a reagent-grade, laboratory-grade, or technical-grade active ingredient was the substance tested normally would be scientifically pertinent to an evaluation of the safety of any pesticide product containing that active ingredient (with certain exceptions dependent on use patterns). However, toxicity data from a test in which the substance tested was a formulated, end-use product (whether or not use-diluted) normally would pertain only to the safety of the same end-use product, closely similar end-use products, or their ingredients, but not to the safety of other end-use products.

(c) As used in this section, the term "end-use product" means a pesticide product whose labeling bears instructions for using or applying the products (as packaged and sold, or after dilution by the applicator) for controlling pests or regulating plant growth. The term excludes products whose labeling allows use of the product to formulate other pesticide products.

(d) FIFRA section 3(c)(2)(D) does not provide an exemption from the FIFRA section 3(c)(1)(D) compensation requirements to the extent that an application relies on efficacy data, or on safety data not pertinent to the purchased product's safety (e.g., data concerning the safety of similar end-use products). FIFRA section 3(c)(1)(D) requires the applicant to furnish a compensation offer to the original submitters of such data. The list of "Pesticide Date Submitters by Chemical" (see § 162.190) does not at this time differentiate between types of data submitted. Accordingly, applicants for registration actions on end-use products should comply with the requirements in § 162.190 (furnish compensation offers to all listed data submitters with whom no written agreement has been reached), to avoid the risk of summary cancellation or denial as provided in FIFRA section 3(c)(1)(D)(ii). Negotiations with listed data submitters should disclose which data are exempt from the compensation requirement.

§ 162.197 Alternate procedure for certain applicants for registration of end-use products.

(a) An applicant for registration of a new product (or for amendment of an existing registration) need not comply with §§ 162.187 and 162.190 if:

(1) Each of the product's active ingredients is contained in some product currently registered under FIFRA;

(2) The product will be labeled as an end-use product, as defined in § 162.195(c); and

(3) The applicant complies with paragraphs (b) through (f) of this section. This section does not apply to other applicants.

(b) The applicant must furnish to EPA, with his application, a copy of each item of test data required to satisfy the minimum requirements for data that apply to the applicant's product and all of its uses, according to 40 CFR Part 158 (or instructions to the applicant by EPA), except that the applicant need furnish only data which are to be derived from tests using a formulated product as the test substance. All such data shall be derived from tests using the applicant's product (or another product with identical composition) as the substance tested.

(c) The applicant shall furnish with the data he submits a statement setting forth, to the best of his knowledge, the name and address of each person at whose expense each submitted item of data was generated, and how the applicant came into possession of each of the items of data (e.g., applicant generated the data; applicant obtained the data from another firm [identify]; applicant copied data from a publication; applicant obtained a copy of the data from EPA).

(d) The applicant shall submit with his application a statement that EPA, in its evaluation of the properties, efficacy, and safety of the formulated end-use product, may not consider any data as supporting the application, except the following data:

(1) The data the applicant has submitted to EPA under paragraph (b) of this section;

(2) Other data pertaining to the safety of the product's active ingredients, rather than to the safety of the end-use product; and

(3) Existing tolerances, food additive regulations, exemptions, and other clearances issued under the Federal Food, Drug, and Cosmetic Act.

(e) If the applicant knows that any item of data he submitted under this section was generated by (or at the expense of) another person who originally submitted the data to EPA (or predecessor, USDA) on or after January 1, 1970, to support an application for registration, experimental use permit, or amendment adding a new use to an existing registration, or for reregistration (unless the applicant and the original data submitter have reached written agreement on the amount and the terms of payment of any compensation that may be payable under FIFRA section 3(c)(1)(D)(ii) with regard to approval of the application), the applicant shall submit to EPA a statement that he has furnished to each such identified original data submitter:

(1) A notification of the applicant's intent to apply for registration, including the proposed product name;

(2) An offer to pay the person compensation, with regard to the approval of the application, to the extent required by FIFRA section 3(c)(1)(D) and 3(c)(2)(D);

(3) An identification of the item(s) of data to which the offer applies;

(4) An offer to commence negotiations to ascertain the amount and terms of compensation to be paid; and

(5) The applicant's name, address, and telephone number.

(f) If the applicant's product contains any active ingredient other than those that are present solely because of the incorporation into the product, during formulation, of one or more other registered pesticide products purchased from another producer, then applicant shall also comply with § 162.190 as to such active ingredient, and the application shall contain an acknowledgment that for purposes of FIFRA section 3(c)(1)(D) the application

relies on (and any resulting registration should be regarded as if it were based on the Administrator's consideration of) the following data:

(1) All data submitted or specifically cited by the applicant in support of the registration; and

(2) Each other item of data in the Agency's files that:

(i) Concerns the properties or effects of any such active ingredient; and

(ii) Is one of the types of data that EPA would require to be submitted for scientific review by EPA if the applicant sought the initial registration under FIFRA section 3(c)(5) of a product with composition and intended uses identical to those proposed for the applicant's product, under the data requirements in effect on the date EPA approves the applicant's present application.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Executive Order 12397 of December 23, 1982

National Commission on Social Security Reform

By the authority vested in me as President by the Constitution and laws of the United States of America, and specifically the Federal Advisory Committee Act, as amended (5 U.S.C. App. I), it is hereby ordered that Section 2(b) of Executive Order No. 12335, establishing the National Commission on Social Security Reform, is hereby amended to provide as follows:

"The Commission shall make its report to the President by January 15, 1983.".

Presidential Documents

Memorandum of December 23, 1982

Renewal of Trade Agreements With the People's Republic of China—Finding and Determination Under Subsection 405(b)(1) of the Trade Act of 1974

Memorandum for the United States Trade Representative

Pursuant to my authority under Section 405 of the Trade Act of 1974 (19 U.S.C. 2435), I find that a satisfactory balance of concessions in trade and services has been maintained during the life of the Agreement on Trade Relations between the United States of America and the People's Republic of China. I further determine that actual or foreseeable reductions in United States tariffs and nontariff barriers to trade resulting from multilateral negotiations have been satisfactorily reciprocated by the People's Republic of China.

This finding and determination shall be published in the **Federal Register**.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 47, No. 249
Tuesday, December 28, 1982

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

GENERAL ACCOUNTING OFFICE

4 CFR Part 12

General Procedures; Code of Ethics

AGENCY: General Accounting Office.
ACTION: Final rule.

SUMMARY: This rule removes from the CFR, regulations setting forth the code of ethics of the General Accounting Office. Because of frequently changing requirements in GAO, these regulations will no longer be published in the **Federal Register**; instead, they will be set forth in GAO Orders 2735.1, 2735.2, and 2735.3. This will simplify the process for revising these regulations.

EFFECTIVE DATE: December 28, 1982.

FOR FURTHER INFORMATION CONTACT: Frances A. McCoy, Personnel Management Specialist, Personnel, United States General Accounting Office, Washington, D.C. (Area Code 202–275–5949).

Accordingly, Title 4 CFR, Part 12 is removed.

PART 4—[REMOVED]

(Sec. 311, 42 Stat. 25, as amended (31 U.S.C. 52; interpret or apply 18 U.S.C. 201–218)).

Charles A. Bowsher,
Comptroller General of the United States.

BILLING CODE 1610–01–M

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 213, 315, 351, 551, 734, 738, 752, and 950

Corrections; Technical Amendments

AGENCY: Office of Personnel Management.
ACTION: Final rule, corrections.

SUMMARY: The Office of Personnel Management is correcting minor inaccuracies and incomplete authority citations in its regulations under Title 5 of the Code of Federal Regulations (5 CFR). These amendments make no substantive changes to the regulations, but are issued to improve the technical integrity of 5 CFR by eliminating errors caused through administrative oversight.

EFFECTIVE DATE: December 28, 1982.

FOR FURTHER INFORMATION CONTACT: Laurel M. Burcham, (202) 254–5966.

SUPPLEMENTARY INFORMATION: In order to correct inaccuracies and omissions in its regulations, the Office of Personnel Management is making the following changes to Title 5 of the Code of Federal Regulations:

(1) In the heading of § 213.3201, the word "possible" is being replaced by the word "practicable." In final regulations published by OPM on April 3, 1982, (46 FR 20146) the word "practicable" appeared correctly in the table of contents but the word "possible" was inadvertently used in the section heading.

(2) In § 351.301, a reference to § 351.203(i)(1) is being changed to § 351.203(h) due to a redesignation of that paragraph published on April 29, 1982 (45 FR 28301).

(3) A final rule correction published on August 21, 1981, (46 FR 42437) amended § 752.401 by revising paragraph (c)(8) rather than redesignating it as (c)(9). The paragraph replaced by the revision is being reincorporated as (c)(9).

(4) The authority citations for several parts are being revised to reference the applicable sections of the United States Code or to correct Executive order citations.

Pursuant to section 553 of title 5 of the United States Code, the Director finds that good cause exists for waiving the general notice of proposed rulemaking and the 30-day delay in effectiveness. The amendments are being made effective immediately because the changes involved are technical and clarifying in nature, and make no substantive alterations to the regulations. Publication before December 31, 1982, would enable the amendments to be incorporated in the 1983 edition of 5 CFR.

U.S. Office of Personnel Management.
Donald J. Devine,
Director.

Accordingly, OPM is amending Title 5 of the Code of Federal Regulations as follows:

PART 213—EXCEPTED SERVICE

§ 213.3201 [Amended]

1. The heading for § 213.3201 is amended by removing the word "possible" and inserting in its place the word "practicable."

PART 315—CAREER AND CAREER-CONDITIONAL EMPLOYMENT

2. The authority for § 315.708 is revised to read as follows:

§ 315.708 Conversion based on service as a Presidential Management Intern.

* * * * *

(E.O. 12364, 47 FR 22931, May 24, 1982)

PART 351—REDUCTION IN FORCE

§ 351.301 [Amended]

3. In § 351.301, the reference to section "351.203(i)(1)" is removed and section "351.203(h)" is inserted in its place.

PART 551—PAY ADMINISTRATION UNDER THE FAIR LABOR STANDARDS ACT

4. In Part 551, the authority for Subpart B is revised to read as follows:

Subpart B—Exemptions

Authority: Sec 4(f) of the Fair Labor Standards Act as amended by Pub. L. 93–259, enacted April 8, 1974; 29 U.S.C. 204f.

PART 734—EXECUTIVE PERSONNEL FINANCIAL DISCLOSURE REQUIREMENTS

5. The authority for Part 734 is revised to read as follows:

Authority: Titles II and IV of Pub. L. 95–521 (October 26, 1978), as amended by Pub. L. 96–19 (June 13, 1979); 5 U.S.C. Appendix 201.

PART 738—OFFICE OF GOVERNMENT ETHICS

6. The authority for Part 738 is revised to read as follows:

Authority: Titles II and IV of Pub. L. 95–521 (October 26, 1978), as amended by Pub. L. 96–19 (June 13, 1979) and Pub. L. 96–28 (June 22, 1979); 5 U.S.C. Appendix 401.

PART 752—ADVERSE ACTIONS

7. In § 752.401(c), subparagraphs (9) through (14) are redesignated as subparagraphs (10) through (15) respectively; and a new subparagraph (9) is added to read as follows:

§ 752.401 Coverage.

* * * * *

(c) * * *

(9) Cancellation of a promotion to a position not classified prior to the promotion;

* * * * *

PART 950—SOLICITATION OF FEDERAL CIVILIAN AND UNIFORMED SERVICE PERSONNEL FOR CONTRIBUTIONS TO PRIVATE VOLUNTARY ORGANIZATIONS

8. The authority citation for Part 950 is revised to read as follows:

Authority: E.O. 12353, 47 FR 12785, March 25, 1982.

(5 U.S.C. 1103)

[FR Doc. 82-35052 Filed 12-27-82; 8:45 am]

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 24

Organization and Functions; Rules of Procedure of Board of Contract Appeals, Department of Agriculture

AGENCY: Office of the Secretary, USDA.

ACTION: Final rule.

SUMMARY: This rule revises the jurisdiction of the Agriculture Board of Contract Appeals by deleting that provision related to referrals to the Board from the Commodity Credit Corporation and by excluding from the jurisdiction of the Board appeals from decisions of Forest Service officers with respect to disputes arising under grazing and special use permits issued by the Forest Service. Rules of Procedure to be followed in proceedings governed by the Contract Disputes Act are added to the presently published rules governing proceedings under the Board's nonstatutory jurisdiction. These changes result from the enactment of the Contract Disputes Act, review of existing procedures, and consideration of USDA and public experience since 1974 with current procedures.

EFFECTIVE DATE: January 27, 1983.

FOR FURTHER INFORMATION CONTACT: Administrative Judge Jewel F. Lewis, Chair, USDA Board of Contract Appeals, (202) 447-2066 or (202) 447-7023.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published on pages 36554-36564 of the **Federal Register** of August 20, 1982, and invited comments for 60 days ending October 19, 1982. No public comments were received.

Only one change has been made to the proposed rules. An exclusion to the Board's nonstatutory jurisdiction has been reinstated at section 24.4(b)(2) to clarify that management and policy decisions reviewable under Forest Service administrative appeal procedures found at 36 CFR 211.19 (proposed to be revised as 36 CFR 211.18) are not within the Board's jurisdiction. The language used is identical to the exclusion presently found at § 24.4(e)(2) and was reinstated to make clear no change is intended in this regard.

This rule will clarify the Agriculture Board of Contract Appeal's jurisdiction and procedures as well as remove confusion about the jurisdictional responsibility within the U.S. Department of Agriculture for review of disputes on grazing and special use permits by placing under 36 CFR 211.18 all aspects of appeals relating to grazing and special use permits which currently would be brought under § 24.4(e).

Regulatory Impact

This action is a delegation of administrative authority and is, therefore, exempt from the requirements of Executive Order 12291.

Small Entity Impact

This rule will not have a significant economic impact on a substantial number of small entities. Therefore, an analysis of impacts on small entities is not required.

Environmental Impact

This rule relates to delegation of authority and the internal administration of the U.S. Department of Agriculture. Therefore, it does not constitute a major federal action affecting the quality of the human environment.

Paperwork Burden

This rule will impose no additional paperwork requirements on individuals or groups who appeal decisions of the Department of Agriculture to the Board of Contract Appeals, Department of Agriculture.

List of Subjects in 7 CFR Part 24

Administrative practice and procedure, Agriculture, Government contracts, Organization and functions (Government agencies).

For the reasons set forth above, Part 24, Subpart A—Organization and Functions, and Subpart B—Rules of Procedure, of Subtitle A of Title 7, Code of Federal Regulations is revised to read as follows:

PART 24—BOARD OF CONTRACT APPEALS, DEPARTMENT OF AGRICULTURE

Sec.
24.1 General.
24.2 Composition of the Board.
24.3 Presiding Administrative Judge.
24.4 Jurisdiction.
24.5 Time for filing notice of appeal.
24.6 Board location and address.
24.7 Public information.
24.8 Rules of procedure.
24.9 Definitions.

Subpart B—Rules of Procedure

24.21 Rules of Procedure of Agriculture Board of Contract Appeals—AGBCA.

Authority: 5 U.S.C. 301; 40 U.S.C. 486(c) sec. 4, 62 Stat. 1070, as amended (15 U.S.C. 714b); 30 Stat. 35, as amended (16 U.S.C. 551); 50 Stat. 525, as amended (7 U.S.C. 1011(f)); secs. 9, 10, 62 Stat. 1072, 1073 (15 U.S.C. 714g, 714h); sec. 8, 92 Stat. 2383 (41 U.S.C. 601-613).

Subpart A—Organization and Functions

§ 24.1 General.

The Board of Contract Appeals, United States Department of Agriculture (referred to as the "Board") is an agency of the Department established by the Secretary of Agriculture in accordance with the requirements of the Contract Disputes Act of 1978 (Pub. L. 95-563, 41 U.S.C. 601-613). The provisions of 5 U.S.C. 551-559 (Administrative Procedure Act, 80 Stat. 378, as amended) are not applicable to proceedings before the Board except for the requirements under 5 U.S.C. 552 (61 Stat. 54) respecting public information, agency rules, opinions, orders, and records.

§ 24.2 Composition of the Board.

The Board consists of a Chair, Vice Chair, and other members, all of whom are attorneys at law duly licensed by a state, commonwealth, territory, or the District of Columbia. The Chair shall manage the business and operations of the Board, assign cases to members, and establish panels for cases. Except as provided in Rule 12.2 the Small Claims (Expedited) Procedure, and Rule 12.3 the Accelerated Procedure, § 24.21(b), and in Rule 9, Accelerated Procedure, § 24.21(c), decisions of the Board will be rendered by a panel of three Administrative Judges, and the decision

of the majority of the panel will constitute the decision of the Board. The Vice Chair shall perform the functions of the Chair upon request of the Chair or in the event of absence or inability of the Chair to act. Members are designated Administrative Judges.

§ 24.3 Presiding Administrative Judge.

The Chair acts as Presiding Administrative Judge, or designates a member of the Board to so act, in each proceeding. The Presiding Administrative Judge has power to:

(a) Rule upon motions and requests;

(b) Adjourn the hearing from time to time and change the time and place of hearing;

(c) Administer oaths and affirmations and take affidavits;

(d) Receive evidence;

(e) Order the taking of depositions;

(f) Admit or exclude evidence;

(g) Hear oral argument on facts or law;

(h) Consolidate appeals filed by two or more appellants; and

(i) Do all acts and take all measures necessary for the maintenance of order at the hearing and the efficient conduct of the proceeding.

In cases considered by the Board under § 24.4(b) the Chair is hereby delegated authority to request subpoenas pursuant to 5 U.S.C. 304.

§ 24.4 Jurisdiction.

(a) *Statutory.* Pursuant to the Contract Disputes Act of 1978 (Pub. L. 95–563, 41 U.S.C. 601–613), the Board shall consider and determine appeals from decisions of contracting officers relating to contracts entered into on or after March 1, 1979, and, at the contractor's election, contracts entered into prior to March 1, 1979, with respect to claims pending before the contracting officer on March 1, 1979, or initiated thereafter. For purposes of this paragraph (a) the term "contracts" shall mean express or implied contracts made by the Department of Agriculture, agencies of the Department and the Commodity Credit Corporation, or by any other executive agency when such agency or the Administrator for Federal Procurement Policy has designated the Board to decide the appeal, for:

(1) The procurement of property, other than real property in being;

(2) The procurement of services;

(3) The procurement of construction, alteration, repair or maintenance of real property; or

(4) The disposal of personal property.

(b) *Non-statutory.* (1) Pursuant to the Disputes Article of contracts, other than timber sale contracts, entered into prior to March 1, 1979, made by the Department of Agriculture, agencies of the Department and the Commodity Credit Corporation, the Board shall consider and determine appeals from decisions of contracting officers arising under such contracts, unless election by the contractor brings the appeal under the statutory jurisdiction described in paragraph (a) of this section.

(2) The Board shall have jurisdiction of appeals from decisions of contracting officers of the Forest Service (as defined in § 24.9), in which the issue under appeal arises under the terms or provisions of timber sale contracts, except that:

(i) Appeals subject to Board jurisdiction involving Forest Service decisions under § 24.4(a), (c) or (d) shall be excluded from jurisdiction under this paragraph.

(ii) Appeals subject to administrative review under 36 CFR 211.18 involving management and policy decisions and not involving breach of contract shall be excluded from jurisdiction under this paragraph, and

(iii) No appeal under this paragraph shall lie where the relief sought is reformation of contract, monetary damages or amendment of contract at the discretion of the Forest Service to extend the term of the contract.

(c) *Contract Work Hours Standards Act.* The Board shall have jurisdiction of appeals taken from decisions of contracting officers of the Department of Agriculture under the Contract Work Hours Standards Act (Pub. L. 87–581, August 13, 1962, 76 Stat. 357; 40 U.S.C. 327–332).

(d) *Debarment.* The Board shall have jurisdiction to hear and determine the issue of debarment and the period thereof, if any, on an appeal by a person debarred: (1) By an authorized official of the Commodity Credit Corporation under 7 CFR 1407.6(d), or (2) by an authorized official of the Department of Agriculture, under 41 CFR 4–1.604–1(b), or (3) by an authorized official of the Farmers Home Administration, under Subpart C of Part 1918, Chapter XVIII of this title.

§ 24.5 Time for filing notice of appeal.

A notice of appeal under § 24.4(a) shall be filed within 90 days from the date of receipt of a contracting officer's decision. (41 U.S.C. 606.) a notice of appeal under § 24.4(b)(1) shall be filed within 30 days from the date of receipt of the decision of the contracting officer or within such different time as may be prescribed in the contract or other applicable regulation of the Department. A notice of appeal under § 24.4(b)(2) shall be filed within 30 days from the date of receipt of the decision of the contracting officer of the Forest Service. The time for filing a notice of appeal shall not be extended by the Board.

§ 24.6 Board location and address.

The Board of Contract Appeals is located in Washington, D.C. All correspondence and all documents to be filed with the Board should be addressed to the Board of Contract Appeals, United States Department of Agriculture, Washington, D.C. 20250. The Board's telephone number is 202–447–7023.

§ 24.7 Public information.

(a) The records of the Board are open to the public for inspection and copying at the office of the Board. Decisions and rulings of the Board shall be published from time to time and copies made available to the public upon request at cost of duplication except that the Board shall, in its discretion, have authority to make copies of decisions and rulings available at no charge in accordance with the Record Copying Policy and Procedures of the Department (39 FR 26050). Hearings before the Board shall be open to the public.

(b) Information which is to be made available for public inspection and copying under provisions of 5 U.S.C. 552(a)(2) and 7 CFR 1.2 may be obtained at the office of the Board. The address of the Board is set forth in § 24.6. Except for such information as is generally available to the public, requests should be in writing and submitted in accordance with 7 CFR 1.3 and paragraphs (c) and (d) of this § 24.7.

(c) Facilities for copying are available at the office of the Board.

(d) Facilities for inspection and copying are available during established office hours for the Board, usually 8:30 a.m. to 5:00 p.m., Monday through Friday. The Department of Agriculture has established a schedule of fees for copies of information. The Board charges for copies of records in accordance with the Department fee schedule.

(e) The Vice Chair is authorized to receive requests for records submitted in accordance with 7 CFR 1.3(a), and to make determinations regarding whether to grant or deny requests for records exempt from mandatory disclosure under the provisions of 5 U.S.C. 552(b). This official is authorized to (1) Extend the ten-day administrative deadline for reply pursuant to 7 CFR 1.8, (2) make discretionary releases pursuant to 7 CFR 1.11(b) of records exempt from mandatory disclosure, and (3) make determinations regarding the charging of fees.

(f) Appeals from denials of requests submitted under paragraph (c) of this section shall be submitted in accordance with 7 CFR 1.3(e) to the Chair, Board of Contract Appeals, Department of Agriculture, 12th Street and Independence Avenue, SW, Washington, D.C. 20250. The Chair shall determine whether to grant or deny the appeal and shall also make all necessary determinations relating to an extension of the twenty-day administrative deadline for reply pursuant to 7 CFR 1.8, discretionary release pursuant to 7 CFR 1.11(b) of records exempt from mandatory disclosure under 5 U.S.C. 552(b), and the charging of appropriate fees.

§ 24.8 Rules of procedure.

The Chair of the Board shall prescribe its Rules of Procedure and publish such Rules in Subpart B of this Part 24 and may prescribe and so publish amendments from time to time. The Rules of Procedure and any amendments thereto shall be consistent with this subpart.

§ 24.9 Definitions.

"Board" means the Board of Contract Appeals established under this Subpart.

"Contract" means any agreement entered into the Department or its agencies or authorized officials with any person having the legal effect of a contract between the Department and such person.

"Contracting officer" means any person who, by appointment in accordance with applicable regulations, has the authority to enter into and administer contracts and make determinations and findings with respect thereto and includes the authorized representative of the contracting officer, acting within the limits of his/her authority. For purposes of appeals under § 24.4(b)(2), "contracting officer of the Forest Service" means a Forest Supervisor, Forest and Range Experiment Station Director, Forest Products Laboratory Director, Area Director, Regional Forester, or the Chief, Forest Service, as the case may be, who is the person designated as the contracting officer under the contract, or any officer or employee of the Forest Service who is authorized to act in his/her stead.

"Department" means the United States Department of Agriculture.

"Government attorney" means the attorney of the Department designated to handle a particular appeal on behalf of the contracting officer.

"Person" means any individual, partnership, public or private corporation, association, agency or other legal entity.

Subpart B—Rules of Procedure

§ 24.21 Rules of Procedure of Agriculture Board of Contract Appeals—AGBCA.

(a) *Preface to Rules.*—(1) *Time, computation and extensions.* (i) All time limitations specified for various procedural actions are computed as maximums and are not to be fully exhausted if the action described can be accomplished in a lesser period. Where appropriate and justified, however, extensions of time will be granted. All requests for extensions of time by either party shall be in writing and state good cause for the requested extension. The Board may grant such extensions on good cause shown except that the Board shall not extend the time prescribed under 7 CFR 24.5 for taking an appeal.

(ii) Except as otherwise provided by law, in computing any period of time prescribed by these rules or any order of the Board, the day of the event from which the designated period of time begins to run shall not be included, but the last day of the period shall be included unless it is a Saturday, Sunday, or a legal holiday, in which event the period shall run to the end of the next business day. If mailing is required, the date of the postmark shall be treated as the date action was taken.

(2) *Ex parte Communications.* No member of the Board or of the Board's staff shall entertain, nor shall any person directly or indirectly involved in an appeal submit to the Board or the Board's staff, off the record any evidence, explanation, analysis, or advice, whether written or oral, regarding any matter at issue in an appeal. This provision does not apply to consultation among Board members not to ex parte communication concerning the Board's administrative functions or procedures.

(b) *Rules of Procedure Applicable to Appeals under the Contract Disputes Act of 1978, 41 USC 601 et seq.* (7 CFR 24.4(a)).

RULES

Preliminary Procedures

Rule 1. Appeals, How and When Taken

(a) Notice of Appeal—90 days. Notice of an appeal shall be in writing and mailed or otherwise furnished to the Board within 90 days from the date of receipt of a contracting officer's decision. A copy thereof shall be furnished to the contracting officer from whose decision the appeal is taken.

(b) Failure to Issue CO decision—60 days—$50,000 or less. Where the contractor has submitted a claim of $50,000 or less to the contracting officer and has requested a written decision within 60 days from receipt of the request, and the contracting officer has not done so, the contractor may file a notice of appeal as provided in paragraph (a) of this Rule 1, citing the failure of the contracting officer to issue a decision.

(c) Failure to Issue CO decision—Reasonable Time—more than $50,000. Where the contractor has submitted a claim in excess of $50,000 to the contracting officer and the contracting officer has failed to issue a decision within a reasonable time, the contractor may file a notice of appeal as provided in paragraph (a) of this Rule 1, citing the failure to issue a decision.

(d) Stay Pending Final CO Decision. Upon docketing of appeals filed pursuant to paragraphs (b) or (c) of this Rule 1, the Board may, at its option, stay further proceedings pending issuance of a final decision by the contracting officer within such period of time as is determined by the Board.

Rule 2. Notice of Appeal, Contents of

A notice of appeal should indicate that an appeal is being taken and should identify the contract (by number), the department and agency or bureau involved in the dispute, the decision from which the appeal is taken, and the amount in dispute if known. The notice of appeal should be signed by the appellant (the contractor making the appeal), or by the appellant's duly authorized representative or attorney. The complaint referred to in Rule 6 may be filed with the notice of appeal, or the appellant may designate the notice of appeal as a complaint, if it otherwise fulfills the requirements of a complaint.

Rule 3. Docketing of Appeals

When a notice of appeal in any form has been received by the Board, it shall be docketed promptly. Notice in writing shall be given to the appellant, with a copy of these rules, and to the contracting officer.

Rule 4. Preparation, Content, Organization, Forwarding, and Status of Appeal File

(a) Duties of Contracting Officer. Within 30 days of receipt of a letter from the Board transmitting the complaint, the contracting officer shall assemble and transmit to the Board through agency channels an appeal file in triplicate consisting of all documents pertinent to the appeal, including:

(1) The decision from which the appeal is taken;

(2) The contract, including specifications and pertinent amendments, plans, and drawings;

(3) All correspondence between the parties relevant to the appeal, including the letter or letters of claim in response to which the decisions was issued;

(4) Transcripts of any testimony taken during the course of proceedings, and affidavits or statements of any witnesses on the matter in dispute made prior to the filing of the notice of appeal with the Board; and

(5) Any additional information considered relevant to the appeal.

(b) Duties of the Appellant. Within 30 days after receipt from the Board of a copy of the appeal file assembled by the contracting officer, the appellant shall transmit to the Board in triplicate any documents not contained therein which the appellant considers relevant to the appeal.

(c) Organization of Appeal File. Documents in the appeal file may be originals or legible facsimiles or authenticated copies, and shall be arranged in chronological order where practicable, numbered sequentially, tabbed, and indexed to identify the contents of the file.

(d) Lengthy Documents. Upon request by either party, the Board may waive the requirement to furnish to the other party through the Board copies of bulky, lengthy, or out-of-size documents in the appeal file when inclusion would be burdensome. At the time a party files with the Board a document as to which such a waiver has been granted such party shall notify the other party that the document or a copy is available for inspection at the offices of the Board or of the party filing same.

(e) Status of Documents in Appeal File. Documents contained in the appeal file are considered, without further action by the parties, as part of the record upon which the Board will render its decision. However, a party may object, for reasons stated, to consideration of a particular document or documents reasonably in advance of hearing, or if there is no hearing, of settling the record. If such objection is made the Board shall remove the document or documents from the appeal file and permit the party offering the document to move its admission as evidence either prior to hearing or prior to closing the record if there is no hearing, in accordance with Rules 13 and 20.

(f) Dispensing with Appeal File requirements. Notwithstanding the foregoing, the filing of the Rule 4(a) and (b) documents may be dispensed with by the Board either upon request of the appellant in the notice of appeal or thereafter upon stipulation of the parties.

Rule 5. Dismissal for Lack of Jurisdiction

Any motion addressed to the jurisdiction of the Board shall be promptly filed. Hearing on the motion shall be afforded on application of either party. However, the Board may defer its decision on the motion pending hearing on both the merits and the motion. The Board shall have the right at any time and on its own initiative to raise the issue of its jurisdiction to proceed with a particular case, and shall do so by an appropriate order, affording the parties an opportunity to be heard thereon.

Rule 6. Pleadings

(a) Appellant—Complaint. Except as provided in Rule 12.2(b) and Rule 12.3(b), within 30 days after receipt of notice of docketing of the appeal, the appellant shall file with the Board an original and two copies of a Complaint setting forth simple, concise and direct statements of each of its claims. Appellant shall also set forth the basis, with appropriate reference to contract provisions, of each claim and the dollar amount claimed, to the extent known. This pleading shall fulfill the generally recognized requirements of a Complaint, although no particular form is required. Upon receipt of the Complaint, the Board shall serve a copy of it upon the Government. Should the Complaint not be filed within 30 days, appellant's claim and appeal may, if in the opinion of the Board the issues before the Board are sufficiently defined, be deemed to set forth its Complaint and the Government shall be so notified.

(b) Government—Answer. Within 30 days from receipt of the Complaint, or the aforesaid notice from the Board, the Government, shall prepare and file with the Board an original and two copies of an Answer thereto. The Answer shall set forth simple, concise and direct statements of Government's defenses to each claim asserted by appellant, including any affirmative defenses available. Upon receipt of the Answer, the Board shall serve a copy upon appellant. Should the Answer not be filed within 30 days, the Board may, in its discretion, enter a general denial on behalf of the Government, and the appellant shall be so notified.

Rule 7. Amendments of Pleadings or Record

The Board upon its own initiative or upon application by a party may order a party to make a more definite statement of the Complaint or Answer, or to reply to an Answer. The Board may, in its discretion, and within the proper scope of the appeal, permit either party to amend its pleading upon conditions fair to both parties. When issues within the proper scope of the appeal, but not raised by the pleadings, are tried by express or implied consent of the parties, or by permission of the Board, they shall be treated in all respects as if they had been raised therein. In such instances, motions to amend the pleadings to conform to the proof may be entered, but are not required. If evidence is objected to at a hearing on the ground that it is not within the issues raised by the pleadings, it may be admitted within the proper scope of the appeal, provided, however, that the objecting party may be granted a continuance if necessary to enable it to meet such evidence.

Rule 8. Hearing Election

After filing of the Government's Answer or notice from the Board that it has entered a general denial on behalf of the Government, each party shall advise whether it desires a hearing as prescribed in Rules 17 through 25, or whether it elects to submit its case on the record without a hearing, as prescribed in Rule 11.

Rule 9. Prehearing Briefs

Based on an examination of the pleadings, and its determination of whether the arguments and authorities addressed to the issues are adequately set forth therein, the Board may, in its discretion, require the parties to submit prehearing briefs in any case in which a hearing has been elected pursuant to Rule 8. If the Board does not require prehearing briefs either party may, in its discretion and upon appropriate and sufficient notice to the other party, furnish a prehearing brief to the Board. In any case where a prehearing brief is submitted, it shall be furnished so as to be received by the Board at least 15 days prior to the date set for hearing, and a copy shall simultaneously be furnished to the other party as previously arranged.

Rule 10. Prehearing or Presubmission Conference

(a) Conference. Whether the case is to be submitted pursuant to Rule 11, or heard pursuant to Ruels 17 through 25, the Board may upon its own initiative, or upon the application of either party, arrange a telephone conference or call upon the parties to appear before an Administrative Judge or examiner of the Board for a conference to consider:

(1) Simplification, clarification, or severing of the issues;

(2) The possibility of obtaining stipulations, admissions, agreements and rulings on

admissibility of documents, understandings on matters already of record, or similar agreements that will avoid unnecessary proof;

(3) Agreements and rulings to facilitate discovery;

(4) Limitation of the number of expert witnesses, or avoidance of similar cumulative evidence;

(5) The possibility of agreement disposing of any or all of the issues in dispute; and

(6) Such matters as may aid in the disposition of the appeal.

(b) Written results of conference. The Administrative Judge or examiner of the Board shall make such rulings and orders as may be appropriate to achieve settlement by agreement of the parties or to aid in the disposition of the appeal. The results of pretrial conferences, including any rulings and orders, shall be reduced to writing by the Administrative Judge or examiner and this writing shall thereafter constitute a part of the record.

Rule 11. Submission Without a Hearing

Either party may elect to waive a hearing and to submit its case upon the record before the Board, as settled pursuant to Rule 13. Submission of a case without hearing does not relieve the parties from the necessity of proving the facts supporting their allegations or defenses. Affidavits, depositions, admissions, answers to interrogatories, and stipulations may be employed to supplement other documentary evidence in the Board record. The Board may permit such submission to be supplemented by oral argument (transcribed if requested), and by briefs arranged in accordance with Rule 23.

Rule 12. Optional SMALL CLAIMS (EXPEDITED) and ACCELERATED Procedures

Notwithstanding any other provisions of these Rules of Procedure, the SMALL CLAIMS (EXPEDITED) and ACCELERATED procedures shall be available solely at the election of the appellant.

Rule 12.1 Elections to Utilize SMALL CLAIMS (EXPEDITED) and ACCELERATED Procedures

(a) SMALL CLAIMS (EXPEDITED)—$10,000 or less. In appeals where the amount in dispute is $10,000 or less, the appellant may elect to have the appeal processed under a SMALL CLAIMS (EXPEDITED) procedure requiring decision of the appeal, whenever possible, within 120 days after the Board receives written notice of the appellant's election. The details of this procedure appear in Rule 12.2.

(b) ACCELERATED—$50,000 or less. In appeals where the amount in dispute is $50,000 or less, the appellant may elect to have the appeal processed under an ACCELERATED procedure requiring decision of the appeal, whenever possible, within 180 days after the Board receives written notice of the appellant's election. The details of this procedure appear in Rule 12.3.

(c) Time for Election. The appellant's election of either the SMALL CLAIMS (EXPEDITED) procedure or the ACCELERATED procedure may be made by written notice within 60 days after receipt of notice of docketing the appeal unless such period is extended by the Board for good cause. The election may not be withdrawn except with permission of the Board for good cause.

(d) Board Determines Amount in Dispute. In deciding whether the SMALL CLAIMS (EXPEDITED) procedure or the ACCELERATED procedure is applicable to a given appeal, the Board shall determine the amount in dispute.

Rule 12.2 The SMALL CLAIMS (EXPEDITED) Procedure

(a) Time Periods for Proceedings. In cases proceeding under the SMALL CLAIMS (EXPDITED) procedure, the following time periods shall apply: (1) Within ten days from the Government's first receipt from either the appellant or the Board of a copy of the appellant's notice of election of the SMALL CLAIMS (EXPEDITED) procedure, the Government shall send the Board a copy of the contract, the contracting officer's final decision, and the appellant's claim letter or letters, if any; remaining documents required under Rule 4 shall be submitted in accordance with times specified in that rule unless the Board otherwise directs;

(2) Within 15 days after the Board has acknowledged receipt of appellant's notice of election, the assigned administrative judge shall take the following actions, if feasible, in an informal meeting or a telephone conference with both parties: (i) Identify and simplify the issues; (ii) establish a simplified procedure appropriate to the particular appeal involved; (iii) determine whether the appellant wants a hearing, and if so, fix a time and place therefor; (iv) require the Government to furnish all the additional documents relevant to the appeal, and (v) establish an expedited schedule for resolution of the appeal.

(b) Decisions—120 days. Pleadings, discovery and other prehearing activity will be allowed only as consistent with the requirement to conduct the hearing on the date scheduled, or if no hearing is scheduled, to close the record on a date that will allow decisions within the 120-day limit. The Board, in its discretion, may impose shortened time periods for any actions prescribed or allowed under these rules, as necessary to enable the Board to decide the appeal within the 120-day limit, allowing whatever time, up to 30 days, that the Board considers necessary for the preparation of the decision after closing the record and the filing of briefs, if any.

(c) Form of Decisions. Written decision by the Board in cases processed under the SMALL CLAIMS (EXPEDITED) procedure will be short and contain only summary findings of fact and conclusions. Decisions will be rendered for the Board by a single Administrative Judge. If there has been a hearing, the Administrative Judge presiding at the hearing may, in the Judge's discretion, at the conclusion of the hearing and after entertaining such oral arguments as deemed appropriate, render on the record oral summary findings of fact, conclusions, and a decision of the Appeal. Whenever such an oral decision is rendered, the Board will subsequently furnish the parties a typed copy of such oral decision for record and payment purposes and to establish the starting date for the period for filing a motion for reconsideration under Rule 29.

(d) No Precedent—Not Appealable. A decision against the Government or the contractor shall have no value as precedent, and in the absence of fraud shall be final and conclusive and may not be appealed or set aside.

Rule 12.3 The ACCELERATED Procedure

(a) Time Periods for Proceedings. In cases proceeding under the ACCELERATED procedure, the parties are encouraged, to the extent possible consistent with adequate presentation of their factual and legal positions, to waive pleadings, discovery, and briefs. The Board, in its discretion, may shorten time periods prescribed elsewhere in these Rules, including Rule 4, as necessary to enable the Board to decide the appeal within 180 days after the Board has received the appellant's notice of election of the ACCELERATED procedure, and may reserve 30 days for preparation of the decision.

(b) Decisions—180 days. Pleadings, discovery and other prehearing activity will be allowed only as consistent with the requirement to conduct the hearing on the dates scheduled, or if no hearing is scheduled, to close the record on a date that will allow decision within the 180-day limit. The Board, in its discretion, may impose shortened time periods for any actions prescribed or allowed under these rules, as necessary to enable the Board to decide the appeal within the 180-day limit, allowing whatever time, up to 30 days, that the Board considers necessary for the preparation of the decision after closing the record, and the filing of briefs, if any.

(c) Form of decisions. Written decisions by the Board in cases processed under the ACCELERATED procedure will normally be short and contain only summary findings of fact and conclusions. Decisions will be rendered for the Board by a single Administrative Judge with the concurrence of the Chair or a Vice Chair or other designated Administrative Judge, or by a majority among these two and an additional designated member in case of disagreement. Alternatively, in cases where the amount in dispute is $10,000 or less as to which the ACCELERATED procedure has been elected and in which there has been a hearing, the single Administrative Judge presiding at the hearing may, with the concurrence of both parties, at the conclusion of the hearing and after entertaining such oral arguments as deemed appropriate, render on the record oral summary findings of fact, conclusions, and a decision of the appeal. Whenever such an oral decision is rendered, the Board will subsequently furnish the parties a typed copy of such oral decision for record and payment purposes, and to establish the starting date for the period for filing a motion for reconsideration under Rule 29.

Rule 12.4. Motions for Reconsideration in Rule 12 cases

Motions for Reconsideration of cases decided under either the SMALL CLAIMS (EXPEDITED) procedure or the ACCELERATED procedure need not be

decided within the original 120-day or 180-day limit, but all such motions shall be processed and decided rapidly so as to fulfill the intent of this Rule.

Rule 13. Settling the Record

(a) Components of the Record. The record upon which the Board's decision will be rendered consists of the documents furnished under Rules 4 and 12, to the extent admitted in evidence, and the following items, if any: pleadings, prehearing conference memoranda or orders, prehearing briefs, depositions or interrogations received in evidence, admissions, stipulations, transcripts of conferences and hearings, hearing exhibits, posthearing briefs, and documents which the Board has specifically designated be made a part of the record. The record will, at all reasonable times, be available for inspection by the parties at the office of the Board.

(b) Closing Dates for Inclusion of Material. Except as the Board may otherwise order in its discretion, no proof shall be received in evidence after completion of an oral hearing or, in cases submitted on the record, after notification by the Board that the case is ready for decision.

(c) Weight Given to Evidence. The weight to be attached to any evidence of record will rest within the sound discretion of the Board. The Board may in any case require either party, with appropriate notice to the other party, to submit additional evidence on any matter relevant to the appeal.

Rule 14. Discovery—Depositions

(a) General Policy and Protective Orders. The parties are encouraged to engage in voluntary discovery procedures. In connection with any deposition or other discovery procedure, the Board may make any order required to protect a party or person from annoyance, embarrassment, or undue burden or expense. Those orders may include limitations on the scope, method, time and place for discovery, and provisions for protecting the secrecy of confidential information or documents.

(b) When Depositions Permitted. After an appeal has been docketed and complaint filed, the parties may mutually agree to, or the Board may, upon application of either party, order the taking of testimony of any person by deposition upon oral examination or written interrogatories before any officer authorized to administer oaths at the place of examination, for use as evidence or for purpose of discovery. The application for order shall specify whether the purpose of the deposition is discovery or for use as evidence.

(c) Orders on Depositions. The time, place, and manner of taking depositions shall be as mutually agreed by the parties, or failing such agreement, governed by order of the Board.

(d) Use as Evidence. No testimony taken by depositions shall be considered as part of the evidence in the hearing of an appeal until such testimony is offered and received in evidence at such hearing. It will not ordinarily be received in evidence if the deponent is present and can testify at the hearing. In such instances, however, the deposition may be used to contradict or impeach the testimony of the deponent given at the hearing. In cases submitted on the record, the Board may, in its discretion, receive depositions to supplement the record.

(e) Expenses. Each party shall bear its own expenses associated with the taking of any deposition.

(f) Subpoenas. Where appropriate, a party may request the issuance of a subpoena under the provisions of Rule 21.

Rule 15. Interrogatories to Parties, Admission of Facts, and Production and Inspection of Documents

After an appeal has been docketed and complaint filed with the Board, a party may serve on the other party: (a) Written interrogatories to be answered separately in writing, signed under oath and answered or objected to within 30 days; (b) a request for the admission of specified facts and the authenticity of any documents, to be answered or objected to within 30 days after service; the factual statements and the authenticity of the documents to be deemed admitted upon failure of a party to respond to the request; and (c) a request for the production, inspection and copying of any documents or objects not privileged, which reasonably may lead to the discovery of admissible evidence. Any discovery engaged in under this Rule shall be subject to the provisions of Rule 14(a) with respect to general policy and protective orders and of Rule 33 with respect to sanctions.

Rule 16. Service of Papers other than Subpoenas

Papers shall be served personally or by mail, addressed to the party upon whom service is to be made. Copies of Complaints, Answers and briefs shall be filed directly with the Board. The party filing any other paper with the Board shall send a copy thereof to the opposing party, noting on the paper filed with the Board that a copy has been so furnished. Subpoenas shall be served as provided in Rule 21.

Hearings

Rule 17. Where and When Held

Hearings will be held at such places determined by the Board to best serve the interests of the parties and the Board. Hearings will be scheduled at the discretion of the Board with due consideration to the regular order of appeals, Rule 12 requirements, and other pertinent factors. On request or motion by either party and for good cause, the Board may, in its discretion, adjust the date of a hearing.

Rule 18. Notice of Hearings

The parties shall be given at least 15 days notice of the time and place set for hearings. In scheduling hearings, the Board will consider the desires of the parties and the requirement for just and inexpensive determination of appeals without unnecessary delay.

Rule 19. Unexcused Absence of a Party

The unexcused absence of a party at the time and place set for hearing will not be occasion for delay. In the event of such absence, the hearing will proceed and the case will be regarded as submitted by the absent party as provided in Rule 11.

Rule 20. Hearings: Nature; Examination of Witnesses

(a) Nature of Hearings. Hearings shall be as informal as may be reasonable and appropriate under the circumstances. Appellant and the Government may offer such evidence as they deem appropriate and as would be admissible under the Federal Rules of Evidence or in the sound discretion of the presiding Administrative Judge or examiner. Stipulations of fact agreed upon by the parties may be regarded and used as evidence at the hearing. The parties may stipulate the testimony that would be given by a witness if the witness were present. The Board may require evidence in addition to that offered by the parties.

(b) Examination of Witnesses. Witnesses before the Board will be examined orally under oath or affirmation, unless the presiding Administrative Judge or examiner shall otherwise order. If the testimony of a witness is not given under oath, the Board may advise the witness that his statements may be subject to the provisions of Title 18, United States Code, sections 287 and 1001, and any other provision of law imposing penalties for knowingly making false representations in connection with claims against the United States or in any matter within the jurisdiction of any department or agency thereof.

Rule 21. Subpoenas

(a) General. Upon written request of either party filed with the recorder, or on the initiative of the Administrative Judge to whom a case is assigned, or who is otherwise designated by the Chair, such Administrative Judge may issue a subpoena requiring:

(1) Testimony at a deposition—the deposing of a witness in the city or county where such witness resides or is employed or transacts business in person, or at another location convenient for such witness that is specifically determined by the Board;

(2) Testimony at a hearing—the attendance of a witness for the purpose of taking testimony at a hearing; and

(3) Production of books and papers—in addition to (1) or (2), the production by the witness at the deposition or hearing of books and papers designated in the subpoena.

(b) Voluntary Cooperation. Each party is expected (1) to cooperate and make available witnesses and evidence under its control as requested by the other party, without issuance of a subpoena, and (2) to secure voluntary attendance of desired third-party witnesses and production of desired third-party books, papers, documents, or tangible things whenever possible.

(c) Requests for Subpoenas.

(1) A request for a subpoena shall normally be filed at least:

(i) 15 days before a scheduled deposition where the attendance of a witness at a deposition is sought;

(ii) 30 days before a scheduled hearing where the attendance of a witness at a hearing is sought.

In its discretion the Board may honor requests for subpoenas not made within these time limitations.

(2) A request for a subpoena shall state the reasonable scope and general relevance to the case of the testimony and of any books and papers sought.

(d) Requests to Quash or Modify. Upon written request by the person subpoenaed or by a party, made within 10 days after service but in any event not later than the time specified in the subpoena for compliance, the Board may (1) quash or modify the subpoena if it is unreasonable and oppressive or for other good cause shown, or (2) require the person in whose behalf the subpoena was issued to advance the reasonable cost of producing subpoenaed books and papers. Where circumstances require, the Board may act upon such a request at any time after a copy has been served upon the opposing party.

(e) Form; Issuance.

(1) Every subpoena shall state the name of the Board and the title of the appeal, and shall command each person to whom it is directed to attend and give testimony, and if appropriate, to produce specified books and papers at a time and place therein specified. In issuing a subpoena to a requesting party, the Administrative Judge shall sign the subpoena and may, in the Judge's discretion, enter the name of the witness and otherwise leave it blank. The party to whom the subpoena is issued shall complete the subpoena before service.

(2) Where the witness is located in a foreign country, a letter rogatory or subpoena may be issued and served under the circumstances and in the manner provided in 28 U.S.C. 1781–1784.

(f) Service.

(1) The party requesting issuance of a subpoena shall arrange for service.

(2) A subpoena requiring the attendance of a witness at a deposition or hearing may be served at any place.

A subpoena may be served by a United States marshal or deputy marshal, or by any other person who is not a party and not less than 18 years of age. Service of a subpoena upon a person named therein shall be made by personally delivering a copy to that person and tendering the fees for one day's attendance and the mileage provided by 28 U.S.C. 1821 or other applicable law; however, where the subpoena is issued on behalf of the Government, money payments need not be tendered in advance of attendance.

(3) The party at whose instance a subpoena is issued shall be responsible for the payment of fees and mileage of the witness and of the officer who serves the subpoena. The failure to make payment of such charges on demand may be deemed by the Board as sufficient ground for striking the testimony of the witness and the evidence the witness has produced.

(g) Contumacy or Refusal to Obey a Subpoena. In case of contumacy or refusal to obey a subpoena by a person who resides, is found, or transacts business within the jurisdiction of a United States District Court, the Board will apply to the Court through the Attorney General of the United States for an order requiring the person to appear before the Board or a member thereof to give testimony or produce evidence or both. Any failure of any such person to obey the order of the Court may be punished by the Court as a contempt thereof.

Rule 22. Copies of Papers

When books, records, papers, or documents have been received in evidence, a true copy thereof or of such part thereof as may be material or relevant may be substituted therefor, during the hearing or at the conclusion thereof.

Rule 23. Posthearing Briefs

Posthearing Briefs may be submitted upon such terms as may be agreed upon by the parties and the presiding Administrative Judge or examiner at the conclusion of the hearing.

Rule 24. Transcript of Proceedings

Testimony and argument at hearings shall be reported verbatim, unless the Board otherwise orders. Waiver of transcript may be especially suitable for hearings under Rule 12.2. Transcripts or copies of the proceedings shall be made available by the Board to the Government attorney. Appellant may order transcripts of the proceedings from the contract reporter at the hearing at actual cost of duplication (Pub. L. 92–463, October 6, 1972, 86 Stat. 770, 5 U.S.C. App. I).

Rule 25. Withdrawal of Exhibits

After a decision has become final, the Board may, upon request and after notice to the other party, in its discretion permit the withdrawal of original exhibits, or any part thereof, by the party entitled thereto. The substitution of true copies of exhibits or any part thereof may be required by the Board in its discretion as a condition of granting permission for such withdrawal.

Representation

Rule 26. The Appellant

An individual appellant may appear before the Board in person, a corporation by one of its officers; and a partnership or joint venture by one of its members; or any of these by an attorney at law duly licensed in any state, commonwealth, territory, the District of Columbia, or in a foreign country. An attorney representing an appellant shall file a written notice of appearance with the Board.

Rule 27. The Government

Government counsel may, in accordance with their authority, represent the interest of the Government before the Board. They shall file notices of appearance with the Board, and notice thereof will be given appellant or appellant's attorney in the form specified by the Board from time to time. Whenever appellant and the Government counsel are in agreement as to disposition of the controversy, the Board may suspend further processing of the appeal. However, if the Board is advised thereafter by either party that the controversy has not been disposed of by agreement, the case shall be restored to the Board's calendar without loss of position.

Miscellaneous

Rule 28. Decisions

Decisions of the Board will be made in writing and authenticated copies of the decision will be fowarded simultaneously to both parties. The rules of the Board and all final orders and decisions (except those required for good cause to be held confidential and not cited as precedents) shall be open for public inspection at the offices of the Board in Washington, D.C. Decisions of the Board will be made solely upon the record, as described in Rule 13.

Rule 29. Motion for Reconsideration

A motion for reconsideration may be filed by either party. It shall set forth specifically the grounds relied upon to sustain the motion. The motion shall be filed within 30 days from the date of the receipt of a copy of the decision of the Board by the party filing the motion.

Rule 30. Dismissal Without Prejudice

In certain cases, appeals docketed before the Board are required to be placed in a suspense status and the Board is unable to proceed with disposition thereof for reasons not within the control of the Board. Where the suspension has continued, or may continue, for an inordinate length of time, the Board may, in its discretion, dismiss such appeals from its docket without prejudice to their restoration when the cause for suspension has been removed. Unless either party or the Board acts within three years to reinstate any appeal dismissed without prejudice, the dismissal shall be deemed with prejudice.

Rule 31. Dismissal or Default for Failure To Prosecute or Defend

Whenever a record discloses the failure of either party to file documents required by these rules, respond to notices or correspondence from the Board, comply with orders of the Board or otherwise indicates an intention not to continue the prosecution or defense of an appeal, the Board may, in the case of a default by the appellant, issue an order to show cause why the appeal should not be dismissed or, in the case of a default by the Government, issue an order to show cause why the Board should not act thereon pursuant to Rule 33. If good cause is not shown the Board may take appropriate action.

Rule 32. Remand from Court

Whenever any court remands a case to the Board for further proceedings, each of the parties shall, within 20 days of such remand, submit a report to the Board recommending procedures to be followed so as to comply with the court's order. The Board shall consider the reports and enter special orders governing the handling of the remanded case. To the extent the court's directive and time limitations permit, such orders shall conform to these rules.

Rule 33. Sanctions

If any party fails or refuses to obey an order issued by the Board, the Board may then make such order as it considers necessary to the just and expeditious conduct of the appeal.

Rule 34. Applicability of These Rules

These Rules of Procedure shall apply to contracts made by agencies described in

Section I, Preface to Rules, for: (1) The procurement of property, other than real property in being; (2) the procurement of services; (3) the procurement of construction, alteration, repair or maintenance of real property; or (4) the disposal of personal property. These Rules shall apply (1) mandatorily, to all appeals relating to contracts entered into on or after March 1, relating to earlier contracts, with respect to claims pending before the contracting officer on March 1, 1979, or initiated thereafter.

Rules of Procedure Applicable to Appeals pursuant to the Disputes Article of Contracts and not under the Contract Disputes Act of 1978 (7 CFR § 24.4(b).

Rule 1. Appeals, How Taken.

Notice of an appeal shall be in writing and the original, together with two copies, shall be mailed or otherwise furnished to the contracting officer from whose decision the appeal is taken, addressed to the Secretary of Agriculture, within the time specified in the contract or allowed by applicable provision of regulation or law. (See 7 CFR § 24.5)

Rule 2. Notice of Appeal, Contents of

A notice of appeal shall clearly identify the decision from which the appeal is taken, the date of decision, the contract number, the agency or field office of the Department cognizant of the dispute and shall indicate that an appeal is thereby intended. The notice of appeal need not follow any prescribed form. It may in the form of a letter. It should be signed personally by the appellant (the contractor making the appeal), or by an officer of the appellant corporation or member of the appeallant firm, or by the contractor's duly authorized representative or attorney. The complaint referred to in Rule 4 may be filed with the notice of appeal, or the appellant may designate the notice of appeal as a complaint if it otherwise fulfills the requirements of a complaint.

Rule 3. Forwarding of Appeals

When a notice of appeal in any form has been received by the contracting officer, the date of mailing (or date of receipt, if otherwise conveyed) shall be endorsed thereon by the contracting officer. The contracting officer shall forward the original and one copy of the notice of appeal to the Board within 10 days through agency channels. The agency office receiving such notice of appeal shall forward the original and one copy to the Board of Contract Appeals, United States Department of Agriculture, Washington, D.C. 20250, not later than 15 days from the date of receipt from its contracting officer. Following receipt by the Board of such notice of appeal, the Board will notify the appellant (contractor) and the contracting officer of the docketing of the appeal and will furnish a copy of these rules to the appellant.

Rule 4. Complaint

A complaint shall be filed by appellant with the Board not later than the date prescribed by letter from the Board except where the Board treats the notice of appeal as the complaint. The complaint shall contain simple, concise and direct statements of each claim and the dollar amount claimed, alleging the basis for each claim with appropriate reference to contract provisions. This pleading shall fulfill the generally recognized requirements of a complaint, although no particular form or formality is required. If a complaint is not timely filed, the Board may treat the notice of appeal as the complaint if it deems the issues to be sufficiently defined. The Board will notify the Government attorney of any such determination.

Rule 5. Appeal File

(a) Duties of contracting officer. The contracting officer shall assemble and file with the Board within the time prescribed by letter from the Board, three copies of all documents pertinent to the appeal as an appeal file including as applicable but not necessarily limited to:

(1) The decision and findings of fact from which appeal is taken;

(2) The contract including pertinent specifications, amendments, plans and drawings;

(3) All correspondence between the parties pertinent to the appeal, including the letter or letters of claim in response to which decision was issued;

(4) Transcripts of any testimony taken during the course of proceedings, and affidavits or statements of any witnesses on the matter in dispute made prior to the filing of the notice of appeal with the Board; and

(5) Any additional information considered pertinent.

(b) Organization of appeal file. Documents in the appeal file may be originals or legible facsimile or authenticated copies thereof, and shall be arranged in chronological order, where practicable, numbered sequentially, tabbed, and indexed to identify the contents of the file.

(c) Board action upon receipt of appeal file. The Board upon receipt of the appeal file from the contracting officer will send a copy thereof to appellant and to the Government attorney. The appellant and the Government attorney may supplement the appeal file by filing with the Board three copies of any additional documents not contained in the appeal file assembled by the contracting officer which appellant or the Government attorney believes are also pertinent to the appeal. Such filings shall be made with the Board within the time prescribed by the Board. The Board upon receipt of any such additional documents will send a copy thereof to the other party.

(d) Status of documents in appeal file. Documents contained in the appeal file are considered, without further action by the parties, as part of the record upon which the Board will render its decision, unless a party objects to the consideration of a particular document in advance of hearing or of closing the record in the event there is no hearing on the appeal. If objection to a document is made, the Board will rule upon its admissibility into the record as evidence.

(e) Lengthy documents. The Board may waive the requirement of including in the copy of the appeal file to be furnished to the other party copies of bulky, lengthy, or out-of-size documents when a party shows to the satisfaction of the Board that providing such documents would impose an undue burden, provided that such documents are available for inspection at the office of the party filing only one copy thereof. Such documents will also be available for inspection at the office of the Board.

Rule 6. Answer.

The Government attorney will be requested by the Board to file an answer on behalf of the contracting officer after the complaint has been filed. The answer shall be filed with the Board within the time prescribed by letter from the Board and shall be in an original and two copies setting forth simple, concise, and direct statements of defenses to each claim asserted by appellant. This pleading shall fulfill the generally recognized requirements of an answer, and shall set forth any affirmative defenses or counterclaims as appropriate. The Board will send a copy of the answer to appellant. If a counterclaim is filed, an opportunity will be afforded to appellant to file a response. If an answer is not timely filed, the Board may, in its discretion, enter a general denial and so notify the appellant.

Rule 7. Additional Pleadings and Motions

The presiding officer may permit or require such additional pleadings or amendments thereto and motions to be filed as may be desirable in the interests of defining the issues and affording the parties full opportunity to prepare their cases. When issues within the proper scope of the appeal,

but not raised by the pleadings or the appeal file are tried by express or implied consent of the parties, or by permission of the presiding officer, such issues shall be treated in all respects as if raised therein. In such instances, motions to amend the pleadings to conform to the proof may be entered but are not required. If evidence is objected to at a hearing on the ground that it is not within the issues raised by the pleadings or appeal file, it may be admitted within the proper scope of the appeal: *Provided, however,* That the objecting party may be granted a continuance if necessary to enable such party to meet such evidence.

Rule 8. Hearing Election.

A hearing before the Board shall be a matter of right which shall be afforded to appellant. The Government attorney may request a hearing in any case. If the parties waive a hearing the case shall be submitted on the record except where the presiding officer requires a hearing. The Board will ascertain from the parties whether a hearing is requested and ordinarily this will be done after the appeal file and pleadings have been received by the Board.

Rule 9. Accelerated Procedure

(a) Election. Either party may notify the Board of its election to have the appeal handled under this Rule 9. If both parties agree to handling under accelerated procedure, the presiding officer shall determine whether the appeal falls within the dollar limitation prescribed in paragraph (b) of this Rule 9 and whether the case otherwise is appropriate, taking into consideration the nature of the dispute, for handling under accelerated procedure. The determination of the presiding officer to handle or not handle the appeal under accelerated procedure shall be final.

(b) Dollar amount limitation. In order to be eligible for handling under accelerated procedure, the appeal shall involve $25,000 or less consisting of the claim of appellant together with the amount involved in any counterclaim filed by the Government attorney. If no dollar amount of claim or counterclaim is involved, the presiding officer shall determine whether the appeal can be properly disposed of under this Rule 9.

(c) Elimination of procedures. In cases proceeding under this Rule 9, parties are encouraged to the extent possible consistant with adequate presentation of their factual and legal positions to waive pleadings, discovery and briefs.

(d) Presiding officer as decision maker. The presiding officer in any appeal handled under accelerated procedure shall issue a short written decision as soon as practicable after closing of the record and such decision shall be the final decision of the Board.

Rule 10. Prehearing or Presubmission Procedures

(a) Prehearing orders. The presiding officer may issue an order in cases where a hearing will be held prescribing as to one or more the following that the parties shall:

(1) Exchange a list of witnesses giving titles and a brief description of the subject matter of the testimony;

(2) Exchange proposed exhibits and prepare an additional set thereof for the presiding officer; and

(3) Exchange a list of expert witnesses with a summary of their qualifications and testimony.

(b) Prehearing orders in complex cases. The presiding officer may issue a more comprehensive order in cases where a hearing will be held and it appears that the issues are confused, complex, that the hearing will be unduly long, or where quantum is involved. Such order, in addition to covering one or more of the items under (a) of this rule, may prescribe as to one or more of the following that the parties shall:

(1) Submit to the presiding officer a stipulation of all facts not in dispute;

(2) Attempt preparation of an agreed statement of factual and legal issues and, failing therein, submit separate statements; and

(3) Submit to the other party, where the issue of quantum will be heard, a statement of the monetary claim in detail with accounting schedules and explanations and afford the other party the right to an audit with the audit report to be available to both parties.

(c) Prehearing or presubmission briefs and oral argument. The presiding officer may require or allow the filing of prehearing or presubmission briefs in such manner as prescribed and may also require or allow oral argument in such manner as prescribed prior to hearing or submission on the record.

(d) Prehearing or presubmission conference. The presiding officer may require a prehearing or presubmission conference to consider:

(1) The simplification or clarification of the issues;

(2) The possibility of obtaining stipulations, admissions, agreements on documents, understandings on matters already of record or similar agreements which will avoid unnecessary proof;

(3) The limitation of the number of expert witnesses, or avoidance of similar cumulative evidence if the case is to be heard;

(4) The possibility of agreement disposing of all or any of the issues in dispute;

(5) Such other matters as may aid in the disposition of the appeal.

The results of the conference shall be reduced to writing by the presiding officer and this writing shall constitute part of the record.

Rule 11. Submission Without a Hearing

Either party may elect to waive a hearing and if the other party as well as the Board do not require a hearing, the case shall be submitted upon the record before the Board. Submission of a case without hearing does not relieve the parties from the necessity of proving the facts supporting their allegations or defenses. Affidavits, depositions, admissions, answers to interrogatories and stipulations may be employed to supplement other documentary evidence in the Board record. The Board may permit such submission to be supplemented by oral argument and briefs.

Rule 12. Discovery procedures

(a) *General policy and protective orders.* The parties are encouraged to engage in voluntary discovery procedures. In connection with any deposition or other discovery procedure, the presiding officer may make any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense, and such order may include limitations on the scope, method, time and place for discovery, and provisions for protecting the secrecy of confidential information or documents.

(b) *When depositions permitted.* After an appeal has been docketed and complaint filed, the parties may mutually agree to, or the presiding officer may, upon application of either party and for good cause shown, order the taking of testimony or any person by deposition upon oral examination or written interrogatories before any officer authorized to administer oaths at the place of examination, for use as evidence or for purpose of discovery. The application for order shall specify whether the purpose of the deposition is discovery or for use as evidence.

(c) *Orders on depositions.* The time, place, and manner of taking depositions shall be as mutually agreed by the parties, or failing such agreement, governed by order of the presiding officer.

(d) *Expenses.* Each party shall bear its own expenses associated with the taking of any deposition.

(e) Interrogatories to parties. After an appeal has been docketed, a party may serve on the other party written interrogatories to be answered separately in writing, signed under oath and returned within 30 days. Upon timely objection by the party, the presiding officer will determine the extent to which the interrogatories will be permitted.

(f) Admission of facts. After an appeal has been docketed, a party may serve on the other party a request for the admission of specified facts. The party served shall answer each requested item or file objections thereto within 30 days after service. The presiding officer will rule on any such objections. The factual propositions set out in the request shall be deemed admitted upon the failure of a party to respond or object to the request for admission.

(g) Production, inspection and copying of documents. After an appeal has been docketed, a party may arrange with the other party to produce and permit the inspection and copying or photographing of any designated documents or objects, not privileged, specifically identified, and their relevance and materiality to the cause or causes in issue explained, which are reasonably calculated to lead to the discovery of admissible evidence. If the parties cannot agree thereon, the presiding officer shall specify just terms and conditions in making the inspection and making copies and photographs. Expenses of making copies and photographs shall be borne by the party seeking to make or cause to be made copies and photographs.

Rule 13. Sanctions

If any party fails or refuses to obey an order issued by the presiding officer, the presiding officer may make such order in regard to the failure deemed necessary to the just and expeditious conduct of the appeal.

Rule 14. Subpoena Power

The Chairman has authority by delegation from the Secretary to request the appropriate United States Attorney to apply to the appropriate United States District Court for the issuance of subpoenas pursuant to 5 U.S.C. 304.

Hearings

Rule 15. Hearings, Notice of

The presiding officer shall give notice of the time and place set for hearing which shall be scheduled as may best serve the interests of the parties and the Board. Such notice shall be sent to the parties in writing not less than 30 days in advance of the date for such hearing unless the parties waive notice.

Rule 16. Unexcused Absence of a Party

The unexcused absence of a party at the time and place set for hearing will not be occasion for delay. In the event of such absence, the hearing will proceed and the case will be regarded as submitted by the absent party as provided in Rule 11.

Rule 17. Hearings, Open to Public, Verbatim Transcript

Hearings shall be open to the public. Testimony shall be reported verbatim. Transcripts of the proceedings shall be made available by the Board to the Government attorney. Appellant may order transcripts of the proceedings from the contract reporter at the hearing at actual cost of duplication (Pub. L. 92–463, October 6, 1972, 86 Stat. 770, 5 U.S.C. App. I).

Rule 18. Hearings, Conduct of

(a) General. Hearings shall be as informal as may be reasonable and appropriate under the circumstances. The parties may offer such relevant evidence as they deem appropriate and as would be admissible under the generally accepted rules of evidence applied in the courts of the United States in nonjury trials, subject, however, to the sound discretion of the presiding officer in supervising the extent and manner of presentation of such evidence. In general, admissibility will hinge on relevancy and materiality. Letters or copies thereof, affidavits or other evidence not ordinarily admissible under the generally accepted rules of evidence, may be admitted in the discretion of the presiding officer. The presiding officer shall receive only evidence which is germane to the issues involved and shall exclude, insofar as practicable, evidence which is immaterial, irrelevant or unduly repetitious or which is not of the sort upon which responsible persons are accustomed to rely. The weight to be attached to evidence presented in any particular form will be within the discretion of the Board members considering the case, taking into consideration all the circumstances of the particular case. Stipulations of fact agreed upon by the parties may be regarded and used as evidence at the hearing. The parties may stipulate the testimony that would be given by a witness if the witness were present. The presiding officer may in any case require evidence in addition to that offered by the parties.

(b) Examination of witnesses. Witnesses will be examined under oath or affirmation subject to cross-examination and questions from the presiding officer and Board members. If the testimony of a witness is not given under oath, the presiding officer may warn the witness that statements made may be subject to provisions of law imposing penalties for knowingly making false representations (18 U.S.C. 287, 1001).

(c) Burden of proof and order of proceeding. The burden of proof rests on the appellant asserting the claim or error in the decision except that the burden of proof in case of counter-claims rests on the party asserting them. Unless otherwise permitted by the presiding officer, the appellant shall proceed first at the hearing followed by the presentation of the Government attorney and any rebuttal case permitted by the presiding officer.

(d) Objections. If a party objects to the admission or rejection of any evidence or to a limitation of the scope of any examination or cross-examination, such party shall state briefly the grounds of such objection and the presiding officer shall rule thereon or reserve ruling.

(e) Records and documents. Upon proof of authenticity, papers, books, records or documents shall be admissible in evidence without the production of the person who made or prepared the same except that the person who prepared documents specially for use at the hearing should be available to explain such documents.

(f) Exhibits. All documents offered in evidence at a hearing shall be marked for identification by number or letter as prescribed by the presiding officer. Except where the presiding officer finds that the furnishing of copies is impracticable, a copy of each proposed exhibit shall be made available to the other party when offer is made or prior to the hearing, if possible.

(g) Offer of proof. Whenever evidence is excluded from the record the offering party may make an offer of proof briefly stating the evidence proposed to be received into evidence.

(h) Official notice. Official notice will be taken of such matters as are judicially noticed by the courts of the United States and of any other matter of technical, scientific, or commercial fact of established character: *Provided,* That the parties shall be given adequate notice of matters so noticed and shall be given adequate opportunity to show that such facts are erroneously noticed.

(i) Depositions. No testimony taken by deposition shall be considered as part of the evidence in the hearing of an appeal unless and until such testimony is offered and received in evidence at such hearing. It will not be received in evidence if the deponent is present and can testify personally at the hearing. In such instances, however, the deposition may be used to contradict or impeach the testimony of the witness given at the hearing. In cases submitted on the record, the presiding officer may receive depositions as evidence in supplementation of that record.

Posthearing or postsubmission procedures

Rule 19. Posthearing Briefs

The presiding officer shall prescribe the manner of filing any posthearing briefs.

Rule 20. Closing the Record

(a) *Contents.* The record consists of the appeal file described in Rule 5 and, to the extent the following have been filed, the pleadings, prehearing conference memoranda or orders, prehearing briefs, depositions or interrogatories received in evidence, admissions, stipulations, transcripts of conference and hearings, hearing exhibits, posthearing briefs and documents which the presiding officer has specifically designated be made part of the record. The record will at all reasonable times be available for inspection by the parties at the office of the Board.

(b) Closing or settling of record. Except as the presiding officer may otherwise order, no proof shall be received in evidence after completion of a hearing or in cases submitted on the record, after the parties have been notified that the case is ready for decision. The weight to be attached to any evidence of record will rest within the sound discretion of the Board members considering the case. The presiding officer may in any case require either party, with appropriate notice to the other party, to submit additional evidence on any matter relevant to the appeal.

Rule 21. Copies of papers

When books, records, papers, or documents have been received in evidence, a true copy thereof or of such part thereof as may be material or relevant may be submitted therefor, during or after the hearing.

Rule 22. Withdrawal of exhibits.

After a decision has become final the Board may, upon request and after notice to the other party, in its discretion, permit the withdrawal of original exhibits, or any part thereof, by the party entitled thereto. The substitution of true copies of exhibits or any part thereof may be repaired by the Board in its discretion as a condition of granting permission for such withdrawal.

Rule 23. Decisions

The Board shall issue written decisions containing findings of fact and conclusions and shall send copies simultaneously to the parties by certified mail or, if delivered directly, with a notation of the date of delivery. Decision of the Board will be made solely upon the record as described in Rule 20.

Rule 24. Reconsideration, Motion for

A motion for reconsideration of a Board decision, if filed by either party, shall set forth specifically the ground or grounds relied upon to sustain the motion and shall be filed within 30 days from the date of receipt of a copy of the Board decision by the party filing

the motion. The Board, in its discretion, may deny the motion or permit such additional proceedings as deemed necessary.

Dismissals

Rule 25. Dismissals

(a) Lack of jurisdiction. A motion to dismiss for lack of jurisdiction may be filed by a party at any time. The Board may also raise the question of jurisdiction at any time on its own motion. The presiding officer shall prescribe any necessary proceedings including but not limited to written arguments, briefs or hearing on the issue of jurisdiction. The presiding officer shall issue a Ruling on the issue of jurisdiction unless the Chairman requires a full three member panel or consider the issue of jurisdiction in which event the designated panel shall issue the Ruling on the issue of jurisdiction.

(b) Failure to prosecute. Whenever a record discloses the failure of either party to file documents required by these rules, respond to notices or correspondence from the presiding officer, comply with orders of the presiding officer, or otherwise indicates an intention not to continue the prosection or defense of an appeal, the presiding officer may issue an order requiring the offending party to show cause why the appeal should not be either dismissed or granted, as appropriate. If the offending party shall fail to show such cause, the presiding officer may issue an Order of Dismissal for failure to prosecute or take such other action deemed reasonable and proper under the circumstances.

(c) Without prejudice. In certain cases, appeals docketed before the Board are required to be placed in a suspense status and the Board is unable to proceed with disposition thereof for reasons not within the control of the Board. In any such case where the suspension has continued, or it appears that it will continue, for an inordinate length of time, the presiding officer, exercising sound discretion, may dismiss such appeals without prejudice to restoration to the docket when the cause of suspension has been removed. Unless either party or the Board acts within 3 years to reinstate any appeal dismissed without prejudice, the dismissal shall be deemed with prejudice.

(d) Settlement or withdrawal. The parties may settle the issues at any state of the proceedings before issuance of a decision of the Board. The appellant may withdraw the appeal at any time. The presiding officer in the event of settlement or withdrawal shall issue an Order of Dismissal.

Miscellaneous

Rule 26. Representation of Parties.

Appellant may appear before the Board in person or be represented by an authorized representative or attorney subject to the limitations prescribed in 7 CFR 1.26 regarding representation before the Department. The Government shall be represented by the Government attorney.

For Subpart A:

Dated: December 22, 1982.

John R. Block,

Secretary of Agriculture.

For Subpart B:

Food and Nutrition Service

7 CFR Parts 273, 274, 275 and 276

[Amdt. No. 237]

Food Stamp Program; Corrections to Food Stamp Rules

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule; Corrections and clarity revisions.

SUMMARY: This action amends Food Stamp Program regulations in the areas of: (1) State agency liabilities and Federal sanctions; (2) Performance Reporting Systems; (3) State agency reporting and destruction of unusable coupons; and (4) Thrifty Food Plan Amounts. This action corrects errors in paragraph referencing and makes clarity revisions only. The action will not result in any policy changes. This document also corrects similar errors or makes clarity changes in the following individual **Federal Register** publications: *1980 Amendments to the Food Stamp Act of 1977, Policy Interpretations, and Miscellaneous Technical Amendments* (issued April 23, 1982); *Proration of Initial Month Benefits* (issued May 14, 1982), *Nondiscretionary Fraud, Waste, Abuse and Simplification Provisions* (issued August 13, 1982), *Household Composition, Income Standards, Adjustments, Deductions, Outreach and Technical Amendments* (issued November 19, 1982), and *Eligibility Criteria and Reduction or Termination of Benefits* (issued December 14, 1982).

EFFECTIVE DATE: This action is effective January 27, 1983.

FOR FURTHER INFORMATION CONTACT: Thomas O'Connor, Supervisor, Policy and Regulations Section, Program Standards Branch, Program Development Division, Food and Nutrition Service, USDA, Alexandria, Virginia, 22302, (703) 756-3429.

SUPPLEMENTARY INFORMATION:

Classification

This final rule has been reviewed under Executive Order 12291. The rule will not result in annual economic impacts of more than $100 million or major increases in costs or prices nor will it have a significant adverse effect on competition, employment, productivity, investment, or foreign trade. Further, the rule is unrelated to the ability of United States-based enterprises to compete with foreign-based enterprises. Therefore, the rule has been classified as "non-major".

Regulatory Flexibility Act

The rule also has been reviewed in relation to the requirements of the Regulatory Flexibility Act of 1980 (Pub. L. 96-354, 94 Stat. 1164, September 19, 1980). The Administrator of the Food and Nutrition Service has certified that this action will not have a significant impact on a substantial number of small entities.

Public Participation

As noted above, the amendments made by this final rule are to correct errors and improve clarity and will result in no change in policy. For these reasons, the Department has determined in accordance with 5 U.S.C. 553(b) that notice of proposed rulemaking and public comment on this rulemaking is unnecessary.

Paperwork Reduction Act

This rulemaking does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget.

7 CFR 273.2(f)(1)(ii)(A) is being amended to change the reference to § 273.4(a) (2) through (6) to reference § 273.4 (a)(2) through (a)(8). Rules issued April 23, 1982 (47 FR 17756), added two more alien provisions to § 273.4.

7 CFR 273.10, Appendix B is being removed. Appendix B sets forth the Thrifty Food Plan Amounts (the amounts on which FSP coupon allotments are based) that were applicable for Guam and the Virgin Islands beginning January 1980. We neglected to delete the Appendix B table when Appendix A to 7 CFR 273.10 was revised to set forth the January 1981 Thrifty Food Plan Amounts for all FSP areas of operation.

7 CFR 271.6(b) (i) and (vi) are being amended to reflect that the State of New York is under the jurisdiction of the Food and Nutrition Services' Burlington, Massachusetts Regional Office, not the Robbinsville, New Jersey Regional Office.

7 CFR 274.2 is being amended to remove paragraph (4) from paragraph (h) and add it to paragraph (i) instead. The paragraph was added to (h) based on rules issued December 8, 1981 (46 FR 60160). However, before the December rules were issued, an earlier rule issued October 9, 1981 (46 FR 50277), redesignated paragraph (h) as (i). This redesignation was overlooked when the December 8 rules were issued. Also, the

December 8 rules redesignated paragraph (g) of 7 CFR 273.11 as (h). A reference to § 273.11 (g)(2) appearing in 7 CFR 274.2(h)(1) and 274.3(c)(1) which were overlooked when the redesignation occurred are corrected by the rule to reference §273.11(h)(2).

7 CFR 274.8(b)(2) is being amended to replace the reference to Form FNS–136 with a reference to form FNS–471, Coupon Account and Destruction Report. Form FNS–471 has officially replaced form FNS–136 and is currently in use.

7 CFR 275.3(b) is being amended to reflect that the review of a State agency's Performance Reporting System consists of one phase, not two phases. The second phase was removed from the CFR by final rules issued January 23, 1981, at 46 FR 7257.

7 CFR 275.11(f) is being amended to delete the last sentence of the section which states that State agencies' eligibility for enhanced funding is dependent on achievement of a 95 percent sample completion rate. Through an agency oversight, the above referenced line was not removed when the Sanction/Incentive System regulations were published on January 23, 1981, (46 FR 7257) which changed this policy. Failure to meet the 95 percent competition rate results in adjustments to a State agency's error rate and does not *automatically* render a State agency ineligible for enhanced funding.

7 CFR 276.1(a)(1) is being amended to correct an error in paragraph referencing. This action removes the reference to § 276.2(c)(iv) appearing in paragraph (a)(1). This regulatory paragraph does not exist.

Amendments to Individual Federal Register Publications

This action corrects typographical errors or clarifies provisions issued in the individual **Federal Register** publications of April 23, 1982, May 14, 1982 and August 13, 1982.

At 47 FR 17756 issued April 23, 1982

(*a*) § 271.2, in the definition of a "Drug addiction or alcoholic treatment and rehabilitation program", appearing in the rule at page 17762, the reference to 278.1 (a), (b) and (d)(1) is being removed. The phrase gives the impression that one must meet the requirements of 7 CFR 278.1 to be granted Program participation. This is not true nor was this the intent of the final rule change in the definition. Only those who also wish to be authorized as a retailer must comply with 7 CFR 278.1. Thus, a correction is necessary to remove the reference and eliminate confusion or misapplication of the provision.

(*b*) § 273.2, paragraph (f)(1)(ii)(C), appearing on page 17762, is being amended to correct the reference to § 273.4 (a)(4) through (a)(6). The reference should be to § 273.4 (a)(4) through (a)(8). The April 23rd rule added two more alien provisions to § 273.4.

(*c*) Also in § 273.2, paragraph (f)(1)(ii)(E) appearing on page 17763 is being corrected to add a reference to section 203(a)(7) of the Immigration and Nationality Act that was unintentionally left out.

(*d*) In § 273.4, paragraphs (a)(4) and (a)(5) appearing on page 17763, are being amended to correct the cut-off dates appearing in these paragraphs to reflect new dates that were recently prescribed by rules issued by the Immigration and Naturalization Service (INS). Paragraph (f)(1)(ii)(C) under § 273.2 on page 17763 is also being amended to add the April 1, 1980, date to clarify when an INS form I–94 is valid for FSP purposes.

(*e*) § 273.8, amendatory instruction No. (6)(a) on page 17764 which requires a revision to the last sentence of paragraph (d) under that section is incorrect. The sentence that should be revised is the next to last sentence in § 273.8(d). This is being corrected.

(*f*) In § 273.8, paragraph (e)(11)(ix) appearing on page 17764, is being changed to correct a reference to a Public Law. Paragraph (c)(10)(ix) under § 273.9 at page 17765 is also being corrected for a similar Public Law reference error.

(*g*) Also in § 273.8, paragraph (h)(1)(vi) appearing on page 17764, is being corrected to reflect revised language for this paragraph that was added by a final rule issued August 25, 1981 (46 FR 43020) and was unintentionally excluded in the April 23rd rule.

(*h*) Again, in § 273.8, paragraph (h)(4)(iii) appearing on page 17764, is being corrected to add a phrase in the first sentence that was unintentionally omitted.

(*i*) In § 273.18, paragraph (b)(3)(ii) appearing on page 17767 is being corrected to add a phrase that was unintentionally omitted.

At 47 FR 20739 issued May 14, 1982

(*a*) In § 272.8, paragraph (h) appearing on page 20741 is being corrected because of a typographical error. The word "retrospective" should be "retroactive".

At 47 FR 35166 issued August 13, 1982

(*a*) In § 272.4 paragraphs (c) and (f) on page 35168 were relettered as (b) through (e). However, these paragraphs contained regulatory references to each other that were not revised to reflect the new designated paragraphs. The references are being corrected.

At 47 FR 52328 issued November 19, 1982

(*a*) In § 272.4, amendatory instruction number 6 (appearing in column 1, page 52334) is incorrect. The reference to revise paragraphs (c)(1) and (c)(2) should refer to revisions for paragraphs (b)(1) and (b)(2) as rules issued August 13, 1982 (47 FR 35166) redesignated all of paragraph (c) as (b). The amendatory instruction and its corresponding regulatory amendment are being corrected.

(*b*) In § 273.11, in amendatory instruction number 13 (column 3, page 52337), the portion of that instruction calling for a revision to paragraphs (a)(4)(ii)(C) and (c)(3) and an amendment to paragraph (c)(4) is being removed. Paragraph (a)(4)(ii)(C) was further revised by rules issued on April 23, 1982 (47 FR 17756), and paragraphs (c)(3) and (c)(4) were redesignated and revised by rules issued on October 8, 1982 (47 FR 44692). Respectively, the April 23rd and October 8th language of these paragraphs is the final version intended to be adopted by the Department. Therefore, amendatory instruction number 13 of the November 19, 1982 rules is being corrected by this final action to remove any instruction to change these three paragraphs.

(*c*) In the preamble to the November 19, 1982 rule (column 2, page 52332) it was stated that 7 CFR 273.20 was being amended to remove all references to the State of Massachusetts. However, we neglected to provide conforming regulatory language to initiate the deletions. The regulatory text of the November 19 rule is being corrected to add the necessary amendatory instruction to remove the references.

At 47 FR 55903 issued December 14, 1982

(*a*) In the preamble of the December 14 interim rule (column 1, page 55904), the Department explained that 1982 Food Stamp Act amendments redefined who constitutes an elderly or disabled member for Food Stamp Program purposes. The interim rule amended 7 CFR 271.2 to reflect the new definition of elderly and disabled persons. However, the Department unintentionally overlooked other sections throughout the regulations which refer to the old definition of an elderly and disabled household that also needed to be changed. Therefore, this action is correcting the regulatory text of the December 14, 1982 rule to add necessary amendatory instructions and/or pertinent regulatory language to reflect

the new definition in 7 CFR 273.9(d)(3) and (d)(4), 273.10(e)(2)(i)(A), and 273.21(b)(2)(i)(B) and (b)(2)(ii).

List of Subjects

7 CFR Part 273

Administrative practice and procedure, Aliens, Claims, Food stamps, Fraud, Grant programs—social programs, Penalties, Reporting and recordkeeping requirements, Social Security, Students.

7 CFR Part 274

Administrative practice and procedure, Food stamps, Grant programs—social programs, Reporting and recordkeeping requirements.

7 CFR Part 275

Administrative practice and procedure, Food stamps, Reporting requirements.

7 CFR Part 276

Administrative practice and procedure, Food stamps, Fraud, Grant programs—social programs, Penalties.

Accordingly, as set out below, the Code of Federal Regulations is amended at 7 CFR Parts 273, 274, 275 and 276. Also, amendments are made to regulations issued on April 23, 1982 (47 FR 17756), May 14, 1982 (47 FR 20739), and August 13, 1982 (47 FR 35166).

PART 271—GENERAL INFORMATION AND DEFINITIONS

§ 271.2 [Corrected]

1. At 47 FR 17762 (column 1), issued on April 23, 1982, the definition of a "Drug addict or alcoholic treatment and rehabilitation program" in § 271.2 is corrected for clarity by removing the words "the requirement of paragraphs (a), (b), and (d)(1) of § 278.1 are met and", appearing in the last sentence.

2. In 7 CFR 271.2, paragraph (b)(1)(i) is amended by removing the reference to the State of "New York" in paragraph (b)(1)(i) and adding a reference to the State of "New York" to paragraph (b)(1)(vi) in alphabetical order.

PART 272—REQUIREMENTS FOR PARTICIPATION STATE AGENCIES

§272.8 [Corrected]

3. At 47 FR 20741 (column 3), issued May 14, 1982, in paragraph (h) of § 272.8, the word "retrospective" is corrected to read "retroactive."

§ 272.4 [Corrected]

4. At 47 FR 35168 (column 3), issued August 13, 1982, amendatory instruction number 3 under § 272.4 is corrected by adding a new sentence at the end of the instruction to read as follows:

"Also, regulatory references contained in some of these newly redesignated paragraphs are amended as follows:

(b)(1)—the reference to (c)(2) and (3) is amended to read (b)(2) and (3),
(b)(2)(iii)—the reference to (c)(3) is amended to read (b)(3),
(b)(4)—the reference to (c)(2) and (3) is amended to read (b)(2) and (3),
(b)(5)—the reference to (c)(3) or (4) is amended to read (b)(3) or (4),
(c)(2)—the reference to (d)(1) is amended to read (c)(1),
(d)(1)(i)—the reference to (e)(1)(iv) is amended to read (d)(1)(iv) and
(d)(3)—the reference to (e)(1)(iv) is amended to read (d)(1)(iv)."

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

§ 273.2 [Amended]

5. In 7 CFR 273.2, paragraph (f)(1)(ii)(A) is amended by replacing the reference to "(a)(2) through (8)" with the reference to "(a)(2) through (a)(8)."

§ 273.10 [Amended]

6. In 7 CFR 273.10, Appendix B is removed.

§ 273.2 [Corrected]

7. At 47 FR 17762 (column 3), issued April 23, 1982, the reference to "§ 273.4 (a)(4) through (a)(6)" appearing in paragraph (f)(1)(ii)(C) of § 273.2 is corrected to read "§ 273.4 (a)(4) through (a)(8)."

8. At 47 FR 17763 (column 1), issued April 23, 1982, the second sentence in paragraph (f)(1)(ii)(C) of § 273.2 is corrected by adding a new sentence after the second sentence to read as follows:

§ 273.2 Application processing.

* * * * *

(f) *Verification.* * * *
(1) *Mandatory verification.* * * *
(ii) *Alien status.* * * *

(C) * * * However, an INS Form I–94 annotated with section 203(a)(7) of the Immigration and Nationality Act must have been issued prior to April 1, 1980 to be considered as acceptable verification. * * *

* * * * *

9. At 47 FR 17763 (column 1), issued April 23, 1982, paragraph (f)(1)(ii)(E) of § 273.2 is corrected by adding the reference of "203(a)(7)" in the second sentence, between the reference to "101(a)(20)" and "207".

§ 273.4 [Corrected]

10. At 47 FR 17763 (column 3), issued April 23, 1982, paragraph (a)(4) and (a)(5) of § 273.4 are corrected by replacing the dates of March 17, 1980 and March 18, 1980, with the dates of March 31, 1980 and April 1, 1980, respectively.

§ 273.8 [Corrected]

11. At 47 FR 17764 (column 1), issued April 23, 1982, amendatory instruction number 6(a) under § 273.8 is corrected to read that "The next to the last sentence in paragraph (d) is revised." Therefore, the last sentence of paragraph (d) as codified based on rules issued December 8, 1981 (46 FR 60166) remains unchanged.

12. At 47 FR 17764 (column 2), issued April 23, 1982, the reference to "Public Law 94–433" in paragraph (e)(11)(ix) of § 273.8 is corrected to read "Public Law 95–433."

13. At 47 FR 17764, issued April 23, 1982, paragraph (h)(1)(vi) of § 273.8 (column 2) and the first sentence of paragraph (h)(4)(iii) of § 273.8 (column 3) are corrected to read as follows:

§ 273.8 Resource eligibility standards.

* * * * *

(h) *Handling of licensed vehicles*

* * *

(l) * * *

(vi) Necessary to transport a physically disabled household member (or ineligible alien or disqualified person whose resources are being considered available to the household) regardless of the purpose of such transportation (limited to one vehicle for physically disabled household member). A vehicle shall be considered necessary for the transportation of a physically disabled household member if the vehicle is specially equipped to meet the specific needs of the disabled person or if the vehicle is a special type of vehicle that makes it possible to transport the disabled person. The vehicle need not have special equipment or be used primarily by or for the transportation of the physically disabled household member.

* * * * *

(4) * * *

(iii) Any other vehicle used to transport household members (or an ineligible alien or disqualified household member whose resources are being considered available to household) to and from employment, or to and from training or education which is preparatory to employmenf, or to seek employment in compliance with the job search criteria. * * *

* * * * *

§ 273.9 [Corrected]

14. At 47 FR 17765 (column 1), issued April 23, 1982, the reference to "(c)(1)(iii)" appearing in paragraph

(b)(1)(iv) of § 273.9 is corrected to read "(c)(10)(iii)".

15. At 47 FR 17765 (column 2), issued April 23, 1982, the reference to "Public Law 95–443" appearing in paragraph (c)(10)(ix) of § 273.9 is corrected to read "Public Law 95–433."

16. At 47 FR 17767 (column 2), issued April 23, 1982, the first sentence in paragraph (b)(3)(ii) of § 273.18 is corrected to read as follows:

§ 273.18 Claims against households.

* * * * *

(b) *Nonfraud claims.* * * *

(3) *Collecting nonfraud claims.* * * *

(ii) State agencies shall initiate collection action by sending the household a written demand letter, designed by FNS, which informs the household of the amount owed, the reason for the claim, the period of time the claim covers, any offsetting that was done to reduce the claim, how the household may pay the claim, and the household's right to a fair hearing if the household disagrees with the State agency's determination. * * *

§ 273.11 [Corrected]

17. At 47 FR 52337 (column 3), issued November 19, 1982, amendatory instruction number 13 is corrected by removing that portion of the instruction calling for a revision to paragraphs (a)(4)(ii)(C) and (c)(3) and an amendment to paragraph (c)(4). Also the corresponding amendatory language under § 273.11 for paragraphs (a)(4)(ii)(C) and (c)(3) appearing on page 52338 in columns 1 and 2, respectively are removed.

18. At 47 FR 52334 (column 1), issued November 19, 1982, amendatory instruction number 6 and its accompanying language change to § 272.4 are corrected to read as follows:

"6. In § 272.4, paragraph (b)(1) and the introductory sentence to paragraph (b)(2) are revised to read as follows:

§ 272.4 Program administration and personnel requirements.

* * * * *

(b) *Bilingual requirements.* (1) Based on the estimated total number of low-income households in a project area which speak the same non-English language (a single-language minority), the State agency shall provide bilingual program information and certification materials, and staff or interpreters as specified in paragraphs (b) (2) and (3) of this section. Single-language minority refers to households which speak the same non-English language and which do not contain adult(s) fluent in English as a second langauge;

(2) The State agency will provide materials used in Program informational activities in the appropriate language(s) as follows. * * *

* * * * *"

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

19. At 47 FR 52338 (column 3), issued November 19, 1982, the regulatory text is being corrected to add the following new amendatory instruction and accompanying amendatory text in numerical order to read as follows:

"15. In § 273.20, paragraphs (a), (b) and (c) are amended by removing all references to the State of Massachusetts."

20. At 47 FR 55909, issued December 14, 1982, the regulatory text is corrected by adding new amendatory instructions (d) and (e) to amendatory instruction No. 7 appearing in the middle of column 2. The instructions read as follows:

"(d) Paragraph (d)(3) is amended by removing everything in the first sentence after the phrase "incurred by any household member who is" and inserting the phrase "elderly or disabled as defined in § 271.2" at the end of that sentence instead.

(e) Paragraph (d)(4) is amended by removing everything in the second sentence after the phrase "unless the household contains a member who is" and inserting the phrase "elderly or disabled as defined in § 271.2" at the end of that sentence instead."

21. At 47 FR 55909, issued December 14, 1982, the regulatory text is corrected by adding a new amendatory instruction (m) to the end of amendatory instruction No. 8 appearing near the top of column 3. The instruction reads as follows:

"(m) Paragraph (e)(2)(i)(A) is amended by removing the phrase "sixty years of age or over, or a member who receives Supplemental Security Income (SSI) benefits under title XVI of the Social Security Act or disability and blindness payments under titles I, II, X, XIV, or XVI of the Social Security Act" and inserting the phrase "elderly or disabled as defined in § 271.2 "in its place."

22. At 47 FR 55910, issued December 14, 1982, the regulatory text is being corrected by adding new amendatory instructions No. 10 (a) and (b) just after the last five asterisks appearing at the end of column 2. The instructions read as follows:

"10. In § 273.21:

(a) Paragraph (b)(2)(i)(A) is amended by removing everything after the phrase "are all without earned income and are" and inserting the phrase "elderly or disabled as defined in § 271.2" instead.

(b) Paragraph (b)(2)(ii) is amended by removing everything between the phrase "are all without earned income and are" and the phrase "unless these households file AFDC monthly reports" and inserting the phrase "elderly or disabled as defined in § 271.2" between the remaining phrases."

PART 274—ISSUANCE AND USE OF FOOD COUPONS

23. In 7 CFR 274.2 paragraph (h)(4) is removed and the third sentence of paragraph (h)(1) is amended by replacing the reference to § 273.11(g)(2) with a reference to § 273.11(h)(2).

24. In 7 CFR 274.2, a paragraph (4) is added to paragraph (i) to read as follows:

§ 274.2 Issuance systems.

* * * * *

(i) * * *

(4) Residents of shelters for battered women and children, as such shelters are defined in § 271.2 and which are not authorized by FNS to redeem through wholesalers, may request that all or part of their coupons be of the 1-dollar denomination and State agencies are authorized to grant this request where feasible.

§ 274.3 [Amended]

25. In 7 CFR 274.3, paragraph (c)(1) is amended by replacing the reference of "§ 273.11(g)(2)" with a reference to "§ 273.11(h)(2)."

§ 274.8 [Amended]

26. In 7 CFR 274.8, paragraph (b)(2) is amended by replacing the reference to "Form FNS–136, Certificate of Destruction of Food Coupons" with a reference to "Form FNS–471, Coupon Account and Destruction Report".

PART 275—PERFORMANCE REPORTING SYSTEM

27. In 7 CFR 275.3, paragraph (b) is revised to read as follows:

§ 275.3 Federal monitoring.

* * * * *

(b) *Reviews of State Agency's Performance Reporting System.* FNS will review each State agency's performance reporting system on an annual basis (in terms of management evaluation (ME) reviews conducted by the State agency). The review will include but not be limited to a determination of whether or not the State is complying with FNS regulations, an assessment of the State's methods and procedures for conducting ME reviews including sampling techniques, and an assessment of the data collected by the State in conducting the reviews.

* * * * *

§ 275.11 [Amended]

28. In 7 CFR 275.11, paragraph (f) is amended by removing the last sentence of the paragraph.

PART 276—STATE AGENCY LIABILITIES AND FEDERAL SANCTIONS

29. In 7 CFR 276.1, paragraph (a)(1) is amended by replacing the phrase "Except as set forth in § 276.2(c)(iv)," with the phrase "Except as otherwise provided in these regulations,".

(91 Stat. 958 (7 U.S.C. 2011–2029))

(Catalog of Federal Domestic Assistance Programs No. 10. 551, Food Stamps)

Dated: December 21, 1982.

Robert E. Leard,

Associate Administrator.

BILLING CODE 3410-30-M

NUCLEAR REGULATORY COMMISSION

10 CFR part 50

Filing of Copies of Changes to Emergency Plans and Procedures

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission is amending its regulations to reduce the number of copies of changes to nuclear power plant emergency plans and procedures. The total number of copies to be submitted will be reduced from 13 to 3. The Commission has determined that 3 copies will be sufficient for processing purposes. These amendments will reduce the regulatory burden on the affected licensees.

DATE: The effective date of this rule will be December 28, 1982.

FOR FURTHER INFORMATION CONTACT: Kenneth E. Perkins, Chief, Incident Response Branch, Office of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555 (Telephone 301–492–7361).

SUPPLEMENTARY INFORMATION: On August 19, 1980, the Nuclear Regulatory Commission published in the **Federal Register** (45 FR 55402) amendments to its regulations for the upgrading of emergency planning and preparedness. The effective date for those regulations was November 3, 1980.

In those regulations, § 50.54(q) required licensees to furnish three copies of changes to the emergency plan and emergency plan implementing procedures to NRC Regional Administrators and ten copies to the Director, Office of Nuclear Reactor Regulation. The amendment contained in this notice reduces to 3 the total number of copies the licensee is required to submit (one copy to be sent to the appropriate Regional Administrator and two copies to NRC Headquarters).

Because these amendments relate solely to procedural matters, the Commission has found that good cause exists for omitting notice of proposed rulemaking and public procedure thereon, as unnecessary. Since the amendment relieves licensees from restrictions under regulations currently in effect, it is effective upon publication.

Paperwork Reduction Act Statement

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget; OMB approval No. 3150–0011.

List of Subjects in 10 CFR Part 50

Antitrust, Classified information, Fire prevention, Intergovernmental relations, Nuclear power plants and reactors, Penalty, Radiation protection, Reactor siting criteria, Reporting requirements.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and sections 552 and 553 of Title 5 of the United States Code, the following amendments to Title 10, Chapter I, Code of Federal Regulations, Part 50 are published as a document subject to codification.

PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

1. The authority citation for Part 50 continues to read as follows:

Authority: Secs. 103, 104, 161, 182, 183, 186, 189, 68 Stat. 936, 937, 948, 953, 954, 955, 956, as amended, sec. 234, 83 Stat. 1244, as amended (42 U.S.C. 2133, 2134, 2201, 2232, 2233, 2236, 2239, 2282); secs. 201, 202, 206, 88 Stat. 1242, 1244, 1246, as amended (42 U.S.C. 5841, 5842, 5846), unless otherwise noted.

Section 50.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 50.78 also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Sections 50.80–50.81 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Sections 50.100–50.102 also issued under sec. 186, 68 Stat. 955 (42 U.S.C. 2236).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273), §§ 50.10 (a), (b), and (c), 50.44, 50.46, 50.48, 50.54, and 50.80(a) are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); §§50.10 (b) and (c) and 50.54 are issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and §§ 50.55(e), 50.59(b), 50.70, 50.71, 50.72, and 50.78 are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. Paragraph (q) of § 50.54 is revised to read as follows:

§ 50.54 Conditions of licenses.

* * * * *

(q) A licensee authorized to possess and/or operate a nuclear power reactor shall follow and maintain in effect emergency plans which meet the standards in § 50.47(b) of this part and the requirements in Appendix E to this Part. A licensee authorized to possess and/or operate a research reactor or a fuel facility shall follow and maintain in effect emergency plans which meet the requirements in Appendix E of this part. The nuclear power reactor licensee may make changes to these plans without Commission approval only if such changes do not decrease the effectiveness of the plans and the plans, as changed, continue to meet the standards of §§ 50.47(b) of this part and the requirements of Appendix E of this Part. The research reactor licensee and/or the fuel facility licensee may make changes to these plans without Commission approval only if such changes do not decrease the effectiveness of the plans and the plans, as changed, continue to meet the requirements of Appendix E of this part. Proposed changes that decrease the effectiveness of the approved emergency plans shall not be implemented without application to and approval by the Commission. The licensee shall furnish one copy of each proposed change for approval to the Administrator of the appropriate NRC Regional Office specified in Appendix D of Part 20 of this chapter and two copies to the Document Control Desk, U.S. Nuclear Regulatory Commission, Washington, DC 20555. If a change is made without approval, the licensee shall furnish one copy to the Administrator of the appropriate NRC Regional Office specified in Appendix D of Part 20 of this chapter and two copies of the Document Control Desk, U.S. Nuclear Regulatory Commission, Washington, DC 20555 within 30 days after the change is made.

3. Part V, "IMPLEMENTING PROCEDURES," of Appendix E is revised to read as follows:

Appendix E—Emergency Planning and Preparedness for Production and Utilization Facilities

* * * * *

V. Implementing Procedures

No less than 180 days prior to the scheduled issuance of an operating license for a nuclear power reactor or a license to possess nuclear material one copy of the applicant's detailed implementing procedures for its emergency plan shall be submitted to the Administrator of the appropriate NRC Regional Office, specified in Appendix D of Part 20 of this chapter and two copies are to be sent to the Document Control Desk, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Licensees who are authorized to operate a nuclear power facility shall submit one copy of any changes to the emergency plan or procedures to the Administrator of the appropriate NRC Regional Office, specified in Appendix D, 10 CFR Part 20, and two copies to the Document Control Desk within 30 days of such changes.

Dated at Bethesda, Maryland, this 29th day of November 1982.

For the Nuclear Regulatory Commission.

William J. Dircks,

Executive Director for Operations.

BILLING CODE 7590-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Parts 368, 369, 370, 372, 373, 387, and 388

[Docket No. 21213-249]

Revision of Enforcement Provisions of the Export Administration Regulations and Conforming Amendments

AGENCY: International Trade Administration, Commerce.

ACTION: Final rule

SUMMARY: This rule finalizes revisions to the Enforcement provisions of the Export Administration Regulations (Part 387, Title 15, Code of Federal Regulations) which were published in interim form on December 22, 1980 (45 FR 84021) with request for comments. All comments, both written and oral, were considered and portions of the Regulations were changed in response to those comments. This rule incorporates amendments to the Export Administration Act (Pub. L. 97-145), reflects current organizational and administrative procedures within the International Trade Administration, revises and incorporates into Part 387 a provision relating to interrogatories or requests to produce documents, codified prior to October 12, 1979 in § 388.15 of the Regulations, and modifies recordkeeping requirements. This rule also makes technical amendments to Part 388 relating to administrative proceedings. Conforming amendments are also made to Parts 368 through 386; reporting for the antiboycott regulations are clarified; one interpretation in the antiboycott regulations is deleted, and four are redesignated as Supplement Nos. 1, 2, 3, 4, and 5, "Interpretations."

DATE: Effective December 28, 1982.

FOR FURTHER INFORMATION CONTACT:

Howard N. Fenton, Office of Antiboycott Compliance, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Room 3886, Washington, D.C. 20230, (202) 377-2381

Archie Andrews, Director, Exporters' Service Staff, Office of Export Administration, U.S. Department of Commerce, Room 1099-A, Washington, D.C. 20230, (202) 377-4811.

SUPPLEMENTARY INFORMATION:

I. Substance of the Regulations

This rule makes final the revisions to the Export Administration Regulations to incorporate changes in the Export Adminstration Act relating to criminal penalties, to conform specific violation provisions to the Export Administration Act, to reflect organizational changes within the International Trade Administration, to establish as distinct violations the failure to comply with reporting requirements and the failure to answer interrogatories or respond to requests for admission or to produce evidence during investigations conducted under the Export Administration Act of 1979, as amended (the "Act") and to conform this Part with revised Part 388.

The antiboycott regulations are amended to delete a supplement that has been superseded and renumber the remaining supplements.

In the interest of reducing the regulatory burden on the export community and persons reporting boycott-related requests, this rule permits recordkeeping entities, as defined in § 387.13(b), to request a limited exception to the recordkeeping requirements of Part 387. If granted an exception, the recordkeeping entity is allowed to maintain micrographic reproductions rather than originals of documents during the first year of the retention period, as well as in subsequent years. The Department is also exempting certain types of documents from the recordkeeping requirement.

Part 388 of the Export Administration Regulations details the administrative proceedings that the Office of Antiboycott Compliance and the Office of Export Enforcement may initiate to impose sanctions for violations of the Export Administration Act of 1979. The Regulations provide for the settlement of cases prior to the service of a charging letter if a consent agreement and order are approved by the Deputy Assistant Secretary of Commerce for Export Enforcement. This rule provides the Deputy Assistant Secretary with the flexibility to suspend a sanction under any terms or conditions that he may specify in such an order.

The authority of the Office of Export Administration to revise, suspend or revoke licenses or, in the case of bulk licenses described in Part 373, portions of licenses, is clarified.

The paragraph dealing with revocation of export licenses under § 373.7, Service Supply (SL) Procedure, is removed because it is redundant. All export licenses, including bulk licenses, and other authorizations are subject to revision, suspension, or revocation without notice under § 370.3 and § 372.9.

The definitions of "department," "party," "presiding official," and "respondent" in § 388.2 are revised.

II. Recordkeeping Requirements

Office of Export Administration and Office of Antiboycott Compliance information collection requirements contained in this regulation (§ 387.13) have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB numbers 0625-0104 and 0625-0036, respectively.

III. Issues and Public Comments

The Department received five public comments on the interim rule published December 22, 1980. Three comments noted with approval revised § 387.13(g) which, upon request, allows companies to maintain records on micrographic systems during the first year of the retention period. One comment suggested that records should be retainable in micrographic systems immediately upon their receipt. Because maintenance of original records for the first year of the retention period facilitates the investigative process, the Department, though sensitive to the reporting burden (as evidenced by its willingness to consider exceptional cases), cannot further reduce that burden without jeopardizing its ability to enforce the Act effectively. Another comment suggested a number of documents that should be exempt from recordkeeping requirements under § 387.13(h). Several of the suggestions have been adopted and included in that section.

The Export Administration Act of 1979 was amended by Pub. L. 97-145 after

publication of these rules in interim form. Consequently, the sanctions provision, § 387.1, has been amended to conform it to the new penalty provisions that apply to violations occurring after December 29, 1981.

IV. Rulemaking Procedure and Invitation for Comments

In connection with various rulemaking requirements, the Office of Export Administration, the Office of Export Enforcement, and the Office of Antiboycott Compliance have determined that:

1. Under section 13(a) of the Act (50 U.S.C. app. 2412) this rule is exempt from public participation in rulemaking procedures of the Administrative Procedure Act. This rule was published in interim form. All comments, both written and oral, were considered, as contemplated by section 13(b) of the Act. This rule addresses those comments and confirms the regulations as a final rule.

2. This rule is not a major rule within the meaning of section 1(b) of Executive Order 12291 (46 FR 13193, February 19, 1981), "Federal Regulation."

3. This rule does not impose an additional burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq.

4. This rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 et seq.

This rule is issued in final form. Although there is no formal comment period, public comments on these regulations are welcome on a continuing basis. All public comments on these regulations are a matter of public record and are available for public inspection and copying. Communications from agencies of the U.S. Government or foreign governments are not made available for public inspection.

The public record concerning these regulations will be maintained in the International Trade Administration Freedom of Information Records Inspection Facility, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Room 4001–B, Washington, D.C. 20230. Records in this facility, including written public comments and memoranda summarizing the substance of oral communications, may be inspected and copied in accordance with regulations published in Part 4 of Title 15 of the Code of Federal Regulations. Information about the inspection and copying of records at the facility may be obtained from Patricia L. Mann, the International Trade Administration Freedom of Information Officer, at the above address or by calling (202) 377–3031.

Drafting Information

The principal authors of these rules are Pamela P. Breed, Deputy Assistant General Counsel—Enforcement and Litigation, Daniel C. Hurley, Jr., Attorney-Advisor, and Margo E. Jackson, Attorney-Advisor.

List of Subjects

15 CFR Part 368

Imports, Penalties.

15 CFR Part 369

Boycotts, Reporting requirements, Trade practices.

15 CFR Part 370

Exports, Administrative practice and procedure.

15 CFR Parts 372, 373

Exports.

15 CFR Part 387

Exports, law enforcement, Penalties.

15 CFR Part 388

Administrative practice and procedure, Exports, Penalties, Boycotts.

For the reasons set forth above, the regulations on Enforcement, 15 CFR Part 387, as well as portions of Parts 368 through 386 and 388 are amended as set forth below.

1. 15 CFR Part 387 is revised as set forth below.

PART 387—ENFORCEMENT

Sec.

387.1 Sanctions.
387.2 Causing, aiding, and abetting a violation.
387.3 Solicitation, attempt, and conspiracy.
387.4 Acting with knowledge of a violation.
387.5 Misrepresentation and concealment of facts.
387.6 Export, diversion, reexport, transshipment.
387.7 Failure to comply with reporting requirements.
387.8 Failure to answer interrogatories or respond to requests for admission or to produce documents.
387.9 Licensee accountable for use of license.
387.10 Unauthorized use and alterations of export control documents.
387.11 Trafficking and advertising export control documents.
387.12 Transactions with persons subject to denial orders.
387.13 Recordkeeping.
387.14 Where to report violations.

Authority. Sec. 4, Pub. L. 97–145 (to be codified at 50 U.S.C. app. 2410;) Secs. 4, 5, 6, 7, 8, 11, 12, 15 and 21, Pub. L. 96–72, 50 U.S.C. app. § 2401, et seq. (Supp. III 1979); E.O. 12214, (45 FR 29783, May 6, 1980); Department Organization Order 10–3 of February 15, 1982 (unpublished) and International Trade Administration Organization and Function Orders 41–1, effective February 15, 1982 (unpublished) and 41–4, effective May 18, 1982 (47 FR 29582, July 7, 1982).

§ 387.1 Sanctions.

(a) *Criminal.*—(1) *Violations of Export Administration Act.*—(i) *General.* Except as provided in paragraph (a)(1)(ii) of this section, whoever knowingly violates the Export Administration Act ("the Act") or any regulation, order, or license issued under the Act is punishable for each violation by a fine of not more than five times the value of the exports involved or $50,000, whichever is greater, or by imprisonment for not more than five years, or both.

(ii) *Willful violations.* Whoever willfully exports anything contrary to any provision of the Act or any regulation, order, or license issued under the Act, with the knowledge that such exports will be used for the benefit of any country to which exports are restricted for national security or foreign policy purposes except in the case of an individual, shall be fined not more than five times the value of the exports involved or $1,000,000, whichever is greater; and in the case of an individual, shall be fined not more than $250,000, or imprisoned not more than 10 years, or both. Any person who is issued a validated license under this Act for the export of any goods or technology to a controlled country and who, with the knowledge that such export is being used by such controlled country for military or intelligence gathering purposes contrary to the conditions under which the license was issued, willfully fails to report such use to the Secretary of Defense except in the case of an individual, shall be fined not more than five times the value of the exports involved or $1,000,000, whichever is greater; and in the case of an individual, shall be fined not more than $250,000, or imprisoned not more than five years, or both. For purposes of this Part, "controlled country" means any country described in section 620(f) of the Foreign Assistance Act of 1961 (22 U.S.C. 2370).

(2) *Violations of False Statements Act.* The submission of false or misleading information or the concealment of material facts, whether in connection with license applications, boycott reports, Shipper's Export Declarations, investigations, compliance proceedings, appeals, or otherwise, is also punishable by a fine of not more than $10,000, or by imprisonment for not more than five years, or both, for each violation (18 U.S.C. 1001).

(b) *Administrative.*[1]—(1) *Denial of export privileges.* Whoever violates any law, regulation, order, or license relating to export controls or restrictive trade practices and boycotts is also subject to administrative action which may result in suspension, revocation, or denial of export privileges conferred under the Export Administration Act (*see* § 388.3 et seq.).

(2) *Exclusion from practice.* Whoever violates any law, regulation, order, or license relating to export controls or restrictive trade practices and boycotts is further subject to administrative action which may result in exclusion from practice before the International Trade Administration (*see* § 390.2(a)).

(3) *Civil penalty.* A civil penalty may be imposed for each violation of the Export Administration Act or any regulation, order or license issued under the Act either in addition to, or instead of, any other liability or penalty which may be imposed. The civil penalty may not exceed $10,000 for each violation except that the civil penalty for each violation involving national security controls imposed under § 5 of the Act may not exceed $100,000. The payment of such penalty may be deferred or suspended, in whole or in part, for a period of time that may exceed one year. Deferral or suspension shall not operate as a bar in the collection of the penalty in the event that the conditions of the suspension or deferral are not fulfilled. When any person fails to pay a penalty imposed under this § 387.1(b)(3), civil action for the recovery of the penalty may be brought in the name of the United States, in which action the court shall determine *de novo* all issues necessary to establish liability. Once a penalty has been paid, no action for its refund may be maintained in any court.[2]

(4) *Seizure.* Commodities or technical data which have been, are being, or are intended to be, exported or shipped from or taken out of the United States in violation of the Export Administration Act or of any regulation, order, or license issued under the Act are subject to being seized and detained, as are the vessels, vehicles, and aircraft carrying such commodities or technical data. Seized commodities or technical data are subject to forfeiture (22 U.S.C. 401) (*see* § 386.8(b)(6)).

[1] Violations of the Act or Regulations, or any order or license issued under the Act, may result in the imposition of administrative sanctions, and also or alternatively of a fine or imprisonment as described in paragraph (a) of this section, seizure or forfeiture of property under 22 U.S.C. 401, or any other liability or penalty imposed by law. The U.S. Department of Commerce may compromise and settle any administrative proceeding brought with respect to such violations.

[2] The U.S. Department of Commerce may refund the penalty at any time within two years of payment if it is found that there was a material error of fact or of law.

§ 387.2 Causing, aiding, and abetting a violation.

No person may cause, or aid, abet, counsel, command, induce, procure, or permit the doing of any act prohibited, or the omission of any act required, by the Export Administration Act or any regulation, order, or license issued under the Act.

§ 387.3 Solicitation, attempt, and conspiracy.

(a) *Solicitation and attempt.* No person may do any act that solicits the commission of, or that constitutes an attempt to bring about, a violation of the Export Administration Act or any regulation, order, or license issued under the Act.

(b) *Conspiracy.* No person may conspire or act in concert with one or more persons in any manner or for any purpose to bring about or to do any act that constitutes a violation of the Export Administration Act or any regulation, order, or license issued under the Act.

§ 387.4 Acting with knowledge of a violation.

No person may order, buy, receive, conceal, store, use, sell, loan, dispose of, transfer, transport, finance, forward, or otherwise service, in whole or in part, any commodity or technical data exported or to be exported from the United States or which is otherwise subject to the Export Administration Regulations, with knowledge or reason to know that a violation of the Export Administration Act or any regulation, order, or license has occurred, is about to occur, or is intended to occur with respect to any transaction.

§ 387.5 Misrepresentation and concealment of facts.

(a) *Misrepresentation and concealment.* No person may make any false or misleading representation, statement, or certification, or falsify or conceal any material fact, whether directly to the Office of Export Administration, the Office of Export Enforcement,[1] the Office of Antiboycott Compliance, any customs office, or an official of any other United States agency, or indirectly to any of the foregoing through any other person or foreign government agency or official:

[1] For purposes of Part 387, the Office of Export Enforcement enforces the Export Administration Regulations relating to short supply controls imposed under section 7 of the Act. Such controls are otherwise the responsibility of the Office of Industrial Resource Administration.

(1) In the course of an investigation or other action instituted under the authority of the Export Administration Act;

(2) In connection with the preparation, submission, issuance, use, or maintenance of any export control document, as defined in §370.2, or restrictive trade practice or boycott request report, as defined in § 369.6;

(3) For the purpose of or in connection with effecting an export from the United States, or the reexport, transshipment, or diversion of any such export.

(b) *Scope.* Paragraph (a) of this section applies to all representations, statements, and certifications made to, and material facts concealed from, the Office of Export Administration, the Office of Export Enforcement, the Office of Antiboycott Compliance, and the U.S. Customs Service, or other agencies with respect to matters within the jurisdiction of these agencies under the statutes, Executive Orders, and regulations relating to export control, restrictive trade practices or boycotts, and orders or licenses issued or established under the Act.

(c) *Representations to be continuing in effect; notification.* All representations, statements, and certifications made by any person are deemed to be continuing in effect. Every person who has made any representation, statement, or certification must notify, in writing, the Office of Export Administration, the Office of Export Enforcement, or the Office of Antiboycott Compliance, as well as any other cognizant agency(ies), of any change of any material fact or intention from that previously represented, stated, or certified. Such notification shall be made immediately upon receipt of any information which would lead a reasonably prudent person to believe that a change of material fact or intention has occurred or may occur in the future.

§ 387.6 Export, diversion, reexport, transshipment.

Except as specifically authorized by the Office of Export Administration, in consultation with the Office of Export Enforcement, no person may export, dispose of, divert, direct, mail or otherwise ship, transship, or reexport commodities or technical data to any person or destination or for any use in violation of or contrary to the terms, provisions, or conditions of any export control document, any prior representation, any form of notification of prohibition against such action, or any provision of the Export

Administration Act or any regulation, order, or license issued under the Act.

§ 387.7 Failure to comply with reporting requirements.

No person may fail or refuse to comply with reporting requirements in violation of the Export Administration Act or of any order, regulation or license issued under the Act. *See,* for example, §§ 369.6 and 373.4(e)(3).

§ 387.8 Failure to answer interrogatories or respond to requests for admission or to produce documents.

(a) *Interrogatories and requests for admission or to produce documents.* Whenever the Office of Export Enforcement or the Office of Antiboycott Compliance finds it impracticable, during the course of an investigation, other proceeding or action, to subpoena a person, or books, writings, records, or other tangible things bearing upon the matter being investigated, the Office of Export Enforcement or the Office of Antiboycott Compliance may serve upon such person interrogatories, requests for admission of facts, requests for the production of books, records and other writings, or requests to produce or make available other tangible things for inspection, including commodities or technical data exported from the United States, as therein specifically set forth. If a person, within 20 days after receiving interrogatories or requests, fails or refuses to (1) furnish responsive answers to such interrogatories or requests for admissions, (2) produce the requested books, records and other writings, or (3) produce or make available for inspection other tangible things requested, including commodities or technical data exported from the United States, which are in that person's possession, custody or control, without good cause being shown, an order may be issued as provided in § 383.3(a)(2), denying export privileges to such person. This order shall remain in effect for five years or until such person responds to the interrogatories or requests or gives adequate reasons for failure or refusal to so respond.

(b) *Service.* Interrogatories or requests shall be served in the same manner as provided in § 388.4 (b) and (c) for service of a charging letter.

(c) *Enforcement procedures.* The procedure regarding applications for denial orders under § 387.8(a) and motions to vacate or modify such orders shall conform substantially to that provided for temporary denial orders by § 388.19 (b) and (c).

§ 387.9 Licensee accountable for use of license.

The person to whom a license is issued becomes the licensee and will be held strictly accountable for use of the license. The licensee may not, without prior written approval of the Office of Export Administration, in consultation with the Office of Export Enforcement, permit any other person to facilitate or effect the export of any commodity or technical data described in the license, except under his direction and responsibility as his true agent in fact. No term of sale or export or other agreement between the licensee or the order party and the purchaser or ultimate consignee of such commodity or technical data may provide otherwise.

§ 387.10 Unauthorized use and alterations of export control documents.

Except as otherwise specifically authorized in the Export Administration Regulations or in writing by the Office of Export Administration, in consultation with the Office of Export Enforcement, no licensee or other person, may obtain, use, alter, or assist in or permit the use or alteration of, any export control document, for the purpose of or in connection with facilitating or effecting any export or reexport other than that set forth in such document and in accordance with all the terms, provisions, and conditions thereof.

§ 387.11 Trafficking and advertising export control documents.

(a) *Unlawful practices.* Without prior written approval of the Office of Export Administration, in consultation with the Office of Export Enforcement, no person may do any of the following with respect to any export or reexport under any export control document:

(1) *Transfers or changes of authority.* Effect any transfer of, or other change of the authority granted in such document, whether by sale, grant, gift, loan or otherwise, to any person; or permit any person to use the same other than for the true account of and as true agent in fact for the licensee; or, if that person is not the licensee, to receive or accept a transfer or other change of the authority granted in, or otherwise use an export control document except for the true account of and as true agent in fact for the licensee.

(2) *Change in named parties.* Effect any change of, substitution for, or addition to, the parties named in an export control document; or transfer, obtain, purchase, or create any interest or participation in the transaction described in any export control document.

(3) *Unlawful advertising or soliciting.* Offer or solicit by advertisement, circular, or other communication any transfer or change of an export control document or any interest therein prohibited above. Such communication shall be deemed unlawful:

(i) Even though coupled with a condition requiring approval by the Office of Export Administration of a new consignor or consignee or other change in the export license, by way of transfer, amendment or otherwise;

(ii) Where, in offering or soliciting the sale for export of any commodities or technical data, the communication indicates that the proposed seller of such commodities or technical data holds or will furnish a license or other export control document for the export of such commodities or technical data;

(iii) Where, in offering or soliciting the purchase for export of any commodities or technical data, that communication is addressed by the proposed buyer directly or indirectly to any person on the condition that such person as a seller then holds or will furnish a license or other export control document for the export of those commodities or technical data.

(4) *Other unlawful practices.* Sections 387.10, 387.11, and 387.12 among other things, make it unlawful:

(i) For a licensee or other person holding an export control document to sell or offer to sell, or for any person to purchase or to offer to purchase, the commodities or technical data described in such document with the understanding that the document may be used by or for the benefit of the purchaser to effect export of those commodities or technical data;

(ii) For any person to effect the export of the commodities referred to in § 387.11(a)(4)(i) for the benefit of or "for the account" of any person other than the licensee, regardless of the device, means, or fiction employed;

(iii) For the licensee to act fictitiously as principal or agent of another person who actually is effecting the export, or for such other person to act fictitiously as the licensee's principal or agent for the same purpose;

(iv) For the named consignee to act "for the account" of a new unlicensed consignee, or

(v) For any person to use a license, originally issued for a specified transaction which was not effected, for any other transaction without the specific written authorization of the Office of Export Administration.

(b) *Transfer of dock receipts, bills of lading, or liens.* (1) *Use of certain export control documents.* Section 387.12(a) is

not to be construed as affecting the transfer and other use of dock receipts, bills of lading, or other commercial documents necessary to complete a transaction authorized by the export license, or impairing the validity of liens or other security titles or interests created in good faith with respect to commodities or technical data or documents in the course of financing, warehousing, forwarding, or transporting commodities or technical data.

(2) *Disposition of export.* A person who is entitled to foreclose on any lien or other security title or interest, or who may exercise any rights as holder of the lien or other security title or interest, who contemplates an export under the license by someone other than the licensee or to someone other than the purchaser or ultimate consignee designated in the license, must apply for a new license in accordance with the provisions of Part 372.

§ 387.12 Transactions with persons subject to denial orders.

(a) *Prohibited activities.* Without prior disclosure of the facts to and specific authorization of the Office of Export Administration, in consultation with the Office of Export Enforcement, no person may directly or indirectly, in any manner or capacity:

(1) Apply for, obtain, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to an export or reexport of commodities or technical data by, to, or for another person then subject to an order revoking or denying his export privileges or then excluded from practice before the International Trade Administration; or

(2) Order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate (i) in any transaction which may involve any commodity or technical data exported or to be exported from the United States, (ii) in any reexport thereof, or (iii) in any other transaction which is subject to the Export Administration Regulations, if the person denied export privileges may obtain any benefit or have any interest in, directly or indirectly, any of these transactions.

(b) *Definition of "Person Denied Export Privileges".* For the purpose of this section, the term "person denied export privileges" means:

(1) Any person, firm, corporation, or other business organization whose export privileges are revoked or denied by any order or who is excluded by such order from practice before the International Trade Administration; and

(2) Any other person, firm, corporation, or other business organization also denied export privileges or excluded from practice before the International Trade Administration because of a relationship to any person denied export privileges through affiliation, ownership, control, position of responsibility, or other connection in the conduct of trade or related services during the period of such order.

(c) *Applicability of orders.* Orders which revoke or deny the export privileges of any person or which exclude any person from practice before the International Trade Administration may provide that the terms and prohibitions of such orders apply not only to the persons expressly named therein but also, for the purpose of preventing evasion, to any other person, firm, corporation, or other business organization with which that person may then or thereafter (during the term of the order) be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of trade or related services. The Table of Denial Orders (*see* Supplement No. 1 to Part 388 and §§ 388.3 and 390.2) contains all orders which currently deny export privileges in whole or in part. The table also lists the names and addresses of such persons, the effective and expiration dates of the orders, a brief summary of the export privileges affected, and the citations to the volumes and pages of the **Federal Register** where complete texts of the orders are published. The publication of such orders in the **Federal Register** constitutes legal notice of the terms thereof to all persons.

§ 387.13 Recordkeeping.

(a) *Transactions subject to this regulation.* This section applies to (1) transactions involving restrictive trade practice or boycott requirements or requests (OMB No. 0625–0036), (2) exports of commodities or technical data from the United States and any known reexports, transshipments, or diversions of commodities or technical data originally exported from the United States (OMB No. 0625–0104), or (3) any other transactions subject to these Regulations, regardless of whether the export or reexport is made, or proposed to be made, by any person with or without authorization by a validated license, a general license, or any other export authorization. This section also applies to all negotiations connected with those transactions, except that for export control matters a mere preliminary inquiry or offer to do business and negative response thereto shall not constitute negotiations, unless the inquiry or offer to do business proposes a transaction which a reasonably prudent exporter would believe likely to lead to a violation of export orders or regulations. It also applies to any exports to Canada, if, at any stage in the transaction, it appears that a person in a country other than the United States or Canada has an interest therein or that the commodity or technical data involved is to be reexported, transshipped, or diverted from Canada to another foreign country.

(b) *Persons subject to this regulation.* Any person subject to the jurisdiction of the United States who, as principal or agent (including a forwarding agent), participates in any transaction described in § 387.13(a), and any person in the United States or abroad who is required to make and keep records under any provisions of the Export Administration Regulations, shall keep all the records described in § 387.13(c), which are made or obtained by that person, and shall produce them in the manner provided in paragraph (f) of this section.

(c) *Records to be kept.* The records to kept under this § 387.13 shall include export control documents, as defined in §370.2, memoranda, notes, correspondence, contracts, invitations to bid, books of account, financial records, restrictive trade practice or boycott documents, and reports, and other written matter pertaining to the transactions described in § 387.13(a), which are made or obtained by a person described in § 387.13(b). In addition to the records required to be kept by this section, other sections of the Regulations require the retention of records, including §§ 368.2, 369.6, 371.9, 371.10, 371.12, 371.22, 372.1, 372.5, 372.6, 372.13, 373.3, 373.4, 373.7, 373.8, 374.7, 376.5, 376.8, 376.10, 376.15, 377.5, 378.5, 378.6, 379.4, 386.3, and 386.6. The revocation or revision of any provision of the Export Administration Regulations which requires the making and keeping of records shall not be retroactive in effect unless specifically provided and shall not affect the original requirement to keep these records for the prescribed period.

(d) *Reproduction of records.* (1) *Definition.* "Reproduction" for the purpose of this § 387.13(d) is defined to include any photographic, photostatic, micrographic, miniature photographic or other process which completely, accurately and durably reproduces the original record.

(2) *Use of reproductions.* Reproductions may not be substituted for original documents with respect to

all categories of records required to be retained under any provision of the Export Administration Regulations or of any order, until all of the following conditions are met:

(i) The original documents have been retained for twelve months after the beginning of the retention period set forth in § 387.13(e) *or* an exception has been granted under the provisions of § 387.13(g).

(ii) All significant information, marks and/or other characteristics on the original document must be clearly visible and legibly reproduced.

(iii) Appropriate facilities must be provided and maintained for the preservation of the reproduced records during the retention period and for the ready location and inspection of the records, including a projector for viewing films, if needed.

(e) *Period of retention.* (1) Except for records relating to restrictive trade practice or boycott requests, which must be kept for three years (*see* § 369.6(b)(8)), records required under this section shall be kept for a period of two years from the latest of the following times:

(i) The export from the United States; or

(ii) Any known reexport, transshipment, or diversion; or

(iii) Any other termination of the transaction, whether formally in writing or by any other means. It may be advisable to maintain records longer than the mandatory two-year retention period because the statute of limitations for criminal actions brought under the Export Administration Act of 1979 and its predecessor Acts is five years (18 U.S.C. 3282). The statute of limitations for administrative compliance proceedings is also five years (28 U.S.C. 2462).

(2) If the Department of Commerce or any other Government agency makes a formal or informal request for a certain record or records, such record or records may not be destroyed or disposed of without the written authorization of the agency concerned.

(f) *Producing and inspecting records.* (1) Persons within the United States may be requested to produce records which are required to be kept by any provision of the Export Administration Regulations or by any order, and to make them available for inspection and copying by any authorized agent, official or employee of the International Trade Administration, the U.S. Customs Service, or the U.S. Government, without any charge or expense to such agent, official or employee. The Office of Export Enforcement and the Office of Antiboycott Compliance encourage voluntary cooperation with such requests. When voluntary cooperation is not forthcoming the Office of Export Enforcement and the Office of Antiboycott Compliance are authorized to issue subpoenas for books, records, and other writings. In instances where a person does not comply with a subpoena, the Department of Commerce may petition the appropriate district court to have the subpoena enforced.

(2) Every person abroad, required to keep records by any provision of the Export Administration Regulations or by any order, shall produce all records or reproductions of records required to be kept, and make them available for inspection and copying upon request by an authorized agent, official, or employee of the International Trade Administration, the U.S. Customs Service, or a U.S. Foreign Service post, or by any other accredited representative of the U.S. Government, without any charge of expense to such agent, official or employee. Persons located outside the United States who fail to comply with certain requests, including requests to produce documents, may be subject to orders denying export privileges. (*See* § 387.8.)

(g) *Requests for exceptions to recordkeeping requirements.* (1) *Effect of exception.* Recordkeeping entities (as defined in § 387.13(b) wishing to maintain records on micrographic systems prior to the second year of the retention period may request an exception to the recordkeeping requirements. An exception, if granted, permits the recordkeeping entity to substitute micrographic records for original documents for the full retention period.

(2) *Basis for consideration.* When reviewing requests for exceptions, the Office of Export Administration, in consultation with the Office of Export Enforcement, and the Office of Antiboycott Compliance will take into consideration the requestor's previous performance with respect to general export control matters and antiboycott matters respectively.

(3) *Guidelines for micrographic systems.* To maintain records under this exception, a micrographic system shall have the following minimum requirements:

(i) The system shall provide commercial permanence of all records.

(ii) The system shall provide for frequent quality control inspection to ensure readability of all records.

(iii) Micrographed records must have a degree of legibility and readability, when displayed on a viewer and when reproduced on paper, equal to that of the original records. (*See* section 5 or IRS Revenue Procedure No. 81–46, 1981–40 C.B. 6 concerning technical standards of micrographed records.)

(iv) A detailed index of all micrographic data shall be maintained, and arranged in such a manner as to permit the immediate location of any particular record, location of all documents relating to a given transaction, and determination of disposition of corresponding original documents.

(4) *Submission of requests for exception.*

(i) The recordkeeping entity shall submit requests for exceptions involving general export matters to:

Office of Export Administration, P.O. Box 273, Washington, D.C. 20044

(ii) The recordkeeping entity shall submit requests for exceptions involving antiboycott matters to:

Office of Antiboycott Compliance, U.S. Department of Commerce, 14th Street and Constitution Ave., NW., Room 3886, Washington, D.C. 20230

(iii) The requesting firm shall include in the request—

(A) Data on the proposed micrographic system, including specific information as to how the system conforms to requirements set forth in § 387.13(g)(3);

(B) A statement concerning intended disposition of corresponding original documents; and

(C) Samples of records to be kept on the system.

(5) *Micrographing records under an exception.* Upon receiving written notice that an exception has been granted under this § 387.13(g), the recordkeeping entity may substitute micrographic reproductions for only those records *already* in the retention period and approved under the exception. Originals of records that have not entered the retention period must be kept until the retention period begins (as set forth in §§ 369.6(b)(8) and 387.13(e)) and micrographed records may then be substituted for the originals.

(6) *Disposition of original documents.* The recordkeeping entity shall include with micrographed records a signed document indicating final disposition of original documents, and the date of final disposition.

(7) *Revocation of exception.* The Department of Commerce may revoke an individual exception at any time if it determines that the firm has acted improperly, or for other good cause. A decision to revoke this exception may be appealed under the provisions of Part 389 of these Regulations.

(h) *Records exempt from recordkeeping requirements.* The

following kinds of records have been determined to be exempt from recordkeeping requirements:

—Export Information Page
—Special Export Price List
—Vessel Log from Freight Forwarder
—Inspection Certificate
—Warranty Certificate
—Guarantee Certificate
—Packing Material Certificate
—Goods Quality Certificate
—Notification to Customer of Advance Mailings

§ 387.14 Where to report violations.

(a) *Notification.* The Office of Export Enforcement has the primary responsibility for enforcing these Regulations except that the Office of Antiboycott Compliance has the responsibility for enforcing the Restrictive Trade Practices or Boycott Regulations in particular.

(1) If a person obtains knowledge that a violation of these Regulations has occurred or will occur, that person may notify: Office of Export Enforcement, P.O. Box 7138, Washington, D.C. 20044, telephone (202) 377–3461, or Office of Antiboycott Compliance, U.S. Department of Commerce, 14th Street and Constitution Ave. N.W., Room 3886, Washington, D.C. 20230, telephone (202) 377–2381, as appropriate.

(2) Any federal, state, or local government agency obtaining knowledge of a potential violation under these Regulations should immediately report such potential violation to: (i) Office of Export Enforcement, P.O. Box 7138, Washington, D.C. 20044, telephone (202) 377–4608. Failure to report such potential violations may result in the unwarranted issuance of validated export licenses or unlicensed exports to the detriment of the national security, foreign policy or short supply interests of the United States; (ii) Office of Antiboycott Compliance, U.S. Department of Commerce, 14th Street and Constitution Ave. N.W., Room 3886, Washington, D.C. 20230, telephone (202) 377–2381.

(b) *Reporting requirement distinguished.* The notification provisions set forth in paragraph (a) of this section are not "reporting requirements" within the meaning of § 387.7.

PART 368—[AMENDED]

2. Section 368.4(b) is revised to read as follows:

§ 368.4 Penalties and sanctions for violations.

* * * * *

(b) *Criminal.* The False Statements Act makes it a criminal offense to make a willfully false statement or conceal a material fact, or knowingly use a document containing a false statement, in any matter within the jurisdiction of a U.S. department or agency. Maximum penalties under this provision are $10,000 fine or imprisonment for five years, or both. In addition, a knowing violation of the Export Administration Act or any regulation, order, or license issued under the Act generally is punishable by a fine of not more than five times the value of the exports involved or $50,000, whichever is greater, or by imprisonment for not more than 5 years, or both. Willful violations are punishable by fines or imprisonment, or both. (*See* also § 387.1(a).)

PART 369—[AMENDED]

3. Section 369.6(b) (5) and (8) are revised to read as follows:

§ 369.6 Reporting requirements.

* * * * *

(b) * * *

(5) At the reporting person's option, reports may be submitted on either a single transaction form (Form ITA–621P, Report of Restrictive Trade Practice or Boycott Request Single Transaction (revised 7–79) OMB No. 0625–0036) or on a multiple transaction form (Form ITA–6051P, Report of Request for Restrictive Trade Practice or Boycott Multiple Transactions (revised 7–79) OMB No. 41–R2305). Use of the multiple transaction form permits the reporting person to provide on one form all required information relating to as many as 75 reportable requests received within any single reporting period.

* * * * *

(8) Records containing information relating to a reportable boycott request, including a copy of any document(s) in which the request appears, must be maintained by the recipient for a three-year period after the receipt of the request. The Department may require that these materials be submitted to it or that it have access to them at any time within that period. (*See* § 387.13 for additional recordkeeping requirements.)

* * * * *

Supplement 1—[Removed]

4. Supplement No. 1 to Part 369 and the heading above it reading "Interpretation of Part 369" are removed.

Appendix—[Redesignated as Supplement 1]

5. The material titled "Appendix—Interpretations" is redesignated as Supplement No. 1 to Part 369, "Interpretations."

Supplement 2—[Amended]

6. A new heading "Interpretations" is added to Supplement No. 2 to Part 369.

Supplement 3—[Amended]

7. Supplement No. 3 to Part 369, "Appendix—Interpretations," is amended by removing "Appendix" from the heading.

Supplement 4—[Amended]

8. Supplement No. 4 to Part 369 is amended by removing "Appendix" from the heading.

Supplement 5—[Amended]

9. Supplement No. 5 to Part 369, "Appendix—Interpretation," is amended by removing "Appendix" from heading.

PART 370—[AMENDED]

10. Section 370.2 is amended by adding the following after the definitions of "Commodity Control List (CCL)" and "Net Value", respectively.

§ 370.2 Definitions of terms.

* * * * *

Controlled Country. Any country described in Section 620(f) of the Foreign Assistance Act of 1961.

* * * * *

Office of Export Enforcement. Pursuant to the Export Administration Act of 1979 (Pub. L. 96–72), the Office of Export Enforcement enforces the Export Administration Act and the Regulations thereunder and among other things, directs the investigation of suspected export control violations and prepares

cases on violations for referral for administrative proceedings by the Department of Commerce and criminal prosecution by the Department of Justice.

* * * * *

11. The first sentence of paragraph (b) of § 370.3 is revised to read as follows:

§ 370.3 Prohibited exports.

* * * * *

(b) *Revocation of Export Licenses and Other Authorizations.* All export licenses and other authorizations to export or reexport are subject to revision, suspension, or revocation, in whole or in part, without notice. * * *

* * * * *

PART 372—[AMENDED]

12. Paragraph (d)(4) of § 372.9 is revised to read as follows:

§ 372.9 Issuance of validated licenses.

* * * * *

(d) * * *

(4) *Revocation, suspensions, or revisions.* Outstanding licenses may be revised, suspended, or revoked, in whole or in part, or the validity periods thereof may be extended or reduced by appropriate orders or regulations.

* * * * *

PART 373—[AMENDED]

§ 373.7 [Amended]

13. Paragraph (m) of § 373.7 is removed.

14. Paragraph (n) of § 373.7 is redesignated as (m).

15. Paragraph (o) of § 373.7 is redesignated as (n).

PART 388—[AMENDED]

16. Section 388.1, first sentence, is revised to read as follows:

§388.1 Purpose and limitations.

The regulations in this part set forth the procedures for imposing administrative sanctions for violation of the Export Administration Act of 1979, as amended (Pub. L. 97–145, 50 U.S.C. app. 2401, *et seq.)* or its predecessor statute, the Export Administration Act of 1969, as amended (50 U.S.C. app. 2401, *et seq.* (1976 & Supp. III 1979)) (hereinafter collectively referred to as the "Act," although citations to particular sections of the Act will be to the 1979 Act), or of any regulation, order, license or other authorization issued thereunder. * * *

17. Section 388.2 is revised to read as follows:

§ 388.2 Definitions.

As used in this part:

Department. The Office of Export Administration, the Office of Export Enforcement or the Office of Antiboycott Compliance, International Trade Administration, U.S. Department of Commerce.

Party. The Department and any person named as a respondent, in a charging letter or order proposed or issued under this part.

Presiding Official. The person authorized to conduct hearings in administrative proceedings. For proceedings brought under § 8 of the Export Administration Act, the presiding official shall be an administrative law judge who may impose sanctions only after notice and opportunity for an agency hearing on the record. Other proceedings may be referred by the Director, Office of Export Enforcement, to either an Administrative Law Judge or the Hearing Commissioner who shall serve as presiding official.

Regulations. The Export Administration Regulations (15 CFR Parts 368 through 399), including the regulations concerning Restrictive Trade Practices or Boycotts (15 CFR Part 369).

Respondent. Any person named in a charging letter, temporary denial order, or order to show cause proposed or issued under this part.

18. Section 388.3(a)(4) is revised to read as follows:

§ 388.3 Denial of export privileges and imposition of civil penalties.

(a) * * *

(4) *Civil penalty.* In addition to or instead of any or all of the administrative sanctions described in (a) (1), (2) and (3) of this section, a civil penalty not to exceed $10,000 for each violation may be imposed, except that a civil penalty not to exceed $100,000 may be imposed for each violation involving national security controls imposed under § 5 of the Act.

* * * * *

19. The first sentence of § 388.4(a) is revised to read as follows:

§ 388.4 Institution of administrative proceedings.

(a) *Charging letters.* The Director of the Office of Export Enforcement [1] or the Director of the Office of Antiboycott Compliance, as appropriate, may begin administrative proceedings under this Part by issuing a charging letter in the name of the Department. * * *

* * * * *

20. The first sentence of § 388.6(a) is revised to read as follows:

§ 388.6 Filing and service of papers other than charging letter.

(a) *Filing.* All papers to be filed shall be delivered or mailed to "EAR Administrative Proceedings," U.S. Department of Commerce, Room 6716, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, or such other place as the presiding official may designate. * * *

* * * * *

21. Section 388.17(b) is revised to read as follows:

§ 388.17 Consent proceedings.

(a) * * *

(b) Cases may also be settled prior to the service of a charging letter. In such event, a proposed charging letter shall be prepared, and a consent agreement and order shall be submitted for approval and signature to the Deputy Assistant Secretary of Commerce for Export Enforcement. The consent proposal shall include a consent agreement and a proposed order. If the Deputy Assistant Secretary does not approve the proposal, he will notify the parties and the case will proceed as though no consent proposal had been made. If the Deputy Assistant Secretary approves the proposal he will issue an order, and no action by the presiding official shall be required. The Deputy Assistant Secretary may order that any administrative sanction imposed shall be suspended in whole or in part upon such terms of probation or other conditions as he deems appropriate. Any such suspension may be modified or revoked by the Deputy Assistant Secretary, or on appeal, by the Assistant Secretary of Commerce for Trade Administration, as provided in § 388.16(c).

* * * * *

§ 388.19 [Amended]

22. Section 388.19(a)(1) is amended to remove "Office of Export Administration" and insert "Office of Export Enforcement" in the first (and only) sentence.

[1] By agreement with the Director of the Office of Industrial Resource Administration, the Director of the Office of Export Enforcement enforces short supply controls imposed under section 7 of the Export Administration Act.

23. Section 388.20(c)(1)(i) is revised to read as follows:

§ 388.20 Record for decision and availability of documents.

* * * * *

(c) *Availability of documents.*—(1) *Scope.*

(i) For proceedings started on or after October 12, 1979, all charging letters, answers, decisions, and orders disposing of a case shall be made available for public inspection in the International Trade Administration Freedom of Information Records Inspection Facility, Room 4001–B, U.S. Department of Commerce. The complete record for decision, as defined in § 388.20 (a) and (b), shall be made available on request. In addition, all decisions on appeal and those final orders providing for denial, suspension or revocation of export licensing privileges shall be published in the **Federal Register.**

* * * * *

24. Section 388.22(b) is revised to read as follows:

§ 388.22 Appeals.

* * * * *

(b) *Filing of appeal.* An appeal of an order must be filed with the Office of the Assistant Secretary for Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Room 3898–B, Washington, D.C. 20230, within 30 days after service of the order appealed from. If the Assistant Secretary cannot act on an appeal for any reason, the Under Secretary for International Trade may designate another Department of Commerce official to receive and act on the appeal.

BILLING CODE 3510–25–M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Release No. 34–19336; S7–933]

Pro Rata Rule

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission announces the adoption of revised Rule 14d–8 to govern the acceptance of securities deposited in response to a partial tender offer if a greater number of securities are deposited than the bidder is bound or willing to purchase and rescission of current Rule 14d–8. Pursuant to revised Rule 14d–8, a bidder in an oversubscribed partial tender offer is required to accept securities on a pro rata basis according to the number of securities deposited by each depositor during the period such offer remains open.

DATE: Revised Rule 14d–8 shall be effective with respect to any tender offer subject to Section 14(d) of the Exchange Act that is commenced within the meaning of Rule 14d–2 under that Act after December 28, 1982.

FOR FURTHER INFORMATION CONTACT: Joseph G. Connolly, Jr., (202) 272–3097, Office of Tender Offers, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission announces the adoption of revised Rule 14d–8 under Sections 14(e) and 23(a) of the Securities Exchange Act of 1934 (the "Exchange Act") (15 U.S.C. 78a *et seq.*). The revised rule requires a bidder in an oversubscribed partial tender offer to accept securities on a pro rata basis according to the number of securities deposited by each security holder during the period such offer remains open.

I. General

After consideration of the comments received on proposed Rule 14d–8,[1] published in Release No. 34–18761 (May 25, 1982) (47 FR 24338) (the "Proposing Release"), and its continuing experience with the ten calendar day proration period in recent partial tender offers, the Commission has determined to adopt revised Rule 14d–8, as proposed, and to rescind current Rule 14d–8 (17 CFR 240.14d–8).[2] The Commission believes that, as stated in the Proposing Release, extension of proration rights throughout the term of the offer is essential to assure security holders the time necessary to consider the merits of an offer and to obtain sufficient information upon which to base their investment decisions and to minimize the potential security holder confusion and misunderstanding generated by changing proration periods and multiple proration pools.

In the Proposing Release, the Commission discussed at length the problems associated with the current ten calendar day proration period and requested comments on its proposal to extend the proration period for the duration of the offer. Concurring in the Commission's assessment that, as used in recent partial tender offers, the minimum ten calendar day proration period denies security holders an adequate opportunity to make informed investment decisions and leads to security holder confusion and misunderstanding, the majority of the commentators supported the Commission's proposal to extend the proration period beyond the current ten calendar day period.

A number of commentators related specific experiences in which they had problems receiving tender offer materials and effecting their investment decisions within the ten calendar day proration period. These experiences included receiving tender offer materials after the expiration of a bidder's proration period or so close to the end of the period that they could not tender before the expiration of the proration period. As a result, these commentators stated that they were foreclosed from participating in the offer and were likely to receive a lesser amount for their securities in a proposed second-step merger. In addition, these commentators highlighted the problems that individual security holders experience trying to understand the varying legal consequences of the deadlines contained in a partial tender offer, appreciating the importance of deciding

[1] Pursuant to the Commission's request for comment on the Proposing Release, 41 commentators submitted 42 letters. The commentators may be categorized as follows: corporations (7); law firms and associations (7); securities industry (6); banks and depositories (2); state governmental agencies (1); academicians (4); and individuals (14). The comment letters are available for public inspection and copying at the Commission's Public Reference Room (*see* File No. S7–933). The Commission also has placed in the files a copy of the summary of public comments prepared by the Division of Corporation Finance.

[2] Having considered the comments received regarding its authority to adopt revised Rule 14d–8, the Commission continues to believe that Sections 14(e) and 23(a) provide such authority.

before the expiration of the proration period whether to tender, sell or hold their stock, and comprehending the effect of multiple proration pools.

Some commentators, while favoring extension of the ten day proration period, suggested modifications to the Commission's specific proposal that were designed principally to make the proration period co-extensive with the withdrawal period. These alternatives were proposed as a result of the commentators' concern that the Commission's proposal would preclude any "early pay" in partial tender offers, since bidders in such offers no longer would be able to begin purchasing tendered securities upon the expiration of the withdrawal period but would have to wait until the expiration of the offer.[3] These commentators expressed concern that the Commission's proposal would tip the balance of advantage in favor of any and all offers and would preclude parity between the two types of offers, because bidders in any and all offers generally could still begin purchasing tendered securities upon the expiration of the withdrawal period.

After reviewing these proposed alternatives, the Commission has concluded that such revisions would continue to deny security holders in a partial tender offer the minimum time prescribed under the tender offer regulations for security holders to make their investment decision, which minimum time is, in fact, assured security holders in an any and all offer. Moreover, the commentators' suggested alternatives fail to eliminate the possibility of multiple proration pools and therefore would permit the current complexity and confusion generated in these partial offers to continue unabated.[4]

[3] Currently, a bidder in a partial offer generally can choose to accept shares for payment upon the expiration of the withdrawal period so long as the shares to be accepted for purchase are not in an open proration pool. In an any and all offer, a bidder generally may choose to accept shares for payment as soon as the withdrawal period expires. In either case, acceptance of securities for payment may be further delayed by, among other things, waiting periods under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 [15 U.S.C. 12 *et seq.*] and required regulatory and shareholders' approvals

[4] Two other proposed alternatives designed to provide some parity between "any and all" and "partial offers" included a suggestion that in addition to extending the proration period for the duration of the offer, the Commission should extend the withdrawal period for the duration of the offer. The other suggestion was to make the proration period co-extensive with the offering period, but allow a bidder to elect to purchase a portion of the shares tendered by each security holder at the time that it would be entitled to purchase securities tendered if the offer were for all the securities. Under this alternative, a bidder at such time could purchase from each security holder a number of shares equal to the percentage of securities of the class sought. The Commission does not believe that achieving time of payment parity between the two types of offers justifies the additional regulation embodied in the first proposal or the increased complexity that would result in the second proposal (particularly in view of the limited utility of such "early pay" option).

II. Certain Findings

As required by Section 23(a)(2) of the Exchange Act, the Commission has specifically considered the impact that the rule will have on competition. The Commission finds that compliance with the rule will not impose a significant burden on competition which is not necessary and appropriate to achieve the purposes of the Exchange Act.

The Commission for good cause finds, in accordance with the Administrative Procedure Act (5 U.S.C. 553(d)), that, in view of the pressing need to address the problems caused by the current ten calendar day proration period, revised Rule 14d–8 should be effective with respect to any tender offer subject to Section 14(d) of the Exchange Act commenced within the meaning of Rule 14d–2 under that Act after the date of publication of revised Rule 14d–8 in the Federal Register.

List of Subjects in 17 CFR Part 240

Reporting requirements, Securities.

III. Text of Rule

In accordance with the foregoing, Title 17, Chapter 2, of the Code of Federal Regulations is amended as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. By revising Rule 14d–8, § 240.14d–8, to read as follows:

§ 240.14d–8 Exemption from statutory pro rata requirements.

Notwithstanding the pro rata provisions of Section 14(d)(6) of the Act, if any person makes a tender offer or request or invitation for tenders, for less than all of the outstanding equity securities of a class, and if a greater number of securities are deposited pursuant thereto than such person is bound or willing to take up and pay for, the securities taken up and paid for shall be taken up and paid for as nearly as may be pro rata, disregarding fractions, according to the number of securities deposited by each depositor during the period such offer, request or invitation remains open.

Authority: This rule is amended pursuant to Sections 14(e) and 23(a) of the Securities Exchange Act of 1934.

(Sec. 23, 48 Stat. 901; sec. 203(a), 49 Stat. 704; sec. 8, 49 Stat. 1379; sec. 10, 78 Stat. 580; sec. 3, 82 Stat. 455; secs. 3–5, 84 Stat. 1497; sec. 18, 89 Stat. 155; 15 U.S.C. 78n(e), 78w(a))

By the Commission (Commissioners Evans, Thomas and Longstreth concurring; Chairman Shad and Commissioner Treadway dissenting).

George A. Fitzsimmons,

Secretary.

December 15, 1982.

Dissent by Chairman Shad:

On December 15th the Commission adopted Rule 14d–8 by a three-to-two vote. This rule extends the minimum proration period for the life of tender offers—from 10 calendar to 20 business days (26 to 28 calendar days). It is intended to reduce public shareholders' confusion and afford them more time to consider and act upon tender offers.

I share the majority's concerns for public shareholders, but dissented briefly for the following reasons.

I. Authority

The Commission's legal authority to extend the statutory proration period is not clear. In addition to the reasons cited by Commissioner Treadway in his dissent, when Congress adopted Section 14(d)(6) of the Securities Exchange Act in 1968, it considered and explicity rejected the proration scheme the new Rule 14d–8 implements.[1] The Supreme Court has held that where the provisions of an Act are unambiguous and its difections specific, there is no power to amend it by regulation[2]; and that if the passage of time indicates changes are needed in a congressionally established regulatory scheme, an agency must go to Congress, rather than implement changes by regulation.[3]

II. Merits

The minimum time periods of the old rule (Section 14(d)(6)) and the new Rule 14d–8 are as follows:

	Minimum business (calendar) days		
	Proration	Withdrawal	Termination
Old rule	6–8 (10)	15 (19–21)	20 (26–28)
New rule	20 (26–28)	15 (19–21)	20 (26–28)

Changes in a tender offer and competitive offers may extend certain of the above time periods, which would compound the problems discussed below.

The new rule increases the proration uncertainty (i.e., risk) to all shareholders, bidder and target companies from 10 to 26–28 calendar days.

Under the old rule, after the 10th calendar day shareholders could redeploy the shares not accepted or sell them and reinvest the

[1] S. Rep. No. 550, 90th Cong., 1st Sess. 4–5 (1967).

[2] *Koshland* v. *Helvering*, 298 U.S. 441, 447 (1936).

[3] *H.K. Porter Co., Inc.* v. *National Labor Relations Board*, 397 U.S. 99, 109 (1970); *Addison* v. *Holly Hill Co.* 322 U.S. 607, 617 (1944).

proceeds in more attractive securities. Under the new rule, they must wait 26–28 calendar days to learn the proration. Such a 16 to 18 day delay circumscribes shareholders' options.

Under the old rule, after the 15 business day withdrawal period, the bidder could purchase the shares tendered. Under the new rule, the bidder must wait an additional week, which increases the bidder's exposure to target defensive tactics, "white knights" and competitive bidders.

Under the old rule, shareholders had 9–11 calendar days after learning the proration to decide whether to withdraw all or any portion of their shares in order to: (a) Tender them to a competitive bidder; (b) sell them and reinvest the proceeds in more attractive securities; or (c) avoid an over-subscription.[4] Under the new rule, the withdrawal period expires five business days *before* shareholders know the proration.

Extending the proration period five business days *beyond* the withdrawal period largely nullifies the benefit of the withdrawal period to shareholders. It also locks-in those who do not withdraw their shares by the 15th business day or who tender thereafter. Therefore, sophisticated shareholders will maximize their options by not tendering until the 20th business day, since there is no advantage in tendering earlier. Unsophisticated shareholders who tender earlier will be locked-in upon expiration of the withdrawal period. In addition, a large volume of last minute tenders will further compound the uncertainty for all shareholders, bidder and target companies.

The new rule does not address dilatory tactics by target companies in forwarding tender offer materials to their shareholders, nor so-called "golder parachutes", nor does it inhibit multiple tenders and proration polls, two-tier offers or legal and financial maneuvers by bidder and target companies. To the contrary, the longer proration period and last minute tenders will facilitate such activities and tend to compound unsophisticated investors' confusion, which will work to the advantage of sophisticated traders.

For example, the much longer proration period, greater uncertainty as to the ultimate proration, increased likelihood of a smaller percentage of the shares tendered being accepted and the increased risk of blocking legal actions by the participants can be expected to result in lower bids in the open market for the public's shares during the longer proration period (nearly a month). This will afford risk arbitrageurs over two extra weeks to accumulate more shares from the public in the open market at lower relative prices than heretofore. The net result may prove to be no greater (if not less) public shareholder participation in proration pools,[5] and lower aggregate price realizations by public shareholders.

The longer proration period and greater uncertainty also increase the risks to first bidders. All other things being equal, this will result in fewer tender offers, to the detriment of public shareholders. Also, if first bidders raise or extend their offers, they will afford more time for competitive bidders and defensive tactics by target companies.

For the foregoing reasons, the new rule also increases potential bidders incentive to accumulate more shares in the open market, prior to announcement of tender offers at higher prices.

III. Study

At the December 15th meeting, the Commission also unanimously approved a study of the foregoing and other aspects or tender offers. Such a study should help clarify these complex issues.

Dissent by Commissioner Treadway:

I respectively dissent from the adoption of Rule 14d–8 under the Securities Exchange Act of 1934. My dissent is based upon my analysis and belief that, as a matter of sound statutory construction, the Commission lacks the authority to adopt the rule.

Rule 14d–8 would modify Section 14(d)(6) of the Securities Exchange Act, which contains an express, unambiguous 10 day proration period. Section 14(d)(6) does not—expressly or implicity—authorize the Commission to modify the 10 day period by rulemaking or order. By way of contrast, the immediately preceding subsection, Section 14(d)(5), which deals with withdrawal rights, expressly confers upon the Commission the authority to modify by rule, regulation or order the time period defined in that subsection. In 1968 Congress specifically considered and rejected conferring upon the Commission such authority in Section 14(d)(6). The difference between the two sections demonstrates that Congress is quite capable of clearly granting us authority to modify expressly stated time frames when that is the intent of Congress.

In 1970, subsequent to the original adoption of Section 14(d)(6), the Congress adopted Section 14(e) under the Securities Exchange Act of 1934. That section provides that the Commission "shall for purposes of this subsection (Section 14(e)), by rules and regulation define and prescribe means reasonably designed to prevent, such acts and practices as are fraudulent, deceptive, or manipulative." The legislative history of Section 14(e) does not address specifically its effect on or relation to Section 14(d)(6) and the express, unambiguous 10 day period contained therein. To conclude that Section 14(e), adopted in 1970, permits the Commission to adopt Rule 14d–8 and thereby override by regulation the statutory 10 day period of Section 14(d)(6), requires that the Commission make a determination that compliance with the express 10 day period of Section 14(d)(6) either is, or is at least closely akin to, "fraudulent, deceptive or manipulative" activity. Confusion and activities which have been characterized as "gamesmenship" in connection with tender offers may not be desirable, but such activities do not, in my view, rise to a level of "fraudulent, deceptive or manipulative" activity, the activities which Section 14(e) is intended to address.

On the basis of the foregoing, I dissent from the Commission's adoption of Rule 14d–8.

BILLING CODE 8010-01-M

[4] As a result of having hedge tendered (i.e., tendered all the shares they owned and sold additional shares short in the open market).

[5] There is no empirical evidence as to the extent to which public shareholders have been precluded from participating in proration pools under the old rule. The examples cited have been a negligible fraction of the shareholders involved.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 74, 81, and 82

[Docket No. 82N–0378]

D&C Red No. 6 and D&C Red No. 7

AGENCY: Food and Drug Administration.

ACTION: Final rules.

SUMMARY: The Food and Drug Administration (FDA) is "permanently" listing D&C Red No. 6 and D&C Red No. 7 for general use in drugs and cosmetics, except for use in the area of the eye. This action is in response to a petition filed by the Cosmetic, Toiletry and Fragrance Association, Inc. This rule will remove D&C Red No. 6 and D&C Red No. 7 from the provisional list of color additives for use in drugs and cosmetics. Published elsewhere in this issue of the **Federal Register** is an order extending the closing date for the provisional listing of D&C Red No. 6 and D&C Red No. 7 until March 29, 1983.

DATES: Effective January 28, 1983; objections by January 27, 1983.

ADDRESS: Written objections may be sent to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: John L. Herrman, Bureau of Foods (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204; 202–472–5690.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of August 6, 1973 (38 FR 21199), FDA announced that a petition (CAP 5C0040) for the permanent listing of D&C Red No. 6 and D&C Red No. 7 as color additives for use in drugs and cosmetics had been filed by the Cosmetic, Toiletry and Fragrance Association, Inc. (CTFA), 1110 Vermont Ave. NW., Washington, DC 20005.

The petition was filed under section 706 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 376). A later notice in the **Federal Register** of March 5, 1976 (41 FR 9584), amended the notice of filing of the petition to include the use of D&C Red No. 7 in cosmetics intended for use in the area of the eye.

D&C Red No. 6 is principally the disodium salt of 3-hydroxy-4-[(4-methyl-2-sulfophenyl)azo]-2-naphthalenecarboxylic acid. D&C Red No. 7 is the calcium salt of the same compound.

I. Toxicological Testing of D&C Red No. 6 and D&C Red No. 7

The provisional regulations published in the **Federal Register** of February 4, 1977 (42 FR 6992) required new chronic toxicity studies of D&C Red No. 6 and D&C Red No. 7 as a condition for their continued provisional listing. FDA placed these requirements on 32 color additives, including D&C Red No. 6 and D&C Red No. 7, because the toxicity studies the petitioners had submitted to support the safe use of these color additives were deficient in several respects. FDA described these deficiencies in the **Federal Register** of September 23, 1976 (41 FR 41863; Docket No. 76N–0366):

1. Many of the studies were conducted using groups of animals, i.e., control and those fed the color additive, that are too small to permit conclusions to be drawn on the chronic toxicity or carcinogenic potential of the color additive. The small number of animals used does not, in and of itself, cause this result, but when considered together with the other deficiencies in this listing, does do so. By and large, the studies used 25 animals in each group; today FDA recommends using at least 50 animals per group.
2. In a number of the studies, the number of animals surviving to a meaningful age was inadequate to permit conclusions to be drawn today on the chronic toxicity or carcinogenic potential of the color additives tested.
3. In a number of the studies, an insufficient number of animals was reviewed histologically.
4. In a number of the studies, an insufficient number of tissues was examined in those animals selected for pathology.
5. In a number of the studies, lesions or tumors detected under gross examination were not examined microscopically.

FDA postponed the closing date for the provisional listing of the color additives until January 31, 1981, for the completion of required toxicity studies. FDA later extended the closing date for completing these studies and for submitting data. In a proposal published in the **Federal Register** of November 14, 1980 (45 FR 75226), the agency outlined the reasons for postponing the closing dates for 23 provisionally listed color additives under test, including D&C Red No. 6 and D&C Red No. 7, beyond January 31, 1981.

In the **Federal Register** of March 27, 1981 (46 FR 18954), the agency established a new closing date of December 31, 1982, for the complete evaluation of D&C Red No. 6 and D&C Red No. 7. When the order set forth below becomes effective, it will remove D&C Red No. 6 and D&C Red No. 7 from the provisional list. Published elsewhere in this issue of the **Federal Register** is an order extending the closing date for the provisional listing of D&C Red No. 6 and D&C Red No. 7 until March 29, 1983, to provide an opportunity for filing objections to this order.

II. Chemistry Concerns

The provisional regulations of February 4, 1977, also established a closing date of October 31, 1977, for developing the chemistry data and analytical methods necessary for defining chemical specifications for certifying batches of D&C Red No. 6 and D&C Red No. 7. FDA requires chemical specifications, based on appropriate analytical methods, that are sufficiently precise that the agency can certify that batches of each color additive are equivalent to the batches of the color additive used in the animal studies that established the safety of the color additive.

The petitioner has been actively engaged in efforts to provide the chemistry information needed to establish specifications since submitting the petition to the agency. By 1977 experimental data showed that both D&C Red No. 6 and D&C Red No. 7 contained unidentified material, but the agency did not have sufficient information to establish appropriate specifications. FDA expected that the chemical nature and amount of this unidentified material, which is soluble in ether, could be established before October 31, 1977. However, this task proved to be more difficult to complete than expected and could not be completed during the short postponement period. FDA, therefore, extended the closing date to October 31, 1978, under § 81.27(c) (21 CFR 81.27(c)), for the development of the necessary chemistry data and analytical methods for the color additives (43 FR 14642; April 7, 1978).

III. Resolution of Concerns Relating to Unidentified Material

FDA has evaluated the scientific data regarding the chemical characterization of D&C Red No. 6 and D&C Red No. 7. Although the petitioner was unable to determine the chemical identity of the material in the ether layer, spectrophotometric analysis provides a means of measuring the total amount of this component that may be present in each batch of these color additives. FDA concludes that samples submitted for certification can be compared spectrophotometrically with samples of the batches tested toxicologically. By this procedure, the agency can assure that certified batches, on average, will not contain a higher percentage of the unknown material than those tested for safety in the chronic toxicity studies. The feeding studies establish that the color additives are safe when the ether-soluble material is present at this level. Therefore, a test specification for ether-soluble matter is included in the regulations. The method for this test is published as an Appendix A to this final rule.

IV. Potential Impurities in D&C Red No. 6 and D&C Red No. 7

The principal starting materials for the manufacture of D&C Red No. 6 and D&C Red No. 7 are *p*-toluidine *m*-sulfonic acid (PTMSA) and 3-hydroxy-2-naphthoic acid. PTMSA may contain small amounts of *p*-toluidine and even smaller amounts of *o*-toluidine. FDA became concerned about these potential impurities when *o*-toluidine (Ref. 1) and *p*-toluidine (Ref. 2) were reported to be animal carcinogens.

FDA and CTFA have concentrated their efforts on finding suitable methods to measure *p*-toluidine rather than *o*-toluidine because *o*-toluidine is present only as a contaminant of *p*-toluidine. *o*-Toluidine would thus be present in the color additive at levels that are vanishingly small. In fact, *o*-toluidine has never been detected in either color additive.

CTFA has submitted to FDA a report containing a method prepared by Shiseido Laboratories (Yokohama, Japan) for determining residual *p*-toluidine in D&C Red No. 6. The method submitted by Shiseido Laboratories uses high performance liquid chromatography separation with fluorescence detection. The reported limit of detection for this method is 0.2 part per million (ppm). FDA considers that this method is a valid analytical method for determining residual *p*-toluidine levels in D&C Red No. 6 at least to 1.5 ppm and probably lower. In addition, FDA has developed a high performance liquid chromatography method for detecting *p*-toluidine in D&C Red No. 6 and D&C Red No. 7 with a reliable sensitivity of less than 5 ppm.

Using the high performance liquid chromatography method that it developed, Shiseido Laboratories analyzed the residual *p*-toluidine in samples of two commercial batches of D&C Red No. 6 sold in the United States. Shiseido Laboratories reported *p*-toluidine levels for these samples of 0.63 and 2.25 ppm. FDA has examined two additional batches of D&C Red No. 6 and one batch of D&C Red No. 7. The largest amount of *p*-toluidine present in

these samples appeared to be less than 2 ppm. Based on these analytical results, FDA expects that the average *p*-toluidine level in certified D&C Red No. 6 and D&C Red No. 7 prepared in accordance with current good manufacturing practice will not exceed 5 ppm.

To ensure that future batches of these color additives are produced in accordance with current good manufacturing practice, FDA is setting a specification of 15 ppm *p*-toluidine in these regulations. This level of *p*-toluidine can be readily detected by practical methods and thus will ensure that no batch will contain excessive amounts of *p*-toluidine. The agency also considers that this specification will provide adequate control for residual *o*-toluidine because, as a contaminant of *p*-toluidine, the amount of *o*-toluidine present is dependent on the amount of *p*-toluidine present. The agency's evaluation of the safety of D&C Red No. 6 and D&C Red No. 7 containing *p*-toluidine impurities is discussed in section V. below.

V. Evaluation of the Safety of D&C Red No. 6 and D&C Red No. 7 for Drug and Cosmetic Use

A. *Statutory Safety requirements.* Under section 706(b)(4) of the act (21 U.S.C. 376(b)(4)), the so-called "general safety clause" for color additives, a color additive cannot be listed for a particular use unless the data presented to FDA establish that the color is safe for that use. Although what is meant by "safe" is not explained in the general safety clause, the legislative history makes clear that this word is to have the same meaning for color additives as for food additives. (See H. Rep. No. 1761, "Color Additive Amendments of 1960," Committee on Interstate and Foreign Commerce, 86th Cong., 2d Sess. 11 (1960).) The Senate report on the Food Additives Amendment of 1958 states:

> The concept of safety used in this legislation involves the question of whether a substance is hazardous to the health of man or animal. Safety requires proof of a reasonable certainty that no harm will result from the proposed use of an additive. It does not—and cannot—require proof beyond any possible doubt that no harm will result under any conceivable circumstances.
>
> This was emphasized particularly by the scientific panel which testified before the subcommittee. The scientists pointed out that it is impossible in the present state of scientific knowledge to establish with complete certainty the absolute harmlessness of any chemical substance.

S. Rep. No. 2422, "Food Additives Amendment of 1958," Committee on Labor and Public Welfare, 85th Cong., 2d Sess. 6 (1958).

FDA has incorporated this concept of safety into its color additive regulations. Under 21 CFR 70.3(i), a color additive is "safe" if "there is convincing evidence that establishes with reasonable certainty that no harm will result from the intended use of the color additive." Therefore, the general safety clause prohibits approval of a color additive if doubts about the safety of the additive for a particular use are not resolved to an acceptable level in the minds of competent scientists.

The general safety clause is buttressed by the anticancer or Delaney Clause, section 706(b)(5)(B) of the act (21 U.S.C. 376(b)(5)(B)), which provides that a color additive shall be deemed to be unsafe "if the additive is found by the Secretary to induce cancer when ingested by man or animal" (21 U.S.C. 376(b)(5)(B)(i)).

B. *Results of toxicology studies.* The agency has completed its evaluation of the color additive petition for D&C Red No. 6 and D&C Red No. 7, including two new chronic toxicity studies on D&C Red No. 6 in rats and mice. These new long-term studies represent current state-of-the-art toxicological testing. The protocols for these studies have benefited from knowledge of deficiencies in previously conducted carcinogenesis bioassays and other chronic toxicity protocols. The use of large numbers of animals of both sexes, pilot studies to determine maximum tolerated dosages, two control groups (thereby effectively doubling the number of controls), and in utero exposure significantly increases the power of these tests to detect dose-related effects. The studies were designed and conducted in full compliance with the agency's good laboratory practice regulations and were subject to inspections by FDA officials during their course.

The test material in the recent chronic rat and mouse studies was D&C Red No. 6. Because D&C Red No. 6 and D&C Red No. 7 are the disodium and the calcium salts, respectively, of the same compound, the agency considers the two color additives to be toxicologically equivalent. Thus, any safety conclusion drawn from studies of either color additive applies equally to the other.

Before 1977, the petitioner had submitted reports on a number of animal toxicity studies with D&C Red No. 7. Among these studies were 2-year feeding studies in rats and dogs, a three-generation reproduction study in rats, a repeated dermal application study in rabbits, a lifetime skin-painting study in mice, teratology studies in rats and rabbits, subacute feeding studies in rats and dogs, and acute oral toxicity studies in rats and dogs. These studies did not produce any evidence that the use of these color additives for the petitioned uses would be unsafe.

However, FDA did note a treatment-related effect in the three-generation reproduction study in which rats received D&C Red No. 7 in the diet at dosage levels of 0.5, 5.0, 15.0, and 50.0 milligrams per kilogram (mg/kg). At the higher dose level, the second generation rats, but not the first or third generation, had decreased fertility. No treatment-related effects were observed at any other dose level. Accordingly, FDA set the no-adverse-effect level in this study at the next lower dose level, which was 15 milligrams D&C Red No. 7 per kilogram body weight per day (15 mg/kg/day).

As discussed above, in 1976, the agency concluded that new chronic toxicity feeding studies would be required to provide data to permit a final determination to be made on the listing of D&C Red No. 6 and D&C Red No. 7 (41 FR 41880; September 23, 1976). These new chronic studies revealed two treatment-related effects from ingestion of D&C Red No. 6.

In one new chronic feeding study, male and female CD–1 mice were fed diets containing D&C Red No. 6 at concentrations of 0.05, 1.0, and 5.0 percent of their diets. The only treatment-related effect in this study was decreased survival of high-dose male mice, compared to controls, during the last 6 months of the study. No carcinogenic effects or other changes that could be ascribed to treatment of mice with D&C Red No. 6 were observed.

In the other new chronic feeding study, which was with male and female Charles River CD rats, parental animals were fed diets containing D&C Red No. 6 at concentrations of 0.05, 0.30, and 2.0 percent continuously from before mating until weaning of their offspring. The offspring were fed diets containing these same concentrations of D&C Red No. 6 for 24 months in males and 31 months in females. The agency noted an increased incidence of kidney disease, listed as chronic nephritis by the testing laboratory, in both male and female rats at the high-dose level. To resolve questions about this kidney disease, FDA requested, by letter dated August 19, 1982, microslides from tissue sections of the kidneys of all rats from the two control groups and the three groups fed diets containing D&C Red No. 6.

The examination of slides by FDA pathologists revealed a treatment-related effect on a commonly occurring spontaneous disease of rats known as

chronic progressive nephrosis. The occurrence of chronic progressive nephrosis as observed in this study was graded by the agency pathologists as being minimal, mild, moderate, or severe. There was no significant difference between the control and treated groups, for both male and female rats, in the incidence of chronic progressive nephrosis that was of minimal to mild severity. However, there was an increased incidence of moderate to severe chronic progressive nephrosis among the male rats in the mid- and high-dose groups compared to the male rats in the low-dose or control groups. Similarly, the incidence of moderate to severe chronic progressive nephrosis was increased among high-dose group female rats compared to the incidence of this effect among other treated or control group female rats. Agency pathologists concluded that, although there were no carcinogenic renal changes in this study attributable to the administration of D&C Red No. 6, there appeared to be an exacerbation of a spontaneous renal disease of aged rats (chronic progressive nephrosis) in the mid- and high-dose group male rats and in the high-dose group female rats.

C. *Computation of acceptable daily intake.* FDA calculates the acceptable daily intake for a color additive by using the following process: The agency identifies the highest no-adverse-effect level in each study in which it observes a treatment-related effect. It then compares the no-adverse-effect levels from these studies and uses appropriate safety factors (see 21 CFR 70.40) to calculate the acceptable daily intake for the color additive using the study that leads to the lowest value.

In the chronic feeding study with mice, the mid-dose (1500 mg/kg/day) was the no-adverse-effect level, and in the chronic feeding study with rats, the low dose (25 mg/kg/day) was the no-adverse-effect level.

Of the effects noted in all the studies reviewed by the agency, the three-generation reproduction study in rats establishes the lowest acceptable daily intake for D&C Red No. 6 and D&C Red No. 7. The no-adverse-effect level for this study was 15 mg/kg/day. Reduced by the safety factor of 100, this study establishes an acceptable daily intake of 0.15 mg/kg/day, or 9 mg/day for a 60 kg human.

D. *Prior actions by FDA.* Even though appropriate testing of D&C Red No. 6 and D&C Red No. 7 did not show them to be carcinogens, the agency still had to consider whether to list these color additives in light of the fact that they contain carcinogenic impurities, *p*-toluidine and *o*-toluidine. In the past, FDA has terminated the provisional listings of several color additives that contained or were expected to contain a carcinogenic impurity or constituent. (See the D&C Green No. 5 final rule published in the **Federal Register** of June 4, 1982 (47 FR 24278, 24280).) However, the agency no longer believes that it must refuse to list a color additive simply because it contains or is expected to contain a carcinogenic impurity.

As explained in the D&C Green No. 6 final rule (47 FR 14138, 14141–2 (April 2, 1982)), the agency has concluded that even if a color additive contains a carcinogenic impurity, the Delaney Clause is not triggered unless the color additive as a whole is found to cause cancer. The agency is confident that it possesses the capacity (through the use of extrapolation procedures) to assess adequately the upper limit of risk presented by the use of a color additive that has not been shown to be a carcinogen but that does contain a carcinogenic impurity. The estimate of the risk may be exaggerated because the extrapolation models used are designed to estimate the maximum risk consistent with the data. For this reason, the estimate can be used with confidence to conclude that a substance is safe under specific conditions of use. (FDA has also explained the basis for this approach in the advance notice of proposed rulemaking on its policy for regulating carcinogenic chemicals in food and color additives published in the **Federal Register** of April 2, 1982 (47 FR 14464).)

Recently, the agency has examined the risk associated with drug and cosmetic uses of D&C Green No. 6 and D&C Green No. 5, which contain minor amounts of *p*-toluidine. Neither color additive had been shown to be carcinogenic by appropriate bioassays. FDA concluded in both instances that the use of these color additives in drugs and cosmetics is safe. The agency is using the same method of analysis for D&C Red No. 6 and D&C Red No. 7.

E. *Use of D&C Red No. 6 and D&C Red No. 7.* Between 1970 and 1977, FDA did not certify any D&C Red No. 6 (straight color), but from 1978 through 1982, FDA certified an average of 560 pounds of this color additive per year. The agency did not certify any straight D&C Red No. 7 during the period of 1970 through 1982.

The use of D&C Red No. 6 and D&C Red No. 7 lakes increased during the second half of the 1970's. The average pounds per year certified for the period 1978 through 1982 was 44,800 pounds of D&C Red No. 6 lakes and 107,300 pounds of D&C Red No. 7 lakes.[1] Based on these average yearly certified poundage data and the trend of increasing use of these color additives, FDA expects that the average total certified poundage of D&C Red No. 6, D&C Red No. 6 lakes, and D&C Red No. 7 lakes might increase to roughly 600, 60,000, and 120,000 pounds per year, respectively. Although individual batches of lakes vary widely in content of primary colors, the average primary color content of the lakes of any specific color additive generally does not exceed 40 percent primary color. Assuming that the average primary color content of lakes is 40 percent, exposure to D&C Red No. 6 and D&C Red No. 7 from both straight color and lake uses would be roughly 72,600 pounds per year.

Many cosmetic manufacturers submit cosmetic product ingredient statements (formulations) to FDA under the voluntary cosmetic regulatory program (21 CFR Part 720). This program provides information on the specific types of cosmetic products in which D&C Red No. 6 and D&C Red No. 7 are used. Additionally, CTFA has provided data on maximum use levels in cosmetics based on a 1981 survey of manufacturers.

As of December 1981, FDA's voluntary cosmetic regulatory program computer file contained 9 formulations that listed D&C Red No. 6 as an ingredient, 598 formulations that listed D&C Red No. 6 lakes as ingredients, 45 formulations that listed D&C Red No. 7 as an ingredient, and 1,178 formulations that listed D&C Red No. 7 lakes as ingredients. (Apparently, for at least D&C Red No. 7, some companies reported use of the straight color when they used the lake.) The major uses of D&C Red No. 6 and D&C Red No. 7 and their lakes in cosmetics were in make-up preparations (57.6 percent) and in manicuring preparations (41.4 percent). Of the listed make-up preparations, 69 percent were lipsticks. The levels at which these color additives are used in

[1] This order does not permanently list D&C Red No. 6 and D&C Red No. 7 lakes. FDA published a notice of intent in the **Federal Register** of June 22, 1979 (44 FR 36411), which discussed the additional information that the agency believes is needed before final regulations on lakes can be issued. FDA intends to publish proposed regulations governing the use of color additives in lakes in the **Federal Register** in the near future and concludes that the listing of color additives for use in lakes can best be implemented by general regulations. D&C Red No. 6 and D&C Red No. 7 lakes will, therefore, continue to be provisionally listed for coloring drugs and cosmetics under Parts 81 and 82 (21 CFR Parts 81 and 82). The discussion of the lakes here is solely for the purpose of establishing the level of exposure to these color additives.

lipsticks range from 0.0013 percent to 6.0 percent (straight color).

In a 1965 Pharmaceutical Manufacturers Association survey, 7 companies reported use of D&C Red No. 7 in 19 drug preparations, all for internal administration. The maximum amount of the color additive used by a company was 4.4 milligrams per daily dose of drug, although most companies used much less. There was no reported use of D&C Red No. 6 in drug products.

Although the fraction of D&C Red No. 6 and D&C Red No. 7 used in ingested drugs apparently is minor at this time, use in ingested drugs without a limitation would represent the greatest potential intake for individuals to these color additives, especially over short periods of time. If no limitation were set, use could exceed the acceptable daily intake. FDA has therefore incorporated a limitation of 5 milligrams of D&C Red No. 6 and D&C Red No. 7 per daily dose of drug product under §§ 74.1306 and 74.1307, respectively. This limitation applies both to ingested and externally applied drug products. It will ensure safe use and is consistent with currently known use levels.

The agency has considered several factors in estimating daily intake from the amount of color additives used in drug or cosmetic products. These factors include, for short-term use, the amount of product likely to be used and the amount of product used that would enter the body by, e.g., ingestion of a drug; the fraction of applied lipstick that would be ingested; and the fraction of color additives likely to penetrate skin from external use. These factors vary with the individual product type. For lifetime average intake, the agency has considered the fact that conditions leading to maximum intake on a given day are not likely to exist every day of one's life. Frequency of use will also vary with individual products. Details of the agency's assumptions can be found in Reference 3.

Using these factors the agency estimates that short-term intake of D&C Red No. 6 and D&C Red No. 7 in drugs will not exceed 5 mg/day, and short-term intake to these color additives from cosmetic use will not exceed 3 mg/day, resulting in a cumulative dose of 8 mg/day. For lifetime-average use, the agency estimates 1 mg/day from drug use, 1 mg/day from ingested cosmetic use, and 4 mg/day from external cosmetic use (only a small fraction of which will be absorbed), leading to the agency's estimated lifetime average intake of approximately 2 mg/day. Details of the agency's estimates and calculations can be found in Reference 3.

F. *Application of risk assessment in this rulemaking.* Because *p*-toluidine may be present in D&C Red No. 6 and D&C Red No. 7 in minor amounts, use of these color additives as authorized by these regulations will likely result in exposure to very small amounts of *p*-toluidine. Any residual *p*-toluidine that might be present does not contribute any color to D&C Red No. 6 or D&C Red No. 7, nor does in impart any color to drugs, cosmetics, or the human body. Consequently, FDA concludes that, although a small amount of *p*-toluidine may be added to drugs and cosmetics with the addition of D&C Red No. 6 or D&C Red No. 7, this chemical is not a color additive within the meaning of section 201(t) of the act (21 U.S.C. 321(t)). [2] Instead, *p*-toluidine would be only an impurity in D&C Red No. 6 and D&C Red No. 7. Because D&C Red No. 6 (and hence D&C Red No. 7) has not been shown to be carcinogenic, the agency concludes, as in the D&C Green No. 6 and D&C Green No. 5 rulemaking proceedings, that it can use risk assessment procedures to provide a basis for deciding whether there is a reasonable certainty of no harm from the use of D&C Red No. 6 and D&C Red No. 7 in ingested and externally applied drugs and cosmetics.

The risk evaluation of *p*-toluidine consists of two parts: (1) Assessment of probable exposure to *p*-toluidine from the use of D&C Red No. 6 and D&C Red No. 7 in ingested and externally applied drugs and cosmetics, and (2) extrapolation of the risk from *p*-toluidine observed in the animal biassay to the conditions of probable exposure to humans.

1. *Exposure to p-toluidine.* Two measures of exposure to carcinogenic compounds that are relevant in assessing the public health hazard presented by *p*-toluidine are the maximum probable individual exposure and the total population exposure.

Of the two estimates, the total population exposure to *p*-toluidine can be more accurately calculated because the certified poundage of these color additives is known. If the average annual certification of D&C Red No. 6 and D&C Red No. 7 (assumed to contain 5 ppm of *p*-toluidine) is 72,600 pounds, then the average lifetime exposure to *p*-toluidine would be less than 2.0 nanograms (ng) per person per day, or if all of the products containing these color additives were consumed by only 10 percent of the population, 20 ng per person per day.

Although a measure of the total population exposure can be calculated quite simply, the maximum probable individual exposure depends on many factors, including the concentration of *p*-toluidine in products, the types of products used, the amount of product used per application, and the frequency of the application. In section V.E of this preamble, FDA discussed the principal types of products in which D&C Red No. 6 and D&C Red No. 7 are used. The agency estimates that the combined lifetime-average individual exposure to these color additives from the ingested and external applications permitted by these regulations would not likely exceed 6 milligrams per day (1 milligram per day from drugs and 5 milligrams per day from ingested and externally applied cosmetics (Ref. 3)). This level is higher than the lifetime-average intake value calculated earlier for the color additives because the 6 milligrams per day figure does not correct for limited penetration of these color additives. Thus, in the absence of adequate data regarding skin penetration by *p*-toluidine, the agency is assuming 100 percent skin penetration of *p*-toluidine from externally applied drugs and cosmetics containing these color additives. This estimate is clearly exaggerated, but the exaggeration does not affect the conclusions of the analysis. If 5 ppm *p*-toluidine is present in an average sample of D&C Red No. 6 or D&C Red No. 7, an individual exposed to 6 milligrams per day of these color additives would have a lifetime-average exposure of 30 ng per day *p*-toluidine.

FDA also recognizes the possibility that individuals will be exposed to minor amounts of *p*-toluidine impurities as a result of their use of products containing several related color additives. Regulations for four color additives now contain specifications on the amount of *p*-toluidine permitted in the additive: D&C Green No. 5 (21 CFR 74.1205, 74.2205, and 82.1205)—0.0015 percent *p*-toluidine; D&C Green No. 6 (21 CFR 74.1206, 74.2206, and 82.1206)—0.1 percent *p*-toluidine; Ext. D&C Violet No. 2 (21 CFR 74.2602a)—0.1 percent *p*-toluidine; and D&C Violet No. 2 (21 CFR 74.1602, 74.2602, and 82.1602)—0.2 percent *p*-toluidine. The latter three color additives are not permitted for use in ingested products. FDA believes that these are the only color additives that contain *p*-toluidine.

2. *Extrapolation of risk.* The second part of the evaluation of the risk presented by *p*-toluidine in D&C Red No. 6 and D&C Red No. 7 is an extrapolation from the actual compound-related incidence (risk) found in animal

[2] This statement is also true for *o*-toluidine

bioassays to the conditions of probable exposure for humans.

The final rules permanently listing D&C Green No. 5 and D&C Green No. 6 discussed the publication by Weisburger, et al. (Ref. 2), which reported the results of long-term feeding studies of *p*-toluidine in mice and rats. FDA has used the data from the Weisburger paper to estimate the upper level of human risk of exposure to *p*-toluidine from the use of D&C Green No. 5, D&C Green No. 6, and, in this case, D&C Red No. 6 and D&C Red No. 7. The agency used two quantitative risk assessment procedures to extrapolate from the dose in the animal experiment to the very low doses of possible human exposure. Both of these procedures are not likely to underestimate the actual risk from very low doses. They serve as a basis for the agency to determine to a reasonable certainty whether any harm will result from the probable exposure to *p*-toluidine from the use of these color additives.

One of the procedures FDA employed was the linear proportional model with dosage data expressed as a concentration of the total diet and using the upper 99 percent confidence interval of the observed tumor incidence as described in FDA's March 20, 1979, proposal, "Chemical Compounds in Food-Producing Animals" (44 FR 17070). Under this procedure, the upper limit individual lifetime risk from exposure to 30 ng per day *p*-toluidine is 1 in 50 million. The second procedure the agency used, also a linear proportional model, estimated the even smaller upper limit risk of lifetime tumor incidence of 1 in 500 million.

Because the lifetime-averaged individual exposure to *p*-toluidine from the use of D&C Red No. 6 and D&C Red No. 7 in drugs and cosmetics would not likely exceed a total of 30 ng per day, the agency concludes that there is a reasonable certainty of no harm from the exposure to *p*-toluidine that results from the use of these color additives.[3]

FDA has also considered the upper limit of risk from exposure to the several color additives that may contain *p*-toluidine to determine whether any harm will result from the probable cumulative exposure to *p*-toluidine from the intended use of all these color additives.

In the D&C Green No. 6 rulemaking proceeding, FDA assessed the upper limit of risk from exposure to *p*-toluidine as a result of use of D&C Green No. 6 to be less than 1 in 15 million to 1 in 150 million in a lifetime. Likewise, for D&C Green No. 5, FDA calculated that the upper limit lifetime risk from exposure to *p*-toluidine as a result of use of this color additive is less than 1 in 30 million to 1 in 300 million. In this document, FDA has calculated that the upper limit lifetime risk from exposure to *p*-toluidine as a result of D&C Red No. 6 and D&C Red No. 7 is less than 1 in 50 million to 1 in 500 million.

Detailed risk assessment analyses have not been performed for possible exposure to *p*-toluidine from the use of Ext. D&C Violet No. 2 (21 CFR 74.2602a) and D&C Violet No. 2 (21 CFR 74.1602, 74.2602, and 82.1602). However, FDA estimates that exposure to *p*-toluidine from the use of these color additives is in the same range as with D&C Green No. 6, because use limitations and specifications are similar, providing approximately the same level of risk. The agency finds that the upper limit of combined risk from the use of these color additives is so low that the exposure to *p*-toluidine from the use of these color additives is safe. The agency notes, however, that it is extremely unlikely that any one individual would use all these color additives at the same time and at the maximum levels.

VI. References

The following information has been placed on file at the Dockets Management Branch (address above) and may be seen in that office between 9 a.m. and 4 p.m., Monday through Friday.

VII. Conclusion

Based upon the evaluation of the results of the two recently submitted chronic toxicity studies, the agency has determined that D&C Red No. 6 (and hence D&C Red No. 7) is not carcinogenic to Charles River Sprague-Dawley CD rats after dietary exposure as high as 2.0 percent or to CD–1 mice after dietary exposure as high as 5.0 percent under conditions of testing adequate to provide assurance for its safe use. FDA has calculated a combined total acceptable daily intake of 9 milligrams per day of D&C Red No. 6 and D&C Red No. 7 for a 60 kg human on the basis of all the toxicity studies it reviewed. The agency finds that short-term intake (8 milligrams per day) and lifetime-averaged intake (2 milligrams per day) from the listed drug and cosmetic uses of these color additives will be within this amount.

The agency has also completed its evaluation of other animal studies submitted by the petitioner for the purpose of establishing the safety of D&C Red No. 6 and D&C Red No. 7 for use in externally applied drugs and externally applied cosmetics. The data from these studies indicate that D&C Red No. 7 is nonirritating when applied daily to either intact or abraded skin. Furthermore, D&C Red No. 7 was not found to be carcinogenic upon twice-weekly application to the skin of mice over their lifetimes.

Therefore, FDA finds that it can conclude that no harm will result from the petitioned uses of D&C Red No. 6 and D&C Red No. 7, for general use in drugs and cosmetics excluding use in the area of the eye, and that certification is necessary for the protection of the public health. The final toxicity study reports, interim reports, and the agency's toxicology evaluations of these studies are on file at the Dockets Management Branch (address above) and may be reviewed there between 9 a.m. and 4 p.m., Monday through Friday.

FDA notified the petitioner by letters dated May 14, 1976, August 15, 1977, and August 4, 1978, of the need for data to support the use of D&C Red No. 7 in cosmetics intended for use in the area of the eye. In the latest letter, dated October 24, 1978, FDA advised the petitioner to consider withdrawing that portion of the petition that sought approval of use of D&C Red No. 7 in cosmetics intended for use in the area of the eye because it appeared that the required data from eye-area studies would not be readily available.

The petitioner has not submitted the data required to support eye-area use of D&C Red No. 7. Therefore, FDA now considers that portion of the petition that was amended by the filing on March 5, 1976 (Docket No. 76C–0044) to include the permanent listing of D&C Red No. 7 for eye-area use to be withdrawn without prejudice in accordance with the provisions of § 71.4 (21 CFR 71.4). Section 71.4 requires that such requested information be submitted within 180 days after filing of the petition, or the petition will be withdrawn without prejudice. Use of

[3] The presence of *o*-toluidine in the color additives would not alter this conclusion. At the levels at which a user of a product containing D&C Red No. 6 or D&C Red No. 7 would be exposed to *o*-toluidine, the presence of this impurity would have virtually no effect on the upper limit of risk.

D&C Red No. 7 in the area of the eye has never been covered by a provisional listing. Future consideration by FDA of the permanent listing of D&C Red No. 7 for eye-area use will require the submission of a new color additive petition for that use. The agency's listing of a color additive for general use in drugs and cosmetics does not encompass eye-area use (see § 70.5 *General restrictions on color additives* (21 CFR 70.5)).

The agency is establishing new chemical specifications that identify the color additives more precisely than those specifications currently in Part 82 (21 CFR Part 82). The agency concludes that it is necessary to include in the listing regulations for D&C Red No. 6 and D&C Red No. 7 a brief description of their manufacturing processes to ensure the safety of the color additives. The agency is concerned that the color additives may contain harmful impurities dependent upon the manufacturing processes used to produce the color additives. The agency is not able at this time to set specifications that would control the presence of these impurities. The agency has contracted with the National Academy of Sciences/National Research Council (NAS/NRC) to develop appropriate specifications for color additives for use in food as part of the Food Chemicals Codex. Similarly, appropriate specifications for color additives for use in drugs and cosmetics will be developed following the general guidelines used by the NAS/NRC in its evaluation of color additives used in food. The agency concludes that specifying, through a general description, the manufacturing process in the regulations for these color additives will provide an adequate assurance of safety until suitable specifications can be developed. Production of the color additives by the specified methods will assure qualitatively similar batches and thus adequately assure the absence of harmful impurities resulting from changes in the manufacturing process.

Also, the chemical names for the two color additives in new listings under 21 CFR Part 74 are different from the names currently listed under 21 CFR Part 82. The agency is listing the nomenclature designated in the Chemical Abstracts Index Guide (September 1982) because the agency believes that it gives the best description of the color additive. FDA is identifying D&C Red No. 6 as the disodium salt, rather than the monosodium salt, as it is currently described in § 82.1306 (21 CFR 82.1306), because analytical results confirm that hydrogens of the carboxylic and sulfonic acid groups are both replaced by sodium.

FDA is also removing § 81.27(c) from its regulations. The agency is making this editorial change because the color additives listed under § 81.27(c) have now been removed from the provisional list. Ferric ferrocyanide was permanently listed for use in drugs and cosmetics under 21 CFR 73.1299 and 73.2299 by a final rule published in the **Federal Register** of November 21, 1978 (43 FR 54235). D&C Red No. 30 was permanently listed for use in drugs and cosmetics under 21 CFR 74.1330 and 74.2330 by a final rule published in the **Federal Register** of May 25, 1982 (47 FR 22509).

The agency has determined under 21 CFR 25.24(b)(12) and (d)(5) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the environment. Therefore, neither an evironmental assessment nor an environmental impact statement is required.

List of Subjects

21 CFR Part 74

Color additives, Color additives subject to certification, Cosmetics, Drugs.

21 CFR Part 81

Color additives, Color additives provisional list, Cosmetics, Drugs.

21 CFR Part 82

Color additives, Color additive lakes, Color additives provisional list, Cosmetics, Drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 706 (b), (c), and (d), 74 Stat. 299–403 (21 U.S.C. 376 (b), (c), and (d))) and the Transitional Provisions of the Color Additive Amendments of 1960 (Title II, Pub. L. 86–618, sec. 203, 74 Stat. 404–407 (21 U.S.C. 376, note)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), Parts 74, 81, and 82 are amended as follows:

PART 74—LISTING OF COLOR ADDITIVES SUBJECT TO CERTIFICATION

1. Part 74 is amended:

a. By adding new § 74.1306 to Subpart B, to read as follows:

§ 74.1306 D&C Red No. 6.

(a) *Identity.* (1) The color additive D&C Red No. 6 is principally the disodium salt of 3-hydroxy-4-[(4-methyl-2-sulfophenyl)azo]-2-naphthalenecarboxylic acid (CAS Reg. No. 5858–81–1). To manufacture the additive, 2-amino-5-methylbenzenesulfonic acid is diazotized with hydrochloric acid and sodium nitrite. The diazo compound is coupled in alkaline medium with 3-hydroxy-2-naphthalenecarboxylic acid. The resulting dye precipitates as the disodium salt.

(2) Color additive mixtures for drug use made with D&C Red No. 6 may contain only those diluents that are suitable and that are listed in Part 73 of this chapter as safe for use in color additive mixtures for coloring drugs.

(b) *Specifications.* The color additive D&C Red No. 6 shall conform to the following specifications and shall be free from impurities other than those named to the extent that such impurities may be avoided by current good manufacturing practice:

Sum of volatile matter (at 135° C) and chlorides and sulfates (calculated as sodium salts), not more than 10 percent.
Ether-soluble matter, passes test entitled "The Procedure for Determining Ether-Soluble Material in D&C Red Nos. 6 and 7," which is an Appendix A to Part 74.
2-Amino-5-methylbenzenesulfonic acid, sodium salt, not more than 0.2 percent.
3-Hydroxy-2-naphthalenecarboxylic acid, sodium salt, not more than 0.4 percent.
3-Hydroxy-4-[(4-methylphenyl)azo]-2-naphthalenecarboxylic acid, sodium salt, not more than 0.5 percent.
p-Toluidine, not more than 15 parts per million.
Lead (as Pb), not more than 20 parts per million.
Arsenic (as As), not more than 3 parts per million.
Mercury (as Hg), not more than 1 part per million.
Total color, not less than 90 percent.

(c) *Uses and restrictions.* The color additive D&C Red No. 6 may be safely used for coloring drugs such that the combined total of D&C Red No. 6 and D&C Red No. 7 does not exceed 5 milligrams per daily dose of the drug.

(d) *Labeling.* The label of the color additive and any mixtures prepared therefrom intended solely or in part for coloring purposes shall conform to the requirements of § 70.25 of this chapter.

(e) *Certification.* All batches of D&C Red No. 6 shall be certified in accordance with regulations in Part 80 of this chapter.

b. By adding new § 74.1307 to Subpart B, to read as follows:

§ 74.1307 D&C Red No. 7.

(a) *Identity.* (1) The color additive D&C Red No. 7 is principally the calcium salt of 3-hydroxy-4-[(4-methyl-2-sulfophenyl)azo]-2-

naphthalenecarboxylic acid (CAS Reg. No. 5281-04-9). To manufacture the additive, 2-amino-5-methylbenzenesulfonic acid is diazotized with hydrochloric acid and sodium nitrite. The diazo compound is coupled in alkaline medium with 3-hydroxy-2-naphthalenecarboxylic acid and the resulting dye converted to the calcium salt with calcium chloride.

(2) Color additive mixtures for drug use made with D&C Red No. 7 may contain only those diluents that are suitable and that are listed in Part 73 of this chapter as safe for use in color additive mixtures for coloring drugs.

(b) *Specifications.* The color additive D&C Red No. 7 shall conform to the following specifications and shall be free from impurities other than those named to the extent that such impurities may be avoided by current good manufacturing practice:

Sum of volatile matter (at 135° C) and chlorides and sulfates (calculated as sodium salts), not more than 10 percent.
Ether-soluble matter, passes test entitled "The Procedure for Determining Ether-soluble Material in D&C Red Nos. 6 and 7," which is an Appendix A to Part 74.
2-Amino-5-methylbenzenesulfonic acid, calcium salt, not more than 0.2 percent.
3-Hydroxy-2-naphthalenecarboxylic acid, calcium salt, not more than 0.4 percent.
3-Hydroxy-4-[(4-methylphenyl]azo]-2-naphthalenecarboxylic acid, calcium salt, not more than 0.5 percent.
p-Toluidine, not more than 15 parts per million.
Lead (as Pb), not more than 20 parts per million.
Arsenic (as As), not more than 3 parts per million.
Mercury (as Hg), not more than 1 part per million.
Total color, not less than 90 percent.

(c) *Uses and restrictions.* The color additive D&C Red No. 7 may be safely used for coloring drugs such that the combined total of D&C Red No. 6 and D&C Red No. 7 does not exceed 5 milligrams per daily dose of the drug.

(d) *Labeling.* The label of the color additive and any mixtures prepared therefrom intended solely or in part for coloring purposes shall conform to the requirements of § 70.25 of this chapter.

(e) *Certification.* All batches of D&C Red No. 7 shall be certified in accordance with regulations in Part 80 of this chapter.

c. By adding new § 74.2306 to Subpart C, to read as follows:

§ 74.2306 D&C Red No. 6.

(a) *Identity and specifications.* The color additive D&C Red No. 6 shall conform in identity and specifications to the requirements of § 74.1306 (a)(1) and (b).

(b) *Uses and restrictions.* The color additive D&C Red No. 6 may be safely used for coloring cosmetics generally in amounts consistent with current good manufacturing practice.

(c) *Labeling requirements.* The label of the color additive shall conform to the requirements of § 70.25 of this chapter.

(d) *Certification.* All batches of D&C Red No. 6 shall be certified in accordance with regulations in Part 80 of this chapter.

d. By adding new § 74.2307 to Subpart C, to read as follows:

§ 74.2307 D&C Red No. 7

(a) *Identify and specifications.* The color additive D&C Red No. 7 shall conform in identity and specifications to the requirements of § 74.1307 (a)(1) and (b).

(b) *Uses and restrictions.* The color additive D&C Red No. 7 may be safely used for coloring cosmetics generally in amounts consistent with current good manufacturing practice.

(c) *Labeling requirements.* The label of the color additive shall conform to the requirements of § 70.25 of this chapter.

(d) *Certification.* All batches of D&C Red No. 7 shall be certified in accordance with regulations in Part 80 of this chapter.

e. By adding new Appendix A to Part 74 to read as follows:

Appendix A to Part 74—The Procedure for Determining Ether Soluble Material in D&C Red Nos. 6 and 7

The dye is dissolved in glacial acetic and 8 *N* hydrochloric acids (1.33 : 1) and extracted with diethyl ether. Sulfonated moieties, including the color additive, are discarded in subsequent aqueous extractions of the ether. Carboxylated moieties are removed from the ether by extraction with 2% (w/w) NaOH. The ether is evaporated to near dryness, ethanol (95%) is added, and the solution is analyzed spectrophotometrically in the visible range. The absorbance at each wavelength must not exceed 150% of the absorbance similarly obtained for D&C Red No. 6 Lot AA5169.

Apparatus

(A) Spectrophotometer (Cary 118 or equivalent).

(B) Separatory funnels—one 1000 mL and one 500 mL.

Reagents

Note.—Use *distilled* water when water is required.

(A) Glacial Acetic Acid (ACS grade).

(B) Diethyl ether (Anhydrous)—Note and follow safety precautions on container.

(C) 8 *N* HCl—Pour 165 mL H_2O into a 500 mL graduate. Place the graduate in hood, then add HCl conc. to bring to volume. Carefully pour this solution into a 500 mL Erlenmeyer flask, Stopper and shake. Label the flask.

(D) 2% (w/w) NaOH—Pour ca 190 mL H_2O into a 250 mL mixing graduate. Add 8 g. (5.23 mL) of 50% (w/w) NaOH, bring to 200 mL volume with water, stopper and mix. Pour this solution into a glass bottle, label and stopper with a teflon top.

(E) Ethanol (95%).

Procedure

Weigh a 250 mL beaker to tenths of a mg and add 100 mg of dye. Record weight to tenths of a mg.

Note.—The following work must be performed in the hood.

Add 75 mL of 8 *N* HC1 and 100 mL of glacial acetic acid to the beaker and stir.

Place the beaker on a hot plate and heat with stirring, until all of the dye is in solution.

Remove the beaker from the hot plate, cover with a watch glass and allow to cool to room temperature (1–2 hrs).

When the dye solution is at room temperature, transfer the solution to a 1000 mL separatory funnel.

Rinse the beaker three times with 50 mL portions of H_{20}, transferring each rinse to the 1000 mL funnel.

Add 150 mL of ether to the funnel, stopper and shake for 10 seconds, then invert funnel and open stopcock to remove gas buildup.

Shake the funnel for one minute, opening the stopcock a few times while the funnel in inverted to remove gas buildup. (Use this shake procedure throughout method.)

Allow the funnel to stand until the layers have separated.

Transfer the bottom (aqueous) layer to a 500 mL separatory funnel, add 100 mL of ether, stopper and shake for one minute.

When the layers have separated, drain off the bottom layer into a waste beaker.

Pour the ether layer in the 500 mL separatory funnel into the 1000 mL separatory funnel.

Rinse the 500 mL sep. funnel with 100 mL H_2O, then transfer it to the 1000 mL sep. funnel, stopper and shake for one minute.

When the layers have separated, drain off the bottom aqueous layer into the waste beaker.

Rinse the 500 mL funnel at least three times (total) and repeat the 100 mL water washes until no color is present in the aqueous layer. Discard the bottom aqueous layer to the waste beaker after each separation.

Shake the ether layer twice more with 100 mL portions of H_2O, discarding the bottom aqueous layer after each separation.

Remove the unsulfonated subsidiary color from the ether by shaking the ether layer for one minute with 20 mL of 2% (w/w) NaOH. *Appropriately label* a 100 mL beaker. After the layers separate, drain the aqueous alkaline layer into the beaker and save for the determination of 3-hydroxy-4-[(4-methylphenyl) azo]-2-naphthalenecarboxylic acid, sodium salt.

If there is any color left in the ether, shake for one minute with another 20 mL portion of 2% (w/w) NaHO. After the layers have separated, drain off the aqueous alkaline layer into the 100 mL beaker.

If color remains in the ether layer, repeat the above step for a total of three washes of the ether with 2% (w/w) NaOH. Note: Three washes is usually sufficient to remove the unsulfonated subsidiary.

With the stopper removed, *gently* swirl the ether layer in the sep. funnel twice to separate the remaining aqueous base. Drain this into the 100 mL beaker.

Appropriately label a 250 mL beaker. *Pour* the ether layer into the beaker. Allow the ether to evaporate to *near* dryness. Cool to room temperature. Add ca 8 mL ethanol (95%). Swirl beaker to mix contents. Quantitatively transfer to a 25 mL graduate using ethanol (95%) rinses. Add ethanol (95%) to bring volume to 12 mL.

Spectrophotometer Analysis

Spectrophotometric Parameters:

Scan Range: 400–700 nm
Scan 50 nm/in; 5.0 nm/sec.
Absorbance Range: 0–1 AUFS
Cell length: 1 cm (Note: Reference and Sample cells)

(1) Record the visible spectrum of a blank. Fill the reference cell with distilled water and the sampe cell with ethanol (95%)

(2) Rinse the sample cell with 2–3 mL of the ether soluble material (in ethanol solution); then fill the cell. Record the visible spectrum of the ether soluble material.

(3) Compare the spectra obtained to the spectra attached. The attached spectra represents 150% of the absorbance at each wavelength for similarly analyzed D&C Red No. 6 Lot AA5169.

The spectra of the current sample must not exceed the attached spectra at any wavelength in order to *pass test.*

BILLING CODE 4160-01-C

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

2. Part 81 is amended:

§ 81.1 [Amended]

a. In § 81.1 *Provisional lists of color additives* in paragraph (b) by removing the entries for "D&C Red No. 6" and "D&C Red No. 7."

§ 81.27 [Amended]

b. In § 81.27 *Conditions of provisional listing*, by removing and reserving paragraph (c) and in paragraph (d) by removing the entries for "D&C Red No. 6" and "D&C Red No. 7."

PART 82—LISTING OF CERTIFIED PROVISIONALLY LISTED COLORS AND SPECIFICATIONS

3. Part 82 is amended:

a. By revising § 82.1306, to read as follows:

§ 82.1306 D&C Red No. 6.

(a) The color additive D&C Red No. 6 shall conform in identity and specifications to the requirements of § 74.1306 (a)(1) and (b) of this chapter.

(b) The color additive D&C Red No. 6 may be safely used for coloring drugs such that the combined total of D&C Red No. 6 and D&C Red No. 7 does not exceed 5 milligrams per daily dose of the drug.

b. By revising § 82.1307, to read as follows:

§ 82.1307 D&C Red No. 7.

(a) The color additive D&C Red No. 7 shall conform in identity and specifications to the requirements of § 74.1307 (a)(1) and (b) of this chapter.

(b) The color additive D&C Red No. 7 may be safely used for coloring drugs such that the combined total of D&C Red No. 6 and D&C Red No. 7 does not exceed 5 milligrams per daily dose of the drug.

Any person who will be adversely affected by the foregoing regulation may at any time on or before January 27, 1983 file with the Dockets Management Branch (address above) written objections thereto. Objections shall show wherein the person filing will be adversely affected by the regulation, specify with particularity the provisions of the regulation deemed objectionable, and state the grounds for the objections. Objections shall be filed in accordance with the requirements of 21 CFR 71.30. If a hearing is requested, the objections shall state the issues for the hearing and shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Three copies of all documents shall be filed and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch, between 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall become effective January 28, 1983; except as to any provisions that may be stayed by the filing of proper objections. Notice of the filing of objections or lack thereof will be announced by pulbication in the **Federal Register**.

(Sec. 706 (b), (c), (d), 74 Stat. 399–403 (21 U.S.C. 376 (b), (c), (d)); sec. 203, Pub. L. 86–618, 74 Stat. 404–407 (21 U.S.C. 376, note))

21 CFR Part 81

[Docket No. 76N-0366]

Provisional Listing of D&C Red No. 6 and D&C Red No. 7; Postponement of Closing Date

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is postponing the closing date for the provisional listing of D&C Red No. 6 and D&C Red No. 7 for use as a color additive in drugs and cosmetics. The new closing date will be March 29, 1983. This brief postponement will provide time for the receipt and evaluation of any objections submitted in response to the final regulation (published elsewhere in this issue of the **Federal Register**) approving the petition for the listing of D&C Red No. 6 and D&C Red No. 7 for these uses.

DATES: Effective December 28, 1982, the new closing date for D&C Red No. 6 and D&C Red No. 7 will be March 29, 1983.

FOR FURTHER INFORMATION CONTACT: John L. Herrman, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204; 202-472-5690.

SUPPLEMENTARY INFORMATION: FDA established the current closing date of December 31, 1982, for the provisional listing of D&C Red No. 6 and D&C Red No. 7 by a rule published in the **Federal Register** of March 27, 1981 (46 FR 18954). The agency extended the closing date until December 31, 1982, to provide time for the completion of chronic toxicity studies and the review and evaluation of these studies by FDA.

After reviewing and evaluating the data, the agency has concluded that D&C Red No. 6 and D&C Red No. 7 are safe for use in drugs and cosmetics. Therefore, elsewhere is this issue of the **Federal Register**, FDA is publishing a regulation that lists D&C Red No. 6 and D&C Red No. 7 for these uses. The regulation set forth below will postpone the December 31, 1982 closing date for the provisional listing of these color additives until March 29, 1983. This postponement will provide sufficient time for receipt and evaluation of comments or objections submitted in response to the regulation that lists D&C Red No. 6 and D&C Red No. 7 for use in drugs and cosmetics.

Because of the shortness of time until the December 31, 1982 closing date, FDA concludes that notice and public procedure on these regulations are impracticable. Moreover, good cause exists for issuing this postponement as a final rule because the agency has concluded that D&C Red No. 6 and D&C Red No. 7 are safe for their intended uses under the Color Additive Amendments of 1960. This regulation will permit the uninterrupted use of this color additive until March 29, 1983. To prevent any interruption in the provisional lising of D&C Red No. 6 and D&C Red No. 7 and in accordance with 5 U.S.C. 553(d) (1) and (3), this regulation is being made effective on December 28, 1982.

List of Subjects in 21 CFR Part 81

Color additives, Color additives provisional list, Cosmetics, Drugs.

Therefore, under the Transitional Provisions of the Color Additive Amendments of 1960 (Title II, Pub. L. 86-618, sec. 203, 74 Stat. 404-407 (21 U.S.C. 376 note)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), Part 81 is amended as follows:

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

§ 81.1 [Amended]

1. In § 81.1 *Provisional lists of color additives*, by revising the closing date for "D&C Red No. 6" and "D&C Red No.

7" in paragraph (b) to read "March 29, 1983."

§ 81.27 [Amended]

2. In § 81.27 *Conditions of provisional listing,* by revising the closing date for "D&C Red No. 6" and "D&C Red No. 7" in paragraph (d) to read "March 29, 1983."

Effective date. This final rule is effective December 28, 1982.

(Sec. 203, 74 Stat. 404–407 (21 U.S.C. 376 note))

Dated: December 3, 1982.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 82-35103 Filed 12-27-82; 8:45 am]

21 CFR Part 145

[Docket No. 78P-0147]

Canned Pears; Standards of Identity and Quality; Confirmation of Effective Date

AGENCY: Food and Drug Administration.

ACTION: Final rule; confirmation of effective date.

SUMMARY: The Food and Drug Administration (FDA) is confirming the effective date for compliance with the provisions of the amended standards of identity and quality for canned pears to provide for "chunky" style.

DATES: Effective July 1, 1985, for all affected products initially introduced or initially delivered for introduction into interstate commerce on or after this date. Voluntary compliance may have begun November 22, 1982.

FOR FURTHER INFORMATION CONTACT: F. Leo Kauffman, Bureau of Foods (HFF-214), Food and Drug Administration, 200 C St. SW., Washington, DC 20204; 202-245-1164.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of September 21, 1982 (47 FR 41529), FDA issued a final regulation amending the standards of identity and quality for canned pears (21 CFR 145.175) to provide for a new optional "chunky" style and to define the styles already provided for in the standard of identity. Any person who would be adversely affected by the regulation could have, at any time on or before October 21, 1982, filed written objections to the final regulation and requested a hearing on the specific provisions to which there were objections. No objections or requests for a hearing were received.

List of Subjects in 21 CFR Part 145

Canned fruit, Food standards, Fruits.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 401, 701(e), 52 Stat. 1046, 70 Stat. 919 as amended (21 U.S.C. 341, 371(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), notice is given that the effective date for compliance with the standards of identity and quality for canned pears § 145.175 *Canned pears* (21 CFR 145.175) as amended in the **Federal Register** of September 21, 1982 (47 FR 41529) is July 1, 1985. Voluntary compliance may have begun November 22, 1982.

Dated: December 20, 1982.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 146

[Docket No. 78N-0236]

Grapefruit Juice; Standard of Identity; Confirmation of Effective Date

AGENCY: Food and Drug Administration.

ACTION: Final rule; confirmation of effective date.

SUMMARY: The Food and Drug Administration (FDA) is confirming the effective date for compliance with the provision of the amended standard of identity for grapefruit juice to provide for 10 percent minimum grapefruit soluble solids in grapefruit juice from concentrate.

DATES: Effective July 1, 1983, for all affected products initially introduced or initially delivered for introduction into interstate commerce on or after this date. Voluntary compliance may begin December 30, 1982.

FOR FURTHER INFORMATION CONTACT: F. Leo Kauffman, Bureau of Foods (HFF-214), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-245-1164.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of October 1, 1982 (47 FR 43364), FDA issued a final regulation amending the standard of identity for grapefruit juice (21 CFR 146.132) to establish the minimum soluble solids for "grapefruit juice from concentrate" at 10 percent, by weight, exclusive of any added sweeteners (21 CFR 146.132(a)(1)). Any person who would be adversely affected by the regulation could have, at any time on or before November 1, 1982, filed written objections to the final regulation and requested a hearing on the specific provisions to which there were objections. No objections or requests for a hearing were received. However, two parties requested that the July 1, 1985 effective date be changed to July 1, 1983, because the October 1, 1982 amendment did not change any labeling requirements, and therefore the later effective date is unnecessary. FDA agrees and is changing the effective date to July 1, 1983.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 401, 701(e), 52 Stat. 1046 as amended, 70 Stat. 919 as amended (21 U.S.C. 341, 371(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), notice is given that the effective date for compliance with the standard of identity for grapefruit juice (21 CFR 146.132) as amended in the **Federal Register** of October 1, 1982 (47 FR 43364) is July 1, 1983. Voluntary compliance may begin December 30, 1982.

Dated: December 23, 1982.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 524

Ophthalmic and Topical Dosage Form New Animal Drugs Not Subject To Certification; Nitrofurazone Solution

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug administration is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) providing revised labeling for use of nitrofurazone solution

for treating female equine genital tract infections and impaired fertility in addition to the existing approval for treating surface bacterial infections in dogs, cats, and horses. The application was filed by Biomed Laboratories.

EFFECTIVE DATE: December 28, 1982.

FOR FURTHER INFORMATION CONTACT: Sandra K. Woods, Bureau of Veterinary Medicine (HFV–114), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857; 301–443–3420.

SUPPLEMENTARY INFORMATION: Biomed Laboratories, 4542 Denver St., Montclair, Calif. 91763, is sponsor for supplemental NADA 126–950 providing revised labeling for use of Fura-Vet (0.2 percent nitrofurazone solution) for treating female equine genital tract infections and impaired fertility. The firm has existing approval for use of the drug for treating surface bacterial infections in dogs, cats, and horses. The existing approval permits over-the-counter marketing of the drug, but addition of the genital tract and impaired fertility claims to a common label requires that the product now be restricted to veterinary prescription use. The nitrofurazone solution regulation provides that since all of the aforementioned conditions of use are NAS/NRC reviewed and found effective, applications for these uses need not include effectiveness data as specified by 21 CFR 514.111. The product is intended for topical use; therefore, the requirement for bioequivalency is waived under 21 CFR 320.22(b)(2). The application is approved, and the regulations are amended accordingly.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

List of Subjects in 21 CFR Part 524

Animal drugs, topical.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 524 is amended in § 524.1580d by revising paragraph (b), to read as follows:

PART 524—OPHTHALMIC AND TOPICAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

§ 524.1580d Nitrofurazone solution.

* * * * *

(b) *Sponsor.* See 000857, 015562, 015579, and 051259 in § 510.600(c) of this chapter for use as in paragraph (d) (1) and (2) of this section.

BILLING CODE 4160–01–M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

Schedules of Controlled Substances; Placement of Triazolam Into Schedule IV

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Final rule.

SUMMARY: This final rule is issued by the Acting Administrator of the Drug Enforcement Administration (DEA) to place the substance, triazolam, into Schedule IV of the Controlled Substances Act (CSA) (21 U.S.C. 801 *et seq.*). This action is based on a finding that triazolam fits the statutory criteria for inclusion in Schedule IV of the CSA. As a result of this rule, the regulatory controls and criminal sanctions of Schedule IV of the CSA will be applicable to the manufacturing, distribution, importation and exportation of triazolam.

EFFECTIVE DATE: December 28, 1982.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug Control Section, Drug Enforcement Administration, Washington, D.C. 20537; telephone (202) 633–1366.

SUPPLEMENTARY INFORMATION: A proposed rule was published in the **Federal Register** on Wednesday, April 29, 1981, (46 FR 23953–4), proposing that triazolam be placed into Schedule IV of the CSA if and when the triazolam New Drug Application (NDA) receives final approval from the Food and Drug Administration (FDA). All persons were given until June 29, 1981, to submit any comments or objections in writing regarding this proposal. One comment was received from the American Society for Hospital Pharmacists (ASHP), which supported the placement of triazolam into Schedule IV. No other comments or objections were received in response to this proposal nor were there any requests for a hearing.

By letter dated November 22, 1982, the FDA notified DEA of the final NDA approval for triazolam contingent upon the announcement of a final scheduling decision in the **Federal Register**. This final rule fulfills that scheduling condition for triazolam.

Triazolam is a member of the benzodiazepine class of drugs. It is a central nervous system depressant and has been clinically evaluated as a hypnotic.

Relying on the scientific and medical evaluation and recommendation of the Acting Assistant Secretary for Health and based on his independent evaluation in accordance with the provisions of 21 U.S.C. 811(c), the Acting Administrator of the Drug Enforcement Administration, pursuant to the provisions of 21 U.S.C. 811(a) and 811(b), finds that:

(1) Based on information now available, triazolam has a low potential for abuse relative to the drugs or other substances listed in Schedule III;

(2) Triazolam has a currently acceptable medical use in treatment in the United States; and

(3) Abuse of triazolam may lead to limited physical dependence or psychological dependence relative to the drugs or other substances in Schedule III.

The above findings are consistent with the placement of triazolam into Schedule IV of the Controlled Substances Act. In order to avoid delays in the initial marketing of triazolam, the control of triazolam in Schedule IV will be effective on December 28, 1982. In the event this imposes special hardships on any registrant, the Drug Enforcement Administration will entertain any justified request for an extension of time to comply with the Schedule IV regulations. The applicable regulations are as follows:

1. *Registration.* Any person who manufactures, distributes, delivers, imports or exports triazolam, or who engages in research or conducts instructional activities with respect to this substance, or who proposes to engage in such activities, must be registered to conduct such activities in accordance with Parts 1301 and 1311 of Title 21 of the Code of Federal Regulations.

2. *Security.* Triazolam must be manufactured, distributed and stored in accordance with §§ 1301.71–1301.76 of Title 21 of the Code of Federal Regulations.

3. *Labeling and Packaging.* All labels and labeling for commercial containers of triazolam must comply with the requirements of §§ 1302.03–1302.05 and 1302.08 of Title 21 of the Code of Federal Regulations.

4. *Inventory.* Every registrant required to keep records who possesses any quantity of triazolam shall take inventories, pursuant to §§ 1304.11–1304.19 of Title 21 of the Code of Federal Regulations, of all stocks of triazolam on hand.

5. *Records.* All registrants required to keep records pursuant to §§ 1304.21–1304.27 of Title 21 of the Code of Federal Regulations shall do so regarding triazolam.

6. *Prescriptions.* All prescriptions for products containing triazolam shall comply with §§ 1306.01–1306.06 and §§ 1306.21–1306.25 of Title 21 of the Code of Federal Regulations.

7. *Importation and Exportation.* All importation and exportation of triazolam shall be in compliance with Part 1312 of Title 21 of the Code of Federal Regulations.

8. *Criminal Liability.* The Acting Administrator, Drug Enforcement Administration, hereby orders that any activity with respect to triazolam not authorized by, or in violation of, the Controlled Substances Act or the Controlled Substances Import and Export Act shall be unlawful.

Pursuant to 5 U.S.C. 605(b), the Acting Administrator certifies that the placement of triazolam into Schedule IV of the Controlled Substances Act will not have a significant impact upon small businesses or other entities whose interests must be considered under the Regulatory Flexibility Act (Pub. L. 96–354). This action involves the initial control of a substance not previously approved for marketing in the United States.

In accordance with the provisions of 21 U.S.C. 811(a), this placement of triazolam into Schedule IV of the CSA is a formal rulemaking "on the record after opportunity for a hearing." Such proceedings are conducted pursuant to the provisions of 5 U.S.C. 556 and 557, and as such, have been exempted from the consultation requirements of Executive Order 12291 (46 FR 13193, Feb. 19, 1981).

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Narcotics, Prescription drugs.

PART 1308—[AMENDED]

Under the authority vested in the Attorney General by Section 201(a) of the CSA (21 U.S.C. 811(a)) and delegated to the Acting Administrator of the Drug Enforcement Administration by the Department of Justice regulations (28 CFR 0.100), the Acting Administrator hereby orders that § 1308.14(c) of Title 21 of the Code of Federal Regulations be amended by adding (c)(24) to read as follows:

§ 1308.14 Schedule IV.

* * * * *

(c) * * *

(24) Triazolam	2887

* * * * *

Dated: December 20, 1982.

Francis M. Mullen, Jr.,

Acting Administrator, Drug Enforcement Administration.

BILLING CODE 4410-09-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[T.D. ATF-121; Ref: Notice No. 371]

California Shenandoah Valley Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Department of the Treasury.

ACTION: Final rule, Treasury decision.

SUMMARY: This final rule establishes a viticultural area in portions of Amador and El Dorado Counties in California to be known as "Shenandoah Valley" qualified by the word "California." The Bureau of Alcohol, Tobacco and Firearms (ATF) believes establishment of the California Shenandoah Valley as a viticultural area and its subsequent use as an appellation of origin on wine labels and in wine advertisements will help consumers better identify the wines they may purchase.

EFFECTIVE DATE: January 27, 1983.

FOR FURTHER INFORMATION CONTACT: James A. Hunt, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms, 1200 Pennsylvania Avenue, NW., Washington, DC 20226 (202–566–7626).

SUPPLEMENTARY INFORMATION:

Background

On August 23, 1978, ATF published Treasury Decision ATF–53 (43 FR 37672, 54624) revising regulations in 27 CFR Part 4. These regulations allow the establishment of definite viticultural areas. The regulations also allow the name of an approved viticultural area to be used as an appellation of origin on wine labels and in wine advertisements.

Section 4.25a(e)(1), Title 27, CFR, defines an American viticultural area as a delimited grapegrowing region distinguishable by geographical features. Section 4.25a(e)(2), outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape growing region as a viticultural area.

Petition

ATF received a petition from the Amador County Wine Grape Growers Association proposing an area in Amador County, California, as a viticultural area to be known as "Shenandoah Valley." The area consists of approximately 10,000 acres of which about 1,200 acres are vineyards. The petitioner asked for the Shenandoah Valley viticultural area to be situated to the north and west of Fiddletown, California, and to the north and east of Plymouth, California.

In response to the petition, ATF published a notice of proposed rulemaking, Notice No. 371, in the **Federal Register** on April 13, 1981, (46 FR 21623) with a 60 day comment period. This comment period was then extended for an additional 30 days. Several requests were received for public hearings by interested persons in California and Virginia. Hearings were held in California on December 7 and 8, 1981, and in Virginia on January 12 and 13, 1982.

Evidence Relating To the Name

Testimony at the hearings established that the area derived its name from settlers from Virginia drawn to the area during the gold rush. The petition states and witnesses testified, among other things, that:

(a) In 1881, J. D. Mason, in his "History of Amador County," mentions choice grapes being grown in the Shenandoah Valley;

(b) A 1927 book, "Amador County History" refers to this area as Shenandoah Valley;

(c) Soil survey maps of Amador County, California, prepared by the U.S. Department of Agriculture Soil Conservation Service and dated Series 1961, identify the area as the Shenandoah Valley;

(d) U.S.G.S. 7.5 minute quadrangle map, (topographic) titled Fiddletown Quadrangle California and dated 1949, identifies the area as the Shenandoah Valley;

(e) An area school, cemetery and road has "Shenandoah" included in their names; and

(f) Numerous articles, books and other materials dealing with wine refer to the Shenandoah Valley in California as a specific grape-growing area.

The major issue in most of the 300 written comments and in the testimony of over 80 persons at two public hearings was use of the name "Shenandoah Valley" for a viticultural area. About half of the commenters said that the Shenandoah Valley name is historically and geographically best known for a valley in Virginia and West Virginia. They claim the use of Shenandoah Valley on California wine labels would be confusing for consumers and would allow the California wine industry use of a name which has significance for the Virginia wine industry. The other half of the commenters stated that the Shenandoah Valley name in California has existed for over 100 years as have commercial vineyards and wine production in this area. They contend use of Shenandoah Valley on these wine labels would not confuse the consumer because such wines are nationally well known and distinctly different from wine produced from grapes grown in the Shenandoah Valley of Virginia and West Virginia.

After a careful review of the name issue, ATF has decided that the evidence shows that the name of the proposed viticultural area, "Shenandoah Valley," is locally known as referring to a specific area in California and this area is nationally known as a specific grape growing area. However, two geographic areas share the same name, one in California and one in Virginia and West Virginia and both grow grapes used in wine production. The record established that the Shenandoah Valley in Virginia and West Virginia is nationally well known, whereas the Shenandoah Valley in California is less well known. ATF believes there would be a potential for consumer confusion if the name "Shenandoah Valley" without qualification were displayed on a California wine label. Because the Shenandoah Valley in Virginia and West Virginia is so well known, ATF believes the consumer would consider a wine labeled with an unqualified Shenandoah Valley viticultural area as originating from grapes grown in this area. ATF further believes that the use of the name "Shenandoah Valley" in direct conjunction with the name of the State of California would eliminate the potential for consumer confusion and allows consumers to readily identify where the wine comes from. Therefore, this final rule allows the name Shenandoah Valley as a viticultural area in California provided that the name California appears in direct conjunction with the name Shenandoah Valley on the wine label.

Geographical Evidence

In accordance with 27 CFR 4.25a(e)(2), a viticultural area should possess geographical features which distinguish it from surrounding areas. The petition states and witnesses testified, among other things that the principal grape producing soil in the California Shenandoah Valley is the Sierra series. This series consists of well-drained deep and moderately deep soils formed of material from granitic rock. These soils are gently sloping to very steep. The surface soil primarily consists of various loams, particularly coarse sandy loam. The subsoil primarily consists of heavy loam or clay loam. The depth to weathered bedrock ranges from 20 inches to more than 60 inches. Witnesses stated that to the west of the area the soil is the Auburn-Exchaquer series which is rocky and shallow, to the east the soil is the Supan-Iron Mountain series which is a volcanic type rock, and to the south the soil is shallower range land.

Boundaries

Another issue with the proposed California Shenandoah Valley viticultural area was a petition from Twin Rivers Vineyards to extend the northern boundary of the Amador County Wine Grape Growers Association's petition to include 170 acres of grapes in El Dorado County. A number of commenters gave their opinion and belief that the Shenandoah Valley stopped at the Amador and El Dorado County line. However, there was evidence that while the proposed extension lay fallow for several years until recently, the early settlers living on the property were regarded as Shenandoah Valley residents. Other commenters gave economic reasons for limiting the Shenandoah Valley viticultural area to Amador County.

A viticultural area is defined as a delimited grape growing region distinguishable by geographical features. The similarity of environmental factors influencing the grapes in a region is far more important than real or imagined boundary lines or economic factors. The one geographical feature which separates the two Counties is a 400 foot wide river canyon. However, grapes are not planted in this river canyon. The evidence shows that the topography, soil type and microclimate on both sides of the river canyon are similar. Further, testimony at the hearing showed that north of the proposed extension the land was no longer Sierra soil series, and was implantable, steep, treed and rocky.

Based on the evidence, ATF believes that the environmental factors influencing the grapes in the petitioned-for Shenandoah Valley viticultural area in Amador County are the same as for the adjacent 170 acre-vineyard located in El Dorado County. Further, based on the evidence, ATF believes the proposed area, as extended, is geographically distinguishable from the surrounding areas. Therefore, the northern boundary of the Amador County Wine Grape Growers Association's petition was extended to include Twin Rivers Vineyards.

Other than the addition of the Twin Rivers Vineyard's property, ATF is approving the boundaries of the California Shenandoah Valley as proposed. This decision is based on the petition, the testimony presented at the hearing, and comments received.

Miscellaneous

Subsequent to the notice of proposed rulemaking on the California Shenandoah Valley petition, ATF received a petition from Shenandoah Vineyards in Edinburg, Virginia, proposing a viticultural area in Virginia and West Virginia to be known as Shenandoah Valley. A notice of proposed rulemaking concerning that petition was published in the **Federal Register** and most of the 80 comments received favored establishing a Shenandoah Valley viticultural area in Virginia and West Virginia.

Approval of the California Shenandoah Valley as a viticultural area does not preclude establishment of a Shenandoah Valley in Virginia and West Virginia as a viticultural area. Regulations do not preclude the use of the same name for two viticultural areas if both areas meet the established

guidelines and it is clear to consumers where the areas are located.

ATF is approving this area as being viticulturally distinct from surrounding areas. By approving the area, wine producers are allowed to claim a distinction on labels and advertisements as to the origin of the grapes. Any commercial advantage gained can only be substantiated by consumer acceptance of California Shenandoah Valley wines.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to a final regulatory flexibility analysis (5 U.S.C. 604) are not applicable to this final rule because it will not have a significant economic impact on a substantial number of small entities. The final rule will not impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The final rule is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of Section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that this final rule will not have a significant economic impact on a substantial number of small entities.

Exective Order 12291

It has been determined that this final regulation is not a "major rule" within the meaning of Executive Order 12291 of February 17, 1981, because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 27 CFR Part 9

Administrative practice and procedure, Consumer protection, Viticultural areas, and Wine.

Drafting Information

The principal author of this document is James A. Hunt, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms.

Authority and Issuance: Accordingly, under the authority contained in Section 5 of the Federal Alcohol Administration Act (49 Stat. 981, as amended; 27 U.S.C. 205), 27 CFR Part 9 is amended as follows:

PART 9—AMERICAN VITICULTURAL AREAS

Paragraph 1. The table of sections in 27 CFR Part 9, Subpart C, is amended to add the title of § 9.37 to read as follows:

Subpart C—Approved American Viticultural Areas

Sec.

* * * * *

9.37 California Shenandoah Valley.

Par. 2. Subpart C is amended by adding § 9.37 to read as follows:

Subpart C—Approved American Viticultural Areas

* * * * *

§ 9.37 California Shenandoah Valley.

(a) *Name.* The name of the viticultural area described in this section is "Shenandoah Valley" qualified by the word "California" in direct conjunction with the name "Shenandoah Valley."

(b) *Approved maps.* The appropriate maps for determining the boundaries of the California Shenandoah Valley viticultural area are two 1982 U.S.G.S. maps. The maps are titled: "Fiddletown Quadrangle California" 7.5 minute series and "Amador City Quadrangle California-Amador Co." 7.5 minute series.

(c) *Boundaries.* The Shenandoah Valley viticultural area is located in portions of Amador and El Dorado Counties of California. The boundaries are as follows:

The line starts at the point where the Consumnes River meets Big Indian Creek. The line then proceeds south, following Big Indian Creek, until Big Indian Creek meets the boundary between Sections 1 and 2 of Township 7 North Range 10 East. The line then follows this boundary south until it meets the Oleta (Fiddletown) Road. The line then follows the Oleta Road east until it meets the boundary between Sections 6 and 5 of Township 7 North Range 11 East. The line follows that boundary north into Township 8 North Range 11 East, and continues north on the boundary between Sections 31 and 32 until this boundary meets Big Indian Creek. The line then follows Big Indian Creek in a northeasterly direction until Big Indian Creek meets the boundary between Sections 28 and 27 of Township 8 North Range 11 East. The line then follows this boundary north until it reaches the southeast corner of Section 21 of Township 8 North Range 11 East. The line then proceeds east, then north, then west along the boundary of the western half of Section 22 of Township 8 North Range 11 East to the intersection of Sections 16, 15, 21, and 22. The line then proceeds north along the boundary between Sections 16 and 15 of Township 8 North Range 11 East and continues north along the boundary of Sections 9 and 10 of Township 8 North Range 11 East to the intersection of Sections 9, 10, 3 and 4 of Township 8 North Range 11 East. The line then proceeds West along the boundary of Sections 9 and 4. The line then continues west along the boundary of Sections 5 and 8 of Township 8 North Range 11 East to the Consumnes River. The line then proceeds west along the Consumnes River to the point of beginning.

Signed: December 3, 1982.

Stephen E. Higgins,

Acting Director.

Approved: December 17, 1982.

David Q. Bates,

Deputy Assistant Secretary (Operations).

27 CFR Part 9

[T.D. ATF—120; Ref: Notice No. 419]

Shenandoah Valley Viticultural Area in Virginia and West Virginia

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Department of the Treasury.

ACTION: Final rule, Treasury decision.

SUMMARY: This final rule establishes a viticultural area in Virginia and West Virginia to be known as "Shenandoah Valley." The Bureau of Alcohol, Tobacco and Firearms (ATF) believes establishment of the Shenandoah Valley in Virginia and West Virginia as a viticultural area and its subsequent use as an appellation of origin on wine labels and in time advertisements will help consumers better identify the wines they may purchase.

EFFECTIVE DATE: January 27, 1983.

FOR FURTHER INFORMATION CONTACT: James A. Hunt, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms, 1200 Pennsylvania Avenue, NW., Washington, D.C. 20226 (202-566-7626).

SUPPLEMENTARY INFORMATION:

Background

On August 23, 1978, ATF published Treasury Decision ATF-53 (43 FR 37672, 54624) revising regulations in 27 CFR Part 4. These regulations allow the establishment of definite viticultural areas. These regulations also allow the name of an approved viticultural area to be used as an appellation of origin on wine labels and in wine advertisements.

Section 4.25a(e)(1), Title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features. Section 4.25a(e)(2), outlines the procedure for proposing an American

viticultural area. Any interested person may petition ATF to establish a grape growing region as a viticultural area.

AFT received a petition from Amador County Wine Grape Growers Association in September 1980 proposing a viticultural area in California to be known as "Shenandoah Valley." A notice of proposed rulemaking was published in the **Federal Register** and public hearings were held in California and Virgina. The major issue in most of the 300 written comments and in the testimony of over 80 persons at the public hearings was the use of the name "Shenandoah Valley" as as viticultural area. About half of the commenters stated that the Shenandoah Valley name is historically and geographically best known for a valley in Virginia and West Virginia. They claimed that the use of Shenandoah Valley on California wine labels would be confusing for consumers and would allow the California wine industry use of a name which has significance for the Virginia wine industry. The other half of the commenters said that the Shenandoah Valley name in California has existed for over 100 years and the wine produced in this area is unique and well known. They stated that use of Shenandoah Valley on these labels would not confuse consumers because such wines are distinctly different from wine produced in the Shenandoah Valley of Virginia.

Petition

ATF received a petition in August 1981 from Shenandoah Vineyards in Edinburg, Virginia, proposing an area in the countries of Frederick, Clarke, Warren, Shenandoah, Page, Rockingham, Augusta, Rockbridge, Botetourt, and Amherst in Virginia, and the counties of Berkeley and Jefferson in West Virginia, as a viticultural area to be known as "Shenandoah Valley."

The petitioner submitted evidence stating the name is locally and nationally known and the area has geographical characteristics which distinguish the viticultural features from those found in surrounding areas. This evidence was presented in a notice of proposed rulemaking published in the **Federal Register** on August 20, 1982 (47 FR 36445), with a 45 day comment period.

Comments

During the commend period, 80 comments with 132 signatures were received. In addition, Congressman J. Kenneth Robinson, 7th District of Virginia, requested that all hearing testimony at Harrisonburg, Virginia, on January 12 and 13, 1982, pursuant to Notices 371 and 391 (notice of proposed rulemaking for the Shenandoah Valley in California), be considered as part of the comment letter. There were no requests for a public hearing during the comment period.

Most of the comments were in support of the Shenandoah Valley viticultural area in Virginia-West Virginia stating that the name Shenandoah Valley clearly is known as being the Virginia-West Virginia Valley. Comments in favor were also received from Federal, State and local government officials.

Five commenters were in opposition because they considered the proposed viticultural area too large when compared to the acres of vineyards.

A few commenters recommended both Virginia and California be allowed use of the name Shenandoah Valley with some way of identifying their respective locations on a label.

Except for the comments opposed to the proposal based on the size of the area, comments on the boundaries favored those stated by the petitioner and contained in the notice.

Name Issue

The major issue for the propose viticultural area in Virginia-West Virginia is use of the name "Shenandoah Valley." Two geographical areas share the same name, one in Virginia and West Virginia and one in California, and both grow grapes used in wine production. The petitions, written comments and testimony at the hearing clearly established that the Shenandoah Valley in Virginia-West Virginia in nationally well known. While not nearly as well known nationally , the Shenandoah Valley located in California is known as a specific area in California and the area is nationally known, especially to wine consumers, as a specific grape growing area.

Because the Virginia-West Virginia Shenandoah Valley is clearly well known, ATF believes the consumer would consider wine labeled with a Shenandoah Valley viticultural area as originating from grapes grown in this area. Therefore, this final rule allows use of the name "Shenandoah Valley" as a viticultural area in Virginia-West Virginia without the need for the qualifying name of a State.

Approval of Shenandoah Valley for Virginia-West Virginia as a viticultural area does not preclude establishment of a California Shenandoah Valley. Regulations do not preclude the use of the same name for two areas if both areas meet the established guidelines and it is clear to consumers where the areas are located. ATF believes that the use of the name "Shenandoah Valley" in direct conjunction with he name of the State of California would eliminate the potential for consumer confusion and would allow consumers to readily identify wher the wine comes from. Therefore, the Treasury decision approving the use of the name Shenandoah Valley in California, will require the name California to appear in direct conjunction with the name Shenandoah Valley.

Viticultural Area Size Issue

The viticultural area requested for Shenandoah Valley is approximately 2.4 million acres. The total commerical wine grape acreage is less than 300 acres. The possibility of reducing the size of the 2.4 million acre viticultural area was strongly opposed by several commenters, including the petitioner and Federal, State, and local officials. These commenters stated that a change in the boundary would also change the nationally recognized Shenandoah Valley boundary. They stated that evidence indicates the soil and climate are generally similar for the whole area. The commenters opposing the large area Shenandoah Valley suggested that several viticultural areas are found in the proposed area but no specific recommendations were made on proposing new boundaries.

On the surface it looks as though the entire area does not merit being included as an approved viticultural area. However, because vineyards have been planted or are planned in locations throughout the petitioned for viticultural area and the evidence shows the geographical influences are generally similar, ATF is approving the Shenandoah Valley boundaries as stated in the petition and the notices. In addition, approval of this large area does not preclude establishing smaller viticultural areas within the Shenandoah Valley in the future.

Geographical Characteristics

The Shenandoah Valley is geologically well defined by the Blue Ridge Mountains on the east and by the Allegheny Mountains on the west. On the north it is drained by the Potomac River, into which the Shenandoah River drains. To the south, the Shenandoah Valley is generally known to extend somewhat beyond the headwaters of the Shenandoah River because of the similar topographic features, the same soils, and similar climatic conditions.

The record shows that the Shenandoah Valley is an example of a mountain landscape that has been formed by erosion during a long interval

of geologic time and that has reached a condition of dynamic equilibrium in which the adjustment between the landforms and the rocks beneath is nearly complete. It is an elongate area lying between the Blue Ridge Mountains on the Southeast and the North and Shenandoah Mountains (the beginning of the Allegheny complex) on the northwest.

On the east side of the Valley, the Blue Ridge Mountains are underlain by igneous rocks, the most resistant of which are metabasalts of the Catoctin Formation of Precambrian age. Highlands on the west side of the Valley are underlain by sandstones and quartzites of Silurian to Mississippian age. The main lowland areas of the Shenandoah Valley are underlain by a thick sequence of limestones, dolomites and shales of early Cambrian to late Ordovician age.

The southern boundary is not quite as completely and sharply defined. The evidence indicates that conditions relevant to a viticultural area, such as soil and terrain, as well as the geographical features associated with the closing of the mountains and the cutting by the James River extends the southern boundary to the James River.

The record shows that the Shenandoah Valley viticultural area is distinguished from the surrounding areas geographically as follows:

(a) The surficial deposits consist of residual deposits, colluvium, and alluvium. The residual deposits and colluvium are closely related in origin to the rocks on which they rest. The alluvial deposits are distributed close to or downstream from the rocks that are their source. It is not unusual for residuum to occur in thicknesses of as much as 100 feet and more on carbonate rocks.

In the mountain areas, covers of thicker residuum are found only on the granitic rocks of the Blue Ridge when protected from erosion by a thin mantle of fresh core stones. On the other side of the Shenandoah Valley, shales interbedded with thin sandstones have a cover of residuum protected by a blanket of sandstone flags. Other areas are characterized by many cliffy slopes and thin rocky soils.

The record shows that the surficial deposits in the valley are, therefore, consistent and have a marked delineation from surrounding areas.

(b) Exclusive of alluvial areas, comprising only about 15 percent of the whole valley, which are relatively flat, the land slopes toward a stream, either steeply or gently. The overall shape or form of the landscape is determined by the network of stream channels, each channel being concave to the sky. The local relief is determined by ridges which rise to a more or less even height about the streams.

(c) The General Soil Map of Virginia prepared by the Soil Conservation Service of the U.S. Department of Agriculture shows that the soils suitable for agriculture in the valley can, in fact, be used to delineate the valley lowlands. Except for the Massanutten Mountain uplift, essentially all of the area is overlain by Frederick-Lodi-Rock outcrop. The record shows that this soil does not occur anywhere else in the State.

(d) The climate features, including average temperature and precipitation, are relatively consistent throughout the valley. Data was cited from four weather stations of the U.S. Department of Commerce Weather Bureau, specifically the stations of Lexington and Staunton, Virginia, in the southern end and Winchester and Woodstock, Virginia, in the northern end of the valley. These stations show average temperatures ranging from 53.9°F to 55.7°F, precipitation from 33.8" to 37.7", heating degree days from 4344 to 4866 and cooling degree days from 851 to 1046. That data from the four stations to the east of the valley show average temperatures ranging from 47.8°F to 57°F, precipitation from 38.6" to 48.6", heating degree days from 4026 to 6463 and cooling degree days from 0 to 1263. Further, the record shows that to the west similar variations occur.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to a final regulatory flexibility analysis (5 U.S.C. 604) are not applicable to this final rule because it will not have a significant economic impact on a substantial number of small entities. The final rule will not impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The final rule is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of Section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that this final rule will not have a significant economic impact on a substantial number of small entities.

Executive Order 12291

It has been determined that this final regulation is not a "major rule" within the meaning of Executive Order 12291 of February 17, 1981, because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Miscellaneous

ATF is approving this area as being viticulturally distinct from surrounding areas. By approving the area, wine producers are allowed to claim a distinction on labels and advertisements as to the origin of the grapes. Any commercial advantage gained can only be substantiated by consumer acceptance of Shenandoah Valley wines.

Drafting Information

The principal author of this document is James A. Hunt, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 9

Administrative practice and procedure, Consumer protection, Viticultural areas, Wine.

Authority: Accordingly, under the authority in 27 U.S.C. 205 (49 Stat. 981, as amended), 27 CFR Part 9 is amended as follows:

PART 9—AMERICAN VITICULTURAL AREAS

Paragraph 1. The table of sections in 27 CFR Part 9, Subpart C, is amended to add the title of § 9.60 to read as follows:

* * * * *

Subpart C—Approved American Viticultural Areas

Sec.

* * * * *

9.60 Shenandoah Valley.

Par. 2. Subpart C is amended by adding § 9.60 to read as follows:

Subpart C—Approved American Viticultural Areas

* * * * *

§ 9.60 Shenandoah Valley.

(a) *Name.* The name of the viticultural area described in this section is "Shenandoah Valley."

(b) *Approved maps.* The appropriate maps for determining the boundaries of the Shenandoah Valley viticultural area are four U.S.G.S. Eastern United States 1:250,000 scale maps. The maps are

titled: Roanoke (1971), Charlottesville (1956, with a revision in 1965), Cumberland (1956, revised 1969) and Baltimore (1957, revised 1978).

(c) *Boundaries.* The Shenandoah Valley viticultural area is located in Frederick, Clarke, Warren, Shenandoah, Page, Rockingham, Augusta, Rockbridge, Botetourt, and Amherst Counties in Virginia, and Berkeley and Jefferson Counties in West Virginia. The boundaries are as follows:

The boundary line starts at the point of the intersection of the Potomac River and the Virginia-West Virginia State line approximately eight miles east of Charlestown, West Virginia. The line then proceeds southwesterly approximately 14.8 miles along the State line, which essentially follows the crest of the Blue Ridge Mountains, to its intersection with the westerly border line of Clarke County, Virginia. The line continues approximately 13.8 miles southwesterly along the county line and the crest of the Blue Ridge to its intersection with the westerly boundary line of Warren County, Virginia. The line continues approximately 15 miles along the Warren County line to its intersection with the Skyline Drive. The line continues approximately 71 miles in a southwesterly direction along the Skyline Drive and the Blue Ridge to its intersection with the Blue Ridge Parkway. The line continues approximately 53 miles in a southwesterly direction along the Blue Ridge Parkway to its intersection with the James River. The line then proceeds approximately 44 miles along the James River in a west-northwesterly direction to its intersection with the northwest boundary line of the Jefferson National Forest near Eagle Rock. The line then proceeds approximately 10.5 miles in a northeasterly direction along the Jefferson National Forest line and along the crest of North Mountain to its intersection with the westerly boundary line of Rockbridge County. The line continues approximately 23 miles along the county line in the same northeasterly direction to its intersection with the Chesapeake and Ohio Railroad. The line continues approximately 23 miles along the railroad between the Great North Mountain and the Little North Mountain to its intersection with the southeastern boundary line of the George Washington National Forest at Buffalo Gap. The line continues approximately 81 miles northeasterly along the George Washington National Forest line to the Vertical Control Station, (elevation 1883), on the crest of Little North Mountain approximately 3 miles west of Van Buren Furnace. The line continues approximately 53 miles northeasterly along the crest of Little North Mountain to its intersection with the Potomac River in Fort Frederick State Park. The line then proceeds approximately 47.4 miles southeasterly along the Potomac River to the beginning point at that river's intersection with the boundary line between West Virginia and Virginia.

Signed: December 3, 1982.

Stephen E. Higgins,

Acting Director.

David Q. Bates,

Deputy Assistant Secretary (Operations).

BILLING CODE 4510-31-M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1904

Exemption From Requirements for Recording Occupational Injuries and Illnesses; Final Rule and Amendment

AGENCY: Occupational Safety and Health Administration (OSHA); Labor.

ACTION: Final rule.

SUMMARY: With this notice, OSHA is amending Part 1904 to exempt certain employer establishments from requirements to: (1) Maintain, retain and provide access to the log and summary of occupational injuries and illnesses (1904.2, 1904.6, and 1904.7); (2) maintain, retain and make available for inspection the supplementary record of occupational injuries and illnesses (1904.4, and 1904.6); and (3) post the annual summary of occupational injuries and illnesses for each establishment (1904.5).

The Agency is exempting employer establishments in the following Standard Industrial Classifications (SIC's):

SIC's 52–59 (Retail Trades, except SIC's 52–54);

SIC's 60–67 (Finance, Insurance and Real Estate);

SIC's 70–89 (Services, except SIC's 70, 75, 76, 79, 80).

This action is part of OSHA's continuing effort to reduce the recordkeeping burden on employers.

The primary value to OSHA of these records has been to help OSHA safety and heath officers to assess workplace safety conditions as part of OSHA's General Schedule (i.e. agency-initiated) inspection of establishments. Since 1977, however, OSHA has not included in its general inspection program those employer establishments that would be exempt under this rule.

Further, because of low incidence rates at affected establishments, and limited OSHA resources, and because needed inspections are made in response to employee complaints about specific hazards, there is little likelihood that these establishments would be included in any future targeting scheme. For these establishments, the primary agency use of these records no longer exists, and OHSA, therefore, exempts these employers establishments from the requirements to keep these records. The exemption thus relieves a large number of employers of a paperwork burden that is unnecessary from the agency's point of view, without lessening on-the-job safety protection for workers.

EFFECTIVE DATE: This rule becomes effective January 1, 1983.

FOR FURTHER INFORMATION CONTACT: Raymond E. Donnelly, Occupational Safety and Health Administration, Room N3622, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210. Telephone (202) 523–8076.

A. Background

1. *History of the Regulation.* The regulations concerning OSHA's occupational injury and illness recordkeeping system (29 CFR Part 1904) were adopted in 1971. Their purpose is to:

Implement section 8(c) (1), (2), 8(g)(2) and 24 (a) and (e) of the Occupational Safety and Health Act of 1970. These sections provide for recordkeeping and reporting by employers covered by the Act as necessary or appropriate for enforcement of the Act, for developing information regarding the causes and prevention of occupational accidents and illnesses, and for maintaining a program of collection, compilation and analysis of occupational safety and health statistics (29 CFR 1904.1).

On July 29, 1977, OSHA amended these regulations to exempt small employers with 10 or fewer employees from the recordkeeping requirements of Part 1904 (42 FR 38567). OSHA then stated that the amendment would continue the Congressional intent, expressed in previous appropriations acts (Pub. L. 93–517 and Pub. L. 94–206) generally to exempt employers with 10 or fewer employees from the recordkeeping requirements but not from the requirement in § 1904.8 to report accidents resulting in a fatality or multiple hospitalization nor from the requirement in § 1904.21 to participate in the Bureau of Labor Statistics' (BLS) annual statistical survey, if such an employer is selected to participate. OSHA also stated that the small employer exemption would carry out the mandate of section 8(d) of the Act which requires that information obtained under the Act be obtained with a minimum burden on employers (29 U.S.C. 657(d)).

On June 4, 1982, OSHA proposed a comparable exemption for establishments which are classified in

the Office of Management and Budget's Standard Industrial Classification (SIC) Manual as retail trade, finance, insurance, real estate and services—SIC's 52–89 (excluding 52–54, 70, 75, 76, 79 and 80) (47 FR 24346).

The scope of the proposed exemption was confined to establishments in the Major Industry Groups within SICs 52–89, which met two criteria. The first was that the establishments fall within SIC's not targeted for general schedule inspections. Since 1977 all establishments in SIC's 52–89 have not been targeted for such inspections. The second criterion was that the establishments fall within Major Industry Groups in SIC's whose average lost workday case injury rate (LWCIR), as published by the Bureau of Labor Statistics, for 1978–80 was at or below 75 percent of the private sector average. Major Industry Groups in SIC's 52–89 which had LWCIR averages above 75 percent of the private sector average and thus were not included in the proposed exemption are: building materials and garden supplies (SIC 52); general merchandise and food stores (SIC's 53, 54); hotels and other lodging places (SIC 70); repair (SIC's 75, 76); amusement and recreation services (SIC 79); and health services (SIC 80).

The purpose of the proposal was to further OSHA's continuing effort under section 8(d) of the Act to reduce the paperwork burden on employers without compromising worker safety and health. In the proposal OSHA identified the three main functions which making and keeping the OSHA prescribed records were intended to serve. OSHA also set forth why it believed that for the industry groups proposed for exemption, these requirements had outlived their usefulness. The following discussion reiterates these points.

The requirements to maintain, retain and provide access to the OSHA prescribed log, summary of occupational injuries and illnesses and supplemental record were intended to serve three main purposes.

First, these requirements were designed to aid OSHA's safety and health officers to identify hazardous operations when conducting general schedule inspections. Establishments in SIC's 52–89, however, have not been targeted for general schedule inspections since 1977 because these establishments fall within less-hazardous industrial divisions. For the same reason, coupled with limited OSHA resources, it is highly unlikely that such firms would be included in any future targeting plan. Thus, for the exempted establishments, OSHA concludes that the requirements have outlived their original purpose as a necessary component of general schedule inspection activity.

It should be emphasized that inspections in these establishments will continue to be made in response to employee complaints, and as part of OSHA's investigation of fatalities, multiple hospitalization incidents, and imminent danger situations. In these cases, however, the hazard information is usually provided by the complaint itself or through prompt investigation.

The second purpose of these regulations was to provide employers and employees with useful information about conditions at their workplaces. Eliminating the requirement to maintain the OSHA log and supplemental record for the establishments affected by this exemption would not result in the loss of useful information. Approximately 94 percent of all establishments in SIC's 52–89 (excluding 52–54, 70, 75, 76, 79 and 80) according to BLS data, are expected to have fewer than two injuries per establishment on an annual basis.

The third purpose of these regulations was to ensure the gathering of uniform, reliable safety and health statistics. OSHA did not propose to exempt affected employers from participating in the Bureau of Labor Statistics' annual survey of occupational injuries and illnesses. Currently, only a small percentage of these employers are asked to participate. In the future, these selected employers will be notified in advance by BLS of the requirement to participate in the survey and to maintain the OSHA log and make reports for the survey as requested by BLS.

Substantial public interest was generated by the proposal. Trade associations, unions, firms and individuals responded within the comment period which ended on July 6, 1982.

The Final Rule

OSHA is issuing the final rule as proposed. The Agency believes that substantial support for both the general concept of recordkeeping relief and the scope of this exemption was demonstrated by the response to the proposal.

Some commenters expressed objections to either the exclusion from or the inclusion of certain industries in the proposed exemption. OSHA has reviewed its proposed two-fold criteria for exemption and has concluded that these criteria are both rational and workable. In addition no alternative criteria which the Agency considers workable and appropriate were suggested. Additional discussion of these objections is found later in this document.

The Rulemaking

First, many of the comments received in response to the proposal generally supported the concept of an exemption from recordkeeping requirements for the industry groups included in the proposal. For example, the Shoe Corp. of America stated that the "requirement to maintain the OSHA 200 for each of the stores (in a 700 store chain) at the location is an exercise in costly paper work. The vast majority go out with all zeros typed in". (2–20; see also the comments of the Society of Independent Gasoline Marketers of America, 2–22; American Bankers Association, 2–23; American Retail Federation (ARF), 2–13A; First Bank Ceredo, 2–6; Arby's Inc. 2–8; RTM, 2–14). Several commenters from the "fast food" industry also wrote in support of their industry's inclusion in the exemption. Arby's stated that the "fast food environment is free from recognizable hazards, due to training and layout," and contended that there is no benefit from the paperwork burden associated with these forms (i.e., recording and posting of accident data). The company also noted it is using alternative recordkeeping systems to capture and store this same data.

The Society of Independent Gasoline Marketers of America (SIGMA) similarly stated that it "would relieve SIGMA members of an unnecessary paperwork burden and would not adversely affect workplace safety for this retail gasoline outlet employees (2–22). Also supporting the proposal was the American Bankers Association which characterized the proposed exemption as "justified and necessary" (2–23).

The ARF also supported the "concept embodied in the (proposed) rule as "consistent with both Section 8(d) of the Act which requires that information sought under the Act be obtained with a minimum burden on employers (29 U.S.C. 657 (d)) and this Administration's goal of reducing unnecessary paperwork burden on employers without lessening on-the-job safety protection for workers".

However, objections to the proposed exemptions were raised by several commenters. California's Department of Industrial Relations stated that OSHA has ignored uses of record keeping information in proposing this exemption. The Department argued that the log is a necessary component of any inspection, that the log contains information important to employees and that summary information is important to

gather for research purposes (2–21). OSHA believes these objections overstate the usefulness of the records involved in this exemption. OSHA inspectors depend on many sources of information. Certainly in the case of complaint inspections, complaining employees themselves are sources of available detailed health and safety information as are prompt investigations. Also most workplace injury and illness data are recorded in workers' compensation reports, which are typically more detailed than the OSHA log. Nor does the exemption ignore research needs. As stated above, this exemption does not affect the reporting requirements needed to complete the BLS Survey. In addition, no other research needs have been identified which would be affected by this exemption. OSHA does not believe that employees will be deprived of important information. Employees, either individually, or through safety and health committees have access to worker's compensation first reports of injury, and other records kept by employers in the form best designed for a particular firm's needs.

Other objections where similar in nature. For example, OSHA agrees with the Michigan Department of Public Health, which stated that the recordkeeping requirements constitute a consistent, uniform way of recording injuries for individual establishments and industry wide (2–26). However, Michigan's claim that such records are the basis for joint labor-management efforts to improve safety and health is, in OSHA's opinion, a vast overstatement. Certainly for the exempted establishments, the minimal information recorded on and communicated by the required forms, could only be of peripheral value to such labor-management efforts. The uniformity of the forms, likewise, is irrelevant to joint labor-management efforts in any one firm, and of minimal significance to industry-wide efforts since the categories of recorded information are unambiguous. Michigan was also concerned that the adoption of this exemption could cause confusion in states operating their own health and safety plans pursuant to section 18 of the Act. However, any such confusion can be obviated by the states' adoption of similar exemptions. In sum, OSHA concludes that most general objections to the proposed exemption were based on theoretical uses for required records, which in fact, are either unproved or of minimal value.

Specific criticism of the proposal centered around OSHA's choice of industry groups for inclusion in the exemption, and/or the criteria themselves. Some commenters argued that additional industry groups or subgroups should be exempt because they meet OSHA's criteria in the proposal. For example OSHA was asked to broaden the exemption to include SIC 48, "Communications", because that industry's LWCIR has been below the criterion level of 75% of the private sector (AT&T) (2–15). OSHA limited its proposal to certain major groups within the broad industrial divisions of retail trade and services (SIC 52–89) because, by far, most of the hazardous major groups are contained in these divisions. OSHA realizes that other major groups also may have relatively low LWCIR's, or using other definitions, may be characterized as less hazardous.

Because statistics and concepts defining "hazardous" are changeable, OSHA is hesitant, however, to frame any exemption in the broadest way at this time. Therefore the Agency will continue to examine non-exempt industry groups for possible inclusion in future exemptions, based on the criteria applied here, or on equally rational criteria. It should also be noted that the record is not complete concerning whether other specified major groups, not included in the proposal, such as "Communications" (SIC 48) should also be exempt. For example, although industry comments supported extending the exemption to "Communications," no comments were received from affected unions, employees and other interested persons on the issue.

Various objections were made to OSHA's using 2-digit SIC codes to designate exempt industry groups. For instance, the AFL–CIO argued that two digit SIC codes are too broad to use for exemption purposes because they incorporate hazardous SIC's within them (2–10).

OSHA agrees with the AFL–CIO that using the 2-digit SIC code to designate less hazardous industries may "hide" less safe industries, firms, or in "safe" firms, unsafe operations. This flaw, however, is simply a consequence of the process of aggregation. OSHA does not agree with the AFL–CIO, however, that the 2-digit code is too "broad" for designating less hazardous industries. As stated above, little purpose would be served to continue to require 3 or 4 digit SIC codes groups or industries to keep records when OSHA is not using general schedule inspections in those industries. OSHA also believes that designating exempt categories down to the 3 or 4 digit level would be confusing to the public and administratively difficult for OSHA.

OSHA also agrees with commenters who stated that any definition which aggregates safety and health records of different firms and/or industries may "hide" high or low performers. In fact, even a firm-by-firm qualification test will aggregate operations with varying safety records with a given firm. Because of this fact, Inco Ltd. recommended that offices within larger establishments should be exempt, because offices are assumed to have very low workplace injury and illness rates. To the extent that office work results in very few recordable illnesses and injuries, the recording of such infrequent incidents would be a very slight additional burden for non-exempt establishments. Further, segregating data on an operation-by-operation basis may be beyond the normal operating procedures of many establishments and may thus create additional paperwork for such establishments. Even for those offices that may be considered separate establishments because the primary activity of their firms does not fall within the exempt SICs, OSHA does not believe that the continued making and keeping of the OSHA log and supplementary record will be unduly burdensome. Many of these offices are responsible for keeping OSHA-mandated records for other divisions of their firms. The additional making and keeping of these records for their own "office establishments" would appear to impose only a slight additional burden.

Other comments requested that OSHA revise its criteria for exemption to include certain SIC's. For instance, the ARF objected to the proposal's exclusion of SIC's 52,53 and 54 from the recordkeeping exemption, even though it acknowledged that these industries' LWCIR's were higher than 75% of the private sector average. The ARF characterized OSHA's criteria as "irrational and improper", in part because they allegedly implied a "casual relationship" between recordkeeping and the lost workday case rate. The ARF also accused OSHA of "punishing" SICs 52, 53 and 54, because they were not included in this exemption.

OSHA disagrees with this analysis. As stated above, the main reason for proposing these exemptions was OSHA's belief that in industries with above average safety and health experience little purpose is served by documenting low injury and illness rates on the forms and at the frequencies now required.

In addition, although this exemption is in keeping with OSHA's practice of

recognizing good performance by employers, OSHA does not expect that this exemption by itself, will provide sufficient incentive to change employer behavior to improve workplace health and safety. Neither does OSHA believe, as ARF suggested, that conforming to reporting requirements, by itself, improves workplace safety and health. Certainly, if data existed which supported such a causal relationship, OSHA would be amiss in issuing this exemption. It is because OSHA believes that the requirements affected by this exemption no longer serve their original purposes, that this exemption is being issued.

In conclusion, OSHA believes that its criteria for choosing industrial groups for exemption from certain recordkeeping requirements are both rational and fair. In addition, and just as importantly, OSHA believes that adopting this exemption will help employers, employees and the Agency to concentrate their respective resources on affirmative actions to improve workplace safety and health.

OSHA finds, in accordance with Executive Order 12291 (46 FR 13193), that this is not a "major rule" since its effect will not meet any of the definitional elements in § 1(b) of the Executive Order. As stated above, the effect of this rule will be to reduce many employers' paperwork burden, and accordingly results in lower costs to them. The Secretary also finds that no regulatory flexibility analysis is required under the Regulatory Flexibility Act (Pub. L. 96–354; 94 Stat. 1164) because this action will not have a significant economic impact on a substantial number of small entities, in that no increased reporting requirements are imposed and that competition within affected industries is not altered. A certification to this effect has been made by the Secretary to Chief Counsel for Advocacy of the Small Business Administration.

Paperwork Reduction Act

Information collection requirements contained in this regulation are in the process of being submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511). Once the requirements have been assigned an OMB control number, the public will be notified to that effect.

Authority

This document was prepared under the direction and supervision of Thorne G. Auchter, Assistant Secretary of Labor for Occupational Safety and Health.

Accordingly, pursuant to Section 8(g) of the Occupational Safety and Health Act of 1970 (84 Stat. 29 U.S.C. 657(g), 1593, 1600), Section 4 of the Administrative Procedures Act (45 U.S.C. 553), and Secretary of Labor's Order 8–76, Part 1904 of Title 29 of the Code of Federal Regulations is hereby amended as set forth below.

List of Subjects in 29 CFR Part 1904.

Health records, Health statistics, Occupational safety and health.

Signed at Washington, D.C., this 20th day of December, 1982.

Thorne G. Auchter,

Assistant Secretary of Labor.

PART 1904—[Amended]

Part 1904 of Title 29, Code of Federal Regulations is amended as follows:

1. By adding a new paragraph (h) to § 1904.12, to read as follows:

§ 1904.12 Definitions.

* * * * *

(h) *Establishments Classified in Standard Industrial Classification Codes (SIC) 52–89.* (1) Establishments whose primary activity constitutes retail trade; finance, insurance, real estate and services are classified in SIC's 52–89.

(2) Retail trades are classified as SIC's 52–59 and for the most part include establishments engaged in selling merchandise to the general public for personal or household consumption. Some of the retail trades are: automotive dealers, apparel and accessory stores, furniture and home furnishing stores, and eating and drinking places.

(3) Finance, insurance and real estate are classified as SIC's 60–67 and include establishments which are engaged in banking, credit other than banking, security dealings, insurance, and real estate.

(4) Services are classified as SIC's 70–89 and include establishments which provide a variety of services for individuals, businesses, government agencies, and other organizations. Some of the service industries are: personal and business services, in addition to legal, education, social, and cultural; and membership organizations.

(5) The primary activity of an establishment is determined as follows: For finance, insurance, real estate, and services establishments, the value of receipts or revenue for services rendered by an establishment determines its primary activity. In establishments with diversified activities, the activities determined to account for the largest share of production, sales or revenue will identify the primary activity. In some instances these criteria will not adequately represent the relative economic importance of each of the varied activities. In such cases, employment or payroll should be used in place of the normal basis for determining the primary activity.

2. By adding a new § 1904.16 to read as follows:

§ 1904.16 Establishments Classified in Standard Industrial Classification Codes (SIC) 52–89, (except 52–54, 70, 75, 76, 79 and 80).

An employer whose establishment is classified in SIC's 52–89, (excluding 52–54, 70, 75, 76, 79 and 80) need not comply, for such establishment, with any of the requirements of this part except the following:

(a) Obligation to report under § 1904.8 concerning fatalities or multiple hospitalization accidents; and (b) obligation to maintain a log of occupational injuries and illnesses under § 1904.21, upon being notified in writing by the Bureau of Labor Statistics that the employer has been selected to participate in a statistical survey of occupational injuries and illnesses.

BILLING CODE 4510–26–M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2621

Limitation on Guaranteed Benefits; Correction

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule; correction.

SUMMARY: On December 13, 1982, the Pension Benefit Guaranty Corporation published in the **Federal Register** at 47 FR 55672, FR Doc. 82–33789, an amendment to its Limitation on Guaranteed Benefits regulation. This document corrects the authority citation for 29 CFR Part 2621 and a typographical error in Appendix A to Part 2621.

FOR FURTHER INFORMATION CONTACT: Renae R. Hubbard, Special Counsel, Office of the General Counsel, Code 210, Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, D.C. 20006, 202–254–4895. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The following corrections are made in FR Doc. 82–33789 appearing at page 55672 in the issue of December 13, 1982:

1. On page 55672 in column 3, in the "Authority", "4022(B)" is corrected to

read "4022B" and "1322B" is corrected to read "1322b".

2. On page 55672 in Column 3, Appendix A, in the table "1982" is corrected to read "1983".

Edwin M. Jones,

Executive Director, Pension Benefit Guaranty Corporation.

[FR Doc. 82-35041 Filed 12-27-82; 8:45 am]

BILLING CODE 7708-01-M

DEPARTMENT OF DEFENSE

Corps of Engineers; Department of the Army

36 CFR Part 331

Falls of Ohio National Wildlife Conservation Area

AGENCY: U.S. Army Corps of Engineers, Defense.

ACTION: Interim rule with request for comments.

SUMMARY: The Secretary of the Army, acting through the Chief of Engineers, is issuing an interim rule to govern the protection, use and management of the Falls of the Ohio National Wildlife Conservation Area (WCA). The WCA was authorized by Title II of Pub L. 97-137 and established pursuant to Section 204 of the Act by the Secretary of the Interior concurrent with publication of Notice and the WCA boundaries in the **Federal Register** of August 12, 1982 at 47 FR 35043. Section 206 of the Act mandates publication of regulations to carry out Title II within one year of enactment or not later than December 29, 1982.

DATE: This interim rule is effective upon publication and comments will be received on or before February 28, 1983.

ADDRESS: Written comments should be sent to: Office of the Chief of Engineers, ATTN: DAEN-CWP-V, Washington, DC 20314.

FOR FURTHER INFORMATION CONTACT: Mr. Richard G. Leverty, Environmental Resources Branch, telephone number (202) 272-0130.

SUPPLEMENTARY INFORMATION: These interim regulations place certain restrictions, prohibitions and limitations on use of the lands and waters within the Falls of the Ohio National Wildlife Conservation Area (WCA), in order to protect, preserve and provide for the proper management of the significant physical and biological features for which the WCA was designated and to prevent interference with commercial and recreational navigation on the Ohio River.

The WCA was authorized by Title II of Pub. L. 97-137, in order to:

(1) Protect wildlife populations and habitats in their natural diversity, including but not limited to, bald eagle, peregrine falcon, Canada geese, mallard, gadwall, blue-winged teal, black duck, American widgeon, and wood duck;

(2) Conserve fish populations in their natural diversity including, but not limited to, shad, shiner, crappie, largemouth bass, striped bass, and channel catfish;

(3) Ensure to the maximum extent practicable the necessary water quantity within the WCA;

(4) Protect the fossilized coral reef; and

(5) Provide opportunities for scientific research and interpretive and environmental uses and fish and wildlife oriented recreational uses.

Responsibility for the administration of the WCA and for promulgation of these regulations rests with the Secretary of the Army, acting through the U.S. Army Corps of Engineers. Within the boundary, lands, waters and interests therein will be acquired by the Corps of Engineers as may be necessary to insure that the WCA can be effectively managed for the purpose for which it was established. The authorizing law requires that these regulations include prohibitions on all hunting, vandalism (including the removal of fossils), and the dumping of refuse within the boundaries of the WCA.

These regulations were developed in consultation with appropriate agencies of the Department of the Interior.

The Corps of Engineers has determined that it is impractical to publish these rules in draft form because the statutory requirement for their promulgation by December 29, 1982.

Regulation Changes: The interim rule amends Title 36 of the Code of Federal Regulations by adding a new part 331 which governs the protection, use and management of the Falls of the Ohio National Wildlife Conservation Area. As noted above, comments will be considered in finalizing these interim rules if received by February 28, 1983.

Impact Analysis: The Department of the Army has determined that this document is not a major rule requiring preparation of a Regulatory Impact Analysis under Executive Order 12291. The Department of the Army has also determined that the interim rule will not have a significant economic impact on a substantial number of small entities and, therefore, does not require a small entity flexibility analysis under Pub. L. 96-354. The interim rule merely sets forth certain restrictions, prohibitions and limitations on use of the Falls of the Ohio National Wildlife Conservation Area in order to properly manage and protect its unique resources and thus to carry out the purposes for which the WCA was authorized and established.

List of Subjects in 36 CFR Part 331

Recreation areas, Waterways, Hunting and fishing, Administrative practice and procedure, Public lands.

John O. Roach, II,

Army Liaison Officer with the Federal Register.

Accordingly, 36 CFR is amended by adding a new interim Part 331 to read as set forth below.

PART 331—REGULATIONS GOVERNING THE PROTECTION, USE AND MANAGEMENT OF THE FALLS OF THE OHIO NATIONAL WILDLIFE CONSERVATION AREA

Sec

331.1 Applicability and scope.
331.2 Policy.
331.3 Hunting and trapping.
331.4 Fishing.
331.5 Explosives and fireworks.
331.6 Public property.
331.7 Sanitation.
331.8 Picnicking.
331.9 Camping.
331.10 Swimming.
331.11 Special events.
331.12 Vehicles.
331.13 Vessels.
331.14 Aircraft.
331.15 Fires.
331.16 Interference with government employees.
331.17 Minerals.

331.19 Commercial activities.
331.20 Advertisement.
331.21 Unauthorized structures.
331.22 Abandonment of personal property.
331.23 Control of animals.
331.24 Permits.
331.25 Violation of regulations.

Authority: Pub. L. 97-137.

§ 331.1 Applicability and scope.

(a) The regulations contained in this part apply to those lands and waters within the established boundary of the Falls of the Ohio National Wildlife Conservation Area (WCA). Included in this boundary, which was published in the **Federal Register** of August 12, 1982, are publicly and privately owned lands, waters and improvements. The Federal Government, acting through the Corps of Engineers, will acquire such rights to privately-owned properties in the WCA as are necessary to carry out the purposes of Title II, Pub. L. 97-137. The regulations prescribed herein are for the use, management and protection of the resources of the WCA and all persons

entering, using or visiting within the boundaries of the WCA are subject to these regulations. All other applicable Federal, State and local laws and regulations remain in full force and effect. The District Engineer, US Army Corps of Engineers, exercises non-exclusive jurisdiction over the lands and waters of the WCA and enforces these regulations.

(b) The WCA boundary encompasses an existing hydroelectric generating station and the McAlpine Locks and Dam, operating navigation structures which are part of the authorized Ohio River Navigation System. The continued operation and maintenance of this system take precedence over the purposes of the WCA, except that such operation and maintenance will be consistent with the basic purpose of the WCA as regards prohibition of hunting, vandalism, and dumping of refuse. Management of the WCA to achieve its intended purposes, will, to the extent practicable, be accomplished in a manner consistent and compatible with continued generation of electricity and navigation on the Ohio River, including operation and maintenance of the McAlpine Locks and Dam and the Louisville Repair Station and material storage areas located on Shippingport Island.

§ 331.2 Policy.

(a) It is the policy of the Secretary of the Army, acting through the Chief of Engineers, to manage the natural and cultural resources of the WCA in the public interest, providing the public with safe and healthful recreational opportunities while protecting and enhancing these resources.

(b) Unless otherwise indicated herein, the term "District Engineer" shall include the authorized representatives of the District Engineer.

(c) The WCA shall be available to the public without regard to sex, race, color, creed, or national origin. No lessee, licensee, or concessionaire providing a service to the public shall discriminate against any person because of sex, race, creed, color, or national origin in the conduct of the operations under the lease, license, or concession contract.

§ 331.3 Hunting and trapping.

(a) The hunting, trapping, catching, molesting, killing, or having in possession any wild animal or bird, or taking the eggs of any such bird, is prohibited.

(b) Possession of equipment (including, but not limited to, firearms, ammunition, traps, projectile firing devices including bow and arrow) which could be used for hunting, trapping, or the taking of wildlife, is prohibited.

§ 331.4 Fishing.

Unless otherwise authorized in writing by the District Engineer:

(a) Fishing is only permitted in accordance with the laws and regulations of the State within whose exterior boundaries that portion of the WCA is located, and such laws and regulations which are now or may hereafter be in effect are hereby adopted as part of these regulations.

(b) Fishing by means of the use of drugs, poisons, explosives, bow and arrow or electricity is prohibited.

(c) Commercial fishing and fishing with gill nets, trammel nets, hoop nets, bow and arrow or trot lines is prohibited.

§ 331.5 Explosives and fireworks.

Unless otherwise authorized in writing by the District Engineer:

(a) The possession or use of fireworks is prohibited.

(b) The possession or use of explosives is prohibited.

§ 331.6 Public property.

Unless otherwise authorized in writing by the District Engineer, the destruction, injury, defacement, removal, or any alteration of public property including, but not limited to natural formations, paleontological features, historical and archeological features and vegetative growth is prohibited. Any such destruction, removal, or alteration of public property shall be in accordance with the conditions of any permission granted.

§ 331.7 Sanitation.

(a) Garbage, trash, rubbish, litter, or any other waste material or waste liquid generated on the WCA shall be removed from the area or deposited in receptacles provided for that purpose. The improper disposal of such wastes on the project is prohibited.

(b) The use of refuse containers for the disposal of refuse not generated on the WCA is prohibited.

(c) It is a violation to bring any material onto the WCA for the purpose of disposal.

(d) The discharge or placing of sewage, galley waste, garbage, refuse, or pollutants into the WCA waters from any vessel or watercraft is prohibited.

§ 331.8 Picnicking.

(a) Picnicking is permitted only in designated areas.

(b) Picnickers shall remove all personal equipment and clean their sites upon departure.

§ 331.9 Camping.

Camping is not permitted within the WCA.

§ 331.10 Swimming.

Swimming is prohibited unless authorized in writing by the District Engineer.

§ 331.11 Special events.

(a) Special events including, but not limited to, water carnivals, boat regattas, music festivals, dramatic presentations, or other special recreation programs are prohibited unless written permission has been granted by the District Engineer.

(b) The public shall not be charged any fee by the sponsor of such permitted event unless the District Engineer has approved in writing the proposed schedule of fees. The District Engineer shall have authority to revoke permission and require removal of any equipment upon failure of the sponsor to comply with terms and conditions of the permit/permission. Any violation shall constitute a separate violation for each calendar day in which it occurs.

§ 331.12 Vehicles.

(a) The use of a vehicle off roadways is prohibited except as may be authorized by the District Engineer.

(b) Vehicles shall not be parked in violation of any posted restrictions, or in such a manner as to endanger any Federal property to include natural features. The owner of any vehicle parked in violation of this section shall be presumed to have parked it, and unless rebutted such presumption will be sufficient to sustain a conviction as provided for in § 331.25.

(c) Vehicles shall be operated in accordance with all posted regulations.

(d) Driving or operating any vehicle in a careless, negligent, or reckless manner, heedlessly or in willful disregard for the safety of other persons, or in such manner as to endanger any property or environmental feature, or without due care or at a speed greater than is reasonable and prudent under prevailing conditions with regard to traffic, weather, road, light and surface conditions, is prohibited.

(e) This section pertains to all vehicles, including, but not limited to, automobiles, trucks, motorcycles, mini-bikes, trail-bikes, snowmobiles, dune buggies, all terrain vehicles, bicycles, trailers, campers, or any other such equipment.

(f) Except as authorized by the District Engineer no person shall operate any motorized vehicle without a proper and effective exhaust muffler, or with an

exhaust muffler cutout open, or in any other manner which renders the exhaust muffler ineffective in muffling the sound of engine exhaust.

§ 331.13 Vessels.

(a) Vessels or other watercraft may be operated in the WCA waters except in prohibited or restricted areas in accordance with posted regulations and applicable Federal, States, and local laws.

(b) All vessels when not in actual use shall be removed from the WCA unless securely moored at mooring facilities approved by the District Engineer. The placing of floating or stationary mooring facilities to, or interfering with, a buoy, channel marker, or other navigational aid is prohibited.

(c) The operation of vessels or other watercraft in a careless, negligent, or reckless manner so as to endanger any property (including the operator and/or user(s) of the vessel or watercraft) is prohibited.

§ 331.14 Aircraft.

(a) The operation of aircraft on WCA lands and waters is prohibited, unless authorized in writing by the District Engineer.

(b) Except in extreme emergencies threatening human life or serious property loss, the air delivery of any person or thing by parachute, helicopter, or other means onto project lands or waters without written permission of the District Engineer is prohibited.

(c) The provisions of this section shall not be applicable to aircraft engaged on official business of the Federal Government or used in emergency rescue in accordance with the directions of the District Engineer.

§ 331.15 Fires.

Open fires are prohibited unless confined to fireplaces, grills, or other facilities designed for this purpose as designated by the District Engineer. Fires shall not be left unattended and must be completely extinguished prior to departure.

§ 331.16 Interference with government employees.

Interference with any Government employee in the conduct of his or her official duties pertaining to the administration of these regulations is prohibited. It is a violation to fail to comply with a lawful order directed by any Government employee or to knowingly give any false, fictitious, or fraudulent report or other information to any Government employee in the performance of his or her official duties pertaining to the administration of these regulations.

§ 331.17 Minerals.

All activities in connection with prospecting, exploration, development, mining or other removal or the processing of mineral resources and all uses reasonably incident thereto are prohibited.

§ 331.18 Restrictions.

The District Engineer may establish and post a schedule of visiting hours and/or restrictions on the public use of a portion or portions of the WCA. The District Engineer may close or restrict the use of the WCA or portion of the WCA when necessitated by reason of public health, public safety, security, maintenance, or other reasons in the public interest. Entering or using the project in a manner which is contrary to the schedule of visiting hours, closure or restrictions is prohibited.

§ 331.19 Commercial activities.

Unless otherwise authorized in writing by the District Engineer, the engaging in or solicitation of business or money is prohibited.

§ 331.20 Advertisement.

Unless otherwise authorized in writing by the District Engineer, advertising by the use of billboards, signs, markers, audio devices, or any other means whatsoever including handbills, circulars, and posters is prohibited. Vessels or vehicles with semipermanent or permanently installed signs are exempt if being used for authorized recreational activities and in compliance with all other rules and regulations pertaining to vessels and vehicles.

§ 331.21 Unauthorized structures.

The construction, placing, or continued existence of any structure of any kind under, upon, in, or over WCA lands or waters is prohibited unless a permit, lease, license, or other appropriate written agreement therefor has been issued by the District Engineer. Structures not so authorized are subject to summary removal or impoundment by the District Engineer. The design, construction, placing, existence, or use of structures in violation of the terms of the permit, lease, license, or other written agreement therefor is prohibited.

§ 331.22 Abandonment of personal property.

(a) Personal property of any kind left unattended upon WCA lands or waters for a period of 24 hours shall be considered abandoned and may be impounded and stored at a storage point designated by the District Engineer who may assess a reasonable impoundment fee. Such fee shall be paid before the impounded property is returned to its owner.

(b) If abandoned property is not claimed by its owner within 3 months after the date it is received at the storage point designated by the District Engineer, it may be disposed of by public or private sale or by other means determined by the District Engineer. Any net proceeds from the sale of property shall be covered into the Treasury of the United States as miscellaneous receipts.

§ 331.23 Control of animals.

(a) No person shall bring or allow horses, cattle, or other livestock in the WCA.

(b) No person shall bring dogs, cats, or other pets into the WCA unless penned, caged, on a leash under 6 feet in length, or otherwise under physical restraint at all times. Unclaimed or unattended animals are subject to immediate impoundment and removal in accordance with State and local laws.

§ 331.24 Permits.

It shall be a violation of these regulations to refuse to or fail to comply with the terms or conditions of any permit issued by the District Engineer.

§ 331.25 Violation of regulations.

Anyone violating the provisions of this regulation shall be subject to a fine of not more than $500 or imprisonment for not more than 6 months, or both. All persons designated by the Chief of Engineers, U.S. Army Corps of Engineers, for that purpose shall have the authority to issue a citation for the violation of these regulations, requiring the appearance of any person charged with violation to appear before the U.S. Magistrate within whose jurisdiction the violation occurred.

BILLING CODE 3710-92-M

VETERANS ADMINISTATION

38 CFR Part 17

Alcohol and Drug Dependence or Abuse Treatment and Rehabilitation

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The VA (Veterans Administration) is publishing final regulations on its implementation of the "Veterans Health Care Amendments of 1979" (Pub. L. 96-22) as amended. The purpose of that Act was to authorize the VA to conduct a five-year pilot program for care, treatment and rehabilitation

services on a contract basis in halfway houses, therapeutic communities, psychiatric residential treatment centers and other community-based treatment facilities, for eligible veterans suffering from alcohol or drug dependence or abuse disabilities. These regulations are necessary in order to provide the authority to VA medical centers for authorizing needed treatment for eligible veterans, who are in need of and request alcohol or drug abuse treatment and rehabiliation.

EFFECTIVE DATE: April 28, 1980.

The incorporation by reference in this regulation is approved by the Director of the office of the Federal Register.

FOR FURTHER INFORMATION CONTACT: Robert L. Murphy, Mental Health and Behavioral Sciences Service (116C), Department of Medicine and Surgery, Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420, (202) 389–5195.

SUPPLEMENTARY INFORMATION: On pages 55716 through 55720 of the **Federal Register** of August 21, 1980, an Interim Final Regulation was published for §17.960, title 38 Code of Federal Regulations. Interested persons were given 30 days to submit comments. Two comments were received. One was a question relating to establishing halfway houses for veterans only or using existing facilities where veterans and nonveterans would be treated together with the VA sponsoring the veterans *only*. Contracts will be negotiated with existing facilities that are able to meet quality and effectiveness standards established by the VA. No attempt will be made to establish facilities for veterans only or start new program activities where none currently exists. The other comments involved additional treatment and transitional assistance required by veterans being discharged from institutional care. Extensive treatment programs are presently available to veterans being release from institutional care to promote adjustment to noninstitutional life. An additional item that has been added involves contract care on an outpatient basis in addition to treatment in residential facilities, and additional standards that must be met to qualify for an award of a contract. The quality and effectiveness standards contained in these regulations are required to be set forth in regulations by law. (See 38 U.S.C. 620A(a)(2)).

These rules are not major rules within the meaning of Executive Order 12291, Federal Regulation, because they will not have an annual effect on the economy of $100 million or more, will not cause a major increase in costs or prices for any persons or entities, and will not have significant adverse effects on any element of our economy. These rules are exempt from the requirement for initial and final regulatory flexibility analyses of sections 603 and 604 of the Regulatory Flexibility Act (Pub. L. 96–354) because those sections are not effective prior to January 1, 1981. These rules were effective, on an interim basis, as of April 30, 1980, and, with minor modifications, will remain effective. In any event, these regulations will not have a significant impact on a substantial number of small entities. The pilot program encompassed by these rules involves only a small number of these entities. Moreover, these rules do not impose any requirements that these entities have not previously been required to meet, none of which are economically significant.

Procedural data included in the publication of Interim Final Regulation §17.960 have been omitted leaving only regulatory matters for final publication and inclusion in Title 38 CFR. The section number of this regulation has been changed from §17.960 to §§ 17.53a through 17.53d. Accordingly, § 17.960 is removed from Title 38, CFR. The final regulations are hereby adopted as set forth below.

The Catalog of Federal Domestic Assistance Program number is 64.019.

List of subjects in 38 CFR Part 17

Alcoholism, Claims, Dental health, Drug abuse, Foreign relations, Government contracts, Grants program—health, Health care, Health facilities, Health professions, Medical devices, Medical research, Mental health programs, Nursing homes, Philippines, Veterans, Incorporation by reference.

Approved: November 24, 1982.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

PART 17—MEDICAL

1. 38 CFR Part 17 is amended by adding new §§ 17.53a, 17.53b, 17.53c, and 17.53d to read as follows:

§ 17.53a Alcohol and drug dependence or abuse treatment and rehabilitation in residential and nonresidential facilities by contract.

(a) Alcohol and drug dependence or abuse treatment and rehabilitation may be authorized by contract in nonresidential facilities and in residential facilities provided by halfway houses, therapeutic communities, psychiatric residential treatment centers and other community-based treatment facilities, when considered to be medically advantageous and cost effective for the following:

(1) Veterans who have been furnished hospital care in facilities over which the Administrator has direct jurisdiction and such transitional care is reasonably necessary to complete treatment incident to such hospital care,

(2) Persons in the Armed Forces who, upon discharge therefrom will become eligible veterans, when duly referred with authorization for Veterans Administration medical center hospital care in preparation for treatment and rehabilitation in this program under the following limitations:

(i) Such persons may be accepted by transfer only during the last 30 days of such person's enlistment or tour of duty,

(ii) The person requests transfer in writing for treatment for a specified period of time during the last 30 days of such person's enlistment period or tour of duty,

(iii) Treatment does not extend beyond the period of time specified in the request unless such person requests in writing an extension for a further specified period of time and such request is approved by the Veterans Administration Medical Center Director authorizing treatment and rehabilitation,

(iv) Such care and treatment will be provided as if the person were a veteran, subject to reimbursement by the respective military service for the costs of hospital care and control treatment provided while the person is an active duty member.

(b) The maximum period for one treatment episode is limited to 60 days. The Veterans Administration Medical Center Director may authorize one 30-day extension.

(c) Any person who has been discharged or released from active military, naval or air service, and who, upon application for treatment and rehabilitative services under the authority of this section is determined to be legally ineligible for such treatment or rehabilitation services shall be:

(1) Provided referral services to assist the person, to the maximum extent possible, in obtaining treatment and rehabilitation services from sources outside the Veterans Administration, not at Veterans Administration expense and,

(2) If pertinent, advised of the right to apply to the appropriate military, naval or air service and the Veterans Administration for review of such person's discharge or release from such service. (Pub. L. 96–22, 38 U.S.C. 620A)

§ 17.53b Contracts for residential treatment services for veterans with alcohol or drug dependence or abuse disabilities.

(a) Contracts for treatment services authorized under § 17.53a(a) may be awarded in accordance with applicable Veterans Administration and Federal procurement procedures. Such contracts will be awarded only after the quality and effectiveness, including adequate protection for the safety of the residents of the contractor's program, has been determined and then only to contractors, determined by the Chief Medical Director or designee to meet the following requirements.

(1) Meet fire safety requirements as follows:

(i) The building must meet the requirements of the applicable residential occupancy chapters and the general requirement chapters (1–7, 31) of the Life Safety Code (NFPA 101) published by the National Fire Protection Association (NFPA), Batterymarch Park, Quincy, Massachusetts 02269, 1981 edition. The 1981 edition of the Life Safety Code is hereby incorporated by reference into this section as though set forth in full herein. This code is available for inspection at the Office of the Federal Register, 1100 L Street, NW, Washington, DC 20408. Any equivalences or variances to Veterans Administration requirements must be approved by the Director, Facility Engineering, Planning, and Construction Office, Veterans Administration Central Office, 810 Vermont Avenue, NW. Washington, DC 20420.

(ii) Where applicable, the home must have a current occupancy permit issued by the local and state governments in the jurisdiction where the home is located.

(iii) All Veterans Administration sponsored residents will be mentally and physically capable of leaving the building, unaided, in the event of an emergency. Halfway house, therapeutic community and other residential program management must agree that all the other residents in any building housing veterans will also have such capability.

(iv) There must be at least one staff member on duty 24 hours a day.

(v) Fire exit drills must be held at least quarterly. Residents must be instructed in evacuation procedures when the primary and/or secondary exits are blocked. A written fire plan for evacuation in the event of fire shall be developed and reviewed annually. The plan shall outline the duties, responsibilities and actions to be taken by the staff and residents in the event of a fire emergency. This plan shall be implemented during fire exit drills.

(vi) A written policy regarding tobacco smoking in the facility shall be established and enforced.

(vii) Portable fire extinguishers shall be installed at the facility. Use NFPA 10, *Portable Fire Extinguishers,* as guidance in selection and location requirements of extingushers.

(viii) Requirements for fire protection equipment and systems shall be in accordance with NFPA 101. Where installed, maintenance and testing of these systems/equipment shall include the following:

(A) The fire alarm system shall be test operated at least semi-annually.

(B) All smoke detectors shall be test operated, by activation of the smoke detector, at least semi-annually.

(C) The monthly and annual inspections and the maintenance of the extinguishers shall be in accordance with NFPA 10.

(D) All fire protection systems and equipment, such as the fire alarm system, smoke detectors, and portable extinguishers, shall be inspected, tested and maintained in accordance with the applicable NFPA fire codes and the results documented.

(ix) An annual fire and safety inspection shall be conducted at the halfway house or residential facility by qualified Veterans Administration personnel. If a review of past Veterans Administration inspections or inspections made by the local authorities indicates that a fire and safety inspection would not be necessary, then the visit to the facility may be waived.

(2) Be in compliance with existing standards of State safety codes and local, and/or State health and sanitation codes.

(3) Be licensed under State or local authority.

(4) Where applicable, be accredited by the State.

(5) Comply with the requirements of the "Confidentiality of Alcohol and Drug Abuse Patient Records" (42 CFR Part II) and the "Confidentiality of Certain Medical Records" (38 U.S.C. 4132), which shall be part of the contract.

(6) Demonstrate an existing capability to furnish the following:

(i) A supervised alcohol and drug free environment, including active affiliation with Alcoholics Anonymous (AA) programs.

(ii) Staff sufficient in numbers and position qualifications to carry out the policies, responsibilities, and programs of the facility.

(iii) Board and room.

(iv) Laundry facilities for residents to do their own laundry.

(v) Structured activities.

(vi) Appropriate group activities, including physical activities.

(vii) Health and personal hygiene maintenance.

(viii) Monitoring administration of medications.

(ix) Supportive social service.

(x) Individual counseling as appropriate.

(xi) Opportunities for learning/development of skills and habits which will enable Veterans Administration sponsored residents to adjust to and maintain freedom from dependence on or involvement with alcohol or drug abuse or dependence during or subsequent to leaving the facility.

(xii) Support for the individual desire for sobriety (alcohol/drug abuse-free life style).

(xiii) Opportunities for learning, testing, and internalizing knowledge of illness/recovery process, and for upgrading skills and improving personal relationships.

(7) Data normally maintained and included in a medical record as a function of compliance with State or community licensing standards will be accessible.

(b) Representatives of the Veterans Administration will inspect the facility prior to award of a contract to assure that prescribed requirements can be met. Inspections may also be carried out at such other times as deemed necessary by the Veterans Administration.

(c) All requirements in this rule, and Veterans Administration reports of inspection of residential facilities furnishing treatment and rehabilitation services to eligible veterans shall to the extent possible, be made available to all government agencies charged with the responsibility of licensing or otherwise regulating or inspecting such institutions.

(d) An individual case record will be created for each client which shall be maintained in security and confidence as required by the "Confidentiality of Alcohol and Drug Abuse Patient Records" (42 CFR Part 2) and the "Confidentiality of Certain Medical Records" (38 U.S.C. 4132), and will be made available on a need to know basis to appropriate Veterans Administration staff members involved with the treatment program of the veterans concerned.

(e) Contractors under this section shall provide reports of budget and case load experience upon request from a

Veterans Administration official. (Pub. L. 96–22, 38 U.S.C. 620A)

§ 17.53c Contracts for outpatient services for veterans with alcohol or drug dependence or abuse disabilities.

(a) Contracts for treatment services authorized under § 17.53a may be awarded in accordance with applicable Veterans Administration and Federal procurement procedures. Such contracts will be awarded only after the quality and effectiveness, including adequate protection for the safety of the participants of the contractor's program, has been determined and then only to contractors determined by the Chief Medical Director or designee to be fully capable of meeting the following standards:

(1) The following minimum fire safety requirements must be met:

(i) The building must meet the requirements of the applicable business occupancy chapters and the general requirement chapters (1–7, 31) of the Life Safety Code (NFPA 101) published by the National Fire Protection Association (NFPA), Batterymarch Park, Quincy, Massachusetts 02269, 1981 edition. The 1981 edition of the Life Safety Code (NFPA 101) is hereby incorporated by reference into this section as though set forth in full herein. This code is available for inspection at the Office of the Federal Register, 1100 L Street, NW., Washington, D.C. 20408. Any equivalencies or variances to Veterans Administration requirements must be approved by the Director, Facility Engineering, Planning, and Construction Office, Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, D.C. 20420.

(ii) Where applicable, the facility must have a current occupancy permit issued by the local and state governments in the jurisdiction where the home is located.

(iii) All Veterans Administration sponsored patients will be mentally and physically capable of leaving the building, unaided, in the event of an emergency.

(iv) Fire exit drills must be held at least quarterly. A written plan for evacuation in the event of fire shall be developed and reviewed annually. The plan shall outline the duties, responsibilities and actions to be taken by the staff in the event of a fire emergency. This plan shall be implemented during fire exit drills.

(v) Portable fire extinguishers shall be installed at the facility. Use NFPA 10, *Portable Fire Extinguishers*, as guidance in selection and location requirements of extinguishers.

(vi) Requirements for fire protection equipment and systems shall be in accordance with NFPA 101. Where installed, maintenance and testing of these systems/equipment shall include the following:

(A) The fire alarm system shall be test operated at least semi-annually.

(B) All smoke detectors shall be test operated, by activation of the smoke detector, at least sem-annually.

(C) The monthly and annual inspections and the maintenance of the extinguishers shall be in accordance with NFPA 10.

(D) All fire protection systems and equipment, such as the fire alarm system, smoke detectors, and portable extinguishers, shall be inspected, tested and maintained in accordance with the applicable NFPA fire codes and the results documented.

(vii) An annual fire and safety inspection shall be conducted at the facility by qualified Veterans Administration personnel. If a review of past Veterans Administration inspections or inspections made by the local authorities indicates that a fire and safety inspection would not be necessary, then the visit to the facility may be waived.

(2) Conform to existing standards of State safety codes and local and/or State health and sanitation codes.

(3) Be licensed under State or local authority.

(4) Where applicable, be accredited by the State.

(5) Comply with the requirements of the "Confidentiality of Alcohol and Drug Abuse Patient Records" (42 CFR Part 2) and the "Confidentiality of Certain Medical Records" (38 U.S.C. 4132), which shall be part of the contract.

(6) Demonstrate an existing capability to furnish the following:

(i) A supervised, alcohol and drug free environment, including active affiliation with Alcoholics Anonymous (AA) programs.

(ii) Staff sufficient in numbers and position qualifications to carry out the policies, responsibilities, and programs of the facility.

(iii) Structured activities.

(iv) Appropriate group activities.

(v) Monitoring medications.

(vi) Supportive social service.

(vii) Individual counseling as appropriate.

(viii) Opportunities for learning/development of skills and habits which will enable Veterans Administration sponsored residents to adjust to and maintain freedom from dependence on or involvement with alcohol or drug abuse or dependence during or subsequent to leaving the facility.

(ix) Support for the individual desire for sobriety (alcohol/drug abuse-free life style).

(x) Opportunities for learning, testing, and internalizing knowledge of illness/recovery process, and to upgrade skills and improve personal relationships.

(7) Data normally maintained and included in a medical record as a function of compliance with State or community licensing standards will be accessible.

(b) Representatives of the Veterans Administration will inspect the facility prior to award of a contract to assure that prescribed requirements can be met. Inspections may also be carried out at such other times as deemed necessary by the Veterans Administration.

(c) All requirements in this rule and Veterans Administration reports of inspection of residential facilities furnishing treatment and rehabilitation services to eligible veterans shall, to the extent possible, be made available to all government agencies charged with the responsibility of licensing or otherwise regulating or inspecting such institutions.

(d) An individual case record will be created for each client which shall be maintained in security and confidence as required by the "Confidentiality of Alcohol and Drug Abuse Patient Records" (42 CFR Part 2) and the "Confidentiality of Certain Medical Records" (38 U.S.C. 4132), and will be made available on a need to know basis to appropriate Veterans Administration staff members involved with the treatment program of the veterans concerned. (Pub. L. 96–22, 38 U.S.C. 620A)

§ 17.53d Limitations on payment for alcohol and drug dependence or abuse treatment and rehabilitation.

The authority to enter into contracts shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation acts, and payments shall not exceed these amounts. (Pub. L. 96–22, 38 U.S.C. 620A)

§ 17.960 [Removed]

2. 38 CFR Part 17 is amended by removing § 17.960 in its entirety.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 204, 205 and 211

[N-FRL 2202-1]

Noise Emission Standards for Portable Air Compressors, Medium and Heavy Trucks, Motorcycles and Motorcycle Replacement Exhaust Systems, Truck Mounted Solid Waste Compactors, and Noise Labeling Requirements for Hearing Protectors; Final Rule; Revocation of Product Verification Testing, Reporting and Recordkeeping Requirements

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency hereby revokes product verification testing and the attendant reporting and recordkeeping requirements for:

(1) Noise Emission Standards for Portable Air Compressors;

(2) Noise Emission Standards for Medium and Heavy Trucks;

(3) Noise Labeling Requirements for Hearing Protectors.

(4) Noise Emission Standards for Truck Mounted Solid Waste Compactors;

(5) Noise Emission Standards for Motorcycles and Motorcycle Replacement Exhaust Systems;

This action stems from the Administrations budget for fiscal year 1982 which did not contain funding for the Noise Enforcement Division to accept or act on the product verification reports after fiscal year 1981. Also, based on the comments received, EPA is revoking the production verification testing provisions.

EFFECTIVE DATE: January 27, 1983.

FOR FURTHER INFORMATION CONTACT: Louise Giersch, (202) 382-2935

SUPPLEMENTARY INFORMATION: EPA promulgated noise regulations which established noise emission standards or labeling requirements for the following:

1. Portable Air Compressors, 40 CFR 204.50 *et seq.*, January 14, 1976 (41 FR 2162)

2. Medium and Heavy Trucks, 40 CFR 205.50 *et seq.*, April 13, 1976 (41 FR 15538)

3. Noise Labeling Requirements for Hearing Protectors, 40 CFR 211.203 *et seq.*, September 27, 1980 (44 FR 56130)

4. Truck Mounted Solid Waste Compactors, 40 CFR 205.200 *et seq.*, October 1, 1980 (44 FR 56526)

5. Motorcycles and Motorcycle Replacement Exhaust Systems, 40 CFR 205.150 *et seq.*, and 205.165 *et seq.*, December 31, 1980 (45 FR 86694).

Each of the noise regulations, listed above, imposes certain recordkeeping and reporting requirements on manufactuers of the regulated products. Contained within these regulations there are specific provisions for (1) Production Verification Testing, (2) Testing by the Administrator, and (3) Selective Enforcement Auditing. The provisions encompassing "Production Verification (PV) Testing" describe highly structured requirements to test products on an annual basis for their compliance with applicable noise emission standards in accordance with certain specified procedures. Provisions authorizing "Testing by the Administrator" describe the discretionary basis upon which the Administrator may require the testing of products to determine compliance with applicable noise emission standards as well as to determine the appropriateness of a manufacturer's test facility to conduct such product testing. The provisions related to "Selective Enforcement Auditing" (SEA) authorize the Administrator, on a discretionary basis, to require manufacturers to conduct assembly-line testing of products upon formal request. The latter two provisions apply only when an issue arises concerning product compliance with the applicable noise emission standard, while the former (PV Testing) provisions are required to be met on an annual basis.

Among these provisions there are various recordkeeping and reporting requirements, including the development and submission of PV testing reports and retention of test data supporting such reports.

On August 14, 1981, EPA suspended enforcement of reporting and recordkeeping requirements (46 FR 41057) and simultaneously proposed revocation of the reporting and recordkeeping provisions for each of these regulations (46 FR 41104). The action stemmed from that portion of the Administration's budget for Fiscal Year 1982, subsequently enacted by Congress, which did not contain funding for the Noise Enforcement Division to accept or act on the product verification reports after fiscal year 1981.

A 30 day comment period was established to allow interested parties to comment on the notice of proposed rulemaking. Fourteen written comments were received.

For the reasons discussed in the proposal and summarized below, this final action revokes the reporting and recordkeeping requirements, as proposed. Additionally, in response to the comments received, EPA is revoking the production verification testing provisions of these regulations.

1. Public Comments

Of the fourteen written comments received, seven were from six different manufacturers, three from trade associations, two from State agencies, one from a public interest legal foundation and one from a private citizen.

Four manufacturers commented on the substance of the proposed action and voiced their support. Two of the four also recommended revocation of the product verification and selective enforcement audit requirements to give them additional flexibility to comply with applicable Federal noise emission standards. Other comments by the manufacturers were on miscellaneous information and/or typographical errors.

The three trade associations supported the proposed action, but also requested that additional steps be taken to reduce regulatory burdens on industry. One association suggested the elimination of product verification and selective enforcement audit provisions to allow manufacturers additional flexibility to comply with applicable Federal standards.

One State agency supported the proposed action, while the other stated that if EPA did not intend to enforce its regulations, they should be recinded. The notice of proposed rulemaking announced that EPA was considering the revocation of reporting and recordkeeping provisions of its noise emission regulations. EPA retains the statutory and regulatory tools to enforce its noise emission regulations both under the Agency's general authority in Section 13 of the Noise Control Act and under selective enforcement auditing and testing by the Administrator provisions within the regulations. EPA intends to use these tools as appropriate.

The public interest legal foundation supported the proposed action and also suggested elimination of product verification, selective enforcement auditing, and testing by the Administrator provisions of the regulations.

The private citizen provided general comments on noise produced by trucks and motorcycles.

2. Agency Action

EPA has considered current and proposed future Agency resources, the President's policy to reduce the burdens of federal regulation, and public comments where appropriate and has decided to revoke the reporting and

recordkeeping requirements as proposed. Additionally, EPA has considered carefully the comments requesting that the Agency revoke additional regulatory provisions. In light of those comments, EPA is revoking the product verification testing requirements; as discussed below, it does not appear that this burden is necessary in view of the rescission of reporting and recordkeeping requirements.

With elimination of the reporting and recordkeeping requirements, the regulations become in part self-enforcing, since manufacturers no longer report their compliance efforts. Elimination of product verification is consistent with these changes, since without active monitoring by EPA of pre-production compliance, there is no reason to bind manufacturers to a formal program. This action will allow regulated manufacturers to structure their own testing programs to assure their products will meet applicable standards. However, the manufacturers must still comply with applicable standards, and must label each product and warrant that they conform to those standards. Moreover, EPA retains the right to require manufacturers to conduct noise tests, where warranted by the circumstances, both under the regulatory provisions discussed below and under the Agency's general authority in Section 13 of the Noise Control Act.

EPA has decided to retain the selective enforcement auditing and testing by the Administrator provisions in their present form. EPA believes these provisions are both necessary and adequate to determine whether a product or a manufacturer's test facility conforms to applicable specifications and/or standards. Without such provisions, there would be no federal mechanism by which questionable products could be adequately tested for compliance. In instances where there is reason to believe non-complying products have been introduced into commerce, the Administrator could require manufacturers to verify that products are meeting standards. For purposes of such verification, the Administrator could require the manufacturer to perform a selective enforcement audit of production models of the products in question and/or review the manufacturer's files for those products. Additionally, manufacturers remain subject to various penalties and administrative actions where noncomplying products have been distributed.

Retaining these provisions should not burden the regulated manufacturers. Both the selective enforcement auditing and testing by the Administrator provisions are discretionary. Unlike product verification, recordkeeping, and reporting requirements, they do not require manufacturers to take actions or expend resources except where the Administrator determines the facts so warrant.

This action affects only the product verification testing and the reporting and recordkeeping requirements of the regulations. All other provisions of the existing regulations remain in effect. Regulated products remain subject to the noise emission standards, labeling, and warranty requirements of the regulations. Moreover, although EPA will not directly monitor compliance with these regulations, states, localities and individuals can still initiate actions under Section 12 of the Noise Control Act [42 U.S.C. 4911] which provides for citizens' suits to enforce noise control standards. States and localities can also continue to exercise their powers to establish in-use controls for federally regulated products, as provided in Section 6(e) of the Act.

3. Regulatory Review

EPA has determined that this final rulemaking is not a major rule under Executive Order 12291, and therefore does not require a Regulatory Impact Analysis. EPA does not anticipate any significant adverse effects on competition, employment, investment, productivity, or innovation in the regulated industries. This action will result in a significant reduction in mandatory testing, reporting and recordkeeping burdens for the regulated industries and is directly translated into cost savings to those industries.

This regulation was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

Under the provisions of the Regulatory Flexibility Act, 5 U.S.C. Section 601 *et seq.*, I hereby certify that this final action will not have a significant economic impact on a substantial number of small entities. The final rule affects only the product verification testing and attendant recordkeeping and reporting requirements of the regulation; other portions of the regulations are unchanged. Reduced testing, reporting and recordkeeping will ease the economic burdens of the affected manufacturers and should cause no adverse economic effects.

Lists of subjects

40 CFR Part 204

Construction industry, Noise control, Reporting requirements..

40 CFR Part 205

Labeling, Motor vehicles, Noise control, Reporting requirements.

40 CFR Part 211

Labeling, Noise control.

4. Authority

This action is being taken under the authority of Sections 6, 10, and 13 of the Noise Control Act of 1972, as amended by the Quiet Communities Act of 1978, 42 U.S.C. 4905, 4909, and 4912.

Dated: November 22, 1982.

Anne M. Gorsuch,

Administrator.

For the reasons set out in the preamble, 40 CFR Part 204 is revised and Parts 205 and 211 are amended.

Portable Air Compressors

1. The table of contents for Part 204 is revised to read as follows:

PART 204—NOISE EMISSION STANDARDS FOR CONSTRUCTION EQUIPMENT

Subpart A—General Provisions

Sec.
204.1 General applicability.
204.2 Definitions.
204.3 Number and gender.
204.4 Inspection and monitoring.
204.5 Exemptions.
204.5–1 Testing exemption.
204.5–2 National security exemptions.
204.5–3 Export exemptions.

Subpart B—Portable Air Compressors

204.50 Applicability.
204.51 Definitions.
204.52 Portable air compressor noise emission standards.
204.54 Test procedures.
204.55 Requirements.
204.55–1 General requirements.
204.55–2 Compliance with Standards.
204.55–3 Labeling.
204.56 Testing by the Administrator.
204.57 Selective enforcement auditing.
204.57–1 Test request.
204.57–2 Test compressor sample selection.
204.57–3 Test compressor preparation.
204.57–4 Testing.
204.57–5 Reporting of test results.
204.57–6 Acceptance and rejection of batches.
204.57–7 Acceptance and rejection of batch sequence.
204.57–8 Continued testing.
204.57–9 Prohibition of distribution in commerce; manufacturer's remedy.
204.58 In-use requirements.
204.58–1 Warranty.

Sec.
204.58–2 Tampering.
204.58–3 Instructions for maintenance, use, and repair.
204.59 Recall of noncomplying compressors.
Authority: (42 U.S.C. 4905), 86 Stat. 1237.

§ 204.2 [Amended]

2. In § 204.2, paragraph (a) (6), is removed.

3. In § 204.4, paragraph (a) is revised to read as follows:

§ 204.4 Inspection and monitoring.

(a) Any inspection or monitoring activities conducted under this section shall be for the purpose of determining (1) whether test products are being selected and prepared for testing in accordance with the provisions of these regulations, (2) whether test product testing is being conducted in accordance with these regulations, and (3) whether products being produced for distribution into commerce comply with these regulations.

* * * * *

4. In § 204.4, paragraph (b)(2), add the word "and" to the end of the statement.

5. In § 204.4, paragraph (b)(3), remove the word "and" at the end of the statement.

6. In § 204.4, paragraph (b)(4) is removed.

7. In § 204.4, paragraph (c)(1)(iii) is removed.

8. In § 204.4, paragraph (d)(3) is revised to read as follows:

* * * * *

(d) * * *

(3) Where facilities or areas other than those covered by paragraph (d)(2) of this section are concerned, "operating hours" shall mean all times during which product manufacture or assembly is in operation or all times during which product testing or maintenance, production, or compilation of records is taking place, or any other procedure or activity related to selective enforcement audit testing or to product manufacture or assembly is being carried out.

* * * * *

§ 204.5–1 [Removed]

9. Section 204.5–1 is removed.

10. Section 204.5–2 is redesignated § 204.5–1 and is revised to read as follows:

§ 204.5–1 Testing exemption.

(a) A new product intended to be used solely for research, investigations, studies, demonstrations or training, and so labeled or marked on the outside of the container and on the product itself, shall be exempt from the prohibitions of Sections 10(a)(1), (2), (3), and (5) of the Act.

(b) No request for a testing exemption is required.

(c) For purposes of Section 11(d) of the Act any testing exemption shall be void ab initio with respect to each new product, originally intended for research, investigations, studies, demonstrations, or training, but distributed in commerce for other uses.

§ 204.5–3 [Removed]

11. Section 204.5–3 is removed.

12. Section 204.5–4 is redesignated § 204.5–2 and is revised to read as follows:

§ 204.5–2 National security exemptions.

(a) A new product which is produced to conform with specifications developed by a national security agency, and so labeled or marked on the outside of the container and on the product itself, shall be exempt from the prohibitions of Sections 10(a) (1), (2), (3), and (4) of the Act.

(b) No request for a national security exemption is required.

(c) For purposes of Section 11(d) of the Act, any national security exemption shall be void ab initio with respect to each new product, originally intended to be produced to conform with specifications developed by a national security agency but distributed in commerce for other uses.

(d) Any manufacturer or person subject to the liabilities of section 11(a) with respect to any product originally intended for a national security agency, but distributed in commerce for use in any State, may be excluded from the application of section 11(a) with respect to such product based upon a showing that such manufacturer:

(1) Had no knowledge of such product being distributed in commerce for use in any state; and

(2) Made reasonable efforts to ensure that such products would not be distributed in commerce for use in any State. Such reasonable efforts would include investigation, prior dealings, contract provisions, etc.

§ 204.5–5 [Redesignated as § 204.5–3]

13. Section 204.5–5 is redesignated § 204.5–3.

§ 204.5–6 [Removed]

14. Section 204.5–6 is removed.

§ 204.5–7 [Removed]

15. Section 204.5–7 is removed.

§ 204.51 [Amended]

16. In § 204.51, paragraph (f) is removed.

17. In § 204.51, paragraph (w) is revised to read as follows:

* * * * *

(w) "Test Compressor" means a compressor used to demonstrate compliance with the applicable noise emissions standard.

* * * * *

§ 204.53 [Removed]

18. Section 204.53 is removed.

§ 204.54 [Amended]

19. In § 204.54, paragraph (a) is revised to read as follows:

* * * * *

(a) *General.* This section prescribes the conditions under which noise emission standard compliance Selective Enforcement Auditing or Testing by the Administrator must be conducted and the measurement procedures that must be used to measure the sound level and to calculate the average sound level of portable air compressors on which the test is conducted.

* * * * *

20. In § 204.54, paragraph (i), the last sentence is revised to read as follows:

* * * * *

(i) * * * Tests conducted by manufacturers under approved alternate procedures may be accepted by the Administrator for all purposes.

21. Section 204.55 is retitled as follows:

§ 204.55 Requirements.

§ 204.55–1 [Amended]

22. In § 204.55–1, paragraphs (a) (1) and (2) are removed; paragraphs (a) (3) and (4) are redesignated paragraphs (a) (1) and (2); and new paragraph (a)(1) is revised to read as follows:

(a) * * *

(1) Shall be labeled in accordance with the requirements of Section 204.55–4.

* * * * *

23. Section 204.55–2 is retitled as follows:

§ 204.55–2 Requirements.

24. In § 204.55–2, paragraph (a)(1) is revised to read as follows:

(a)(1) Prior to distribution in commerce, compressors of a specific configuration must verify such configurations in accordance with this subpart.

* * * * *

25. In § 204.55–2, paragraph (a)(2) is removed and reserved.

26. In § 204.55–2, paragraph (b) is revised to read as follows:

* * * * *

(b) The requirements for purposes of Testing by the Administrator and Selective Enforcement Auditing consist of:

(1) Testing in accordance with § 204.54 of a compressor selected in accordance with § 204.57–2; and

(2) Compliance of the test compressor with the applicable standards when tested in accordance with § 204.54.

* * * * *

27. In § 204.55–2, paragraph (c)(1)(iii) is revised to read as follows:

* * * * *

(c) * * *

(1) * * *

(iii) Testing in accordance with § 204.54 selected in accordance with § 204.57–2 which must be a compressor of the configuration which is identified pursuant to paragraph (c)(1)(iii) of this section as having the highest sound level (estimated or actual) within the category.

* * * * *

28. In § 204.55–2, paragraph (c)(1)(iv), remove the word "and" at the end of the statement.

29. In § 204.55–2, paragraph (c)(1)(v) is removed.

30. In § 204.55–2, paragraph (c)(2) is revised to read as follows:

* * * * *

(c) * * *

(2) Where the requirements of paragraph (c)(1) of this section are complied with, all those configurations contained within a category are considered represented by the tested compressor.

31. In § 204.55–2, paragraph (c)(3) is revised to read as follows:

* * * * *

(c) * * *

(3) Where the manufacturer tests a compressor configuration which has not been determined as having the highest sound level of a category, but all other requirements of paragraph (c)(1) of this section are complied with, all those configurations contained within that category which are determined to have sound levels no greater than the tested compressor are considered to be represented by the tested compressor: however, a manufacturer must for purposes of Testing by the Administrator and Selective Enforcement Auditing verify according to the requirements of paragraph (b)(1) and/or (c)(1) of this section any configurations in the subject category which have a higher sound level than the compressor configuration tested.

* * * * *

32. In § 204.55–2, paragraph (d) is revised to read as follows:

* * * * *

(d) A manufacturer may elect for purposes of Testing by the Administrator and Selective Enforcement Auditing to use representative testing, pursuant to paragraph (c) of this section, all or part of his product line.

* * * * *

33. In § 204.55–2, paragraph (e)(1) and (2) are revised to read as follows:

* * * * *

(e)* * *

(1) In the case of representative testing, a new test compressor from another configuration must be selected according to the requirements of paragraph (c) of this section in order to verify the configurations represented by the non-compliant compressor.

(2) Modify the test compressor and demonstrate by testing that it meets applicable standards. The manufacturer must modify all production compressors of the same configuration in the same manner as the test compressor before distribution into commerce.

34. In § 204.55–2, paragraph (f) is removed.

§§ 204.55–4 through 204.55–7 [Removed]

35. Sections 204.55–4 through 204.55–7 are removed.

§ 204.55–8 [Redesignated as § 204.55–4]

36. Section 204.55–8 is redesignated § 204.55–4.

§§ 204.55–9 through 204.55–11 [Removed].

37. Sections 204.55–9 through 204.55–11 are removed.

38. Section 204.57–3 is revised to read as follows:

§ 204.57–3 Test compressor preparation.

(a) Prior to the official test, the test compressor selected in accordance with § 204.57–2 shall not be prepared, tested, modified, adjusted, or maintained in any manner unless such adjustments, preparations, modifications and/or tests are part of the manufacturer's prescribed manufacturing and inspection procedures and are documented in the manufacturer's internal compressor assembly and inspection procedures or unless such adjustments and/or tests are required or permitted under this subpart or are approved in advance by the Administrator. The manufacturer may perform adjustments, preparations, modifications and/or tests normally performed by a dealer to prepare the compressor for delivery to a customer or the adjustments, preparations, modifications and/or tests normally performed at the port-of-entry by the manufacturer to prepare the compressor for delivery to a dealer or customer.

(b) Equipment of fixtures necessary to conduct the test may be installed on the compressor: *Provided*, That such equipment of fixtures shall have no effect on the noise emissions of the compressor, as determined by the appropriate measurement methodology.

(c) In the event of compressor manfunction (i.e., failure to start, misfiring cylinder, etc.), the manufacturer may perform the maintenance necessary to enable the compressor to operate in a normal manner.

(d) No quality control, testing, assembly, or selection procedures shall be used on the completed test compressor or any portion thereof, including parts and subassemblies, that will not normally be used during the production and assembly of all other compressors of that category which will be distributed in commerce, unless such procedures are required or permitted under this subpart or are approved in advance by the Administrator.

39. In § 204.57–9, paragraph (a)(1) is revised to read as follows:

§ 204.57–9 Prohibition of distribution in commerce; manufacturer's remedy.

(a) * * *

(1) Submit a written report to the Administrator which identifies the reason for the noncompliance of the compressors, describes the problem, and describes the proposed quality control and/or quality assurance remedies to be taken by the manufacturer to correct the problem or follows the requirements for an engineering change. Such requirements include the following:

(i) Any change to a configuration with respect to any of the parameters stated in § 204.55–3 shall constitute the addition of a new and separate configuration or category to the manufacturer's product line.

(ii) When a manufacturer introduces a new category or configuration to his product line, he shall proceed in accordance with §204.55–2.

(iii) If the configuration to be added can be grouped within a verified category and the new configuration is estimated to have a lower sound level than a previously verified configuration with the same category, the configuration shall be considered verified.

* * * * *

§ 204.57–1 [Amended]

40–41. In § 204.57–1, paragraph (b) is removed and reserved.

§ 204.58–1 [Amended]

42. In § 204.58–1, paragraph (a) is revised to read as follows:

(a) The portable air compressor manufacturer shall include in the

owner's manual or in other information supplied to the ultimate purchaser, the following statement.

43. In § 204.58–1, paragraphs (b), (c), and (d) are removed:

§ 204.58–2 [Amended]

44. In § 204.58–2, paragraph (a) is revised; paragraphs (b), (c), and (g) are removed; paragraphs (d) and (e) are revised; and paragraphs (d), (e), and (f) are redesignated paragraphs (b), (c), and (d) respectively.

The amended § 204.58–2 reads as follows:

§ 204.58–2 Tampering.

(a) For each configuration of air compressors covered by this part, the manufacturer shall develop a list of those acts which, in his judgment, might be done to the air compressor in use and which would constitute the removal or rendering inoperative of noise control devices or elements of design of the compressor.

(b) The manufacturer shall include in the owner's manual the following information:

(1) The statement:

Tampering With Noise Control System Prohibited

Federal law prohibits the following acts or the causing thereof:

(1) The removal or rendering inoperative by any persons, other than for purposes of maintenance, repair, or replacement, of any devices or element of design incorporated into any new compressor for the purpose of noise control prior to its sale or delivery to the ultimate purchaser or while it is in use; or (2) the use of the compressor after such device or element of design has been removed or rendered inoperative by any person.

(2) The statement:

Among those acts included in the prohibition against tampering are the acts listed below.

Immediately following this statement, the manufacturer shall include the list developed under paragraph (a) of this section.

(c) Any act included in the list prepared pursuant to paragraph (a) of this section is presumed to constitute tampering; however, in any case in which a proscribed act has been committed and it can be shown that such act resulted in no increase in the sound level of the compressor or that the compressor still meets the noise emission standard of § 204.52, such set will not constitute tampering.

§ 204.58–3 [Amended]

45. In § 204.58–3, paragraphs (c), (d), and (e) are removed.

Medium and Heavy Trucks

PART 205—TRANSPORTATION EQUIPMENT NOISE EMISSION CONTROLS

1. The table of contents for Part 205, Subparts A and B, are revised to read as follows:

Subpart A—General Provisions

Sec.
205.1 General applicability.
205.2 Definitions.
205.3 Number and gender.
205.4 Inspection and Monitoring.
205.5 Exemptions.
205.5–1 Testing exemption.
205.5–2 National security exemptions.
205.5–3 Export exemptions.

Subpart B—Medium and Heavy Trucks

205.50 Applicability.
205.51 Definitions.
205.52 Vehicle noise emission standards.
205.54 Test procedures.
205.54–1 Low speed sound emission test procedures.
205.54–2 Sound data acquisition system.
205.55 Requirements.
205.55–1 General requirements.
205.55–2 Compliance with standards.
205.55–3 Configuration identification.
205.55–4 Labeling-compliance.
205.55–5 Labeling-exterior.
205.55–6 Labeling.
205.56 Testing by the administrator.
205.57 Selective enforcement auditing requirements.
205.57–1 Test request.
205.57–2 Test vehicle sample selection.
205.57–3 Test vehicle preparation.
205.57–4 Testing procedures.
205.57–5 Reporting of the test results.
205.57–6 Acceptance and rejection of batches.
205.57–7 Acceptance and rejection of batch sequence.
205.57–8 Continued testing.
205.57–9 Prohibition on distribution in commerce; manufacturer's remedy.
205.58 In-use requirements.
205.58–1 Warranty.
205.58–2 Tampering.
205.58–3 Instruction for maintenance, use and repair.
205.59 Recall of noncomplying vehicles.
Appendix I

Authority: Sec. b, 10, 11, 13, Pub. L. 92–574, 86 Stat 1234 (42 U.S.C. 4905, 4909, 4910, 4912).

§ 205.2 [Amended]

2. In § 205.2, paragraph (a)(6) is removed.

§ 205.4 [Amended]

3. In § 205.4, paragraph (a) is revised to read as follows:

(a) Any inspection or monitoring activities conducted under this section shall be for the purpose of determining (1) whether test products are being selected and prepared for testing in accordance with the provisions of these regulations, (2) whether test product testing is being conducted in accordance with these regulations, and (3) whether products being produced for distribution into commerce comply with these regulations.

* * * * *

4. In § 205.4, paragraph (b)(2) add the word "and" at the end of the statement.

5. In § 205.4, paragraph (b)(3) remove the word "and" and the end of the statement.

6. In § 205.4, paragraph (b)(4) is removed.

7. In § 205.4, paragraph (c)(1)(iii) is removed, and paragraph (c)(1)(iv) is redesignated as paragraph (c)(1)(iii). Paragraph (c)(1)(iv) is reserved.

8. In § 205.4, paragraph (d)(3) is revised to read as follows:

* * * * *

(d) * * *

(3) Where facilities or areas other than those covered by paragraph (d)(2) of this section are concerned, "operating hours" shall mean all times during which product manufacture or assembly is in operation or all times during which product testing and maintenance is taking place and/or production or compilation of records is taking place, or any other procedure or activity related to selective enforcement audit testing or product manufacture or assembly being carried out in a facility.

§ 205.5–1 [Removed]

9. Section 205.5–1 is removed.

§ 205.5–2 [Redesignated as § 205.5–1]

10. Section 205.5–2 is redesignated § 205.5–1 and revised to read as follows:

§ 205.5–1 Testing exemption.

(a) A new product intended to be used solely for research, investigations, studies, demonstrations or training, and so labeled or marked on the outside of the container and on the product itself, shall be exempt from the prohibitions of section 10(a) (1), (2), (3), and (5) of the Act.

(b) No request for a testing exemption is required.

(c) For purposes of section 11(d) of the Act, any testing exemption shall be void ab initio with respect to each new product, originally intended for research, investigations, studies, demonstrations, or training, but distributed in commerce for other uses.

§ 205.5–3 [Removed]

11. Section 205.5–3 is removed.

§ 205.5–4 [Redesignated as § 205.5–2]

12. Section 205.5–4 is redesignated § 205.5–2 and revised to read as follows:

§ 205.5–2 National security exemptions.

(a) A new product which is produced to conform with specifications developed by a national security agency, and so labeled or marked on the outside of the container and on the product itself, shall be exempt from the prohibitions of section 10(a) (1), (2), (3), and (5) of the Act.

(b) No request for a national security exemption is required.

(c) For purposes of section 11(d) of the Act, any national security exemption shall be void ab initio with respect to each new product, originally intended to be produced to conform with specifications developed by a national security agency, but distributed in commerce for other uses.

(d) Any manufacturer or person subject to the liabilities of section 11(a) with respect to any product originally intended for a national security agency, but distributed in commerce for use in any State, may be excluded from the application of section 11(a) with respect to such product based upon a showing that such manufacturer:

(1) Had no knowledge of such product being distributed in commerce for use in any state; and

(2) Made reasonable effort to ensure that such products would not be distributed in commerce for use in any State. Such reasonable efforts would include investigation, prior dealings, contract provisions, etc.

§ 205.5–5 [Redesignated as § 205.5–3]

13. Section 205.5–5 is redesignated § 205.5–3.

§ 205.5–6 [Removed]

14. Section 205.5–6 is removed.

§ 205.5–7 [Removed]

15. Section 205.5–7 is removed.

§ 205.51 [Amended]

16. In § 205.51, paragraph (a)(20) is removed and reserved.

17. In § 205.51, paragraph (a)(28) is revised to read as follows:

(a) * * *

(28) "Test vehicle" means a vehicle selected and used to demonstrate compliance with the applicable noise emission standards.

§ 205.53 [Removed]

18. Section 205.53 is removed.

19. Section 205.54 is revised to read as follows:

§ 205.54 Test procedures.

The procedures described in this and subsequent sections will be the test program to determine the conformity of vehicles with the standards set forth in § 205.52 for the purposes of Selective Enforcement Auditing and Testing by the Administrator.

§ 205.54–2 [Amended]

20. In § 205.54–2, paragraph (b), the last sentence is removed.

21. Section 205.55 is retitled as follows:

§ 205.55 Requirements.

§ 205.55–1 [Amended]

22. In § 205.55–1, paragraph (a)(1) and (2) are removed; paragraphs (a) (3) and (4) are redesignated paragraphs (a) (1) and (2); and new paragraph, (a) (1) is revised to read as follows:

(a) * * *

(1) Shall be labeled in accordance with the requirements of § 205.55–5 of this subpart.

23. In § 205.55–1, paragraph (c) is revised to read as follows:

* * * * *

(c) Subsequent manufacturers of a new product which conforms to the definition of vehicle in these regulations when received by them from a prior manufacturer, need not fulfill the requirements of paragraph (a)(1) where such requirements have already been complied with by a prior manufacturer.

24. Section 205.55–2, is retitled to read as follows:

§ 205.55–2 Compliance with standards.

* * * * * *

25. In § 205.55–2, paragraph (a)(1) is revised to read as follows:

(a) (1) Prior to distribution in commerce of vehicles of a specific configuration, the first manufactures of such vehicles must verify such configurations in accordance with the requirements of this subpart.

* * * * *

26. In § 205.55–2, paragraph (a)(2) is removed and reserved.

27. In § 205.55–2, paragraph (b) is revised to read as follows:

* * * * *

(b) The requirements for purposes of testing by the Administrator and selective enforcement auditing with regard to each vehicle configuration consist of:

(1) Testing in accordance with § 205.54 of a vehicle selected in accordance with § 205.57–2, and

(2) Compliance of the test vehicle with the applicable standard when tested in accordance with § 205.54.

28. In § 205.55–2, paragraph (c)(1)(iii) is revised to read as follows:

* * * * *

(c) * * *

(1) * * *

(iii) Testing in accordance with § 205.54 of a vehicle selected in accordance with § 205.57–2 which must be a vehicle of the configuration which is identified pursuant to paragraph (c)(ii) of this paragraph as having the highest sound pressure level (estimated or actual) within the category.

* * * * *

29. In § 205.55–2, paragraph (c)(1)(iii) add "and" at the end of the statement.

30. In § 205.55–2, paragraph (c)(1)(iv) remove "and" at the end of the statement.

31. In § 205.55–2, paragraph (c)(1)(v) is removed.

32. In § 205.55–2, paragraph (c)(2) is revised to read as follows:

* * * * *

(c) * * *

(2) Where the requirements of paragraph (c)(1) are complied with, all those configurations contained within a category are considered represented by the tested vehicle.

* * * * *

33. In § 205.55–2, paragraph (c)(3) is revised to read as follows:

* * * * *

(c) * * *

(3) Where the manufacturer tests a vehicle configuration which has not been determined as having the highest sound pressure level of a category, but all other requirements of paragraph (c)(1) of this section are complied with all those configurations contained with that category which are determined to have sound pressure levels no greater than the tested vehicle are considered to be represented by the tested vehicle, however, a manufacturer must for purposes of Testing by the Administrator and Selective Enforcement Auditing verify according to the requirements of (b)(1) and/or (c)(1) of this section any configurations in the subject category which have a higher sound pressure level than the vehicle configuration tested.

* * * * *

34. In § 205.55–2, paragraph (d) is removed.

35. In § 205.55–2, paragraphs (e)(1) and (e)(2) are revised to read as follows:

* * * * *

(e) * * *

(1) In the case of representative testing a new test vehicle from another configuration must be selected according to the requirements of paragraph (c) of this section, in order to verify the configurations represented by the non-compliant vehicle.

(2) Modify the test vehicle and demonstrate by testing that it meets applicable standards. The manufacturer must modify all production vehicles of the same configuration in the same

manner as the test vehicle before distribution into commerce.

36. In § 205.55–2, paragraph (f) is removed.

§§ 205.55–4 through 205.55–10 [Removed]

37. Sections 205.55–4 through 205.55–10 are removed.

§ 205.55–11 [Redesignated as § 205.55–4]

38. Section 205.55–11 is redesignated § 205–55–4.

§ 205.55–12 [Redesignated as § 205.55–5]

39. Section 205.55–12 is redesignated § 205.55–5.

§ 205.56 [Amended]

40. In §205.56 remove and reserve subparagraph (c)(1)(i) and remove (c)(1)(v).

§ 205.56 [Amended]

41. In § 205.56 remove the word "; and" at the end of paragraph (c)(1)(iv).

42. In § 205.57–2, paragraph (a) is revised to read as follows:

§ 205.57–2 Test vehicle sample selection

(a) Vehicles comprising the batch sample which are required to be tested pursuant to a test request in accordance with this subpart will be selected in the manner specified in the test request from a batch of vehicles of the category or configuration specified in the test request. If the test request specifies that the vehicles comprising the batch sample must be selected randomly, the random selection will be achieved by sequentially numbering all of the vehicles in the batch and then using a table of random numbers to select the number of vehicles as specified in (c) of this section based on the batch size designated by the Administrator in the test request. An alternative random selection plan may be used by a manufacturer: *Provided,* That such a plan is approved by the Administrator. If the test request does not specify that test vehicles must be randomly selected, the manufacturer shall select test vehicles consecutively.

(1) Should a situation arise in which the configuration to be tested consists of only vehicles with automatic transmissions, they shall be tested in accordance with § 205.54–1(c)(2).

(2) If the configuration to be tested consists of both automatic transmission and standard transmission vehicles, the test vehicle shall be a standard transmission vehicle unless the manufacturer has reason to believe that the automatic transmission vehicle emits a greater sound level.

* * * * *

43. Section 205.57–3 is revised to read as follows:

§ 205.57–3 Test vehicle preparation.

(a) Prior to the official test, the test vehicle selected in accordance with § 205–57–2 shall not be prepared, tested, modified, adjusted, or maintained in any manner unless such adjustments, preparation, modification and/or tests are part of the manufacturer's prescribed manufacturing and inspection procedures, and are documented in the manufacturer's internal vehicle assembly and inspection procedures or unless such adjustments and/or tests are required or permitted under this subpart or are approved in advance by the Administrator. The manufacturer may perform adjustments, preparations, modification and/or tests normally performed at the port of entry by the manufacturer to prepare the vehicle for delivery to a dealer or customer.

(b) Equipment or fixtures necessary to conduct the test may be installed on the vehicle: *Provided,* That such equipment or fixtures shall have no effect on the noise emissions of the vehicle, as determined by measurement methodology.

(c) In the event of vehicle malfunction (i.e., failure to start, misfiring cylinder, etc.) the manufacturer may perform the maintenance that is necessary to enable the vehicle to operate in a normal manner.

(d) No quality control, testing, assembly or selection procedures shall be used on the completed vehicle or any portion thereof, including parts and subassemblies, that will not normally be used during the production and assembly of all other vehicles of the category which will be distributed in commerce, unless such procedures are required or permitted under this subpart.

§ 205.57–9 [Amended]

44. In § 205.57–9, paragraph (a)(1) is revised to read as follows:

(a) * * *

(1) Submit a written report to the Administrator which identifies the reason for the noncompliance of the vehicles, describes the problem and describes the proposed quality control and/or quality assurance remedies to be taken by the manufacturer to correct the problem or follows the requirements for an engineering change. Such requirements include the following:

(i) Any change to a configuration with respect to any of the parameters stated in § 205.55–3 shall constitute the addition of a new and separate configuration or category to the manufacturer's product line.

(ii) When a manufacturer introduces a new category or configuration to his product line, he shall proceed in accordance with § 205.55–2.

(iii) If the configuration to be added can be grouped within a verified category and the new configuration is estimated to have a lower sound pressure level than a previously verified configuration within the same category, the configuration shall be considered verified.

* * * * *

§ 205.58–1 [Amended]

45. In § 205.58–1, paragraph (a) is revised to read as follows:

(a) The vehicle manufacturer shall include the owner's manual or in other information supplied to the ulitmate purchaser the following statement:

Noise Emissions Warranty

The manufacturer warrants to the first person who purchases this vehicle for purposes other than resale and to each subsequent purchaser that the vehicle was designed, built and equipped to conform at the time of sale to such first purchaser with all applicable U.S. EPA noise control regulations.

This warranty is not limited to any particular part, component or system of the vehicle. Defects in the design, assembly, or in any part, component, or system of the vehicle which, at the time of sale to such first purchaser, caused noise emission levels to exceed Federal standards are covered by this warranty for the life of the vehicle.

* * * * *

46. In § 205.58–1, paragraphs (b), (c), and (d) are removed.

47. In § 205.58–2, paragraph (a) is revised; paragraphs (b), (c), and (g) are removed; paragraphs (d) and (e) are revised and redesignated as paragraphs (b) and (c), respectively; paragraph (f) is redesignated as paragraph (d). The amended portions read as follows:

§ 205.58–2 Tampering.

(a) For each configuration of vehicles covered by this part, the manufacturer shall develop a list of those acts which, in his judgment, might be done to the vehicle in use and which would constitute the removal or rendering inoperative of noise control devices or elements of design of the vehicle.

(b) The manufacturer shall include in the owner's manual the following information:

(1) The statement:

Tampering With Noise Control System Prohibited

Federal law prohibits the following acts or the causing thereof:

(1) The removal or rendering inoperative by any person, other than for purposes of maintenance, repair, or replacement, of any device or element of design incorporated into any new vehicle for the purpose of noise

control prior to its sale or delivery to the ultimate purchaser or while it is in use; or (2) the use of the vehicle after such device or element of design has been removed or rendered inoperative by any person.

(2) The statement:

Among those acts presumed to constitute tampering are the acts listed below.

Immediately following this statement, the manufacturer shall include the list developed under paragraph (a) of this section.

(c) Any act included in the list prepared pursuant to paragraph (a) of this section is presumed to constitute tampering; however, in any case in which a prescribed act has been committed and it can be shown that such act resulted in no increase in the noise level of the vehicle or that the vehicle still meets the noise emission standard of § 205.52, such act will not constitute tampering.

(d) * * *

§ 205.58–3 [Amended]

48. In § 205.58–3, paragraphs (c), (d), and (e) are removed.

Product Noise Labeling

PART 211—PRODUCT NOISE LABELING

1. The table of contents for Part 211, subpart A is revised to read as follows:

Subpart A—General Provisions

Sec.
211.101 Applicability.
211.102 Definitions.
211.103 Number and gender.
211.104 Label content.
211.105 Label format.
211.106 Graphical requirements.
211.107 Label type and location.
211.108 Sample label.
211.109 Inspection and monitoring.
211.110 Exemptions.
211.110–1 Testing exemption.
211.110–2 National security exemptions.
211.110–3 Export exemptions.
211.111 Testing by the Administrator.

Authority: Sec. 8, Noise Control Act of 1972, (42 U.S.C. 4907), and other authority as specified.

§ 212.109 [Amended]

2. In § 211.09, paragraph (a)(1), is removed and paragraphs (2), (3) and (4) are redesignated paragraphs (a)(1), (2), and (3).

3. In § 211.109, paragraph (b)(4) is removed.

4. In § 211.109, paragraph (d) is revised to read as follows:

* * * * *

(d) * * *

(3) Where other facilities or areas are concerned, "operating hours" means all times during which products are being manufactured or assembled; or all times during which products are being tested or maintained; or records are being compiled; or when any other procedure or activity related to labeling, selective enforcement auditing, or product manufacture or assembly being carried out.

5. Section 211.110–1 is revised to read as follows:

§ 211.110–1 Testing exemption.

(a) A new product intended to be used solely for research, investigations, studies, demonstrations or training, and so labeled or marked on the outside of the container and on the produce itself, shall be exempt from the prohibitions of sections 10(a), (1), (2), (3), and (5) of the Act.

(b) No request for a testing exemption is required.

(c) For purposes of section 11(d) of the Act, any testing exemption shall be void ab initio with respect to each new product, originally intended for research, investigations, studies, demonstrations, or training, but distributed in commerce for other uses.

6. Section 211.110–2 is revised to read as follows:

§ 211.110–2 National security exemptions.

(a) A new product which is produced to conform with specifications developed by national security agency, and so labeled or marked on the outside of the container and on the product itself, shall be exempt from the prohibitions of sections 10(a), (1), (2), (3), and (5) of the Act.

(b) No request for a national security exemption is required.

(c) For purposes of section 11(d) of the Act, any national security exemption shall be void ab initio with respect to each new product, originally intended for a national security agency, but distributed in commerce for other uses.

§ 211.110–3 [Amended]

7. In § 211.110–3, paragraph (d) is removed.

§ 211.110–4 [Removed]

8. Section 211.110–4 is removed.

§ 211.110–5 [Removed]

9. Section 211.110–5 is removed.

§ 211.111 [Amended]

10. In § 211.111, paragraph (c)(1)(i), is removed and reserved.

Hearing Protective Devices

PART 211—PRODUCT NOISE LABELING

11. 40 CFR Part 211 is amended by revising the table of contents for Subpart B to read as follows:

Subpart B—Hearing Protective Devices

Sec.
211.201 Applicability.
211.202 Effective date.
211.203 Definitions.
211.204 Hearing protector labeling requirements.
211.204–1 Information content of primary label.
211.204–2 Primary label size, print and color.
211.204–3 Label location and type.
211.204–4 Supporting information.
211.205 Special claims.
211.206 Methods for measurement of sound attenuation.
211.206–1 Real ear method.
211.206–2 through 211.206–10 Alternative test methods [Reserved]
211.207 Computation of the noise reduction rating (NRR).
211.208 Export provisions.
211.210 Requirements.
211.210–1 General requirements.
211.210–2 Labeling requirements.
211.211 Compliance with labeling requirement.
211.212 Compliance audit testing.
211.212–1 Test request.
211.212–2 Test hearing protector selection.
211.212–3 Test hearing protector preparation.
211.212–4 Testing procedures.
211.212–5 Determination of compliance.
211.212–6 Continued compliance testing.
211.212–7 Relabeling requirements.
211.213 Remedial orders for violations of these regulations.
211.214 Removal of label.
APPENDIX A—Compliance Audit Testing Report.

Authority: Sec. 8, Pub. L. 92–574, 86 Stat. 1241 (42 U.S.C. 4907), and additional authority as specified.

12. § 211.205, the heading is revised and paragraphs (b) and (c) are removed.

§ 211.205 Special claims.

* * * * *

§ 211.209 [Removed]

13. Section 211.209 is removed.

14. Section 211.210 is retitled to read as follows:

§ 211.210 Requirements.

§ 211.210–1 [Amended]

15. In § 211.210–1, paragraph (a) (1) and (2) are removed; and paragraphs (a) (3) and (4) are redesignated paragraphs (a) (1) and (2).

16. Section 211.210–2 is retitled to read as follows:

§ 211.210–2 Labeling requirements.

* * * * *

17. In § 211.210–2, paragraph (a)(1) is revised to read as follows:

(a)(1) A manufacturer responsible for labeling must satisfy the requirements of this subpart for a category of hearing protectors before distributing that category of hearing protectors in commerce.

* * * * *

18. In § 211.210–2, paragraph (a)(2) is revised to read as follows:

(a)* * *

(2) A manufacturer may apply to the Administrator for an extension of time to comply with the labeling requirements for a category of protectors before he distributes any protectors in commerce. The Administrator may grant the manufacturer an extension of up to 20 days from the date of distribution. The manufacturer must provide reasonable assurance that the protectors equal or exceed their mean attenuation values, and that labeling requirements will be satisfied before the extension expires. Requests for extension should go to the Administrator, U.S. Environment Protection Agency, Washington, D.C. 20460. The Administrator must respond to a request within 2 business days. Responses may be either written or oral.

* * * * *

19. In § 211.210–2, paragraph (a)(3) is revised to read as follows:

(a) * * *

(3) A manufacturer, receiving hearing protectors through the chain of distribution that were labeled by a previous manufacturer, may use that previous manufacturer's data when labeling the protectors for ultimate sale or use, but is responsible for the accuracy of the information on the label. The manufacturer may elect to retest the protectors.

* * * * *

20. In § 211.210–2, paragraph (b) is revised to read as follows:

* * * * *

(b) Labeling requirements regarding each hearing protector category in a manufacturer's product line consist of:

(1) Testing hearing protectors according to § 211.206 and the hearing protectors must have been assembled by the manufacturer's normal production process; and it must have been intended for distribution in commerce.

* * * * *

21. In § 211.210–2, paragraph (d) is removed.

§ § 211.210–3 through 211.210–7 [Removed]

22. Sections 211.210–3 through 211.210–7 are removed.

23. Section 211.211 is revised to read as follows:

Section 211.211 Compliance with labeling requirement.

(a) All hearing protective devices manufactured after the effective date of this regulation, and meeting the applicability requirements of § 211.201, must be labeled according to this subpart, and must comply with the Labeled Values of mean attenuation.

(b) A manufacturer must take into account both product variability and test-to-test variability when labeling his devices in order to meet the requirements of paragraph (a) of this section. A specific category is considered when the attenuation value at the tested one-third octave band is equal to or greater than the Labeled Value, or mean attenuation value, stated in the supporting information required by § 211.204–4, for that tested frequency. The attenuation value must be determined according to the test procedures of § 211.206. The Noise Reduction Rating for the label must be calculated using the Labeled Values of mean attenuation that will be included in the supporting information required by §211.204–4.

§ 211.212–1 [Amended]

24. In § 211.212–1, paragraph (c) (4), the words enclosed by the parenthesis are removed.

25. Section 211.212–3 is revised to read as follows:

§ 211.212–3 Test hearing protector preparation.

The manufacturer must select the test hearing protector according to § 211.212–2 before the official test, and must comply with the test protector preparation requirements described in this subpart:

(a) A test hearing protector selected according to § 211.212–2 must not be tested, modified, or adjusted in any manner before the official test unless the adjustments, modifications and/or tests are part of the manufacturer's prescribed manufacturing and inspection procedures.

(b) Quality controls, testing, assembly or selection procedures must not be, used on the completed protector or any portion of the protector, including parts, that will not normally be used during the production and assembly of all other protectors of that category to be distributed in commerce.

26. In § 211.212–6, paragraph (a) is revised to read as follows:

§ 211.212–6 Determination of compliance.

(a) A category will be in compliance with these requirements if the results of the test conducted under the test request show that:

(1) The mean attenuation value, at each one-third octave band center frequency as determined from the Compliance Audit Test values plus 3 dB(A), is equal to or greater than the mean attenuation value at the same one-third octave band as stated in the Supporting Information required by § 211.204–4; and

(2) The Noise Reduction Rating, when calculated from the mean attenuation values determined by Compliance Audit Testing, equals or exceeds the Noise Reduction Rating as stated on the label required by § 211.204.

* * * * *

Appendix A [Removed]

27. Appendix A is removed.

Appendix B [Redesignated as Appendix A]

28. Appendix B is redesignated Appendix A.

Compactors

PART 205—TRANSPORTATION EQUIPMENT NOISE EMISSION CONTROLS

1. The table of contents for Part 205, Subpart F is revised to read as follows:

Subpart F—Truck-Mounted Solid Waste Compactors.

Sec.
205.200 Applicability.
205.201 Definitions.
205.202 Noise emission standards.
205.204 Test procedures.
205.205 Requirements.
205.205–1 General requirements.
205.205–2 Compliance with standards.
205.205–3 Configuration identification.
205.205–4 Labeling.
205.206 Testing by the Administrator.
205.207 Selective enforcement auditing requirements.
205.207–1 Test request.
205.207–2 Test sample selection.
205.207–4 Testing procedures.
205.207–5 Reporting of the test results.
205.207–6 Passing or failing under SEA.
205.207–7 Continued testing.
205.207–8 Prohibition of distribution in commerce; manufacturer's remedy.
205.208 In-use requirements.
205.208–1 [Reserved].
205.208–2 Tampering.
205.208–3 Instructions for maintenance, use and repair.
205.208–4 Noise Level Degradation Factor (NLDF) and retention of durability data.
205.209 Recall of non-complying compactors.
Appendix I—Sample Tables.

Authority: Sec. 6, Noise Control Act (42 U.S.C. 4905) (except where otherwise specified).

§ 205.201 [Amended]

2. In § 205.201, paragraph (a) (13), is removed and reserved.

3. In § 205.201, paragraph (a)(5), is revised to read as follows:

(15) "Test compactor" means a compactor in a test sample.

4. In § 205.202, paragraph (b), the second sentence is revised to read as follows:

§ 205.202 Noise emission standards.

* * * * *

(b) * * * At the time of selective enforcement auditing (SEA) testing prescribed in § 205.207, new truck-mounting solid waste compactors must comply with the standards set forth in paragraph (a) of this section minus the noise level degradation factor (NLDF) developed in accordance with § 205.208–4.

* * * * *

§ 205.203 [Removed]

5. Section 205.203 is removed.

§ 205.204 [Amended]

6. Section 205.204, paragraph (a) is revised to read as follows:

* * * * *

(a) *General.* This section prescribes the conditions under which noise emission standard compliance testing for selective enforcement auditing or testing by the Administrator must be conducted and the measurement procedures that must be used to determine the maximum noise level of truck-mounted solid waste compactors.

* * * * *

7. In § 205.204, paragraph (g), the last sentence is revised to read as follows:

* * * * *

(g) * * * Tests conducted by manufacturers under approved alternate procedures may be accepted by the Administrator for all purposes, including, but not limited to, selective enforcement audit testing and testing by the Administrator.

8. Section 205.205 is retitled to read as follows:

§ 205.205 Requirements.

* * * * *

§ 205.205–1 [Amended]

9. In § 205.205–1, paragraphs (a)(1) and (2) are removed; paragraph (a)(3) and (4) are redesignated paragraphs (a)(1) and (2); and paragraph (1) is revised to read as follows:

(a) * * *

(1) Shall label each compactor in accordance with the requirements of § 205.205–4 of this subpart; and

* * * * *

10. In § 205.205–1, paragaraph (c) is revised to read as follows:

* * * * *

(c) A subsequent manfacturer of a truck-mounted solid waste compactor need not fulfill the requirements of paragraph (a)(1) of this section if the compactor, when received by the manfacturer, fits the definition of a new truck-mounted solid waste compactor in the regulation, and the prior manufacturer had already complied with these requirements.

. In § 205.205–1, paragraph (d) is removed.

12. In § 205.205–2 is retitled to read as follows;

§ 205.205–2 Compliance with standards.

* * * * *

13. In § 205.205–2, paragraph (a), (2) and (3) are removed.

14. In § 205.205–2, paragraph (b) is revised to read as follows:

* * * * *

(b) The requirements for purposes of Testing by the Administrator and Selective Enforcement Auditing with regard to each compactor configuration shall consist of:

(1) Testing in accordance with § 205.204 of a compactor selected in accordance with § 205.204–2; and

(2) Compliance of the test compactor with a noise level such that the arithemtic sum of the Noise Level Degradation Factor (NLDF, determined in accordance with § 205.208–4 of this Subpart) and that noise level does not exceed the applicable standards, when tested in accordance with § 205.204.

* * * * *

15. In § 205.205–2; paragraph (c), paragraph (1) (iii) is revised to read as follows:

* * * * *

(C)(1)* * *

(iii) Testing in accordance with § 205.204 of a compactor, selected in accordance with § 205.207–2 of the configuration identified pursuant to paragraph (c)(1)(ii) of this section as having the highest noise level (estimate or actual) within category:

* * * * *

16. In § 205.205–2, paragraph (c)(1)(v) is removed.

17. In § 205.205–2, paragraph (c)(2) is revised to read as follows:

* * * * *

(c) * * *

(2) If there has been compliance with the requirements of paragraph (c)(1) of this section, all those configurations within a category are considered to be represented by the tested compactor, and therefore considered to be verified.

* * * * *

18. In § 205.205–2, paragraph (c)(3) is revised to read as follows:

* * * * *

(c) * * *

(3) If there has been compliance with all other requirements of paragraph (c)(1) of this section, except that the manufacturer tests a configuration which does not have the highest noise level in a category (as identified in (c)(1)(ii)), all those configurations in the category which have noise levels no greater than that of the tested compactor are considered to be verified. However, a manufacturer must for purposes of Testing by the Administrator and Selective Enforcement Auditing verify according to the requirements of (b)(1) or (c)(1) of this section any configurations in the category which have a higher noise level than that of the compactor configuration tested.

* * * * *

19. In § 205.205–2, paragraph (d) is revised to read as follows:

* * * * *

(d) A manufacturer may elect to verify all or part of his product line using representative testing pursuant to paragraph (c) of this section.

* * * * *

20. In § 205.205–2, paragraph (e)(1) and (2) are revised to read as follows:

* * * * *

(e) * * *

(1) In the case of representative testing, a new test compactor from another configuration must be selected and verified according to the requirements of paragraph (c) of this section, in order to verify the category represented by the compactor that does not comply; or

(2) Modification of the test compactor and demonstration by testing that it meets applicable standards. The manufacturer shall modify all production compactors of the same configuration in the same manner as the test compactor before distribution into commerce.

* * * * *

21. In Section 205.205–2, paragraph (f) is removed.

§ 205.205–4 through 205.205–10 [Removed]

22. Sections 205.205–4 through § 205.205.10 are removed.

§ 205.205–11 [Redesignated as § 205.205.4].

23. Section 205.205–11 is redesignated as § 205.205–4 and paragraph (a)(3) is revised to read as follows:

§ 205.205–4 Labeling—compliance.

(a) * * *

(3) The compactor manufacturer shall affix the label in such a manner that it cannot be removed without destroying or defacing the label. He shall not affix the label to any piece of equipment that is easily detached from the compactor.

* * * * *

§ 205.206 [Amended]

24. In § 205.206 paragraph (c)(1)(i) is removed and [reserved and paragraph (c)(ii) is revised to read as follows:

* * * * *

(c)(1) * * *

(ii) Testing of a reasonable number of compactors for purposes of selective enforcement auditing under § 205.207.

* * * * *

25. In § 205.206 paragraph (c)(1)(v) is revised to read as follows:

* * * * *

(c)(1) * * *

(v) Testing of up to 50 percent of the manufacturer's production test products to be tested during a year, if the Administrator determines it is necessary to test these vehicles to assure that a manufacturer has acted or is acting in compliance with the Act.

26. In § 205.207–2, paragraph (c) is revised to read as follows:

§ 205.207–2 Test sample selection.

* * * * *

(c) The compactors of the category configuration or subgroup selected for testing shall have been assembled by the manufacturer for distribution in commerce using the manufacturer's normal production process.

* * * * *

27. In § 205.207–3 is revised to read as follows:

§ 205.207–3 Test sample preparation.

(a) Before the official test, the test compactor selected must not be prepared, tested, modified, adjusted, or maintained in any manner unless such adjustments, preparation, modification or tests are part of the manufacturer's prescribed manufacturing and inspection procedures, and are documented in the manufacturer's internal compactor assembly and inspection procedures, or unless such adjustments or tests are required or permitted under this subpart or are approved in advance by the Administrator. For purposes of this section prescribed manufacturing and inspection procedures include quality control testing and assembly procedures normally performed by the manufacturer on like products during production, if the resulting testing is not biased by this procedure. In the case of imported products, the manufacturer may perform adjustments, preparation, modifications or tests normally performed at the port of entry by the manufacturer, to prepare the compactor for delivery to a dealer or customer.

(b) Equipment or fixtures necessary to conduct the test may be installed on the compactor, if such equipment or fixtures have no effect on the noise emissions of the compactor, as determined by the measurement methodology.

(c) In the event of a compactor malfunction (e.g., failure to start) the manufacturer may perform the maintenance that is necessary to enable the compactor to operate in a normal manner.

(d) No quality control, quality assurance testing, assembly or selection procedures may be used on the test compactor or any portion thereof, including parts and subassemblies, that will not normally be used during the production and assembly of all other compactors of the category which will be distributed in commerce, unless such procedures are required or permitted under this subpart, or are approved in advance by the Administrator.

28. In § 205.207–5, the address in paragraph (b) is revised to read as follows:

§ 205.207–5 Reporting of the test results.

* * * * *

(b)* * *

Administrator, U.S. Environmental Protection Agency, Washington, D.C. 20460.

29. In § 205.207–8, paragraph (a)(1) is revised to read as follows:

§ 205.207–8 Prohibition of distribution in commerce, manufacturer's remedy.

(a)* * *

(1) Submits a written report to the Administrator which identifies the reason for the non-compliance of the compactors, described the problem and describes the proposed quality control or quality assurance remedies to be taken by the manufacturer to correct the problem.

* * * * *

30. In § 205.208–2, paragraph (1) is revised; paragraphs (b) and (c) are removed; paragraphs (d) and (e) are revised and redesignated paragraphs (b) and (c); paragraph (h) is removed; and paragraphs (f) and (g) are redesignated (d) and (e), respectively. The revised portions of §205.208–2 read as follows:

§ 205.208–2 Tampering.

(a) For each configuration of compactor covered by this part, the manufacturer shall develop a list of those acts which, in his judgment, might be done to the compactor in use and which would constitute the removal or rendering inoperative of noise control devices or elements of design of the compactor.

(b) The manufacturer shall include in the owner's manual the following information:

(1) The statement:

Tampering With Noise Control System Prohibited

Federal law prohibits the following acts or the causing thereof:

(1) The removal or rendering inoperative by any person, other than for purposes of maintenance, repair, or replacement, of any device or element of design incorporated into any new compactor for the purpose of noise control prior to its sale or delivery to the ultimate purchaser or while it is in use; or (2) the use of the compactor after such device or element or design has been removed or rendered inoperative by any person.

(2) The statement: Among those acts presumed to constitute tampering are the acts listed below.

Immediately following this statement, the manufacturer shall include the list developed under paragraph (a) of this section.

(c) Any act included in the list prepared pursuant to paragraph (a) of this section is presumed to constitute tampering; however, in any case in which a prescribed act has been committed and it can be shown that such act resulted in no increase in the noise level of the vehicle or that the vehicle still meets the noise emission standard of § 205.202, such act will not constitute tampering.

(d) Manufacturers who only assemble compactors need not fulfill the requirements of paragraphs (a) and (b) of this section. Such manufacturers shall provide ultimate purchasers of their compactors with the tampering list developed by the compactor body manufacturer under paragraph (a) of this section for that particular compactor body and truck chassis combination.

31. In § 205.208–3, paragraphs (c), (d), and (f) are removed; paragraph (e) is redesignated (c) and is revised to read as follows:

§ 205.208–3 Instructions for maintenance, use and repair.

* * * * *

(c) Manufacturers who only assemble compactors are not required to fulfill the requirements of paragraphs (a) and (b) of this section. Such manufacturers shall

provide the maintenance instructions and log book developed by the compactor body manufacturer for that particular compactor body and chassis combination.

Motorcycles

PART 205—TRANSPORTATION EQUIPMENT NOISE

1. The table of contents for Part 205, Subpart D and E is revised to read as follows:

Subpart D—Motorcycles

Sec.
205.150 Applicability.
205.151 Definitions.
205.152 Noise emission standards.
205.153 Engine displacement.
205.154 Consideration of alternative test procedures.
205.155 Motorcycle class and manufacturer abbreviation.
205.156 [Reserved]
205.157 Requirements.
205.157–1 General requirements.
205.157–2 Compliance with standards.
205.157–3 Configuration identification.
205.158 Labeling requirements.
205.159 Testing by the Administrator.
205.160 Selective enforcement auditing (SEA) requirements.
205.160–1 Test request.
205.160–2 Test sample selection and preparation.
205.160–4 Testing procedures.
205.160–5 Reporting of the test results.
205.160–6 Passing or failing under SEA.
205.160–7 Continued testing.
205.160–8 Prohibition of distribution in commerce; manufacturer's remedy.
205.162–1 Warranty.
205.162–2 Tampering.
205.162–3 Instructions for maintenance, use, and repair.
205.163 Recall of noncomplying motorcycles; relabeling of mislabled motorcycles.

Subpart E—Motorcycle Exhaust Systems

205.164 Applicability.
205.165 Definitions.
205.166 Noise emission standards.
205.167 Consideration of alternative test procedures.
205.168 Requirements.
205.168–1 General requirements.
205.168–2 [Removed]
205.169 Labeling requirements.
205.170 Testing by the Administrator.
205.171 Selective enforcement auditing (SEA) requirements.
205.171–1 Test request.
205.171–2 Test exhaust system sample selection and preparation.
205.171–3 Test motorcycle sample selection.
205.171–6 Test procedures.
205.171–7 Reporting of the test results.
205.171–8 Passing or failing under SEA.
205.171–9 Continued testing.
205.171–10 Prohibition on distribution in commerce; manufacturer's remedy.
205.173 In-use requirements.
205.173–1 Warranty.
205.173–2 Tampering.
205.173–3 Warning statement.
205.173–4 Information sheet.
205.174 Remedial orders.
Appendix I: Motorcycle Noise Emission Test Procedure
Appendix II: Sampling Tables

Authority: Sec. 6, Noise Control Act (42 U.S.C. 4905) and additional authority as specified.

2. In § 205.151, paragraph (a)(24) is removed and reserved and paragraph (a)(27) is revised to read as follows:

§ 205.151 Definitions.

(a) * * *

(27) "Test vehicle" means a vehicle in a Selective Enforcement Audit test sample.

* * * * *

3. In § 205.154, the last sentence is revised to read as follows:

§ 205.154 Consideration of alternative test procedures.

* * * * *

* * * "After approval by the Administrator, testing conducted by manufacturers using alternative test procedures will be accepted by the Administrator for all purposes including, but not limited to, selective enforcement audit testing.

4. Section 205.157 is retitled as follows:

§ 205.157 Requirements.

§ 205.157–1 [Amended]

5. In 205.157–1, paragraphs (a) (1) and (2) are removed; paragraphs (a)(3) and (4) are redesignated paragraphs (a)(1) and (2); and paragraph (a)(1) is revised to read as follows:

* * * * *

(1) Shall be labeled in accordance with the requirements of section 205.158 of this subpart.

* * * * *

6. In § 205.157–1, paragraph (c) is revised to read as follows:

* * * * *

(c) Subsequent manufacturers of a new product which conforms to the definition of vehicle in these regulations when received by them from a prior manufacturer, need not fulfill the requirements of paragraph (a)(1) of this section where such requirements have already been complied with by a prior manufacturer.

* * * * *

7. Section 205.157–2 is retitled to read as follows:

§ 205.157–2 Compliance with standards.

8. In § 205.157–2, paragraph (a)(1) is revised to read as follows:

* * * * *

(a)(1) Prior to distribution in commerce of vehicles of a specific configuration, the first manufacturer of such vehicle must verify such configurations in accordance with the requirements of this subpart.

* * * * *

9. In § 205.157–2, paragraph (a)(2) is removed and reserved.

10. In § 205.157–2, paragraph (b) is revised to read as follows:

* * * * *

(b) The requirements for purposes of testing by the Administrator and selective enforcement auditing with regard to each vehicle configuration consist of:

(1) Testing in accordance with § 205.160–4 of a vehicle selected in accordance with § 205.160–2.

(2) Compliance of the test vehicle with the applicable standard when tested in accordance with § 205.160–4.

* * * * *

11. In § 205.157–2, paragraph (c) (1)(iii) is revised to read as follows:

* * * * *

(c)(1) * * *

(iii) Testing in accordance with § 205.160–4 of a vehicle selected in accordance with § 205.160–2 which much be a vehicle of the configuration which is identified pursuant to paragraph (c)(1)(ii) of this section as having the highest sound pressure level (estimated or actual) within the category.

* * * * *

12. In § 205.157–2, paragraph (c) (1)(v) is removed.

13. In § 205.157–2, paragraph (c) (2) is revised to read as follows:

* * * * *

(c) * * *

(2) Where the requirements of paragraph (c)(1) of this section are complied with, all those configurations contained within a category are considered represented by the tested vehicle.

* * * * *

14. § 205.157–2, paragraph (c) (3) is revised to read as follows:

* * * * *

(c) * * *

(3) Where the manufacturer tests a vehicle configuration which has not been determined as having the highest sound pressure level of a category, but all other requirements of paragraph (c)(1) of this section are complied with, all those configurations contained within that category which are determined to have sound pressure levels not greater than the tested vehicle are considered to be represented by the

tested vehicle; however, a manufacturer must for purposes of Testing by the Administrator and Selective Enforcement Auditing verify according to the requirements of (b)(1) and/or (c)(1) of this section any configurations in the subject category which have a higher sound pressure level than the vehicle configuration tested.

* * * * *

15. In § 205.157–2, paragraph (d) is revised to read as follows:

* * * * *

(d) A manufacturer may elect for purposes of Testing by the Administrator and Selective Enforcement Auditing to use representative testing pursuant to paragraph (c) of this section for all or part of his product line.

* * * * *

16. In § 205.157–2, paragraphs (e) (1) and (2) are revised to read as follows:

* * * * *

(e) * * *

(1) In the case of representative testing, a new test vehicle from another configuration must be selected according to the requirements of paragraph (c) of this section, in order to verify the configurations represented by the non-compliant vehicle.

(2) Modify the test vehicle and demonstrate by testing that it meets applicable standards. The manufacturer must modify all production vehicles of the same configuration in the same manner as the test vehicle before distribution into commerce.

17. In § 205.157–2, paragraph (f) is removed.

§§ 205.157–4—205.157–10 [Removed]

18. Sections 205.157–4 through 205.157–10 are removed.

§ 205.158 [Amended]

19. In § 205.158, paragraph (a)(1) is revised to read as follows:

(a)(1) The manufacturer of any vehicle subject to this subpart must, at the time of manufacture, affix a label, of the type specified in paragraph (a) (2), (3), and (4) of this section, to all such vehicles to be distributed in commerce.

* * * * *

20. In § 205.158, paragraph (a)(3) is revised to read as follows:

(a) * * *

(3) The label must be affixed by the vehicle manufacturer to the vehicle in such a manner that the label cannot be removed without destroying or defacing it, and must not be affixed to any piece of equipment that is easily detached from such vehicle.

* * * * * *

21. In § 205.158, paragraph (e) is removed.

22. Section 205.159, paragraph (c)(5) is revised to read:

§ 205.159 Testing by the Administrator.

* * * * *

(c) * * *

(5) Testing of up to 10 percent of the manufacturer's test vehicles for a model year if the Administrator determines testing these vehicles at the EPA test site is necessary to assure that a manufacturer has acted or is acting in compliance with the Act.

23. In § 205.160–2, the section title and paragraph (a) are revised to read as follows:

§ 205.160–2 Test sample selection and preparation.

(a) Vehicles comprising the sample which are required to be tested under a test request in accordance with this subpart must be selected consecutively as they are produced. Before the official test, the test vehicle must not be prepared, tested, modified, adjusted, or maintained in any manner unless such preparation, tests, modifications, adjustments or maintenance are part of the manufacturer's prescribed manufacturing and inspection procedures, and are documented in the manufacturer's internal vehicle assembly and inspection procedures, are required or permitted under this subpart, or are approved in advance by the Administrator. For purposes of this section, prescribed manufacturing and inspection procedures include quality control testing and assembly procedures normally performed by the manufacturer on like products during early production if the resulting testing is not biased by this procedure. In the case of imported products, the manufacturer may perform adjustments, preparations, modification or tests normally performed at the port of entry by the manufacturer to prepare the vehicle for delivery to a dealer or customer.

(1) Equipment or fixtures necessary to conduct the test may be installed on the vehicle if such equipment or fixtures have no effect on the noise emissions of the vehicle, as determined by the measurement methodology.

(2) In the event of a vehicle malfunction (i.e., failure to start, etc.) the manufacturer may perform the maintenance that is necessary to enable the vehicle to operate in a normal manner. This maintenance must be documented and reported in the SEA report.

(3) No quality control, quality assurance testing, assembly or selection procedures may be used on the test vehicle or any portion of the test vehicle including parts and subassemblies, unless such quality control, quality assurance testing, assembly or selection procedures are used normally during the production and assembly of all other vehicles of this configuration which will be distributed in commerce, are required or permitted under this subpart or are approved in advance by the Administrator.

(4) If a vehicle is unable to complete the noise tests, the manufacturer may replace the vehicle. Any replacement vehicle must be a production vehicle of the same configuration as the replaced vehicle or a noisier configuration and will be subject to all the provisions of these regulations. Any replacement must be reported in the SEA report.

§ 205.160–3 [Removed and reserved]

24. Section 205.160–3 is removed and reserved..

§ 205.160–4 [Amended]

25. In § 205.160–4, paragraph (b), the first sentence is removed.

26. In § 205.160–8, paragraph (a)(1) is revised to read as follows:

§ 205.160–8 Prohibition of distribution in commerce; manufacturer's remedy.

(a) * * *

(1) Submission of a written report to the Administrator which identifies the reason for the noncompliance of the vehicles, describes the problem and/or quality control or quality assurance remedies to be taken by the manufacturer to correct the problem.

* * * * *

§ 205.161 [Removed]

27. Section 205.161 is removed.

§ 205.162–1 [Removed]

28. Section 205.162–1 is removed.

29. In § 205.162–2, paragraph (a) is revised; paragraphs (b) and (c) are removed; paragraphs (d) and (e) are revised and redesignated paragraphs (b) and (c), respectively; paragraph (g) is removed; and paragraph (f) is redesignated paragraph (d). The revised portions of § 205.162–2 read as follows:

§ 205.162–2 Tampering.

(a) For each configuration of vehicles covered by this part, the manufacturer shall develop a list of acts which, in his judgment, constitute the removal or rendering totally or partially inoperative, other than for purposes of maintenance, repair, or replacement of noise control devices or elements of design of the vehicle.

(b) The manufacturer shall include in the owner's manual the following information:

(1) The statement:

Tampering With Noise Control System Prohibited

Federal law prohibits the following acts or causing thereof:

(1) The removal or rendering inoperative by any person other than for purposes of maintenance, repair, or replacement, of any device or element of design incorporated into any new vehicle for the purpose of noise control prior to its sale or delivery to the ultimate purchaser or while it is in use, or (2) the use of the vehicle after such device or element of design has been removed or rendered inoperative by any person.

(2) The statement:

Among those acts presumed to constitute tampering are the acts listed below.

Immediately following this statement, the manufacturer must include the list developed under paragraph (a) of this section.

(c) Any act included in the list prepared pursuant to paragraph (a) of this section is presumed to constitute tampering; however, in any case in which a presumed act of tampering has been committed and it can be shown that such act resulted in no increase in the noise level of the vehicle or that the vehicle still meets the noise emission standard of § 205.152, the act will not constitute tampering.

* * * * *

§ 205.162–3 [Amended]

30. In § 205.162–3, paragraphs (c), (d), and (e) are removed.

§ 205.162–4 [Removed]

31. Section 205.162–4 is removed.

§ 205.165 [Amended]

32. In § 205.165, paragraph (a)(6) is removed and reserved.

33. In § 205.165, paragraph (a)(8) is revised to read as follows:

(a) * * *

(8) "Test exhaust system" means an exhaust system in Selective Enforcement Audit test sample.

* * * * *

34. Section 205.168 is retitled to read as follows:

§ 205.168 Requirements.

* * * * *

35. Section 205.168–1 is revised to read as follows:

§ 205.168–1 General requirements.

(a) Each manufacturer of motorcycle exhaust systems manufactured for Federally regulated motorcycles and distributed in commerce in the United States which are subject to the noise emission standards prescribed in this subpart and not exempted in accordance with Subpart A, § 205.5:

(1) Must label each exhaust system in accordance with the requirements of § 205.169 of this subpart; and

(2) Must only manufacture exhaust systems which conform to the applicable noise emission standard established in § 205.166 of this regulation when installed on any Federally regulated motorcycle for which it has been designed and marketed.

(b) The manufacturer who is required to conduct testing to demonstrate compliance with a particular standard must satisfy all other provisions of this subpart applicable to that standard.

(c) Prior to distribution into commerce of exhaust systems of a specific category, the manufacturer of the exhaust system shall verify the category in accordance with this subpart.

(2) Notwithstanding paragraph (a)(1) of this section, the manufacturer may distribute in commerce exhaust systems of that category for up to 90 days if weather or other conditions beyond the control of the manufacturer make testing of a category impossible and if the following conditions are met:

(i) The manufacturer performs the tests required under paragraphs (d) or (e) of this section on such category as soon as conditions permit;

(d) The requirements for each exhaust system category consist of:

(1) Testing in accordance with § 205.171–1 of an exhaust system selected in accordance with § 205.171–2.

(2) Compliance of the test exhaust system on a motorcycle for which it is marketed with the applicable standard when tested in accordance with Appendix I; and

(e) A manufacturer is required to verify all categories of exhaust systems within his product line for each class of Federally regulated motorcycle for which it is designed and marketed. A category of a replacement exhaust system is defined by a separate combination of at least the following parameters:

(1) *Muffler/Silencer:* (i) Volume; (ii) type of absorption material; (iii) amount of absorption material; (iv) length; (v) diameter; (vi) directional flow of exhaust gas; (vii) interior construction; (viii) shell and inner construction material; (ix) number of header pipes entering muffler; and (x) specific motorcycle application.

(2) *Expansion Chamber:* (i) Volume; (ii) diameter; (iii) construction material; (iv) directional flow of exhaust gas; (v) length; and (vi) specific motorcycle application.

(3) *Spark Arrestors:* (i) Volume; (ii) construction material; (iii) directional flow of exhaust gas; (iv) length; (v) diameter, and (vi) specific motorcycle application.

(4) *Other Exhaust System Components:* (i) Volume; (ii) shape; (iii) length; (iv) diameter; (v) material; (vi) directional flow of exhaust gas; and (vii) specific motorcycle application.

(f) Exhaust system components sold as separate products shall be tested pursuant to § 205.166(b).

(g) Original equipment exhaust systems that are also sold as replacement systems for the same motorcycle configuration need not be tested under this subpart if they have been tested or represented in a test report under Subpart D of this part.

(h) A manufacturer has the following alternatives if any test exhaust system is determined not to be in compliance with applicable standards:

(i) Modify the test exhaust system and demonstrate by testing that it meets applicable standards. The manufacturer must modify all production exhaust systems of the same category in the same manner as the test exhaust system before distribution in commerce.

§§ 205.168–2—205.168–10 [Removed]

36. Sections 205.168–2 through 205.168–10 are removed.

§ 205.169 [Amended]

37. In § 205.169, paragraph (a) is revised to read as follows:

(a) The manufacturer of any product (including the manufacturer of newly produced motorcycles) subject to this subpart must, at the time of manufacture, affix a permanent, legible label, or mark of the type and in the manner described below, containing the information provided below, to all such exhaust systems or exhaust system components to be distributed in commerce.

* * * * *

38. In § 205.169, paragraph (f) is removed.

§ 205.170 [Amended]

39. In § 205.170, paragraph (c)(1) is removed and reserved.

40. In § 205.170, paragraph (c)(5) is revised to read as follows:

* * * * *

(c) * * *

(5) In addition to any exhaust systems included in paragraph (c) (1), (2), (3), or (4) of this section, testing of up to 10 percent of the manufacturer's exhaust systems for a model year if the Administrator determines testing these exhaust systems at the EPA test site is

necessary to assure that a manufacturer has acted or is acting in compliance with the Act.

41. In § 205.171–2, the section title and paragraph (a) are revised to read as follows:

§ 205.171–2 Test exhaust system selection and preparation.

(a)(1) Exhaust systems comprising the sample which are required to be tested under a test request in accordance with this subpart must be selected consecutively as they are produced.

(2) Test motorcycles and test exhaust systems to be used for testing of exhaust systems must be of the subject class which has been assembled using the manufacturer's normal production processes, in stock configuration including exhaust system, as sold or offered for sale in commerce.

(3) Before the official test, the test motorcycle and test exhaust system must not be prepared, tested, modified, adjusted, or maintained in any manner unless such preparation, tests, modifications, adjustments or maintenance are part of the original equipment manufacturer's prescribed manufacturing and inspection procedures, and are documented in the manufacturer's internal motorcycle assembly and inspection procedures, or are required or permitted under this subpart, or are approved in advance by the Administrator.

(4) Equipment or fixtures necessary to conduct the test may be installed on the motorcycle, if such equipment or fixtures shall have no effect on the noise emissions of the motorcycle as determined by the measurement methodology.

(5) In the event of a motorcycle malfunction (i.e., failure to start, etc.) maintenance that is necessary may be performed to enable the vehicle to operate in a normal manner. This maintenance must be documented and reported in the final report prepared and submitted in accordance with this subpart.

(6) No quality control, quality assurance testing, assembly or selection procedures may be used on the test vehicle or any portion thereof, including parts and subassemblies, that will not normally be used during the production and assembly of all other motorcycles of that class which will be distributed in commerce, unless such procedures are required or permitted under this subpart or are approved in advance by the Administrator.

§§ 205.171–4—205.171–5 [Removed]

42. Sections 205.171–4 and 205.171–5 are removed.

43. In § 205.171–6, paragraph (b), the first sentence is revised to read as follows:

§ 205.171–6 Testing procedures.

* * * * *

(b) No maintenance may be performed on the test exhaust system except as provided by § 205.171–2. * * *

44. In § 205.171–10, paragraph (a)(1) is revised to read as follows:

§ 205.171–10 Prohibition on distribution in commerce; manufacturer's remedy.

(a) * * *

(1) Submission of a written report to the Administrator which identifies the reason for the noncompliance of the exhaust systems, describes the problem and describes the proposed quality control or quality assurance remedies to be taken by the manufacturer to correct the problem.

* * * * *

45. In § 205.173–1, paragraph (b) is removed and reserved and paragraph (a) is revised as follows:

§ 205.173–1 Warranty.

(a) The exhaust system manufacturer must include in the information supplied to the ultimate purchaser pursuant to section 205.173–4, the following statement:

Noise Emission Warranty

[The manufacturer] warrants that this exhaust system, at time of sale, meets all applicable U.S. E.P.A. Federal noise standards. This warranty extends to the first person who buys this exhaust system for purposes other than resale, and to all subsequent buyers. Warranty claims should be direct to ————. (Manufacturer shall fill in this blank with his name, address and telephone number.)

* * * * *

46. In § 205.173–2, the introductory text is revised to read as follows:

§ 205.173–2 Tampering.

The manufacturer must include the following statement pursuant to § 205.173–4 with each product of that category the manufacturer distributes into commerce.

* * * * *

47. In § 205.173–3, the introductory text is revised to read as follows:

§ 205.173–3 Warning statement.

The manufacturer must include the following statement pursuant to § 205.173–4 with each product of that category the manufacturer distributes into commerce.

* * * * *

§ 205.173–5 [Removed]

48. Section 205.173–5 is removed.

[FR Doc. 82–34911 Filed 12–27–82; 8:45 am]

Proposed Rules

Federal Register
Vol. 47, No. 249
Tuesday, December 28, 1982

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 352

Reemployment Rights; Correction

AGENCY: Office of Personnel Management.

ACTION: Proposed regulations; correction.

SUMMARY: In publishing proposed regulations on reemployment rights in the November 12, 1982, issue of the **Federal Register** (47 FR 51146), the Office of Personnel Management (OPM) inadvertently left out the address for comments. Any comments on the proposed regulations should be sent to the address below.

ADDRESS: Written comments may be sent to Richard B. Post, Associate Director, Staffing Group, U.S. Office of Personnel Management, 1900 E Street, N.W., Washington, D.C. 20415, or delivered to Room 6F08, 1900 E Street, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: William Bohling, (202) 632–6000.

U.S. Office of Personnel Management.

Donald J. Devine,

Director.

BILLING CODE 6325–01–M

5 CFR Part 733

Political Activity of Federal Employees; Workplace Solicitation and Collection of Political Contributions Prohibited

AGENCY: Office Personnel Management

ACTION: Proposed rule

SUMMARY: The Office of Personnel Management proposes to issue a regulation prohibiting the solicitation, payment, and collection of political contributions in the Federal workplace and through Federal payroll deductions. This action is necessary to clarify the Office of Personnel Management's existing regulatory prohibition on the solicitation, payment, collection, and receipt of political contributions.

DATE: Comments should be submitted on or before February 28, 1983.

ADDRESS: Comments should be addressed to: Joseph A. Morris, General Counsel, Room 5H30, United States Office of Personnel Management, 1900 E Street NW., Washington, D.C. 20415.

FOR FURTHER INFORMATION CONTACT: Jo-Ann Chabot, Office of the General Counsel, (202) 632–5421.

SUPPLEMENTARY INFORMATION: Section 7321 of Title 5, United States Code, provides that "* * * an employee in an Executive agency or in the competitive service is not obliged, by reason of that employment, to contribute to a political fund or to render political service * * * and * * * may not be removed or otherwise prejudiced for refusal to do so."

Section 7322 further provides that "* * * an employee in an Executive agency or in the competitive service may not use his official authority or influence to coerce the political action of a person or body."

Federal criminal statutes, at 18 U.S.C. 600, make it unlawful for any person to promise "any employment, position, compensation, contract, appointment, or other benefit, provided for or made possible in whole or in part by any Act of Congress, or any special consideration in obtaining any such benefit, to any person as consideration, favor or reward for any political activity or for the support of or opposition to any candidate or any political party * * *."

Federal criminal statutes, at 18 U.S.C. 602, further make it unlawful for "* * * an officer or employee of the United States or any department or agency thereof * * * to knowingly solicit, any contribution within the meaning of section 301(8) of the Federal Election Campaign Act of 1971 from any other such officer [or] employee * * *."

Federal criminal statutes, at 18 U.S.C. 603(a), also make it unlawful for " * * * an officer or employee of the United States or any department or agency thereof * * * to make any contribution within the meaning of section 301(8) of the Federal Election Campaign Act of 1971 to any other such officer [or] employee * * *, if the person receiving such contribution is the employer or employing authority of the person making the contribution."

Federal criminal statutes, at 18 U.S.C. 607(a), additionally make it unlawful for "any person," with the exception, stated in 18 U.S.C. 607(b), of certain employees of Congress, "to solicit or receive any contribution within the meaning of section 301(8) of the Federal Election Campaign Act of 1971 in any room or building occupied in the discharge of official duties by any person mentioned in [18 U.S.C.] section 603, or in any navy yard, fort, or arsenal.

Section 301(8) of the Federal Election Campaign Act of 1971, as codified at 2 U.S.C. 431(8), defines a "contribution" to include "* * * any gift, subscription, loan, advance, or deposit of money or anything of value made by any person for the purpose of influencing any election for Federal office. * * *"

The solicitation, payment, collection, or receipt of political contributions by Federal employees subject to the Hatch Act, if done in the Federal workplace, would violate one or more of the foregoing statutory prohibitions. In addition, even if solicitation of such contributions occurred elsewhere, the payment, collection, or receipt of such contributions in the Federal workplace would still violate the law.

Similarly, the use of a Federal payroll deduction scheme or the Government's allotment system as a conduit for political contributions by Federal employees subject to the Hatch Act would involve the use of Federal workplaces and instrumentalities to pay, collect, and receive such contributions. Because Government payroll deductions and allotments necessarily pass through the hands of supervisors, co-workers, and agency payroll offices, the use of such means to channel political contributions raises the unacceptable possibility of abuse; the certain knowledge that a Federal employee is making or is failing to make a political contribution would enable or encourage supervisors and co-workers to bring varieties of impermissible pressures upon the employee to change such conduct, thereby substantially impairing and inhibiting the employee's exercise of political rights secured by the Constitution.

The regulations presently in force under the Hatch Act make it clear that Federal employees who are covered by

the Hatch Act have the right to make financial contributions to political parties and organizations; *see* 5 CFR 733.111(a)(8). Present regulations do not adequately protect employee freedoms and the integrity of the Federal workplace, however, in that they do not clearly state prohibitions against the solicitation, payment, collection, and receipt of political contributions in the Federal workplace and through Government payroll and similar channels.

The congressional declaration of merit system principles that was enacted in Section 101(a) of the Civil Service Reform Act of 1978, 5 U.S.C. 2301(b), commands that "Employees should be * * * protected against arbitrary action, personal favoritism, or coercion for partisan political purposes * * *" 5 U.S.C. 2301(b)(8)(A). Therefore, OPM proposes to amend 5 CFR Part 733 (Political Activity of Federal Employees) to include the foregoing in the list of prohibited political activities set forth in 5 CFR 733.122.

E.O. 12291, Federal Regulation

OPM has determined that this is not a major rule as defined under Section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because it only affects the political activities of Federal employees.

List of Subjects in 5 CFR Part 733

Political activity of Federal employees.

United States Office of Personnel Management.

Donald J. Devine,

Director.

Accordingly, OPM proposes to amend 5 CFR as follows:

PART 733—POLITICAL ACTIVITY OF FEDERAL EMPLOYEES

1. The authority citation for Part 733 would read as follows:

Authority: 5 U.S.C. §§ 3301, 3302, 7301, 7324, 7325, and 7327; Reorganization Plan No. 2 of 1978, E.O. 12107; and 3 CFR 1978 Comp., p. 284, unless otherwise noted.

2. In Part 733, § 733.101 would be amended by adding paragraphs (g), (h), and (i) to read as follows:

§ 733.101 Definitions.

* * * * * * *

(g) "Political fund" means any fund, organization, political action committee, or other entity that, for purposes of influencing in any way the outcome of any partisan election, receives or expends money or anything of value or transfers money or anything of value to any other fund, candidate, organization, political action committee, or other entity.

(h) "Contribution" means any gift, subscription, loan, advance, deposit of money, allotment of money, or anything of value given or transferred by one person to another, including in cash, by check, by draft, through a payroll deduction or allotment plan, by pledge or promise, whether or not enforceable, or otherwise.

(i) "Federal workplace" means any place, site, installation, building, room, or facility in which any Executive department or agency conducts official business, including, but not limited to, office buildings, forts, arsenals, navy yards, post offices, vehicles, ships, and aircraft.

3. In Part 733, § 733.122 (b) is amended by revising subparagraphs (12) and (13) and adding subparagraphs (14), (15), and (16) to read as follows:

§ 733.122 Political management and political campaigning; prohibitions.

* * * * *

(b) * * *

(12) Addressing a convention, caucus, rally or similar gathering of a political party in support of or in opposition to a partisan candidate for public office or political party office;

(13) Initiating or circulating a partisan nominating petition;

(14) Soliciting, collecting, or receiving a contribution from any employee for any political party, political fund, or other partisan recipient;

(15) Paying a contribution to any employee who is the employer or employing authority of the person making the contribution for any political party, political fund, or other partisan recipient; and

(16) Soliciting, paying, collecting, or receiving a contribution, at or in any Federal workplace, for any political party, political fund, or other partisan recipient.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 272 and 273

[Amdt. No. 238]

Food Stamp Program; Notice of Adverse Action and Mass Change

AGENCY: Food and Nutrition Service, USDA.

AGENCY: Proposed rule.

SUMMARY: The Food and Nutrition Service is changing the way a State welfare agency tells food stamp recipients about changes in their food stamps. At present, there is confusion about how the State agency should make changes that affect many or all recipients. There are also needlessly difficult requirements for informing recipients of individual changes. This proposed rule would simplify these requirements.

DATES: Comments must be received on or before February 28, 1983.

ADDRESS: Please submit comments to Thomas O'Connor, Supervisor, Policy and Regulations Section, Family Nutrition Programs, Food and Nutrition Service, USDA, Alexandria, Va. 22302. Comments will be available for public inspection during regular business hours (8:30 a.m. to 5:00 p.m.) at the agency's offices: Room 708, 3101 Park Center Drive, Alexandria, Va.

FOR FURTHER INFORMATION CONTACT: Mr. O'Connor at the address above; telephone (703) 756-3429.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12291. This rule has been reviewed under Executive Order 12291 and Secretary's Memorandum No. 151-1. The Department has classified this rule as a non-major rule. The rule's effect on the economy will be less than $100 million. The rule will have no effect on costs or prices. Competition, employment, investment, productivity and innovation will remain unaffected. There will be no effect on the competition of United States-based enterprises with foreign-based enterprises.

Regulatory Flexibility Act. Samuel J. Cornelius, Administrator of the Food and Nutrition Service, has certified that this proposal does not have a significant economic impact on a substantial number of small entities. The rule gives State welfare agencies greater flexibility in their administration of the Food Stamp Program.

Paper Reduction Act. This regulation does not contain reporting and recordkeeping requirements subject to approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act.

Mass Changes

A mass change in food stamps is one which affects many or all food stamp recipients. A mass change is also one which the Federal or State governments

cause, not one caused by the recipients. Examples of mass changes are an increase in the Thrifty Food Plan and an increase in Supplemental Security Income payments.

The current regulations discuss four kinds of mass change. First are changes in food stamps which occur according to a schedule for keeping up with the cost-of-living and seasonal variations. Second are changes in public assistance grants. Third are changes in other Federal benefits. Finally there are changes in food stamp regulations concerning the way a State agency notifies a household that a mass change has taken place.

The amendment would provide a way to resolve the often conflicting pressures of specificity and time. Participants need specific information about benefit changes to ensure their accuracy. The State agency needs time to inform individuals of the changes. To resolve this conflict, the Department propose to give the State agency a reasonable time to provide the necessary information to the household without diminishing the household's rights.

Notifying Households of Mass Changes

Currently, the regulations do not specify the amount of information which a State agency must give to a household when a mass change occurs. Neither do the regulations give clear instructions about the timeliness of the notice. The Department is proposing guidelines for State agencies to follow.

Content. The Department is proposing that the State agency shall, at a minimum inform the household of the general nature of the mass change by giving it a range of likely effects. For example a rule might change the percentage of the earned income deduction. The State agency would then inform households of the likely effects, that a household with $100 in monthly wages would probably lose $1 in food stamps, one with $300 in wages would lose $2 in food stamps, etc. The State agency would also notify the household, as it does now, of the household's rights to a fair hearing, continued benefits, and further information from the State agency.

Beyond this minimum, the Department proposes that the State agency provide the household with as specific information as the State agency can reasonably give. This would not be an encouragement to provide specific information; it would be a requirement.

There are many kinds of specific information which the State agency could provide, including the household's new benefit or individual notice to a household that its benefits will be reduced or terminated. The State agency may also be able to provide a general explanation of the change, even if it cannot notify specific households of specific effects.

Timing. The Department is proposing that the State agency shall, at a minimum, inform the household of the mass change no later than the household's scheduled issuance date. Beyond this minimum, the Department proposes that the State agency provide the household with as much advance notice as the State agency can reasonably give. This would not be an encouragement to provide early information; it would be a requirement. The State agency would not be required to provide information any earlier than ten days before the effective date of the change.

Conflicts between content and timing. It is clear that there may be, at times, an inverse relationship between content and timing. That is, the State agency may be able to provide specific information, but only at the last minute. Conversely, the State agency may be able to provide early notice, ten days before the effective date. However, the early notice may turn out to be only general.

The Department proposes that, when such a conflict occurs, the State agency resolve it in favor of more specific information with less advance notice. The Department is concerned that a household be able to make an informed decision as to the accuracy of a mass change when applied to itself. An informed decision depends upon the household's having adequate knowledge of the change.

If the specific information arrives as late as the issuance, the household will then be able to decide whether the State agency's action is right or wrong. Under the Department's proposal, the household can ask for a fair hearing. If the household is entitled to continued benefits, the State agency would reinstate the household's allotment to its prior level by the issuance date or within five working days, whichever is later.

Continuation of Benefits. (§ 273.12(e)(7)). The current regulations limit the times when a household can obtain continued benefits after it requests a fair hearing about a mass change. Specifically, according to § 273.15(k)(1), there are two conditions to continued benefits, either of which the household must meet. Because the policy concerning continued benefits is not clearly stated in § 273.12(e), the Department proposes to restate the current policy. A household would be entitled to a continuation of benefits only if the fair hearing request is based on either of two specific conditions. The first condition is that there was an error in arithmetic. For example, the State agency may have incorrectly computed the household's earned income deduction, calculating that 18 percent of $200 in wages was $30. If that incorrect calculation were appealed, the household could receive continued benefits while awaiting the fair hearing decision. The second condition is that the State agency misinterpreted or misapplied Federal policy. For example, a household contained a member 70 years of age (entitling the household to the net income eligibility limit) and the State agency terminated the household because its gross income was too high, the household could receive continued benefits while appealing. As with any continued benefits, the household may not receive them after the end of its certification period.

Because a household may not receive its notice until its issuance date, the household may not request a fair hearing until after it has already received its allotment. In such an instance, the State agency would reinstate the household's benefits to its prior level. Reinstatement would be the means of continuing the household's benefits.

Miscellaneous provisions. The Department proposes to amend the introductory sentences in § 273.12(e) on three points. First, this paragraph now specifies that Social Security is the Retirement, Survivors, and Disability Insurance (RSDI) program and that SSI means the Supplemental Security Income program. The second miscellaneous change is that the references to fair hearings during a mass change are gathered into one paragraph for the sake of clarity. The third miscellaneous change would be the deletion of § 273.12(e)(2)(ii). This paragraph is unnecessary, since a separate description of the notice would be added.

Notice of Adverse Action (§ 273.13)

The Department is making two changes in the regulations concerning notices of adverse action. These changes simplify the process of making changes.

Voluntary Termination. (§ 273.13 (b)(12)). Currently, the State agency must notify a household at least ten days before its participation is terminated. This is the case even if the household requests the termination. If the household requests termination on April 25, and the State provides advance notice on that day, the ten day period

would expire on May 5. If the household's next issuance date is May 1, the State agency cannot stop that allotment. The ten day period gives the household an opportunity to reconsider its withdrawal from the program.

The Department believes that a notice of adverse action is not productive in this situation. The State agency is terminating the household's participation only because the household has requested it. In this situation there is no question of the household's eligibility or its benefit level. The notice requirement serves only to produce more paperwork for the recipient and the State agency, and to delay the termination. Therefore, the Department proposes to exempt voluntary terminations from the requirement that a notice of adverse action be sent. This exemption applies only in cases where the household specifically requests the termination of its participation in writing or in person. This exemption does not apply when the household reports a change in circumstances which results in termination.

Moving from the Project Area. (§ 273.13(b)(13)). Currently, the regulations require a State agency to terminate participation, without notice, when a household has already moved from the project area (7 CFR 273.13(b)(3). The Department does not proposed to change this procedure.

The Department does propose to add a new procedure to use when a household reports that it will move from the project area. If the household will not be able to obtain its coupons because it will not be residing in the project area, the State agency would terminate the household's participation without notifying the household in advance.

This new procedure is meant to deal with the problem of issuing coupons (through direct mailing) and Authorization to Participate (ATP) cards to households which no longer reside in the project area and therefore cannot obtain them. The coupons and ATP cards can be used improperly by persons who wish to abuse the Food Stamp Program. When advance notice of the termination is required, the State agency now must issue benefits if the household reports its future move and leaves the project area in fewer than ten days before its next issuance.

Therefore, the Department proposes that the State agency not provide advance notice. However the State agency would provide notice. The notice would arrive no later than the issuance date. The notice would explain the termination, its effective date, and the household's right to a fair hearing and continued benefits.

Implementation (§ 272.1)

The Department proposes to require State agencies to implement this amendment's provisions no later than the first day of the month 90 days after publication of the final rule.

List of Subjects

7 CFR Part 272.

Alaska, Civil rights, Food stamps, Grant programs—social programs, Records, Reporting requirements.

7 CFR Part 273.

Administrative practice and procedure, Aliens, Claims, Fraud, Grant programs-social programs, Penalties, Records, Reporting requirements, Social security, Students.

For the reasons set out in the preamble, the Department proposes to amend Parts 272 and 273 of Chapter II, Subtitle B, Title 7, Code of Federal Regulations, as follows.

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

1. In § 272.1, new paragraph (g) (56) is added to read as follows:

§ 272.1 General terms and conditions.

* * * * *

(g) *Implementation.* * * *

(56) *Amendment 238.* State agencies shall implement the mandatory provisions of this amendment no later than the first day of the month 90 days after publication of the final rule.

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLD

2. In § 273.12, the introductory text of paragraph (e) is revised; paragraph (e)(2)(ii) is removed; paragraph (e)(2)(iii) is redesignated as paragraph (e)(2)(ii); and new paragraphs (e)(5), (e)(6), and (e)(7) are added; the revisions and additions read as follows:

§ 273.12 Reporting changes.

* * * * *

(e) *Mass changes.* Certain changes are initiated by the State or Federal government which may effect the entire caseload or significant portions of the caseload. These changes include adjustments to the income eligibility standards, the shelter and dependent care deductions, the Thrifty Food Plan and the standard deduction; annual and seasonal adjustments to Retirement, Survivors, and Disability Insurance (RSDI), and Supplemental Security Income (SSI) and other Federal benefits; periodic adjustments to Aid to Families with Dependent Children (AFDC) or General Assistance (GA) payments; and other changes in the eligibility and benefit criteria based on legislative or regulatory changes.

* * * * *

(5) Notice for Mass Changes. When the State agency makes a mass change in food stamp elibility or benefits or conducts desk reviews in place of a mass change, it shall notify all households whose benefits are reduced or terminated, except for mass changes made under § 273.12(e)(1).

(i) At a minimum, the State agency shall inform the household of:

(A) The general nature of the change;

(B) Examples of the change's effect on households' allotments;

(C) The month in which the change will take effect;

(D) The household's right to a fair hearing; and

(E) The household's right to continued benefits.

(ii) In addition, the State agency shall provide the household with as much specific information about the change in the household's allotment as it can reasonably provide at the time the State agency mails the notice.

(iii) At a minimum, the State agency shall notify the household of the mass change on the date the household is scheduled to received the allotment which has been changed.

(iv) In addition, the State shall notify the household of the mass change as much before the household's scheduled issuance date as reasonably possible, although the notice need not be given any earlier than the time required for advance notice of adverse action.

(v) In the event the State agency cannot notify the household of the specific change before the change is effective, the State agency shall provide as specific notice as reasonably possible.

(6) *Fair hearings.* The household shall be entitled to request a fair hearing when it is aggrieved by the mass change.

(7) *Continuation of benefits.* A household which requests a fair hearing due to a mass change shall be entitled to continued benefits at its previous level only if the household meets three criteria:

(i) The household does not specifically waive its right to a continuation of benefits;

(ii) The household requests a fair hearing within the time period set by the State agency in accordance with § 273.13(a)(1); and

(iii) The household's fair hearing is based upon improper computation of

food stamp eligibility or benefits, or upon misapplication or misinterpretation of Federal law or regulation.

* * * * *

In § 273.13, new paragraph (12) and (13) are added to paragraph (b), to read as follows:

§273.13 Notice of adverse action

* * * * *

(b) Exemptions from notice.* * *

(12) The household voluntarily requests, in writing or in the presence of a caseworker, that its participation be terminated.

(13) The State agency determines, based on reliable information, that the household will not be residing in the project area and therefore will be unable to obtain its next allotment. When this occurs, the State agency shall notify the household no later than its next scheduled issuance date. While the State agency may notify the household before its next issuance date the State agency shall not delay terminating the household's participation in order to provide advance notice. The notice shall contain all the information required by paragraph (a)(2) of this section.

Agricultural Marketing Service

7 CFR Part 1011

Milk in Tennessee Valley Marketing Area; Proposed Temporary Revision of Shipping Percentage

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed temporary revision of rule.

SUMMARY: This notice invites written comments on a proposal that the supply plant shipping requirement under the Tennessee Valley Federal milk order be decreased temporarily for the months of January and February 1983. The temporary change was requested by the operator of a supply plant that is regulated as a pool plant by the Tennessee Valley order. The handler contends that the change is necessary to remove the need for its pool supply plant to incur the cost of uneconomic shipments of milk to maintain pool status for its plant during a period of supply imbalance.

DATE: Comments are due by January 4, 1983.

ADDRESS: Comments (two copies) should be filed with the Hearing Clerk, Room 1077 South Building, United States Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202–447–4829.

SUPPLEMENTARY INFORMATION: This proposed action has been reviewed under USDA procedures established to implement Executive Order 12291 and has been classified as a "non-major" action.

It has also been determined that the potential need for adjusting certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register.** However, this would not permit the completion of the procedure in time to give interested parties timely notice that the supply plant shipping requirement for January 1983 would be modified. The initial request for the action was received on December 10, 1982.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this proposed action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers.

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the provisions of § 1011.7(b) of the order, the temporary revision of certain provisions of the order regulating the handling of milk in the Tennessee Valley marketing area is being considered for the months of January and February 1983.

All persons who desire to submit written data, views or arguments in connection with the proposed revision should file the same with the Hearing Clerk, Room 1077, South Building, United States Department of Agriculture, Washington, D.C. 20250, not later than January 4, 1983. Please submit two copies of the documents filed. The period for filing views is being somewhat limited to enable the timely consideration of this matter since the proposed action would be applicable to milk shipments made during January 1983.

All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The provisions proposed to be revised are the supply plant shipping percentages set forth in § 1011.7(b) that are applicable during the months of January and February 1983. It has been requested that the shipping requirement be reduced from 60 percent to 50 percent for the two-month period. Section 1011.7(b) allows the Director of the Dairy Division to increase or decrease the applicable shipping percentage up to 10 percentage points in order to obtain needed shipments for the market or to prevent uneconomic shipments of milk to distributing plants.

Kraft, Inc., which operates a supply plant regulated by the Tennessee Valley order, has requested a temporary reduction in the supply plant shipping requirement of 10 percentage points. Kraft states that over the past year the Tennessee Valley market has experienced an increase in milk production without a corresponding increase in Class I sales. The handler claims that this marketwide development makes it difficult for its supply plant to meet the 60 percent shipping requirement without engaging in uneconomic shipments of milk if it wishes to maintain pool plant status. Kraft expects that the general imbalance of supply over demand in the Tennessee Valley market that led to a temporary reduction in the supply plant shipping requirements for October and November 1982 will continue through January and February 1983.

Under the circumstances described, it may be appropriate to reduce the pool supply plant shipping percentage for these months. The proposed temporary reduction in the shipping requirement could prevent uneconomic movements of milk merely for purposes of pool plant qualification. Also, the reduction could assure that producers who have been regularly associated with the fluid market can continue to share in the pool proceeds of the market.

List of Subjects in 7 CFR Part 1011

Milk marketing orders, Milk, Dairy products.

Signed at Washington, D.C., on: December 21, 1982.

Edward T. Coughlin,

Director, Dairy Division.

BILLING CODE 3410-02-M

DEPOSITORY INSTITUTIONS DEREGULATION COMMITTEE

12 CFR Part 1204

[Docket No. D-0031]

Deregulation of Deposit Rate Ceilings

AGENCY: Depository Institutions Deregulation Committee.

ACTION: Proposed rulemaking.

SUMMARY: As a result of the passage of the Garn-St Germain Depository Institutions Act of 1982, the Depository Institutions Deregulation Committee ("Committee") is requesting public comment on whether it should accelerate the deregulation of interest rate ceilings on deposits and should simplify other regulations on existing deposit categories. Specifically, the Committee requests comment on whether it should: (1) remove all interest rate ceilings immediately OR deregulate accounts with maturities of 91 days or more, except for a minimum early withdrawal penalty OR eliminate all existing time deposit categories with maturities of less than 91 days and extend the maximum maturity on the new Money Market Deposit Account (12 CFR 1204.122) to 91 days; (2) accelerate its current schedule for phasing out interest rate ceilings; (3) simplify the current rate ceiling schedules; (4) simplify interest rate ceilings and other characteristics on the 26-week money market certificate and the 91-day time deposit to make them more consistent; and (5) simplify and rationalize other features of account categories, such as minimum denomination and compounding of interest, to make them more consistent.

DATES: Comments must be received by February 1, 1983.

ADDRESS: Interested parties are invited to submit written data, views, or arguments regarding the proposal to Gordon Eastburn, Acting Executive Secretary, Depository Institutions Deregulation Committee, Room 1058, Department of the Treasury, 15th Street and Pennsylvania Avenue, NW., Washington, D.C. 20220. All material submitted should include the Docket Number D-0031. Such material will be made available for inspection and copying upon request except as provided in the Committee's Rules Regarding Availability of Information (12 CFR 1202.5).

FOR FURTHER INFORMATION CONTACT: Alan Priest, Attorney, Office of the Comptroller of the Currency (202/447-1880); F. Douglas Birdzell, Counsel, and Joseph A. DiNuzzo, Attorney, Federal Deposit Insurance Corporation (202/389-4147); Rebecca Laird, Senior Associate General Counsel, Federal Home Loan Bank Board (202/377-6446); John Harry Jorgenson, Senior Attorney, Board of Governors of the Federal Reserve System (202/452-3778); or Elaine Boutilier, Attorney-Adviser, Treasury Department (202/566-8737).

SUPPLEMENTARY INFORMATION: The Depository Institutions Deregulation Act of 1980 (Title II of Pub. L. No. 96-221; 12 U.S.C. 3501 *et seq.*) ("DIDA") was enacted to provide for the orderly phaseout and ultimate elimination of the limitations on the maximum rates of interest and dividends that may be paid on deposit accounts by depository institutions as rapidly as economic conditions warrant. Under the DIDA, the Committee is authorized to phase out interest rate ceilings by any one of a number of methods, including the elimination of interest rate limitations applicable to particular categories of accounts, the creation of new account categories not subject to interest rate limitations, or with interest rate ceilings set at market rates of interest, or any combination of the above.

The Garn-St Germain Depositing Institutions Act of 1982, Pub. L. 97-320 ("Garn-St Germain Act") amended the DIDA and required the Committee to authorize the new Money Market Deposit Account ("MMDA"). After taking public comment, the Committee on November 15, 1982, did create such an account to enable institutions to compete with money market mutual funds, effective December 14, 1982. (47 FR 53710 November 29, 1982) Section 326 of the Garn-St Germain Act requires that the interest rate differential in favor of thrifts be eliminated on or before January 1, 1984.

In March 1982, the Committee adopted a deregulation schedule that phases out interest rate ceilings beginning with longer-term time deposits. With the deregulation schedule in place, the focus of the Committee turned to short-term deposit instruments. Prevailing high interest rates had caused a continued erosion of low-cost deposits at banks and thrifts, as depositors sought market rates elsewhere, particularly through money market mutual funds ("MMFs"). The Committee addressed this problem by authorizing, effective May 1, 1982, a 91-day time deposit with a $7,500 minimum denomination indexed to the 91-day Treasury bill rate, and establishing effective September 1, 1982, a 7- to 31-day deposit account with a $20,000 minimum denomination, also indexed to the 91-day Treasury bill rate. On December 6, 1982, the Committee further deregulated short-term deposits by exempting from interest rate ceiling NOW accounts with average balances of $2,500 that are subject to certain of the restrictions that apply to the MMDA to be effective January 5, 1983. The Committee also reduced to $2,500 the minimum denomination on the 7- to 31-day, the 91-day, and the 26-week MMC categories of deposits, effective January 5, 1983, and eliminated the indexed ceiling on the 7- to 31-day account, effective on that date.

Because of the effect the statutory and regulatory changes summarized above may have on the mix of short-term and long-term deposits of depository institutions, the Committee requests comments on several proposals pertaining to existing interest rate ceilings and account characteristics. The Committee wishes to encourage interested parties to comment on the effect that these changes may have on earnings and liquidity.

Even if opposed to any changes or in favor of complete deregulation of interested rate ceilings, interested parties are requested to comment on changes that should be made if the Committee does decide to accelerate the schedule or to amend the short-term deposit ceiling rate schedules in order to simplify their characteristics and make them more consistent.

Current Ceiling Rate Structure (see Table 1): Under the current interest rate ceiling structure for deposits at federally insured commercial banks, savings and loan associations, and mutual savings banks, most of the interest rate ceilings on traditional, fixed-rate time deposits are superseded as a practical matter by account categories with indexed rates or with no rate ceiling. Also, the MMDA has no interest rate ceiling, and the 7- to 31-day account, effective January 5, 1983, will also have no interest rate ceiling. Deposit categories with maturities of 91 days, 6 months and 2½ to less than 3½ years are available, but such accounts are subject to rate ceilings tied to an index. Other categories with maturities between 31 days and 3½ years are subject to the fixed-rate ceiling schedule. With the exception of the 1½ year IRA/Keogh deposit category (which has a limited purpose), depository institutions cannot offer ceiling-free deposits with

maturities of between 31 days and 3½ years.

TABLE 1.—CURRENT TIME DEPOSIT CEILING RATE STRUCTURE [1]

Maturity of account	Commercial banks	S&Ls and MSBs
Fixed Ceilings		
14 to 89 days [2]	5½	(na).
90-day to 1 year [2]	5½	6.
1 to 2½ years	6	6½.
2½ to 4 years [2]	6½	6¾.
4 to 6 years [2]	7½	7½.
6 to 8 years [2]	7¾	7¾.
8 years and over [2]	7¾	8.
Indexed or Ceiling-Free		
1 to 31-day MMDA.	No ceiling	No ceiling.
7- to 31-day account [4]	No ceiling	No ceiling.
91-day account [5]	Indexed	Indexed.
6-month MMCD [5]	Indexed; ceiling rate does not decline below 7.75 percent.	Indexed; ceiling rate does not decline below 7.75 percent.
18-month IRA/ Keogh Account.	No ceiling	No ceiling.
2½-year to less than 3½-year [6]	Indexed; ceiling rate does not decline below 9.25 percent.	Indexed; ceiling rate does not decline below 9.50 percent.
3½-year or more [7]	No ceiling	No ceiling.

1. Does not describe all details of current ceiling rates.
2. Partially superseded by indexed accounts.
3. Completely superseded by indexed or ceilingless accounts.
4. Ceiling removed effective January 5, 1983.
5. See TABLE 3 for full detail of the index rate schedule for these accounts.
6. Indexed to average yield for Treasury securities with comparable remaining maturity. See 12 C.F.R. §1204.106. Effective April 1, 1983, this category becomes "1½ year to less than 2½ years."
7. These accounts have characteristics that distinguish them from fixed ceiling time deposits. See 12 C.F.R. § 1204.119. Effective April 1, 1983, this category becomes "2½ years or more."

Current Phaseout Schedule (see TABLE 2): The phaseout schedule adopted by the Committee in March of 1982 established a new deposit category with a maturity of 3½ years or more and no interest rate ceiling. Institutions were free to offer the deposit in any denomination but had to at least offer it in a $500 denomination. Under the schedule, the maturity of the instrument will be reduced annually by one year until March 31, 1986, at which time it will have the minimum maturity for time deposits (currently 14 days).

The gap between short-term and long-term ceiling-free deposits will be narrowed somewhat on April 1, 1983, when institutions will be able to offer ceiling-free deposits with maturities of 2½ years or more. However, a 31-day to 2½ year gap would remain, restricting depositors and institutions alike in their selection of ceiling-free accounts to those with very short, or with still relatively long, maturities. Since rate ceilings were initially intended to reduce the risks to institutions of offering short-term interest bearing deposits, and since, in any event, the existence of indexed rate ceilings in the near-term ceiling structure may induce institutions to shorten their liability structure unduly, the Committee believes it is appropriate to consider removing existing interest rate ceilings on longer-term deposits (or accelerating their removal) to allow institutions to offer a range of deposit instruments distinguished primarily by a negotiated rate and maturity. This is especially true since the short-term, ceiling-free accounts may be attractive enough to draw significant funds from longer-term indexed accounts. The flexibility of the management of depository institutions would also be increased by such an action.

TABLE 2.—CURRENT INTEREST RATE CEILING DEREGULATION SCHEDULE FOR INDEXED TIME DEPOSITS

Original maturity	Commercial bank ceiling	Thrift ceiling
Effective Apr. 1, 1983: 2½ years or more [1].	Ceiling eliminated	Ceiling eliminated.
1½ years to less than 2½ years [2].	Thrift rate less .25%.	Average yield for 1½ year Treasury securities.
Effective Apr. 1, 1984: 1½ years or more [3].	Ceiling eliminated	Ceiling eliminated.
Effective Apr. 1, 1985: 6 months or more [4].	....do	Do.
Effective Mar. 31, 1986, 14 days or more [5].	....do	Do.

Comments on Elimination or Acceleration of Ceilings

Elimination of Rate Ceilings: The Committee requests comment on whether to eliminate the current rate ceilings (TABLE 1) completely at its next meeting. The Committee is particularly interested in comments on the projected effect such as action would have on institutional earnings and deposit flows. While such an action would effectively eliminate the need for the various existing deposit categories, such as the 91-day, and the 26-week MMC and the short-term fixed-ceiling deposit categories, it would not actually eliminate these accounts. Institutions would probably want to retain some of these categories because they are currently popular with consumers. Eventually, however, the accounts will probably become obsolete like the longer-term fixed-ceiling time deposits shown in the top panel of TABLE 1. Further, while elimination of the rate ceiling structure would automatically remove any interest rate differentials on deposit categories in favor of thrift institutions, the elimination of all differentials must occur on or before January 1, 1984, under section 328 of the Garn-St Germain Act. Thus, if the Committee eliminated all existing ceilings at its next meeting, and assuming a delayed effective date, the elimination of the thrift differential would be accelerated by no more than nine months.

An alternative to the removal of the current rate ceiling structure was suggested to the Committee by the Federal Deposit Insurance Corporation ("FDIC"). The FDIC suggests that the Committee completely deregulate all time deposits with original maturities of 91 days or more by removing all interest rate ceilings and other restrictions (except for an early withdrawal penalty) on such time deposits. For such time deposits, if funds are withdrawn within the first 90 days of the deposit, a minimum early withdrawal penalty, requiring the forfeiture of one-month's interest (not to exceed the interest earned), would be imposed. This penalty would be necessary so that these totally deregulated time deposits can not be structured to provide instant liquidity. If withdrawal is permitted after the first 90 days, institutions would be permitted, but not required by regulation, to impose an early withdrawal penalty. The remaining rate structure on time deposits with maturities of 31 to 90 days would be phased out on March 31, 1986. Alternatively, the Federal Home Loan Bank Board suggested that all categories of time deposits with original maturities of 91 days or less be eliminated and that the maximum maturity of the money market deposit account be extended to 91 days from its current maximum of 31 days. The balance of the ceiling rate structure would be phased out as currently scheduled (TABLE 2).

Acceleration of Rate Schedule: As mentioned above, the Garn-St Germain Act accelerated the total elimination of the thrift differential from March 31, 1986, to on or before January 1, 1984 and directed the Committee to create the ceiling-free MMDA. Consistent with this Congressional acceleration of the phaseout of limitations on the payment of interest, the Committee also requests comment on accelerating its current schedule (TABLE 2) for phasing out ceilings in general in the event the Committee finds that total deregulation or the removal of ceilings is inappropriate at this time. For example, the entire schedule could be advanced one year so that elimination of all ceilings occurs on April 1, 1985, instead of March 31, 1986, or the one-year interval in TABLE 2 could be reduced to six months. The Committee could also accelerate the removal of ceilings on

longer-term deposits while keeping the short-term portion of the schedule intact. For example, it could accelerate deregulation of ceilings on deposits with maturities of 1½ years or more to April 1, 1983, from April 1, 1984, but leave deregulation of rate ceilings on deposits with maturities of 6 months to 1½ years until the currently scheduled date of April 1, 1985.

Comments on Simplification

In addition to requesting comment on deregulation in general, the Committee also requests comments on how it could simplify current ceiling rate schedules and current account characteristics. The Committee also requests comment on whether it should rescind ceilings on fixed-rate deposits that have been or will be, superseded by indexed or ceiling-free account categories (TABLE 1). The Committee also requests comment on whether it should promptly extend indexing to all categories of fixed-rate deposits that have not yet been superseded by indexed ceilings or by removal of ceilings (TABLE 1). Ceilings on these newly indexed accounts would be phased out in accordance with the schedule on TABLE 2.

Short-Term Deposit Rate Schedule (TABLE 3): The current ceiling rate structure for the 26-week money market certificate is presented in the top portion of TABLE 3. The schedule is rather complex in that two alternative index rates are used—the most recent auction rate on 6-month Treasury bills or an average of the bill rates at the four most recent auctions—and the formula for determining the ceiling rate changes at five different levels of the index rate.

TABLE 3—CURRENT CEILING SCHEDULES FOR SHORT-TERM DEPOSIT ACCOUNTS

Index rate [1]	Commercial bank ceiling	Thrift ceiling	Differential
26-week money market certificates:			
Greater than 8.75 percent	Index rate +0.25	Index rate +0.25	0.
8.5 to 8.75	Index rate +0.25	9.0	0 to 0.25.
7.5 to 8.5	Index rate +0.25	Index rate +0.50	[illegible]
7.25 to 7.5	7.75	Index rate +0.50	0.25 to 0.
Less than 7.25	7.75	7.75	0.
91-day account:			
Greater than 9.0 percent [2]	Index rate −0.25	Index rate	0.25.
9.0 percent or below [3]	Index rate	Index rate	0
7- to 31-day account [4]	No ceiling	No ceiling	[illegible]

[1] The index rate for the 26-week MMC is the higher of the most recent auction rate (auction average, discount basis) on 6-month Treasury bills or an average of the four most recent auction rates. The index rate on the 91-day account is the most recent auction rate (auction average, discount basis) on 3-month Treasury bills.
[2] The differential is scheduled to be removed on May 1, 1983. At that time, all institutions will be able to pay the index rate at all interest rate levels.
[3] The index must be 9.0 percent or below for four consecutive auctions.
[4] At its December 6, 1982 meeting, the Committee determined that, effective January 5, 1983, the 7- to 31-day account would become ceiling free. This action was taken because the ceiling (indexed to the 91-day Treasury bill rate) became meaningless with the authorization of the new money market deposit account, which is ceiling free.

The methods of establishing the ceilings on the newer 91-day account (authorized beginning in May 1982) is less complex than the MMC, with the formula for determining the ceiling rate at various index rate levels changing only once, namely, when the 3-month Treasury bill rate reaches 9.0 percent (middle portion of TABLE 3). In addition to different ceiling rate structures, the thrift differential is applied inconsistently to these accounts. It is added to the index rate in the case of the 26-week MMC but is deducted from the index in the case of the 91-day deposit. Moreover, in the case of the 26-week MMC the differential is removed if the index rate goes above 8.75 percent and is removed on the 91-day account when the index rate falls below 9 per cent. However, the differential on the 91-day account is scheduled to be eliminated on May 1, 1983, so conforming this feature on these two accounts solely for the purpose of consistency may be unnecessary.

The different methods of calculating the ceilings on the MMC and the 91-day instrument have resulted in a confusing, and in some instances an inconsistent, situation. Therefore, the Committee requests comment on whether and how this schedule should be revised.

Simplification of Other Account Characteristics (TABLE 4): Even if the Committee determines to make no changes to the short-term rate ceiling schedule, other characteristics of the short-term deposit categories could be made more consistent in order to simplify the current account structure. Some of the differences in the short-term deposit accounts are presented in TABLE 4.

TABLE 4—SELECTED CHARACTERISTICS OF SHORT-TERM DEPOSIT ACCOUNTS

Characteristic	26-week MMC	91-day account	7- to 31-day account
Minimum denomination	$2,500 [1]	$2,500 [1]	$2,500 [1]
Loophole loans	Permitted	Prohibited	Prohibited.
Index rate	6-mo bill rate or 4-week average of bill rates.	3-mo bill rate	NA.
Relation between index rate and ceiling rate.	Presented in table 1	Presented in table 1	NA.
Minimum ceiling	7.75 percent	None	None.
Compounding	Prohibited [2]	Prohibited [3]	Unrestricted.
Differential	When index rate is between 7.25 and 8.75 percent. [4]	When index rate is above 9 percent. [5]	NA.
Differential on IRA/Keogh accounts and deposits of governmental units.	Banks may pay the thrift rate for these deposits.	Differential applies to these deposits.	NA.
Scheduled elimination of differential.	Dec. 31, 1983 [6]	May 1, 1983	
Scheduled elimination of ceiling	Apr. 1, 1985	Mar. 31, 1986	

[1] Effective Jan. 5, 1982.
[2] Although compounding is prohibited, a saver effectively will receive semiannual compounding if the original deposit plus interest is reinvested in another MMC at maturity.
[3] Although compounding is prohibited, a saver effectively will receive quarterly compounding if the original deposit plus interest is reinvested in another 91-day certificate at maturity.
[4] The full 25 basis point differential is in effect only when the index rate is between 7.5 and 8.5 percent.
[5] Scheduled to be eliminated May 1, 1983.
[6] Prior to the passage of the Garn-St Germain Depository Institutions Act, this differential was scheduled to be eliminated on April 1, 1985.

In view of these complexities, the Committee requests comment on whether changes should be made to the existing regulations authorizing these accounts in order to make the regulations less cumberesome and more uniform. The Committee is particularly interested in comments on (1) the relation between the index rate and the ceiling rate, (2) the thrift ceiling rate differential, (3) loophole loans, (4) the use of the four-week average method of calculating the MMC ceiling, and (5) the frequency of compounding that is permitted.

The Committee also requests comment on whether it should phase out minimum denomination requirements. For example, combining the phaseout of the minimum denomination on the MMDA and other short-term accounts with the Committee's current rate deregulation schedule would have the effect of phasing out passbook and NOW account ceiling rates as well as the minimum denomination on NOW accounts exempt from rate ceilings. Ceilings on savings account and on NOW accounts not subject to a minimum denomination requirement are not eliminated until March 31, 1986 under the Committee's current phaseout schedule. As the minimum denomination of indexed or ceiling-free, short-term time deposits is reduced under a phaseout schedule, the ceiling rate on savings and NOW accounts would become less binding, and more depositors would become eligible for the higher rate. For example, the $2,500 minimum denomination on the MMDA, NOW accounts exempt from rate ceilings, the 7- to 31-day account, the 91-day account, and the 26-week MMC could be reduced $500 or $1,000 at the time of each interest rate ceiling adjustment. At the next such adjustment, scheduled for April 1, 1983, the minimum denomination on such accounts could be reduced to $1,500. Subsequent periodic reductions would occur until no minimum denomination would be required on any deposit category.

Outline of Possible Options on Which Comment is Requested

A summary of the options, disscussed above, or possible Committee action is presented in an outline form below.

Elimination of Interest Rate Ceilings

1. Should the Committee eliminate the current interest rate ceiling structure (TABLE 1)?

a. Should the Committee eliminate all remaining interest rate ceilings immediately?

b. Should the Committee adopt the FDIC proposal and remove interest rate ceilings and all other restrictions on deposits with original maturities of 91 days or more, except for an early withdrawal penalty for withdrawals made in the first 90 days of the deposit?

c. Should the Committee adopt the FHLBB suggestion by extending the maximum maturity on money deposit accounts to 91 days and eliminating all competing categories of short-term deposits and let the current schedule apply otherwise?

d. What other methods of eliminating current ceilings should the Committee consider?

Acceleration of the Current Rate Phaseout Schedule (Table 2)

2. Should the Committee accelerate the current phaseout schedule (Table 2)?

a. Should the Committee simply advance each date in Table 2 by six months or a year or by some other period?

b. Should the Committee accelerate the long-term phaseout schedule (i.e., move up deregulation of deposits with original maturities of 1½ years or more) but allow the deregulation schedule for all other time deposits to remain intact (i.e. 91-days to 1 year)?

c. What other methods of accelerating deregulation should the Committee consider?

Simplification of Interest Rate Ceilings

3. If the Committee does not eliminate or accelerate the phaseout of interest rate ceilings in general, should the Committee make changes to the rate ceiling schedule for any category of time deposits (Table 1)?

a. Should all indexed accounts (middle of Table 1 and Table 3) become ceiling-free when their base rate is at 9 per cent or below (or at some other base rate) for four consecutive auctions (or for some other period)?

b. Should indexed accounts have a minimum ceiling that remains at 9 per cent (or some other rate) if the auction rate is at or below a rate of 9 per cent?

c. Should the elimination of the thrift differential be accelerated from its current statutory elimination on December 31, 1983?

d. Should the Committee rescind existing rate ceilings on all fixed-ceiling time deposits that are now, or in the future will be, superseded by indexed or ceiling-free accounts? (See footnotes 2 & 3 to Table 1)

e. Should existing ceilings on fixed-rate accounts (top of TABLE 1) be eliminated and replaced by appropriate market rate indexing (bottom of TABLE 1), which would then be subject to the phaseout schedule (TABLE 2)?

f. What other options for simplifying ceilings should the Committee consider?

Simplification and Rationalization of Interest Rate Ceilings and Other Characteristics of the 26-week MMC and the 91-day Account

4. If the Committee does not make changes to the rate ceiling schedule for deposits in general (No. 3, above), should it make changes to the 26-week MMC and the 91-day account (TABLE 3)?

a. Should a Committee remove the interest rate ceilings on the 26-week money market certificate and the 91-day account as it did for the 7- to 31-day account at its last meeting?

b. Should the 26-week MMC and the 91-day account become ceiling-free

when the rate on U.S. Treasury bills is at 9 percent or below (or at some other rate) for four consecutive auctions (or for some other period)?

c. Should the 26-week MMC and the 91-day account have a minimum ceiling that remains at 9 percent (or at some other rate) if the auction rate is below a rate of 9 percent (or at some other rate)?

d. Should the Committee eliminate the 7.75 percent minimum ceiling for the 26-week MMC?

e. Should the phaseout of the differential on 26-week MMCs, currently scheduled for December 31, 1983, be accelerated to May 1, 1983, to conform to the phaseout date for the differential on the 91-day account?

f. Should commercial banks be permitted to pay the thrift ceiling rate on maturing 26-week MMCs in order to enable them to compete more effectively for such deposits upon maturity?

g. Should the Committee rescind the amendment on the 26-week MMC which permits the ceiling to be the higher of the auction average or a 4-week average of the auction rates?

h. What other options concerning changes to the ceiling rates on these accounts should the Committee consider?

Simplification of Characteristics of Deposit Categories

5. If the Committee does not make changes to the schedule for deregulating rates in general, should it make changes to the primary characteristics of short-term deposits (TABLE 4)?

a. Should the Committee permit loans to meet the minimum denomination requirements on all accounts *OR* should it prohibit such loans on all accounts?

b. Should the Committee establish a schedule for phasing out all minimum denomination requirements (such as reducing the minimum by $500 or $1,000 on each scheduled interest rate phaseout date) *OR* should it eliminate such requirements immediately?

c. Should the Committee permit compounding on the 26-week MMC and the 91-day account as is currently permitted on all other interest-bearing accounts?

d. Should commercial banks be permitted to pay the ceiling rate for thrifts on *IRA/Keogh* and *governmental unit* deposits?

e. What other changes to the characteristics of these accounts should the Committee consider?

The Committee wishes to encourage interested parties to comment on the effect these changes may have on earnings and liquidity. Even if opposed to any changes or in favor of complete deregulation of interest rate ceilings, interested parties should comment on specific changes that they believe should be made if the Committee does decide to accelerate the schedule or to amend the short-time deposit ceiling rate schedules in order to simplify and make their characteristics more consistent.

List of Subjects in 12 CFR Part 1204

Banks, Banking.

By order of the Committee, December 22, 1982.

Mark Bender,

Acting Executive Secretary.

BILLING CODE 4810-25-M

CIVIL AERONAUTICS BOARD

14 CFR Parts 241, 248, 291 and 297

[Econ. Regs. Docket 41147; EDR-450]

Uniform System of Accounts and Reports for Certificated Air Carriers; Submission of Audit and Reconciliation Reports; Domestic Cargo Transportation; and Foreign Air Freight Forwarders and Foreign Cooperative Shippers Associations

Dated: December 16, 1982.

AGENCY: Civil Aeronautics Board.

ACTION: Notice of proposed rulemaking.

SUMMARY: The CAB proposes to eliminate reporting requirements for foreign air freight forwarders and to revise reports required of all-cargo carriers. The CAB also proposes to eliminate the reconciliation report required of certificated air carriers. This information is no longer needed by the CAB and their elimination will reduce burdens on these carriers.

DATE: Comments by February 28, 1983.

Comments and relevant information received after this date will be considered by the Board only to the extent practicable.

Requests to be put on Service List by January 12, 1983.

The Docket Section prepares the Service List and sends it to each person listed on it, who then serves comments on others on the list.

ADDRESSES: Twenty copies of comments should be sent to Docket 41147, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C., as soon as they are received.

FOR FURTHER INFORMATION CONTACT:

Jack Calloway, Office of the Comptroller, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428; 202-673-6042, or David Schaffer, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428; 202-673-5442.

SUPPLEMENTARY INFORMATION:

The Paperwork Reduction Act of 1980, Pub. L. 96-511 (PRA) took effect on April 1, 1981. The law has two general objectives: 1) insure that agencies make only necessary information request of the public, and 2) eliminate those reporting burdens that are found to be unnecessary. It establishes a goal of reducing the existing paperwork burden by 25 percent in 3 years, and consolidates information policy functions within the Office of Management and Budget (OMB).

In light of the impending "sunset" of the CAB, and later, in view of the PRA, the Board has been reviewing the need for its reporting requirements and information systems. The purpose of this review has been to determine which reporting requirements could be eliminated or reduced at or before sunset and which should be transferred to other agencies. Decisions are based on whether the regulatory program that a reporting requirement supports transfers at sunset or expires, and on whether there is still a regulatory need for the report. The conclusions of this review are contained in the staff report "CAB Information Systems and Early Sunset" (Docket 40024), which the Board approved for public release on September 15, 1981.

The Board sent the staff report to the heads of other Federal agencies for their comments before rulemakings were initiated. It recognized that these agencies also use CAB data and that changing the data collection system might impair their programs. The Board also sent the staff report to airline presidents, State aeronautics agencies, hub airport executives and about 275 other interested persons to obtain their views and to let them know that the Board might stop collecting data that they are relying on.

Based on its review of the comments received, the Board has tentatively decided to eliminate some reporting requirements and to reduce the scope of others. In this notice, the Board proposed to eliminate two reporting requirements and to reduce one other. These are: (1) The report required of

foreign air freight forwarders and cooperative shippers associations under 14 CFR Part 297; (2) the special report under 14 CFR Part 248 reconciling a carrier's audited balance sheet and income statement with like statements in the Form 41 report, and 3) the report required of all-cargo carriers under 14 CFR Parts 241 and 291.

Foreign Indirect Carriers

Foreign indirect carriers of property (air freight forwarders and cooperative shippers associations) are required by § 297.40 of the Board's rules to file a Financial and Operating Report (CAB Form 296R) by February 15 of each year. This section requires the reporting of gross air freight forwarding revenues, gross air freight forwarding expenses, net income (loss) from forwarding operations, and the number of shipments and number of tons of air freight received from customers as an indirect air carrier.

The Board has been moving to reduce its oversight of the activities of indirect air carriers of property. In ER–1094, 44 FR 6634, February 1, 1979, the Board significantly liberalized its rules governing these carriers. In ER–1159, 44 FR 69633, December 4, 1979, the Board adopted similar rules for foreign air freight forwarders and cooperative shippers associations. This action was taken to place U.S. and foreign indirect air carriers on an equal competitive footing. Both rules included the reporting requirements described above. The Board stated in ER–1094 that these requirements were necessary to monitor the industry during the initial stages of deregulation, and that they would be phased out completely in the future. By ER–1261, 46 FR 54726, November 4, 1981, the Board eliminated these reporting requirements for U.S. indirect air carriers of property. This notice proposes to accord equal treatment to foreign ones. The Board no longer has any need for this report. The reporting requirements of § 297.40 are waived pending the completion of this rulemaking.

All-Cargo Carriers

Part 291 of the Board's rules (14 CFR Part 291) applies to domestic cargo transportation by air carriers certificated under sections 401 or 418 of the Act. Subpart E of that part sets forth reporting requirements for these carriers. Section 291.41 states that carriers operating under section 401 certificate must comply with the reporting requirements of 14 CFR Part 241. The reporting obligations of carriers operating under a section 418 certificate are governed by Part 291, specifically § 291.42. If a carrier holds both a 401 and 418 certificate it is presumed to be operating under the section 418 certificate (see § 291.20) unless it is also conducting passenger or international operations.

The staff report recommended that the reporting requirement for 418 carriers in § 291.42 be eliminated. It recommended that these carriers file instead a balance sheet, an income statement, and a summary statistical schedule under Part 241 if they operate large aircraft (aircraft with a capacity of more than 18,000 pounds). Carriers operating small aircraft would not have had any reporting requirements. The reporting obligations of 401 carriers would not have been affected.

The reporting requirements were originally designed to monitor the growth and health of all-cargo carriers during the initial stages of cargo deregulation. It has now been more than 5 years since Congress passed the law deregulating all-cargo service (P.L. 96–163, November 9, 1977) and more than 4 years since the Board issued the rule substantially lessening the extent of its regulation of domestic cargo transportation (ER–1080, 43 FR 53628, November 16, 1978). The Board therefore would favor revoking § 291.42.

The Department of Transportation (DOT), however, has asked the Board not to eliminate all reporting by all-cargo carriers. It stated that it has a need to monitor the level of demand for air cargo activity. Since a substantial portion of this activity is conducted by all-cargo carriers, DOT considered some data reporting by these carriers to be essential. It called for a scaled-down version of the current reporting requirements.

Since DOT will administer most of the Board's remaining programs after sunset, the Board gives great weight to the views of that agency in these matters. The Board is therefore proposing to revise § 291.42 along the lines requested by DOT. Similar changes are proposed in the Schedule T–8 in Part 241 applicable to section 401 carriers. It will be less expensive to continue these reporting requirements in this way than to eliminate them, if DOT plans to reinstitute them later. Continuing these reporting requirements would also provide for continuity of the cargo data base. We are asking DOT to document for the record its need and economic justification for these report.

Under this proposal, the reporting obligations of section 418 all-cargo carriers would be reduced to nine items—three profit and loss items (total operating revenues, total operating expenses, and operating income or loss) and six traffic items (total revenue ton-miles, revenue tons enplaned, available ton-miles, aircraft miles flown, aircraft departures performed, and aircraft hours-airborne). This approximately an 85 percent reduction in the level of current reporting by these carriers.

Audit and Reconciliation Reports

Part 248 of the Board's rules (14 CFR Part 248) requires certificated carriers to submit to the Board, if an independent audit is made, two copies of the audit report. This part further requires each carrier to submit a special report reconciling the financial statements certified by a public accountant as part of the independent audit with those that the carrier filed with the Board as part of its Form 41 reports (§ 248.3). This reconciliation report was required to help resolve inconsistencies between the financial statements of the independent auditor and those in the Form 41 reports, and to help the Board detect possible inaccuracies in the Form 41 or violations of the uniform system of accounts.

The staff report recommended that the submission of the audit report be continued but that the reconciliation report be eliminated. No comments were received opposing these recommendations. The Board is therefore now proposing to eliminate § 248.3. Although there were formerly significant differences between the generally accepted accounting principles used by independent auditors and accounting principles that formed the basis for the Form 41 reports, this is no longer the case. By ER–980, 42 FR 19, January 3, 1977, the Board amended Part 241 of its rules (14 CFR Part 241) to minimize the differences between Board regulations and report forms on the one hand and generally accepted accounting principles on the other. This reduces the likelihood of inconsistencies between the financial statements of the independent auditor and those in the Form 41 reports.

We are also proposing to make a technical change in §§ 248.2 and 248.4 in light of recent staff reorganizations.

Regulatory Flexibility Act

In accordance with 5 U.S.C. §605(b), as added by the Regulatory Flexibility Act, Pub. L. 96–354, the Board certifies that this rule will not, if adopted as proposed, have a significant economic impact on a substantial number of small entities. Most of the entities affected by this proposal would be large certificated air carriers, and the effect of the change

will be a moderate reduction in reporting costs.

List of Subjects in 14 CFR Parts 241, 248, 291, and 297

Accounting, Air Carriers, Antitrust, Air transportation—foreign, Freight Forwarders, Insurance, Reporting requirements.

Accordingly, the Board proposes to amend Chapter II of 14 CFR, as follows:

PART 241—[AMENDED]

1. In Part 241, *Uniform System of Accounts and Reports for Certificated Air Carriers*, schedule T–8 of section 25 would be revised to read:

Section 25 Traffic and Capacity Elements

* * * * *

Schedule T–8—Report of all-cargo Operations.

(a) This schedule shall be filed semiannually by all air carriers holding section 401 certificates that conduct all-cargo operations under certificates issued under section 418 of the Act.

(b) Data reported on this schedule shall include only results of operations conducted in all-cargo aircraft. Data shall be segregated between domestic all-cargo operations conducted within the geographic limitations of section 418 certificates and all other all-cargo operations.

(c) Statement of operations. This statement shall include the following elements:

(1) Total operating revenue, categorized as follows:

(i) Transport revenues from the carriage of property in scheduled and nonscheduled service;

(ii) Transport revenues from the carriage of mail in scheduled and nonscheduled service; and

(iii) Transport-related revenues.

(2) Total operating expenses; and

(3) Operating profit or loss, computed by subtracting the total operating expenses from the total operating revenues.

(d) Summary of traffic and capacity statistics. This summary shall include the following elements:

(1) Total revenue ton-miles, which are the aircraft miles flown on each flight stage times the number of tons of revenue traffic carried on that stage. They shall be categorized as follows:

(i) Property; and

(ii) Mail.

(2) Revenue tons enplaned, reflecting the total revenue tons of cargo loaded on aircraft during the semiannual period;

(3) Available ton-miles, reflecting total revenue ton-miles available for all-cargo service during the semi-annual period, and computed by multiplying aircraft miles flown on each flight stage by the number of tons of aircraft capacity available for that stage;

(4) Aircraft miles flown, reflecting the total number of aircraft miles flown in cargo service during the semiannual period;

(5) Aircraft departures performed, reflecting the total number of take-offs performed in cargo service during the semiannual period; and

(6) Aircraft hours airborne, reflecting the aircraft hours of flight (from take-off to landing) performed in cargo service during the semiannual period.

PART 248—[AMENDED]

2. In Part 248, *Submission of Audit and Reconciliation Reports*, § 248.2 would be revised by replacing "Bureau of Accounts and Statistics" with "Office of Comptroller", as follows:

§ 248.2 Filing of audit reports.

(a) Whenever any air carrier subject to § 248.1 shall have caused an annual audit of its books, records, and accounts to be made by independent public accountants, such air carrier shall file with the Board's Office of the Comptroller, in duplicate, a special report consisting of a true and complete copy of the audit report submitted by such independent public accountants, including all schedules, exhibits, and certificates included in, attached to, or submitted with or separately as a part of, the audit report.

(b) Each air carrier subject to § 248.1 that does not cause an annual audit to be made of its books, records, and accounts for any fiscal year shall, at the close of such fiscal year file with the Board's Office of the Comptroller, as a part of its periodic reports, a statement that no such audit has been performed.

§ 248.3 [Removed and Reserved]

3. Also in Part 248, § 248.3, *Reconciliation of reports* would be removed and reserved.

4. Also in Part 248, § 248.4 would be revised by replacing "Bureau of Accounts and Statistics" with "Office of the Comptroller", as follows:

§ 248.4 Time for filing reports.

The report required by this part shall be filed with the Board's Office of Comptroller within 15 days after the due date of the appropriate periodic CAB Form 41 report, filed for the 12-month period covered by the audit report, or the date the accountant submits its audit report to the air carrier, whichever is later.

PART 291—[AMENDED]

5. In Part 291, *Domestic Cargo Transportation*, § 291.42 would be revised as follows:

§ 291.42 Section 418 financial and statistical reporting.

(a) General instructions.

(1) Carriers operating under section 418 certificates that are not subject to Part 241 of this chapter shall file Form 291, Statement of Operations and Statistics Summary for section 418 operations.

(2) The form required by this section shall be filed semiannually on February 10 and August 10 covering the six months ending December 31 and June 30 respectively. They shall be filed at the Office of the Comptroller, Information Management Division, B–46a, Civil Aeronautics Board, Washington, D.C. 20428.

(3) The carrier's chief accounting officer shall sign a certification attesting to the truth and completeness of the reports required by this section.

(b) Statement of Operations and Statistics Summary of section 418 operations. This statement shall include the following elements:

(1) Total operating revenue, categorized as follows:

(i) Transport revenues from the carriage of property in scheduled and nonscheduled service;

(ii) Transport revenues from the carriage of mail in scheduled and nonscheduled service; and

(iii) Transport-related revenues.

(2) Total operating expenses; and

(3) Operating profit or loss, computed by subtracting the total operating expenses from the total operating revenues.

(c) Summary of traffic and capacity statistics. This summary shall include the following elements:

(1) Total revenue ton-miles, which are the aircraft miles flown on each flight stage times the number of tons of revenue traffic carried on that stage. They shall be categorized as follows:

(i) Property; and

(ii) Mail.

(2) Revenue tons enplaned, reflecting the total revenue tons of cargo loaded on aircraft during the semiannual period;

(3) Available ton-miles, reflecting the total revenue ton-miles available for all-cargo service during the semiannual period, and computed by multiplying aircraft miles flown on each flight stage

by the number of tons of aircraft capacity available for that stage;

(4) Aircraft miles flown, reflecting the total number of aircraft miles flown in cargo service during the semiannual period;

(5) Aircraft departures performed, reflecting the total number of take-offs performed in cargo service during the semiannual period; and

(6) Aircraft hours airborne, reflecting the aircraft hours of flight (from take-off to landing) performed in cargo service during the semiannual period.

PART 297—[AMENDED]

Subpart E—[Reserved]

6. In Part 297, *Foreign Air Freight Forwarders and Foreign Cooperative Shippers Associations*, Subpart E, *Reporting Requirements*, would be removed and reserved.

(Secs. 204, 401, 407, 416, 418, 1601, P.L. 85–726, 72 Stat. 743, 754, 766, 771, 91 Stat. 1284, 92 Stat. 1744; 49 U.S.C. 1324, 1371, 1377, 1386, 1388, 1551.)

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

Topical Antifungal, Topical Antimicrobial, External Analgesic, and Skin Protectant Drug Products for Over-the-Counter Human Use; Advance Notices of Proposed Rulemaking; Extension of Time for Comments and Reply Comments

AGENCY: Food and Drug Administration.

ACTION: Advance notices of proposed rulemaking; extension of comment periods.

SUMMARY: The Food and Drug Administration (FDA) is extending the comment periods to February 4, 1983, and the reply comment periods to March 7, 1983, for the advance notices of proposed rulemaking to establish conditions for the safety, effectiveness, and labeling of over-the-counter (OTC) topical antifungal, topical antimicrobial, external analgesic, and skin protectant drug products as the relate to OTC diaper rash drug products. FDA is taking this action in response to a request to allow more time for interested persons to address adequately issues related to diaper rash drug products as a product category and to consult experts so that more informed comments may be submitted to FDA.

DATES: Written comments by February 4, 1983, and reply comments by March 7, 1983.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: William E. Gilbertson, National Center for Drugs and Biologics (HFN-510), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4960.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of September 7, 1982 (47 FR 39408, 39412, 39436, and 39464), FDA issued four advance notices of proposed rulemaking to establish conditions under which OTC topical antifungal, topical antimicrobial, external analgesic, and skin protectant drug products used (1) For the treatment of diaper rash; (2) for the prevention of poison ivy, oak, and sumac; (3) for the treatment of fever blisters; (4) as male genital desensitizers; (5) as astrigents; and (6) as insect bite neutralizers are generally recognized as safe and effective and not misbranded. These notices reopened the administrative records for OTC topical antifungal, topical antimicrobial, external analgesic, and skin protectant drug products to allow for consideration of recommendations on drug products for the six drug categories listed above that were received from the Advisory Review Panel on OTC Miscellaneous External Drug Products. These notices relate to the development of monographs for topical antifungal, topical antimicrobial, external analgesic, and skin protectant drug products in general, as part of the ongoing review of OTC drug products conducted by FDA. Interested persons were given until December 6, 1982 to comment on each advance notice of proposed rulemaking and until January 5, 1983 for reply comments. FDA advised that comments and reply comments were limited to those that relate to drug products for the six drug categories listed above.

In response to the advance notices of proposed rulemaking, The Proprietary Association requested a 60-day extension of the comment periods in order to allow adequate time for the association to address what it considered a number of unique and unexpected problems concerning OTC drug products for the treatment of diaper rash. The Proprietary Association stated that, because categorization of data and a proposed monograph were not included in the Panel's statement on diaper rash drug products, and because of the complexity of the subject of diaper rash and diaper rash drug products, more time was needed by member company experts and outside consultants to study adequately and consider the best options for handling these products in the OTC drug review process.

FDA has carefully considered the request. The agency believes that information described in the request may be of assistance in adequately establishing the safety and effectiveness of OTC topical antifungal, topical antimicrobial, external analgesic, and skin protectant drug products used for the treatment of diaper rash and is in the public interest. The agency considers a general extension of the comment periods for 60 days to be appropriate. This extension applies only to comments on diaper rash drug products. Accordingly, the comment periods for submissions by any interested person are extended to February 4, 1983 and the reply comment periods are extended to March 7, 1983. Interested persons may submit to the Dockets Management Branch (address above) written comments regarding these advance notices of proposed rulemaking as they relate to OTC diaper rash drug products. Three copies of any comments are to be submitted, except that individuals may submit one copy. Comments may be seen in the Dockets Management Branch betwen 9 a.m. and 4 p.m., Monday through Friday.

Dated: December 22, 1982.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 82-35205 Filed 12-23-82; 11:48 am]

21 CFR Part 356

[Docket No. 81N-0033]

Oral Health Care Drug Products for Over-the-Counter Human Use; Advance Notice of Proposed Rulemaking; Extension of Time for Reply Comments

AGENCY: Food and Drug Administration.

ACTION: Advance notice of proposed rulemaking; extension of reply comment period.

SUMMARY: The Food and Drug Administration (FDA) is extending to January 21, 1983, the reply comment period for the advance notice of proposed rulemaking to establish conditions for the safety, effectiveness, and labeling of over-the-counter (OTC) oral health care drug products. FDA is taking this action in response to a request to allow more time for interested persons to address adequately several important issues raised during the comment period.

DATE: Written reply comments by January 21, 1983.

ADDRESS: Written reply comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: William E Gilbertson, National Center for Drugs and Biologics (HFN–510), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4960.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of July 30, 1982 (47 FR 32953), FDA issued an extension of comment periods for an advance notice of proposed rulemaking to establish conditions for the safety, effectiveness, and labeling of oral health care drug products for OTC human use. This advance notice of proposed rulemaking, which was based on the recommendations of the Advisory Review Panel on OTC Oral Cavity Drug Products, is part of the ongoing review of OTC drug products conducted by FDA. Interested persons were given until November 22, 1982, to comment on the advance notice of proposed rulemaking and until December 22, 1982, for reply comments.

The Proprietary Association has requested a 60-day extension of the reply comment period in order to allow adequate time for the association to analyze and evaluate comments submitted in response to the advance notice of proposed rulemaking and to prepare reply comments. The association stated that as of December 2, 1982 all comments were not yet available at the Dockets Management Branch, and that the number and length of the comments available on December 2, 1982 were extensive. The association pointed out that the reply comment period runs through the holiday season when many member company employees are not available to analyze and evaluate the comments fully.

FDA has carefully considered the request. The agency believes that an extension of the reply comment period may be of assistance in establishing the safety and effectiveness of OTC oral health care drug products and is in the public interest. Because the comment and reply comment periods have already been extended once and because the submitted comments are now available at the Dockets Management Branch, the agency considers an additional extension of 20 days for the reply comment period to be appropriate. Accordingly, the reply comment period for submissions by any interested person is extended to January 21, 1983. Interested persons may submit to the Dockets Management Branch (address above) written reply comments to comments submitted in response to the advance notice of proposed rulemking. Three copies of any reply comments are to be submitted, except that individuals may submit one copy. Comments and reply comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: December 21, 1982.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4150–01–M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1910

[Docket No. S–010]

Servicing of Multi-Piece and Single Piece Rim Wheels; Extension of Comment Period

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Extension of time for submission of written comments.

SUMMARY: This notice extends the comment period for written responses to the questions OSHA presented in the notice of proposed rulemaking: "Servicing of Multi-Piece and Single Piece Rim Wheels" (47 FR 51159, November 12, 1982).

DATES: Written responsés to the November 12, 1982 notice must submitted on or before January 26, 1983.

ADDRESS: Comments and hearing requests should be sent to: Docket Officer, Docket No. S–101, Room S–6212, U.S. Department of Labor, Washington, D.C. 20210 (202) 523–7894.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Sauger, U.S. Department of Labor—OSHA, Office of Mechanical Engineering Safety Standards, Room N–3506, Washington, D.C. 20210 (202) 523–7213.

SUPPLEMENTARY INFORMATION: On November 12, 1982, OSHA published in the **Federal Register** (47 FR 51159) a proposed rule, "Servicing of Multi-Piece and Single Piece Rim Wheels." In the proposed rule, OSHA included requirements for the training of all tire servicing employees, establishing a safe practice procedure for servicing single piece rim wheels, using restraining devices or other means of securing the rim wheel during inflation and using only matching rim wheel components (tires and rims). The proposal also contains several minor amendments to the provisions currently applicable to multi-piece rim wheel servicing operations.

In the notice, OSHA requested written responses to many general and special issues pertaining to multi-piece and single piece rim wheels. The written responses were to have been received December 27, 1982.

OSHA has been asked to extend the comment period to ensure that interested parties have sufficient time to compile data and prepare responses to the issues raised in the notice. OSHA believes that the information gathering process will be improved if all interested parties are granted additional time for submission of comments. Thus, OSHA has decided to extend the written comments period to January 26, 1983.

(Sec. 6, 84 Stat. 1593 (29 U.S.C. 655), 29 CFR Part 1911; Secretary of Labor's Order No. 8–76 (41 FR 25059))

Signed at Washington, D.C., this 22nd day of December 1982.

Thorne G. Auchter,

Assistant Secretary of Labor.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 913

Public Comment Procedures and Opportunity for Public Hearing on Modified Portions of Illinois Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed Rule.

SUMMARY: OSM is announcing procedures for the public comment period and for requesting a public hearing on the substantive adequacy of certain program amendments submitted by the State of Illinois to satisfy conditions imposed by the Secretary of the Interior on the approval of the Illinois permenent regulatory program (hereinafter referred to as the Illinois program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

This notice sets forth the times and locations that the Illinois program and the proposed amendments are available

for public inspection, the comment period during which interested persons may submit written comments on the proposed program elements and the procedures that will be followed for the public hearing.

DATES: Written comments must be received on or before 4:00 p.m., January 27, 1983, to be considered in the decision on whether the proposed amendments satisfy the conditions of approval.

A public hearing on the proposed modifications will be held only if requested. If no one requests a public hearing, none will be held. If only one person requests a public hearing, a public meeting rather than a public hearing may be held, and a summary of the meeting included in the Administrative Record. If a hearing is requested and scheduled, a notice announcing the time and location of the hearing will be published in the **Federal Register**. Requests for a public hearing should be directed to Daniel Jones at the address and phone number listed below by 4:00 p.m., January 12, 1983.

ADDRESSES: Written comments and requests for a hearing should be sent to: Daniel Jones, Field Office Director, Illinois Field Office, Office of Surface Mining, No. 4 Old Capitol Plaza North, Springfield, Illinois 62701, Telephone: (217) 492–4486.

Copies of the Illinois program, the proposed modifications to the program, a listing of any scheduled public meeting, and all written comments received in response to this notice will be available for public review at the OSM Field Office listed above and at the OSM Headquarters Office and the Office of the State regulatory authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays:

Office of Surface Mining, Administrative Record, Room 5315, 1100 L Street NW., Washington, D.C. 20240

Illinois Department of Mines and Minerals, 277 South 7th Street, Springfield, Illinois 62706.

FOR FURTHER INFORMATION CONTACT: Mr. Daniel Jones, Field Office Director, Illinois Field Office, Office of Surface Mining, No. 4 Old Capitol Plaza North, Springfield, Illinois 62701, Telephone: (217) 492–4486.

SUPPLEMENTARY INFORMATION:

Background:

The Illinois program was approved on June 1, 1982 (47 FR 23858–23883). The approval was conditioned on the correction of five minor deficiencies. In accepting the Secretary's conditional approval, Illinois agreed to correct deficiencies (a), (d), and (e) by December 1, 1982, and deficiencies (b) and (c) by June 1, 1983. Information pertinent to the general background, revisions, modifications, and amendments to the Illinois permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Illinois program can be found in the June 1, 1983 **Federal Register**.

Submissions of Amendments

Illinois has now submitted rules, by letter dated November 30, 1982, intended to satisfy conditions (a), (d), and (e).

(1) To satisfy condition (a), Illinois has amended its rules 1816.64(a) and 1817.65(a) as follows:

Section 1816.64 Use of explosives: Public notice of blasting schedule.

(a) Blasting schedule publication.

(1) Each person who conducts surface mining activities shall publish a blasting schedule at least 30 days, but not more than 60 days, before beginning a blasting program in which blasts that use more than 5 pounds of explosives or blasting agent are detonated. The blasting schedule shall be published in a newspaper of general circulation in a locality of the blasting site.

Section 1817.65 Use of explosives: Surface blasting requriements.

(a) A resident or owner of a dwelling or structure that is located within one-half mile of any area affected by any surface blasting event shall be notified in writing at least 30 days, but not more than 60 days, before beginning a blasting program in which blasts that use more than 25 pounds of explosives or blasting agent are detonated. Such notification shall be accompanied by information advising the owner or resident how to request a pre-blast or condition survey.

(2) To satisfy condition (d), Illinois has amended its rule 1807.11(d) as follows:

Section 1807.11 Procedures for seeking release of performance bond.

(d) Inspection by Department. The Department shall inspect and evaluate the reclamation work involved within 30 days after receiving a completed application for bond release, or as soon thereafter as weather conditions permit. The surface owner, or lessee, or agent thereof shall be given notice of such inspection, and may participate with the regulatory authority in making the bond release inspection.

(3) To satisfy condition (e), Illinois has amended its rule 1843.12(f) and added a new 1843.12(i) as follows:

Section 1843.12 Notices of violation.

(f) Circumstances which may qualify a surface coal mining operation for an abatement period of more than 90 days are:

(1) Where the permittee of an ongoing permitted operation has timely applied for and diligently pursued a permit renewal or other necessary approval of designs or plans but such permit or approval has not been or will not be issued within 90 days after a valid permit expires or is required, for reasons not within the control of the permittee;

(2) Where there is a valid judicial or administrative order precluding abatement within 90 days as to which the permittee has diligently pursued all rights of appeal and as to which he or she has no other effective legal remedy;

(3) Where the permittee cannot abate within 90 days due to a labor dispute;

(4) Where climatic conditions preclude abatement within 90 days, clearly:

(i) Would cause more environmental harm than would prevent; or

(ii) Requires action that would violate safety standards established by statute or regulation under the Mine Safety and Health Act.

(5) Where abatement of the violation within 90 days would create an imminent danger to the health or safety of the public or would cause, or could reasonably be expected to cause, significant imminent environmental harm to land, air, or water resources.

(i) *No extension granted under paragraph (h) exceed 90 days in length. Where the condition or circumstances which prevented abatement within 90 days exists at the expiration of any such extension, the permittee may request a further extension in accordance with the procedures of paragraph (h).*

The Secretary seeks public comment on whether the amendments satisfy conditions (a), (d), and (e). If the amendments are approved, conditions (a), (d), and (e) will be removed from the Illinois program.

Additional Determinations

National Environmental Policy Act

Pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), this rule is not a major Federal action and therefore no environmental impact statement, environmental assessment, or FONSI need be prepared on this rulemaking.

Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act 5 U.S.C. 601 et seq. I certify that this proposed rule will not have a significant

economic impact on a substantial number of small entities.

Executive Order 12291

On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 6 and 8 of Executive Order 12291 for all actions taken to approve or conditionally approve State programs, actions or amendments. Therefore, this proposed program amendment is exempt from the requirement to prepare a Regulatory Impact Analysis and regulatory review by OMB.

List of Subjects in 30 CFR Part 913

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: December 22, 1982.

30 CFR Part 936

Cancellation of Public Comment Period and Hearing on Oklahoma's Proposed Rules of Practice and Procedure

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed Rule; Cancellation of Public Comment Period and Hearing.

SUMMARY: On December 3, 1982, OSM announced the procedures for a public comment period and hearing on the substantive adequacy of Oklahoma's proposed Rules of Practice and Procedure. Those rules were intended to satisfy one of the conditions of the Secretary's approval of the Oklahoma State Program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

On December 20, 1982, OSM received from the Oklahoma Department of Mines a request that OSM withdraw the Rules of Practice and Procedure from consideration as a formal program amendment at this time for the reasons set forth later in this notice.

In response to Oklahoma's request, OSM hereby gives notice that it is suspending the public comment period that was to end on January 3, 1983, and cancelling the public hearing that was scheduled to be held on December 27, 1982, in Tulsa, Oklahoma.

DATE: This cancellation is effective December 28, 1982.

ADDRESSES: See "Supplementary Information" below for locations where copies of Oklahoma's withdrawal request is available for public inspection and copying.

FOR FURTHER INFORMATION CONTACT: Mr. Robert L. Markey, Director, Oklahoma Field Office, Office of Surface Mining Reclamation and Enforcement, 333 West Fourth Street, Room 3432, Tulsa, Oklahoma 74103, Telephone: (918) 581-7927.

SUPPLEMENTARY INFORMATION:

I. Availability of Copies

Copies of the Oklahoma Department of Mines' withdrawal request is available for review and copying at the OSM offices and the office of the state regulatory listed below, Monday through Friday, 8:00 a.m., to 4:00 p.m., excluding holidays:

Office of Surface Mining Reclamation and Enforcement, Room 5315, 1100 L Street NW., Washington, DC 20240

Office of Surface Mining Reclamation and Enforcement, 333 West Fourth Street, Room 3432, Tulsa, Oklahoma 74103

Oklahoma Department of Mines, 4040 North Lincoln Boulevard, Suite 107, Oklahoma City, Oklahoma 73105

II. Details of the Cancellation of the Public Comment Period and Hearing

On November 9, 1982, OSM received a revised set of Rules of Practice and Procedure from the Oklahoma Department of Mines. See OK-436. The Rules of Practice and Procedure were submitted as a formal state program amendment and were intended to meet the requirements of condition 30 CFR 936.11(b) of the Secretary's approval of the Oklahoma program. That condition requires Oklahoma to amend its Rules of Practice for hearings to make the public participation aspects of those rules no less effective than the public participation aspects of SMCRA, 30 CFR Chapter VII and 43 CFR Part 4.

OSM announced receipt of Oklahoma's proposed program amendment in the **Federal Register** on December 3, 1982, at 47 FR 54473-54474. The notice stated that the public hearing would be held, if requested, in Tulsa, Oklahoma on December 27, 1982, and that the comment period would close on January 3, 1983.

On December 20, 1982, OSM received a letter from Mr. Blaney Qualls, Director and Deputy Chief Mine Inspector of the Oklahoma Department of Mines. See OK-437. Mr. Qualls requested that the November 9, 1982, submission of Rules of Practice and Procedure be withdrawn from further consideration because those rules had not been adopted under the permanent rulemaking procedures of Oklahoma and to do so would require review by the Oklahoma Legislature during its 1983 session. Mr. Qualls also stated that the Department of Mines had made several revisions to the Rules of Practice and Procedure subsequent to the date when those rules were submitted to OSM as a State program amendment. The Department of Mines Director also indicated that he expects Oklahoma will promulgate permanent Rules of Practice and Procedure on or after February 3, 1983, unless the rules are disapproved by the Legislature.

OSM has decided to honor Oklahoma's request. For this reason, this notice has been issued to inform the public about the circumstances of Oklahoma's withdrawal request and to indicate that the public hearing and comment period have been cancelled. However, OSM will forward to Oklahoma copies of all comments received during the cancelled comment period for the State's consideration in redrafting its rules.

OSM notes that Oklahoma has until May 15, 1983, to meet the requirements of condition 30 CFR 936.11(6).

Dated: December 22, 1982.

Wm. B. Schmidt,

Assistant Director, Program Operations and Inspection.
